SUICIDAL UNION TACTICS.

The state of things which has lately prevailed at Cripple Creek, the great Colorado mining camp, gives an inkling of what may easily become more general if the present foolish tactics of the trades-union leaders continue. There, in the desire not only to discourage non-union labor, but ruthlessly to root it out, some person or persons unknown, but no doubt actuated by unionist sympathies, caused an explosion of dynamite, which killed several free workmen. This showed that the Western Federation of Miners was engaged not merely in a labor contest of the ordinary kind, but in a war of extermination against unattached labor. Even if its leaders were not the direct actuating cause of the crime, such men should not be allowed to hold the sway they do at present, for it shows that they are incapable of true leadership, and not strong enough to prevent some of the men under their orders from committing the most diabolical excesses.

The reply to this particular unionist feat was a cry of execration, not only from the non-unionists, but from the general public, with a swift determination to suffer no longer such a reign of terror as had already begun. The unionists had committed crimes in order to exterminate their competitors. Very well, the anti-unionists would exterminate, too; they would keep clear of crime, but would stretch the law to its very fullest extent, perhaps even go a step beyond. And this, aided by a slowly-moving Government, they have done, the result being that now only non-union labor is employed at this camp, the other being deported. It is a very regrettable state of things to exist in a civilized country; but can it be denied that it is a logical issue to present-day conflicts of unionist versus free workmen? The unionists are killing themselves with their own methods.

◆

THE AUDITOR-GENERAL.

The Auditor-General of Canada, Mr. J. L. McDougall, has resigned his office, and speculation is rife as to whether his resignation is to be accepted. The reason of this resignation is stated to be that he has not received the support he expected in certain important decisions which he felt called upon to make. And he feels himself, therefore, in a false position. It may be pointed out that the office of the Auditor-General is a peculiar one. He is the servant of the Parliament of Canada, not of the Government of the day only. It is his province to see that the money of the country is honestly spent; and if he discovers any transactions that are not justified by statute or by authority of Parliament it is in the line of his duty to refuse sanction to them.

This is not the first time that the Auditor-General has had a difference with Parliament upon matters where he felt constrained by a sense of duty. In Sir John Macdonald's time he held out strongly with respect to some transactions he did not think justified. And Sir John defended the Auditor's point of view against the clamors of party. Mr. McDougall is not a compliant man; he is firm to a fault. The writer well remembers the description given of him when, during the term of Alexander Mackenzie's Government, he was proposed for the auditorship. It was this—and the man who so described him was a fellow Highlandman and a strong Liberal: "He is stubborn, and he is cranky, but he has brains; you can't fool him, and you can't scare him." It has always seemed to us that these last were valuable qualifications for an official upon whom so much depends. Granted that he is cranky, as people have often found him, and that he has a Highlandman's hot temper; these failings are outweighed by honesty, capacity, and sturdiness in the maintenance of right.

We observe with regret, therefore, a disposition on the part of some journalists to throw mud at this watch-dog of the treasury, to impugn his motives, and to hint doubts of his sincerity. The view he takes of the Davis lighting contract as one which is unduly costly to the country has not been successfully controverted, and so old and faithful a servant of Canada deserves consideration and support rather than slighting treatment. When the terms of his letter of resignation are made known it will be seen what truth there is in the suggestion that he is trying to compel a retiring allowance which is not due. Any mere party view of his attitude is beside the mark. Whether to let this official go or to retain him is not a party question. Whatever political party is in power, the Parliament of Canada should strengthen the hands of an honest servant of the country. And slurs thrown at a man like Mr. McDougall who is standing up for what he believes to be his duty, are not only ill-timed, but unseemly. We trust to hear that his resignation is not accepted.

BRITISH COLUMBIA MINERAL PRODUCTION.

The total value of the mineral production of British Columbia last year was $17,495,954, or an increase over the preceding year of only $9,404. This bald statement is somewhat disappointing, but there are facts of an explanatory nature to be taken into consideration. Chief among these, perhaps, is that so many of the companies have been or are engaged in installing machinery and other improvements, which have delayed the work of production, but which, when fully in operation, will place it on a much more economical footing, and more than make up for present losses. Strikes were accountable, too, in the earlier portion of the year for a considerable diminution. The whole business of mining, however, in the Province of British Columbia seems to be getting based upon a more secure foundation, and this is gradually leading to an elimination of enterprises not founded upon substantial merit, such as, in the past, have cast doubt upon even legitimate undertakings. The following table will show in brief form the production for the years 1902-1903:

	1902.		1903.	
	Quantity.	Value.	Quantity.	Value.
Gold, placer, oz..	53,657	$1,073,140	53,021	$1,060,420
Gold, lode, oz. ..	236,491	4,888,269	232,831	4,812,616
Silver, oz.	3,917,917	1,941,328	2,996,204	1,521,472
Copper, lbs.	29,636,057	3,446,673	34,359,921	4,547,535
Lead, lbs.	22,536,381	824,832	18,089,283	689,744
Coal (long tons)	1,397,394	4,192,182	1,168,194	3,504,582
Coke (long tons)	128,015	640,075	165,543	827,715
Other materials ..	....	480,051	....	531,870
		$17,486,550		$17,495,954

In coal, the Crow's Nest mines showed a substantial increase last year, but the Coast collieries showed a decrease, which was more than equivalent. The output in both districts was interfered with by labor troubles, while in the latter there was a change in ownership and a subsequent important alteration in plans. Placer gold mining did not show any great change, taking the Province as a whole. In the northern sections there was an increase, but in the central a decrease. The Cariboo and Lower Fraser River valley experienced adverse weather conditions. In lode mine ore there was an increase over 1902 of 287,000 tons, or 27 per cent. This increase was shared in by the Rossland, Boundary and Coast districts. On many properties improved methods have rendered low-grade ores workable.

In Rossland section the ore mined amounted to 360,786 tons, or an increase of more than nine per cent., but the metallic contents showed scarcely an equivalent increase, the average grade of ore mined being lower than before. This seems to be the experience of most of the chief mining districts in the world—the transition from the occurrence of high-grade bonanza ore bodies, capable of profit under expensive methods of smelting, to masses of lower grade requiring milling treatment.

Of the total output of silver, amounting to 2,996,204 ounces, valued at $1,521,472, nearly three-fourths was found associated with lead, which makes the treatment, the production and value received for the latter an important problem in British Columbia mining economics. For the past two years this industry has been at a low ebb, and recently the Dominion Government passed an Act providing for the payment of lead bounties, which has given a decided impulse to the Kootenay District, where the silver-lead mines largely lie. The copper production of the Province last year showed up very well, being larger than ever before, but the ores could not be profitably worked, as a rule, were it not for their values in gold and silver. As to other minerals, while their existence in the Province is a fact, such as iron, zinc, platinum, etc., their output was too small to be of much account. Oil-bearing shales, too, have been discovered in the Cariboo district.

THE LUMBER TRADE.

While there has been no general cut in the prices of lumber, yet several lines are being sold at prices distinctly lower than those held early this spring. And where prices keep stiff it is quite frequently the case that little business is being done at those figures. There is a distinctly easier market, though to what it is directly due would be difficult to say. Primarily, of course, it is a consequence of the partial cessation of the demand for building, and some attribute this, not so much to the high cost of materials, but to the reaction, which has not even yet spent itself, from the stock speculation of a year or so ago. There can be little doubt but that a considerable amount of money with which it was the original intention to build residences, enlarge premises, etc., in Toronto and other Canadian cities was swallowed up in the "boom" at that time, and now a waiting, retrenching period is in order. Apart from the above, the trade may be said to be in a satisfactory condition, but without any very notable feature to report. The following is a summary of the conditions in Great Britain, from Farnworth & Jardine's (Liverpool) circular:

> The arrivals from British North America during the past month have been 13,849 tons register, against 7,415 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1902, 1903, and 1904 has been 137,121, 126,475, and 131,783 tons respectively. The business during the past month has been inactive, and buyers are disposed to act with caution; the arrivals have not been excessive, but the demand generally is very quiet, and stocks are ample; the deliveries have been fair, but have been assisted by unreserved auction sales of various stocks; values generally are weaker. With regard to Canadian woods: of waney the arrivals have been moderate, the deliveries fair, but the demand is quiet, and stocks are sufficient; values are firm; second class is only in limited request. The arrivals of square pine have been small, but there is no improvement in the demand, and stocks are ample; values are steady. The stock of red pine, though small, appears sufficient for present requirements. There has been no import of oak logs; the demand has been exceedingly quiet, deliveries disappointing, and the stock is heavy; there is little change in value to report. First class rock elm is in demand, the stock much reduced, and there is a fair opening for early arrivals, values are very high; the arrivals consist chiefly of round logs, which have been more in demand. The demand for ash is very limited. The first direct shipments of pine deals are now coming forward, largely on merchants' account; the deliveries have been fair, but the stock is large; sales are difficult. Red pine deals are dull of sale; prices are easier. New Brunswick and Nova Scotia spruce and pine deals—The arrivals during the past month have been considerably in excess of the corresponding month last year, viz.: 4,840

stds against 2840 stds in 1903, the deliveries have been large, owing partly to forced sales by auction, but generally the demand has been unsatisfactory, and stocks are too large, values are lower. There is no improvement in the demand for pine deals. Birch logs from St. John, etc., and Quebec have arrived more freely, the deliveries have been fair, and stocks are not too large, prices are steady. Planks—The arrivals have been moderate; there has been a good consumption, and the stock is light; values show improvement, but are still low. British Columbian and Oregon pine—There have been no arrivals, the consumption shows improvement, but the stock is too heavy; values are steady.

THE TRUST COMPANY IDEA AND ITS DEVELOPMENT.

THE FUNCTIONS OF A TRUST COMPANY.

(7)

What are the functions of a trust company? A different answer will be given to this question in different countries. The trust company promoter in the United States will say that a trust company can undertake a banking business, the guaranteeing of land titles, the underwriting of stock, and everything and anything of an agency description that will pay. In Australia and in Canada trust companies, as we have seen, have been developed upon different lines; and the manager of a well-conducted company under this name would reply that there are some things which ought not to be done by a company to which the Government grants a charter for the purpose of attending to the interests of its wards, the orphan, the helpless and insane. It must not imperil its capital or its reputation by making investments which are not absolutely sound, or by incurring obligations to the public except in its capacity as trustee; and the invasion of the financial departmental store must be repelled, because the company which is formed to act as executor and trustee ought to be a specialist in its line, and needs protection from the competition of the general agent.

It will be generally conceded that the policy which has been adopted in the British colonies is based upon sound business principles, and is better calculated to inspire public confidence. The foundation of the trust company idea is the failure of the individual trustee. There are few people who cannot recall some instances where a widow, left sole executrix, has been badly advised, and lost all that she had; where the man whom everybody trusted, speculated with the moneys placed in his care, and was unable to make restitution, or where the fortunes of a family have been wrecked by the absconding of a trusted friend. The trust company offers insurance against loss from these sources: and it is as necessary as insurance against fire. To render this insurance effective it is necessary that the trust business of the country should be concentrated in a few companies, and that the whole time and thought of the officials should be devoted to the work. We must not forget that there are important interests at stake. The trust company is entrusted with the most sacred responsibilities. It is the guardian of family secrets; it has in its care the welfare and future of many families; it is the adviser of the helpless and unprotected, and it is the trusted agent of the absentee.

The functions of the professional trustee company are manifold. It acts as executor or joint executor under a will, as administrator by direction of the next of kin, executors or a creditor entitled to administration who wish to renounce their responsibilities, as trustee of marriage and other settlements, as executor, administrator, or trustee in place of persons wishing to give up such positions, as committee of the estates of lunatics, and it undertakes the management of estates as agent or attorney under power for absentees or people who wish to be relieved from the worry and trouble of business. Acting in these capacities, it undertakes the fulfilment of all kinds of contracts, buys and sells real estate, collects rents, interest and dividends, attends to repairs and insurance, pays taxes, and buys and sells all kinds of investments. To maintain the equipment necessary to fulfil these duties better than an individual, and to make it pay, the trust company offers various services to the public. Thus every properly equipped trust company has a safe deposit branch. It will undertake to invest the funds of any person, and guarantee the prompt payment of interest. It can act as liquidator and assignee of insolvent estates. It acts for corporations in arranging amalgamations, as mortgagee for the securing of bonds, and as registrar and transfer agent. It is in a peculiarly advantageous position for undertaking a general real estate agency, and also to act as an appraiser of real estate.

And there is another legitimate and useful field of work for the colonial trust company. The problem of new countries has always been how to safely attract the money that is stored in the old. How is the Old Country investor to collect specific investments for consideration? How is he to be protected from the unscrupulous promoter, from ignorance, incompetence and fraud, from the over-sanguine temperament of the trusted friend? To whom is he to entrust the care of his investments across the seas? In the established and well-managed trust company this medium can be found. It has all the necessary office machinery developed in every department; it has responsible agents and correspondents all over the country; it is in constant touch with the field of investment. It can offer to the investor the advice of an experienced manager and of a board of directors composed of men who know the country, and have been selected for their integrity, knowledge and business capacity, and it is a convenient medium to hold deeds and money in escrow pending the completion of an agreement.

THE ADVANTAGES OFFERED BY TRUST COMPANIES.

(8)

The stock in trade of a trust company is special skill, constant vigilance, permanence, reliability, and, most important of all, good management. The advantages in selecting a well-managed trust company to act as executor and trustee are written in large letters in the literature of every company. The Trust Company does not die. This is a substantial advantage, because trusts frequently last for twenty-five or fifty years. The creator of a trust may select the original trustees with the greatest care, but it is impossible for him to control the selection of their successors. The trust company is always available: it is never ill, and never takes a vacation; its officers are experts in the management of estates; the execution of trusts is their primary concern and not subordinate to other interests, as is sometimes the case with individuals. These officers know how to meet each emergency as it arises, and how to make the best of estates committed to their charge. It is in constant touch through its manager and directors with the financial world, and is constantly on the watch in the interests of its clients to procure new investments and advise when a change of investment is desirable. A trust company cannot abscond. Its clients have the whole capital of the company as security for the faithful performance of its duties, and it keeps a separate account of each trust, so that no trust funds can be imperilled in the possible event of disaster. It has proper vaults for the keeping of securities, and regular departments for every detail of the work to be done. Its advice is wholly disinterested, and as the custodian of family secrets it is as impersonal and secretive as the Egyptian Sphinx. It costs no more to employ a trust company than an individual.

And there are other advantages in employing a trust company which have not been generally advertised. No man cares to be under an obligation to a friend or relative in his life time; still less is he willing to place his family in this position after he is gone. Formerly no other course was open to the man who had property to leave behind him after death; but with the advent of the trust company the necessity for this has disappeared. The trust company is always available as an alternative; and the executor need nowadays feel no compunction in renouncing his position.

To quote from an Australian writer: "It is difficult, indeed, to see how any private individual would willingly accept the position of executor, unless it be the family solicitor, who makes his living out of such work. A man once an executor finds himself always a prisoner, because he is obliged to give much more time and attention to his trust work than to his own business, and the anxiety is unceasing. The danger of mistakes occurring owing to inexperience is considerable, the responsibilities are enormous, and the personal liability never ends. He may perform his duties conscientiously, but he will never be given any thanks for his trouble. On the other hand, he may find himself at loggerheads with the members of his family, and perhaps be involved in law suits and other worries. There is no more fruitful source of discord between relations and friends than is brought about over the administration of wills and trusts."

ERNEST HEATON.

◆

A SUGGESTION.

We have had some evidence that interest has been taken in these papers on the Trust Company Idea, which are completed with the articles published this week; and if we receive sufficient encouragement to warrant the expenditure, it is proposed to republish them in pamphlet form. These papers contain a short and readable history of the growth of the trust company idea throughout the world. The matter has been carefully collected from England, Australia and the United States, as well as Canada, and it seems worth while to republish it in handy form for the purpose of reference. If any of our readers who wish to purchase such a book at a cost not exceeding thirty-five cents will let us know how many copies each requires, their expressed wishes will assist us in determining whether we shall reprint.

THE ASSESSMENT SYSTEM OF LIFE ASSURANCE.

It is some consolation to know that the public is now thoroughly convinced that there is no permanence in the assessment system, and that the craze for starting new societies on that basis is completely at an end. It is many years since a new one has been even proposed to be started, either in the United States or Canada. In some of the neighboring States it has been made illegal even to continue the operation of those already apparently well established. In Canada, the increase of the monthly rates is a burning question at every annual gathering, and every member now acknowledges the need of a reserve fund; also the wisdom of an increase in the rates, at some early date, with which to provide for that fund, as well as to meet the ever-growing death claims.

The great delusion under which the leaders of those societies have labored has been the idea that money was to be made by the lapsing of certificates, thus relieving the society from having to pay the death claims of those who thus dropped out. They now find that it is the healthiest and youngest and best of the membership who thus depart, and that the sickly and the aged are holding on, and that hence there is an immense indebtedness already accumulated in the liability to heavier death claims, without any proper provision having been made for them while the society was young and strong. That error was a fatal one, and can never now be redeemed or overcome, for the reason that the new blood can never again be induced to come along from the outside public in such volume as formerly. The former seven millions and five millions rush has dropped to about three millions in the A.O.U.W., and even this at a heavy cost for quite a little army of organizers at work all over Canada. And even the Independent Order of Foresters, with a pretended surplus above its fellows (which is really no surplus above its heavy liabilities) is now reduced to the necessity of getting up expensive spectacular demonstrations in honor of their distinguished elderly Supreme Chief Ranger. In this way it seems easy to capture a crowd of entrants under special dispensations and liberal disbursements to prize-winning pushers. But "easy come, easy go."

With all the eclat the new plan gives, and with the whole civilized world to roam over for recruits, the membership of the I.O.F. grows but slowly. Out of $78,393,500 of new certificates put on the past three years there has been an increase made in the total in force during the three years of only $31,560,500. This shows a very heavy receding wave in operation over the whole field; and, like the A.O.U.W., the new recruits to the I.O.F. who can now be induced to enter the Order make a small show in volume of insurance compared with former years. The following are the figures for the past three years compared with three former years:

	In Former Years.		In Recent Years.	Falling off.
1896 ...	$28,858,000	1901..	$23,871,000	$ 4,987,000
1897 ...	35,224,500	1902..	24,509,500	10,715,000
1898 ...	36,271,500	1903..	30,013,000	6,258,500
Total diminution of in-rush........				$21,960.500

But the amount of death claims do not run in that direction by long odds. The following statement shows how greatly they have increased in recent years, taking the same years as above, viz.:

	Former three years.	Latest three years.	Growth in amount.
In 1896	$ 820,942	$1,730,921	$ 919,979
In 1897	902,226	1,755,411	853,185
In 1898	1,176,015	1,857,598	681,583
Total increase in recent three years..			$2,454,747

It should not be difficult to understand that if these two occurrences continue to actively operate in the future, as they are pretty sure to do, there must supervene before very long the same state of stagnation as has struck the A.O.U.W., and has, later on, been the death of so many of their predecessors.

THE A.O.U.W. FADING AWAY.

Both in the United States and in Canada the Ancient Order of United Workmen are having a serious time of it. The ordinary assessment rate which the Order have been using, both there and here, independent of each other, is proving inadequate to meet the increasing death losses. In both jurisdictions extra calls have had to be made far beyond anything known heretofore. The natural result is that a state of stagnation has come over the larger body and the smaller branch alike.

In the United States, instead of the $110,019,000 of new certificates written in 1902, only $92,695,000 was issued in 1903. And instead of these sums making a handsome addition to the total insurance in force, the contrary result was experienced. Instead of $772,314,000, with which 1901 closed, the year 1902 showed a slight increase to $799,039,000, but the year 1903 scored a startling decrease to $746,928,000 for all the different grand lodge jurisdictions in that country. And this despite the $202,714,000 of new certificates put on during the two years. The death losses in 1903 were $11,320,112, as compared with $9,083,454 five years previously, being an increase of $2,236,658, with no real increase in the average insurance in force.

In Canada the experience has been very similar, but on a smaller scale. The membership in Canada is much younger than on the other side of the line, and hence the "old age" infirmity has not struck the Order so very seriously here as it has there. Nevertheless, extra assessments are being made, and heavy lapses on the part of the middle-aged and the younger members have set in, and the usual unfortunate end of such foolish enterprises is coming rapidly nearer. At the close of 1903 the membership was reported as being 46,125. Since that date a large amount of new blood has come in from week to week. But at the close of May, 1904, with nearly half the year gone by, the 46,125 have dwindled to 42,910, according to the statement of paying members in the last issue of the Canadian Workman.

In 1901 the new certificates issued amounted to $5,146,000, and a few years earlier they ran above $7,000,000 on several occasions. But last year the amount dwindled to $3,715,000, or about one-half the former figures. And so heavy have the lapses and deaths become that the increase to the amount of certificates in force was only the trifle of $188,000 during 1903.

But while the total certificates in force have thus become stationary, and are this year diminishing every month, not so the death claims. These threaten to tax the membership most alarmingly. The following is the record for the past three months as compared with the corresponding three months of the previous year:

	March.	April.	May.
Death claims in 1904.	$102,200	$111,500	$89,000
Death claims in 1903.	51,300	81,800	65,000
Increase in 1904.	$ 50,900	$ 29,700	$14,000

The three increases put together make $94,600 of excess to be met by the two extra assessments which have been levied since the first of the year. After getting in the proceeds of the first extra assessment, the shortage was reported, a month ago, at $54,557.78. And now, at the close of the May accounts, the Grand Recorder publishes the following statement as a reason why another call is so soon made upon the "dear brethren," viz.:

Balance on hand...........	$24,528 91	
Balance due on extra assessment	1,000 00	
Estimated collections, Assessment No. 6.........	71,000 00	
		$ 96,528 94
Delayed claims	$17,000 00	
Unpaid claims (proofs).....	99,500 00	
Reported claims (no proofs).	50,000 00	
		166,500 00
Short		$ 69,971 06

The Order has been accumulating a small reserve fund for a few years past. It now amounts to $415,045.62, and when it amounts to half a million the promise is that the interest upon it will be used to help pay excessive death claims. But the interest at 5 per cent. per annum on so small a sum would only be $25,000, whereas the excess outgo upon March last alone was over $50,000, and for March, April and May it was $94,600 above the same months of 1903. How terribly inadequate, therefore, is such a small sum as $500,000 at the back of $71,061,500 of insurance liability! It amounts at present to less than $6 per $1,000 at risk. An old line company with $75,862,148 at risk deems it proper to have a fund on hand of not $500,000, but (in the case of the Canada Life) of $27,180,007. This amount is only a little short of $400 for each $1,000 at risk, but includes provision for very many older members, as well as for endowments rapidly coming to maturity. Still, it shows how weak is the assessment society, operating from hand to mouth, as it were, compared with the regular companies, all of which make full and adequate provision for every liability as they go along, year by year.

TARIFF ANNOUNCEMENT.

Hon. Mr. Fielding, Minister of Finance, made an announcement in the House this week, which will do much to appease the anxiety of dry goods importers (referred to last week), to the effect that in the case of goods actually ordered before the date of the budget, and provided that they be entered in this country by August 31st next, they shall be admitted under the old rate of duty, and the new schedule shall apply only to cases in which the goods have not been ordered. This course was rendered advisable, explains the Minister, because in some lines, notably woolen goods, large quantities were sold in advance at fixed prices on the basis of existing duties. In some cases the goods were on the way and could not be cancelled.

Another proviso announced is in respect to what is known as the dumping clause. Its intention is to make a temporary exemption in cases where the goods referred to are not manufactured in Canada in large quantities and in open competition. It would be possible that an article might be made in Canada to a very small extent, or it would perhaps be in the hands of some one producer and not open to the trade. It is felt by the Government that if such a condition should arise, it might not be a proper case for the application of the dumping clause. The amendment will therefore provide that the Minister of Customs may, in his regulations, temporarily exempt from the operation of the special duty—or the dumping clause—articles of a class which are not made in Canada in a substantially large quantity, and open to sale on even terms to all applicants. Though an article may be made in Canada ordinarily, exceptional circumstances may arise, such as a strike, which would stop the manufacture in Canada, and in that case the Minister of Customs ought to have some discretion to meet a condition which might arise. This is the object of the amendment.

HAMILTON BOARD OF TRADE.

A meeting of the Hamilton Board of Trade was held on Monday last for the purpose of making nominations for the annual election which takes place on Monday next. The result of the nomination was: President, Mr. C. A. Birge; vice-president, Mr. J. W. Lamoreaux; councillors, Capt. J. B. Fairgrieve, John Proctor, William Hendrie, J. Turnbull, Alex. Turner, W. A. Robinson, and F. H. Whitton; secretary-treasurer, Mr. Charles Stiff; board of arbitration, J. M. Young, George Hope, R. T. Steele, and John Milne; board of conciliation, George Sweet, John Milne, George Hope, Seneca Jones, J. W. Ross, H. N. Kittson, and W. A. Robinson.

LIFE ASSURANCE UP-TO-DATE.

Some months ago we referred to the proposed operations in our midst of the Monarch Life Assurance Co., which we believe still has a bill before Parliament. The "advantages" of the stock of this company were declared in its prospectus to be "very great and numerous." The company was "destined to meet with unparalleled success by reason of plans which are original and up-to-date," and so on. It was to have "a Copyrighted Gold Bond System by which the insured will reap benefit as well as his heirs." The gentleman who owns these copyrighted plans, Mr. T. Marshall Ostrom, displayed quite an alluring prospect, and assured his readers that his special methods were about to accomplish what no other Canadian life company could do.

Again, some two or three weeks ago, we hear of the advent, in Winnipeg, of a similar scheme, with "special contracts," "special advisers," special chances to those "on the ground floor of an up-to-date life insurance scheme." This sounds to us very like the same concern offering to the enthusiastic Western man, who is always looking for something novel and promising, a chance to get ahead of somebody and to get some life insurance very cheap. Or may be it is the Indiana plan, with a good deal that is special in it, which has been taken hold of in that State with avidity, but at which our more cautious life assurance men look askance as something too good to last.

We are told that these very plans, now advertised by Mr. Ostrom, or something almost identical with them, have been essayed by the Southern Mutual Insurance Company, of Louisville or Lexington, Kentucky, and that they are not approved by the sound life companies of the United States, any more than they are by the sound life companies of Canada. However high its "destiny," however brilliant its so-called advantages, of a "gold-bond-endowment-system comprising fifteen plans" with a house-building attachment, we prefer to believe that methods of life assurance, which are frowned upon by the oldest and best life companies on this continent, are not the proper sort for the Canadian people.

LIFE ASSURANCE CO. PARAGRAPHS.

At what has been described as the finest hotel in the Thousand Islands of the St. Lawrence, the annual banquet of the North American Life agents was held on the evening of 24th June. There were agents present from New York State and Michigan, as well as from Canada. About eighty sat down to a repast in the Frontenac, and after the health of the King of Great Britain and the President of the United States had been drunk, various other toasts followed, but the speakers were limited to five minutes each, and thus a good many were heard. It may be remembered that the North American Life banquet was held last year at the Chateau Frontenac, Quebec, and by a vote it was decided that Mr. W. J. Fair, the popular eastern manager of the company, had carried the convention, hence Kingston and the Thousand Islands were selected for 1904. The party left the Frontenac by their steam yacht for Kingston. The gathering was an enthusiastic and successful one. The prize for the agent securing the largest amount of paid-for business for the first five months of the year, a handsome gold locket, was awarded to Mr. G. H. Simpson, manager for Montreal, and that for the manager having the largest number of agents entitled to attend, went to Mr. L. A. Wilson, Syracuse, manager for New York State, and was a handsome black leather Gladstone travelling bag.

FIRE INSURANCE MATTERS.

A by-law to provide waterworks for Grimsby, Ont., carried on Monday last by a majority of 62 votes. Engineer Shipman, of Toronto, estimated the cost at $34,000 for a first-class system.

An inspection of the Toronto water pressure and of the city fire apparatus is being made this week by Inspector Howe, of the Canadian Fire Underwriters' Association. He has already visited the Lombard, Berkeley, Bolton, Wilton, Rose Avenue, Yorkville and Yonge Street fire stations, where water tests were made. In each case three 250-foot lays of hose were attached from two hydrants. On the whole, the pressure was found to be satisfactory.

A part of Newfoundland has suffered from forest fires. Last Saturday's news from the Island stated that extensive forest fires were raging on the west coast, especially near Bay of Islands, or Birchy Head. The woods took fire somehow and spread to a settler's house, coming gradually closer to the town. The Bank of Montreal building, the Star newspaper office, and railway station stood in great danger for some hours, and only after constant exertion and from the fact that a copious rainfall began at 5 o'clock were they saved.

It is stated by the Insurance Record, of London, Eng., that an extraordinary general court of the Atlas Assurance Company was held on 7th June. Mr. J. P. Currie presided, and stated that the meeting had been called for the purpose of making certain changes in the laws and regulations of the company concerning its capital. The directors had decided to recommend the proprietors to split up each £50 share of the company into five £10 shares. This recommendation had been resolved upon, upon two grounds—first, in order to afford a convenient method of carrying out an agreement for the acquirement of the Manchester Fire Assurance Company, and, secondly, because it was thought that the property of the company would be improved in value by making the shares of a smaller denomination than that of £50. The directors were in every way satisfied that the Manchester Company was a valuable acquisition, and capable of development. The resolutions dealing with the proposed alterations were carried unanimously.

On Monday morning, 27th June the fire brigade of Victoria, B.C., after a hard fight, put out a fire in the Driard Hotel, which several times threatened to get beyond control. The damage was confined to the basement and first floor, and will total probably $20,000. The loss is fully covered by insurance.

◆

HAMILTON AND PETERBORO.

It would offend the residents of these places, in Ontario, if one should say there is a "boom" in either. And we have no desire to accuse them of possessing such a doubtful good at the present time. Far better is it to chronicle steady activity and growth, and we believe this is characteristic of both. What leads us to couple the names of the two places as we do is hearing, on Wednesday last, persons from these prosperous cities telling what is going on in each.

"We shall have in the Deering agricultural works, when completed," said the Hamilton man, "a factory employing the largest number of hands of any in Canada. And the Westinghouse Canadian works, situate also in Hamilton, will be a close second." The Peterboro resident demurred to this claim for Hamilton, and insisted that the American Cereal Company's Plant, at Peterboro, now employed, or would presently employ, more hands than any other concern in the Dominion, and the Canadian General Electric Works will be a good second. Neither of them appeared to take any account of such places as Montreal or Toronto in this particular industrial competition.

Meeting a well-informed resident of Hamilton the same afternoon, a question put to him elicited the reply that not less than ten thousand has been added to the population of Hamilton during the last twelve months. And as to commercial activity, where the sales of postage stamps at that city during the last year of the three-cent rate of letter postage had been $70,000, they are in the latest fiscal year, since the adoption of the two-cent rate, $120,000. A very good test, this, of the increase in mail matter at a decreased rate of revenue. The pay-roll of the Deering works for a recent spring month showed 1,380 names, and when the buildings are all up and the works running full force, the number is expected to approach 3,000. Difficulty is experienced in obtaining house-room for the incoming wage-earners, for there is not, it seems, a vacant dwelling in Hamilton. Several different syndicates of house-builders are now petitioning for the laying out of parts of the city near the Bay for small dwellings or terraces of dwellings at the foot of Wellington street and thereabout. Hamilton has for years been an important industrial and commercial centre, and it is very pleasing to hear of its prosperity and growth.

◆

FOR GROCERS AND PROVISION DEALERS.

The Armour Packing Company, of Chicago, is said to be about to set up a plant in Toronto for the manufacture of extract of beef.

The directors of the Canada Grocers, Limited, have been empowered to acquire, on behalf of the company, such amount of the preference stock as they may see fit, and to cancel the stock so purchased or acquired, and to reduce pro rata, according to the amount of stock so cancelled any reserve set apart in respect of such preference stock so cancelled.

A report recently received from London stated that a spirit of timidity still lingered among buyers of Canadian cheese, even at the low prices. Prices for new were 40s. to 41s. per cwt., and for old 43s. to 46s. Canadian butter was not being enquired for to any extent, but the supplies to hand were too small to interest purchasers greatly. With large arrivals of full-grass, fresh-made butter, a better demand was anticipated.

According to the Cincinnati Price Current, the movement of hogs in the West has fallen off a little. The total packing for the week was 460,000, compared with 490,000 each for the two preceding weeks. For the corresponding time last year the number was 510,000, and two years ago, 395,000. From March 1st the total is 6,785,000, against 6,360,000 a year ago—an increase of 425,000. Reports indicate fair to good quality. Prices are higher, prominent markets at the close indicating a general average of about $5.15 per 100 lbs., compared with $4.90 a week ago, $4.75 two weeks ago, $5.80 a year ago, $7.45 two years ago, and $6 three years ago.

◆

BANKING AND FINANCIAL.

The amount received by the Ontario Government in the form of succession duties, between March 15th and June 15th, this year, was $224,188, compared with $57,159 in the same period of last year.

It is proposed in Great Britain to hold a Colonial and Indian Exhibition at the Crystal Palace next year. It is eighteen years since such an exhibition, on a large scale, was held, and seeing the marvellous growth of Canada and some of the other colonies since that time, it is considered that another now would result in great benefits to the whole Empire.

A few weeks ago a Wall Street bank clerk celebrated the completion of the fiftieth year of his service in the employ of a single bank, and the papers singled it out as a matter of note that an American had been content to serve one master for fifty years. And it was a matter of note. We printed some little time ago a striking little article on "Americans as Quitters." Those were men of brains and energy, who quit when their job was done, in order to go higher up and do a better job, better still. But most of us are more fitted to clerk it than to organize, and what is energy in abler men is often just plain restlessness among the rank and file. To serve one master well for fifty years is an achievement. It ought to be made distinctively an American one.—Leslie's Monthly.

◆

FOR DRY GOODS DEALERS.

The Canadian Colored Cotton Company, Montreal, have appointed Mr. S. Greenwood manager of the mills at Cornwall in place of Mr. C. D. Owen, who resigned recently.

The General Artificial Silk Company, a corporation with a Delaware charter, has been authorized to carry on trade and manufacturing in Ontario, with a capital not exceeding $40,000.

The W. R. Brock Company, Limited, have elected Mr. B. B. Cronyn vice-president of the company, in lieu of the late Thos. J. Jermyn. Messrs. Jas. A. Catto and J. S. Anderson were elected directors.

It is stated that several of the big cotton mills will close down for a couple of weeks next week. The reasons given are the high price of raw cotton, the wish to instal improved machinery, and the large importation of cotton goods from Great Britain under the preferential tariff.

Some years ago a law was passed in England requiring imported goods to be marked "Made in France," "Made in Germany," etc. As many of these goods are of excellent quality, it has been found that the law actually benefits the foreign makers, and an effort is accordingly being made to have it changed so that goods from the continent shall have merely a label marking them as "Imported."

One does not need to go to the St. Louis Exposition. One can see it and read about it in the fifty pages the Dry Goods Economist has devoted to that city and Fair in its issue of 18th June, which is a marvel. The issue consists of four hundred pages. Portions describe the retail trade of New York, Boston, Philadelphia, Baltimore, Cleveland, Chicago, the South, and other portions give, in more than usual degree, information about dry goods conditions in all parts of the world. Some of the page advertisements are wonderfully good. The whole issue, illustrated profusely, is described as "having especial reference to the Louisiana Purchase Exhibition."

PUBLISHERS: THE MONETARY TIMES PRINTING CO. OF CANADA, LIMITED

ROBT. J. CHRISTIE, President THOS. ROBERTSON, Vice-President JAS. HEDLEY, Editor
EDGAR A. WILLS, Sec'y-Treas. JAS. J. SALMOND, Advertising Representative

Office: 62 Church Street, Toronto, Canada.

TORONTO, CANADA, JULY 1, 1904.

The Nova Scotia Woolen Mills, Limited, held their first annual meeting in New Glasgow on the 20th inst., when the following officers were elected: President, H. M. Fitzpatrick; vice-president, A. F. McCulloch; other directors, George E. Munro, H. B. McCulloch, J. C. Redmond, Dr. F. W. Wright and D. McIvor. A. J. Chisholm was appointed secretary-treasurer.

A despatch from Lethbridge, Alberta, says that officers of the Alberta Wool Growers' Association have held a conference with representatives of some of the large manufacturers in the East, and that they sold the wool for $14.10 per hundred, a higher price than has been paid for some years past. It is expected, says the despatch, that the total clip will reach 250,000 pounds.

Many Montreal wholesale houses have decided to remain closed to-morrow, coming as it does between Dominion Day and Sunday. The following wholesale dry goods and millinery houses have agreed, we understand, to close their houses: W. R. Brock Company (Limited), McIntyre, Son & Co., Limited, A. McDougall & Co., Hermann H. Wolff & Co., Caverhill & Kissock, Debenham, Caldecott & Co., J. P. A. Des Troismaisons & Co., Chaleyer & Orkin, G. Goulding & Sons, S. F. McKinnon & Company, Limited, p. pro. Finley, Smith & Co., Gault Brothers Co., Limited, George H. Hees, Son & Co., Limited, Greenshields, Limited, John Fisher, Son & Co., Brophy, Cains & Co., A. Bradshaw, & Son, The Bagley & Wright Manufacturing Co., William Agnew & Co., Fitzgibbon, Schafheitlin & Co.

A Bradford, (Eng), report says that the tone of the market there continues exceedingly firm, and any change that occurs in wool values is always in an upward direction. But as there is great hesitancy displayed both here and abroad about following values to the highest point, the turnover in raw material is not large. In pure merino the market continues to be unusually bare of stocks both of raw wool and in the combed form of tops, so that, as spinners have been only buying to supply their immediate requirements, any increased demand would have an immediate effect on the quotations of top makers. There are indications that some improvement in the demand for merino may set in, as in both ladies' and men's wear the tendency of fashion appears to be in the direction of finer wool fabrics. With regard to dress goods, in spite of most unfavorable weather, we have now had two summer seasons in which goods of unusually light texture have been very largely worn. These fine light wool fabrics can only be made from the best quality of merino, so that, as there is no indication of a change in the public taste for light fabrics, this wool certainly should receive a stimulus.—Drapers' Record.

The New York Dry Goods Economist says that silk manufacturers have displayed considerable interest in the market during the last few days and have placed some fair-sized contracts for forward delivery. They now have a fairly definite idea regarding prices of new silk, and are influenced to operate by the fact that cocoon prices display an advancing tendency. The fact that raw silk, and particularly European, is obtainable at about the lowest prices on record in recent years, also influences more liberal anticipatory buying. European cocoon markets opened this week at prices fully 30 per cent. below those ruling a year ago, but under the stimulus of active buying they steadily recovered a large part of this loss, and closed at an advance of about 11 per cent. Cocoons that sold at 2.70 francs at the opening closed firm at 3 francs. At the latter price there is little profit for reelers as long as raw silk remains as low as at present, and they are holding firmly for higher figures. Sales of Italians have been made on a basis of 42 lire for Classical, as compared with 54 lire last year.

◆

DOMINION COAL COMPANY—WHY IT PASSED DIVIDEND.

The following letter was issued on Monday last to holders of common stock in the Dominion Coal Company:

Your directors beg to report that the net earnings for the six months ending June 30th, 1904, as actually ascertained for the first five months and estimated from June, have been disappointing.

A heavy decrease in earnings occurred during the operation of the first four months, and was attributed to bad weather conditions, which seriously interfered with the operation of the mines and with the transportation of our coal.

These bad physical conditions, together with higher operating expenses, largely increased the cost of mining.

The earnings for May and the estimated earnings for June are satisfactory and equal to those of last year, but even with these results, the net earnings for the six months ending June 30th, after providing for the fixed charges, preferred stock dividend, general interest and sinking fund, are not sufficient to warrant any dividend being declared at this time on the common stock. Your directors, for the above reason, and taking into consideration the floating debt of the company, conclude that the most prudent course is to defer action on the dividend on the common stock until after the close of the present year, when the full accounts for that period will be presented.

It is hoped that the shareholders will consider this action as conserving the best future interests of the company, and as being the only proper course which the board of directors under the circumstances could adopt.

The property is in first-class condition, its output at present the largest in its history, and it possesses a large and increasing earning power. Your directors aim to place the company on a sound financial basis, and have every confidence in its future.

By order of the board,

J. MACKAY, Secretary.

◆

—An enquiry comes to us from the Musée Commerciale et Agricole, of Lille, France, as to the opening presented to this country for the sale of French woolen yarns, combing wools, woolen wastes, etc. So far as our observation goes, the promise is not bright for the development of such a business, particularly under the very high prices which have prevailed for some months past for Continental wool.

◆

—The report of the Manitoba and North-West Grain Dealers' Association as to grain acreage in that Province was issued at Winnipeg last week. It estimates the area under wheat in Western Canada this year at 3,420,411 acres, an increase of 9½ per cent., as compared with last year. The yield in 1903, under unfavorable conditions, was about 53,000,000 bushels. If the same conditions prevailed this year, the indicated yield would be 58,035,000 bushels. If, however, the production per acre be placed at 20 bushels—a moderate estimate—the aggregate yield would be 68,408,220 bushels this year.

◆

—A letter from Rossland, B.C., under date 24th June, speaks hopefully of the condition and prospects of that camp. It says: "Everything was going along in fine shape here until the Le Roi muddle occurred and caused a setback, but we are gradually recovering, and this neighborhood will ultimately astonish the world with its output of low grade ores. It is really too bad that a mine like the Le Roi, which has produced more than a million tons of ore, on which the profits should have been $5,000,000, should not be helping to make Canadian mining investments attractive. However, this and other mines here have long lives before them, and there are endless quantities of ore for concentration by a process, which is now an undoubted success."

EDMONTON, ALBERTA

As immigration pours into our North West, such well-placed towns as Edmonton, on the river Saskatchewan, are sure to benefit. Indeed, the growth of Edmonton has already been marked, for it contains between 6,000 and 7,000 people. For nearly a hundred years after a trading-post was established there in, say, 1784, the place scarcely grew. Although known to Manitobans and to other dwellers of the plains as the centre of an extensive and especially rich district of pasturing and arable land, the outside world knew or cared little about it, and, although its growth was slow, it had begun. In 1897 or thereabout, however, the Calgary and Edmonton railway made the town easy of access, farmers and ranchers took up land along the railway or near it, and the town began to fill up. In September, 1903, when the writer saw Edmonton, a land boom was in progress, and $200 to $300 per foot front was being paid for building lots on the main street.

The coal deposits in and around the town will prove of enormous value to the surrounding country, and must promote the growth of manufacture in the town itself. Already there are brickyards and lumber industries established; a great trade in furs is being done, and it is stated that a linen factory, 110 feet by 400 feet, is shortly to be put in operation to use the flax which is cultivated thereabout. Building is going on actively, the structures erected in the town last year are of an estimated value of $2,500,000 to $3,000,000, and during the present year by the look of things this figure will be much exceeded. A street railway

Wood-Working Machinery.

The line of wood working Machines made by the The Goldie & McCulloch Co., Limited, Galt, is in great demand. This firm builds an extensive range suitable for almost any kind of wood-working establishments. The machines are all very heavy and made to stand hard and continuous work. Send for Catalog. Address

The Goldie & McCulloch Co. Limited,
GALT, Ont., Can.

We Make— Wheelock Engines, Ideal High Speed Engines, Gas and Gasoline Engines, Boilers, Pumps, Water Wheels, Flour Mill Machinery, Oatmeal Mill Machinery, Wolf Gyrators, Emery Choppers, Wood Working Machinery, Shingle Machinery, Heading and Stave Machinery, Wood Rim Split Pulleys, Iron Pulleys, Shafting, Hangers, Friction Clutch Couplings, Friction Clutch Pulleys, Safes, Vaults and Vault Doors.

WYLD-DARLING COMPANY LIMITED, TORONTO
Wholesale DRY GOODS, and Clothing MANUFACTURERS

has been begun, and it is intended to be completed this autumn. Half a dozen banks have agencies there: the Bank of Montreal authorities paid $15,000 for a corner lot for their building, and several other banks are building or preparing to build. The Hudson's Bay Co. are erecting a new warehouse, and Revillon Freres have added largely to their premises. Churches and schools are being extended and new ones erected. A fine new hotel has just been completed. Altogether, the prospects of the town are very bright.

The spring of the present year proved the most favorable for a long period in that part of Alberta around Edmonton. For several years the spring weather had proved wet and backward, and the crop was last year not first-class. This year, if good weather continues until harvest time, the crop can hardly fail to be the best ever known, for the conditions of seeding were excellent and the grain shows well above ground, and appears hardy. The warm weather of mid-June was most favorable.

THE INTERCOLONIAL RAILWAY.

It has been resolved by the Dominion Government to purchase the Canada Eastern Railway, and to operate it in connection with the Intercolonial. The price is understood to have been about $800,000 This is a step of some importance to the Maritime Provinces. The Minister of Railways and Marine is, we are told, engaged in formulating a system of pensions for employees of the Intercolonial Railway, the yearly allowance to be proportioned to length of service and other conditions.

It is interesting to learn further in connection with "The People's Railway" that a well-known and competent official, Mr. James Hardwell, for six years assistant general freight agent, has just left it to take the position of traffic expert to the Railway Commission, and will hereafter have his headquarters at Ottawa. He is a Devonshire man, well known in railway circles. He was for six years connected with the I.C.R., was for fifteen years with the C.P.R., and was for ten years with the Grand Trunk, so that in the matter of experience he is well equipped. In this connection we find that Mr. W. H. Olive has been appointed assistant general freight agent of the Intercolonial Railway Mr. Olive was formerly traveling agent of the railway, but on the recent appointment of Mr Hardwell to the position of traffic expert to the Railway Commission, Mr. Olive secured promotion, for which he has certainly worked hard The tourist season promises to be a fairly good one in the Provinces, and Ontario or Quebec people who wish to see our own beautiful watering-places on the Atlantic coast may well call at the Intercolonial offices

A CANADIAN EXHIBITION IN JAMAICA.

Through the good offices of Mr. J. Eustace Burke, commercial agent for the Dominion, stationed at Kingston, Jamaica, we have received a prospectus of the Anglo-Canadian Commercial Museum This will be a *permanent* exhibition and sale repository of the food products and manufactures of Canada and the United Kingdom, which it is proposed to establish permanently in that city. It will be under the patronage of Sir Augustus Hemming, Governor of Jamaica, and the Canadian Departments of Trade and Commerce and of Agriculture It is believed that this will give to West Indian traders and consumers a much needed opportunity to inspect samples of Canadian goods and obtain information respecting those in which they are interested For the fiscal year ending March 31st last it may be mentioned, Jamaica imported goods to the value of $10,000,000, of which only $600,000 worth came from Canada compared with $4,000,000 from the United States. Practically the whole could be obtained from this country if only the trade were worked up with energy It is worth noting that Messrs. Pickford & Black the enterprising Halifax shipowners, have made the generous offer to convey all sample shipments and exhibits to Kingston free of charge. The Canadian section of the museum will be opened about September 1st next.

MERCHANTS BANK OF CANADA.

The report of this bank for the twelve months ended with May, submitted at the general meeting of shareholders held on Wednesday, 15th June, shows about the same net result in the way of net profit as in the previous twelve months. Gross profits were not so great, but there were fewer losses; and by means of the $74,000 odd brought over from 1902-3 the management was enabled to add $300,000 to rest account, and to add $15,000 to officers' Pension Fund, and to put aside $50,000 for bank premises account after paying dividend, the balance carried forward being $18,959.

Comparing the statements of assets and liabilities for the two years, it is observable that the increased deposits, some $1,600,000, are all subject to notice, and that it is the call deposits which are lessened. Apparently the new deposits have been put into current loans and discounts; at all events the increased discounts are just about equal to the increase in deposits. The proportion of this bank's assets held in the shape of cash and easily available securities is large, as it has of late years been. Probably the management possesses the secret of producing "quicker returns" if "smaller profits" by this use of a large proportion of their resources

LIVERPOOL & LONDON & GLOBE INSURANCE COMPANY.

In a very unpretending manner—in the reticent English way, in fact—this company tells by its card in our columns that its capital and assets exceed $61,000,000; its Canadian investments exceed $3,000,000; its claims paid exceed $200,000,000. These, of course, are large figures, but it is not till one comes to read the annual report for 1903 that the extent and the widespread nature of the business of the Liverpool & London & Globe impresses itself upon the mind. The company has a dozen branch offices in the United Kingdom; local boards in the United States, Australia and Canada. It does not only fire but life and annuity business, the proportions of these being shown as follows in making up the $14,099,710 which make up its income for last year:

Fire premiums	$10,335,970
Life premiums	1,230,405
Interest from investments	1,882,540
Considerations for annuities granted	650,795
	$14,099,710

We notice that the aggregate of its various funds is no less than $52,000,000, of which the Globe Perpetual Fund constitutes $8,271,000; the life and annuity funds, $27,040,000; the fire reserve fund, $11,500,000 These funds have grown almost ten millions in as many years. The fact of such large accumulations, the result of prudence and experience extending over nearly seventy years, gives confidence to any intending insurant in the strength and character of the company

In Canada the L., L. & G. has long been well represented, and the business it does in the fire department ($684,482 premiums last year) is exceeded by only one company among the thirty six doing fire underwriting in Canada. And its record of loss incurred in Canada for the year was under 40 per cent., a remarkably low figure The Canadian board is composed of W. J Buchanan, chairman; E. S Clouston, general manager of the Bank of Montreal; George E. Drummond, president of the Montreal Board of Trade; Sir A Lacoste and Fred W Thompson, all prominent and able men. The resident manager is J. Gardner Thompson, and the deputy manager W Jackson.

THE FARMERS' LOAN COMPANY A MEMORY.

An award has been made by the court to the Toronto General Trusts Corporation for its care and management of the estate of the Farmers' Loan Company since it went into liquidation in 1897. Chief Justice Falconbridge grants $26,000 to the corporation, in addition to $40,000 awarded in 1901. This sum also includes percentage on receipts and disbursements since November, 1901. The former totaled $1,553,292, and the latter $1,482,031. The creditors have received 85 cents on the dollar, and will likely get one or two cents more. The court declares that the liquidation has been successfully accomplished; indeed, that it is unparalleled in the history of liquidations in the Province. This company's failure was a shameful one The loss of creditors was small, as above shown, but the whole of the capital was lost. Such was the condition of the affairs of the company disclosed by investigation that the interim liquidator, Edmund B. Osler, reported as follows:

"The position of the company is due to total disregard and ignorance of the first principles of accounts. No balance sheet had been taken off since the inception of the company. No attempt had been made to keep a proper ledger. Yearly accounts and balance sheets had apparently been arrived at by lump sum entries. The fact was overlooked that a very large amount of the company's assets brought in no revenue. The method of arriving at profits was to take the total amount of capital stock, reserve fund and borrowed money, assume that it brought from 7 per cent. to 6 per cent., take this total as profit, charge the amount up to investment account, and credit investment account with the money actually paid in. Years of this method of book-keeping has resulted in the company having taken credit for more income than was earned, and consequently paying out more than it received for revenue" It needed long time, frequent legal proceedings, and sometimes distressing measures to secure the whole of the assets for creditors But that this was done the strong praise given to the liquidator assures us May it be long before another Canadian financial company shows such a flagrantly dishonorable career.

GUARDIAN ASSURANCE COMPANY, LIMITED.

There is something attractive in a name when it is appropriate to the person or thing it designates And probably this fact was recognized by the founders of this Assurance Company long ago, for "Guardian" is certainly an appropriate name for a company which transacts fire, life, accident and burglary assurance and has reserves of over $19,000,000 to cover all their responsibilities As the Guardian confines its operations in Canada to fire insurance alone, our readers will be naturally most interested in the fire branch of the company's business We, therefore, look first at the fire figures, merely noting that the life and accident insurance funds exceed three millions sterling The fire revenue account which includes burglary insurance business, amounted in 1903 to $2,376,647, and the losses were $1,131,418 The fire branch earned and transferred to profit and loss account in 1903 no less a sum than $256,000. The company has a fire general reserve fund of $2,125,000, and a further reserve of something over a million to cover unexpired fire policies. There is, therefore, an aggregate fund of $3,175,000 to meet fire claims. Enough has probably been said to establish the strength of the company.

Its history would be interesting had we time or space to refer to it. The beginning of the company was in 1821, in the time of George IV., when it was established by deed of settlement, and it become a limited liability concern as lately as 1893. The capital subscribed was two millions of pounds, practically ten millions of dollars, and one-half of this was paid up. So successful has been the administration of the company that it has never been necessary to pay up a further proportion of the capital. The company pays to shareholders a yearly dividend of 8 to 10 per cent. and the shares of £10 each, with £5 paid, are worth in the market £10 or over. Four Montreal gentlemen, W. M. Ramsay, J. O. Gravel, R. Wilson Smith and Hon. A. Desjardins, and one Toronto gentleman, W. H. Beatty, constitute the Canadian board. Mr. H. M. Lambert is the resident manager, and Mr. Bertram E. Hards the assistant manager. These gentlemen have to supervise a business in Canada which last year reached $489,256 in premiums, and the amount at risk at close of 1903 was something over $45,000,000.

ELECTRICAL STATISTICS.

Mr. George Johnson, the Dominion statistician, is the author of a paper full of interesting figures and dates, which was read before the Canadian Electrical Association in convention at Hamilton the other day. Since the invention sixty years ago of the Morse registering instrument the progress of telegraphy has been marvellously rapid. In the world to-day there are 1,764 telegraph cables, with a total length of 204,527 nautical miles, while on land there are estimated to be 5,004,200 miles of telegraph line. The daily transmission of messages over these is 30,000 cables and 1,400,000 telegrams, beside many thousands of words in press messages. In proportion to population, Canada largely exceeds the United States in miles of wire. As to electric railways, Canadian lines last year carried by these 167,704,000 passengers, a large proportion, compared with the city population of the country. There are in existence forty-six street railroads, with 455 miles of track, capitalized at about $30,000,000; paid-up capital, $17,000,000, bonded debt. In the United States there are 25,800 miles of track, capitalized at $1,030,000,000, and carrying annually five billions of passengers. In regard to telephones, Mr. Johnson calculates that there are 815,000 instruments in use in the world, an increase of 144 per cent. in the last four years. Of light and power companies, Canada had (in 1903) 324, employing 1,786 hands, and with an invested capital of $20,000,000. There were 14,780 arc lights and 1,212,861 incandescent lights. Of the plants in operation, 203 are in Ontario, but British Columbia shows the largest proportionate increase of any Province. Mr. Johnson concluded his very informative paper with some general remarks upon the future of the electrical profession. "The electrical engineer," said he, "is dealing with a force whose uses have become and promise to become even more in the future than in the past, so varied that, more than any profession, a man has to be a hustler all the time or he will become a way-back even while he is positive he is well to the front. The up-to-date man of to-day is rearguard to-morrow if he is not always on the alert, so rapid are the movements, so numerous the applications of the electrical forces"

BANKING AND FINANCIAL ITEMS.

The reduction of capital is being seriously considered by some of the Baltimore trust companies. The directors of one, the Baltimore Trust and Guarantee Company, have already voted to reduce the capital from $1,000,000 to $800,000. The motive assigned is generally the doubtful outlook for good business as compared with what it was up to two years ago. In 1899, it seems, there was a sort of boom in forming trust companies and more were formed than were needed.

The growth of the banking business of Ohio is shown by a recent statement. Twenty years ago there were four hundred banks in that State, with a total capitalization of $41,389,735. A bare majority of these were private banks. To-day Ohio has about nine hundred banks, with a capitalization of about $125,000,000, and deposits of $555,000,000. About one hundred are private banks The three societies for savings have deposits of $60,000,000.

Action recently by several New York trust companies in reducing the rates of interest paid depositors has attracted attention as being in line with what conservative

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON, ENGLAND—The National Bank of Scotland.

bankers have all along contended, that no company could allow depositors 3 per cent. interest in a 1 per cent. money market. The Windsor Trust Company has publicly announced that rates on its deposit accounts would be reduced to 2 per cent., and one of the strongest Wall Street concerns is said to have advised its clients privately to similar effect. Although the 3 per cent. rate is generally regarded by conservative companies as being the highest return justified for active accounts, recent competition has forced many companies to offer 3, 3½, and even 4 per cent. for general business.—Bankers' Monthly.

In spite of the many bank agencies scattered through the prairie country and British Columbia, the Western people seem to think there is still room for more banks. At Ottawa on Monday last a bill to incorporate the Pacific Bank of Canada was introduced in the Senate by Hon. William Templeman, and received a first reading.

◆

CLEARING HOUSE FIGURES.

Having to go to press this week on Thursday instead of Friday, by reason of the Dominion Day holiday, we are unable to present in this issue our usual figures of Canadian Bank Clearing Houses for the week ended with 30th June. We reprint last week's table, however, with the figures for Montreal supplied. It will have been seen that in the four weeks ending June 2nd, 9th, 16th, and 23rd, the clearings were $50,752,000; $58,518,000; $54,196,009; and $50,951,000, compared with $62,000,000; $65,000,000; $64,900,000; and $54,585,000, in the corresponding weeks of 1903. But those days of last year were days when stock speculation was active, and when everything on "the street" was rose-colored:

	June 23, 1904
Montreal	$19,691,850
Toronto	15,710,654
Winnipeg	5,127,616
Halifax	1 501,702
Hamilton	1,106,359
St. John	917,774
Vancouver	1,725,929
Victoria	534,753
Quebec	1,458,306
Ottawa	2,254,784
London	931,983
	$50,951,800

◆

—Under the influence of Prof. Robertson, of the Department of Agriculture, and of Sir Wm. Macdonald, who, it will be remembered, two or three years ago offered prizes aggregating in value to $10,000 for the best seeds and grain, a convention of seed growers met together in Ottawa a few days ago and decided to form a permanent association of a national character, similar to the Canadian Live Stock Association. There is room for trained intelligence and the exercise of painstaking care in the growing and selecting of seed, and the work of the new Canadian Seed Growers' Association will, we doubt not, be of great value to the agricultural interests of the country. Branches will be established in several districts, the object of which will be the making of regulations respecting the growing, selecting and improving of farm seeds, for guidance, the keeping of records of seeds, fixing standards, publishing information, and the issuing of certificates of registration for hand-selected seed.

◆

—For a dozen years the efforts of builders and owners of steamers for the Great Lakes trade seem to have centred on producing season after season new steamers bigger than the old. They are now constructed so big and of so deep draught that they can hardly go through the river channels at Detroit and St. Clair, which Uncle Sam has so laboriously been digging for them. A steel giant, the "Augustus B. Wolvin," left Two Harbors, on Lake Superior, the other day with 10,892 tons of iron ore. This beats the record cargo up to last year, which was that of the "William Edenborn," carrying 9,864 tons from Escanaba to South Chicago.

◆

FOR TOWN AND CITY PEOPLE.

A member of the City Improvement Society handed the following sensible advices to the Hamilton Times, which printed them. We copied them into our columns several years ago, and now copy them again, considering them eminently sensible:

Don't throw anything into the street. Garbage cans and barrels are always near at hand.

Dont' throw away banana skins. They are slippery. Give them to a horse. Horses like them.

Don't forget that orange skins and watermelon rinds are easiest cared for when thrown into a garbage can.

Don't tear up waste paper and scatter it about the street. Your mother can use it for lighting her fire.

Don't fill the ash-barrel too full. Ashes are easily scattered by the faintest breeze.

Don't use ash-barrels for bonfires. Bonfires make extra work for the sweepers and cartmen; they injure the pavement; the barrels cost somebody money.

Don't throw water into the street on frosty days.

Don't scatter the sandheaps in front of buildings being erected.

Don't throw anything into the sewers.

Don't prevent water in gutters from flowing into the sewers.

Don't touch the fire hydrants. If the hydrants get out of repair, the damage, in case of fire, might be serious.

Cut this piece out of the paper and paste it up where you will see it often.

Chicago & Milwaukee Electric Railroad 5 per cent. Bonds

These bonds have been largely purchased by leading Canadian financial institutions. We recommend them as strictly high-grade investment securities.

The net earnings on this property for 1903 amounted to double the interest on the bonds.

The net earnings for 5 months, 1904, have increased 65%.

Particulars on Application.

Mercantile Summary.

The Standard Varnish Works, of New York and Chicago, propose to establish a factory in Toronto.

The Driard Hotel, Victoria, B.C., was badly damaged by fire a few days ago to the extent of $25,000; covered by insurance.

The Wiarton, (Ont.), Beet Sugar Manufacturing Company's entire plant and property will be offered for sale at auction on the 15th inst.

The Dominion Government has announced its intention to build at once two ice-breaker vessels for the St. Lawrence. Ice-breakers for the Great Lakes will be built later on.

The Trinidad (B.W.I.), Electric Company, whose stock is largely held in Nova Scotia, has declared a quarterly dividend at the rate of 8 per cent. per annum, payable on the 8th inst.

The Canadian Iron Company, Limited, Ottawa, capital, $2,000,000, has received an Ontario charter empowering it to carry on mining, milling, reduction and development work. Among the provisional directors are: H. F. Gooderham and F. R. Dymond, of Toronto.

The White Star Line has just launched a new steamer, the "Baltic," claimed to be the largest vessel ever built. She is 726 ft. long, or 26 ft. longer than the "Cedric" and "Celtic." Her gross register is 24,000 tons, cargo capacity about 28,000 tons, and she has accommodation for 3,000 passengers.

J. B. Atchison's planing and sawmills, at Cornwall, Ont., were last Friday burned to the ground, with a loss of $40,000, not insured. On the same day a fire, which broke out in the Olaison block, in Winnipeg, did damage to the extent of $25,000, and rendered a score of families homeless. The building was partially insured.

The Grand Trunk Railway Company are preparing to start work on large additions to their shops, at Stratford, Ont., including new boiler and tender shops, a new brass foundry and an extension of the present blacksmith shop. Large orders, it is understood, have already been placed for new machinery. About 200 extra hands will be required.

This is a great time for the furniture trade. In Exhibition Park, Toronto, there has been going on for the last few days (and will continue until the 9th inst.), a Canadian Furniture Exposition. The exhibit of the Canada Furniture Manufacturers, Limited, who own and operate no fewer than twenty-one factories in Ontario, covers 50,000 square feet of floor space at the above place, but they are also making a splendid showing at their large warehouse in King street East. On the 6th, 7th, and 8th inst., the Retail Furniture Dealers will hold their annual convention at the park, and everybody looks forward to an enjoyable time.

GEO. A. STIMSON & CO.,
44-26 King Street West TORONTO, Ont

The entire plant and building of the St. Catharines Box and Lumber Company, in St. Catharines, Ont., were on Friday last destroyed by fire, at a loss of about $50,000, with insurance of $30,000.

The Montreal branch of the Canadian Manufacturers' Association are busying themselves with a project for providing the industrial classes of that city with better facilities for obtaining a high-class technical and business training. The trustees of the Mechanics' Institute are working in with the idea, but it will be necessary to raise the sum of at least $250,000, not more than 60 per cent. of which will be used for building and equipment.

Mercantile Summary

Mr. J. R. Booth, of Ottawa, is starting work on a new paper mill at the Chaudiere, to utilize the product of the pulp mill.

T. H. Pelow, of Kingston, Ont., formerly a commercial traveller, and in the grocery trade since 1901, is stated to have assigned, after having been sued on several late occasions.

The St. Catharines, Pelham and Welland Electric Railway Company will apply to the Ontario Legislature for power to extend its line from its present terminus, at Pelham, to Wainfleet, Gainsboro, and Moulton.

Doing business under the name of the J. F. Crosby Co., at Ottawa, as a dry goods retailer, J. F. Crosby has become embarrassed, and is reported as seeking an arrangement on the basis of 60 cents on the dollar of liabilities which amount to $18,000. His assets are nominally figured at $18,500.

The Canadian Pacific Railway Company is expending a large amount of money in the developing of the anthracite (or more strictly speaking, semi-anthracite), coal fields at Banff. Many people, perhaps, will be surprised to hear of the existence of such beds in this country, but they are believed to be of great extent.

The annual sale of Crown timber limits of the Province of Quebec took place in the Parliament Buildings, and was the largest ever held in the province, Mr. P Blouin, acting as auctioneer.. Bidding was rather slow, but eventually good prices were reached. About 1,716 miles of limits were sold, the total revenue being $250.805 For some lots along the river Bonaventure, as much as $290 per mile was realized.

The Americans have been successful on the Pacific Coast in taking quantities of salmon by "trapping" them, instead of spearing or otherwise catching them. J. H Tod & Sons, of Victoria, are the only persons, so far as we hear, who have taken advantage of the Government's permission to take salmon by means of traps. If the firm are as successful as they hope to be, it will mean a considerable change in the British Columbia coast fishery.

The following failures are reported to us in Quebec City: Cardinal & Bedard, in the grocery line a little more than a year, have assigned. The former is a mason by trade, and the latter had some experience as a store clerk. They owe $2,500.——J. L. Fortin, a retailer of boots and shoes, has had a similarly brief career, having begun storekeeping in the spring of 1903. He has assigned after an unsuccessful effort to compromise liabilities of $4,900 at 25 cents on the dollar. He was formerly foreman in a shoe factory, where, it is evident, he should have stayed.——Joseph Letarte, a butcher and ice dealer, is reported embarrassed, and likely to offer 50 cents.

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe.

Mercantile Summary.

On demand, an assignment has been made by Arthur Saucier, provision dealer in Montreal. He came to Montreal four years ago, and originally was a country storekeeper, at Maskinonge subsequently running a match factory at Louiseville, which was not a success.

The mills of the Maritime Sulphite Fibre Company, at Chatham, N.B., which have been closed down for the past three years, are now offered for sale, and the ratepayers of that town have decided, by almost unanimous vote, to offer exemption from taxation, except school taxes, to anyone who will take them over and operate them.

The St John Sulphite Pulp Co., referred to lately in our St John letter, whose factory is at Mispec, N.B., is to be wound up, E. B. Ketchum having been appointed liquidator, and a meeting of creditors is called for July 16th. The company was incorporated under English laws in 1898, with a capital of £60,000, £45,000 preferred, and £15,000 common stock.

After being fifteen years timekeeper in a leading Montreal manufacturing establishment, George Tate took a notion to start in the grocery line a year ago last April. He has already found out one cannot jump into storekeeping and expect to make a success of it. He has had to assign.——J. L. Racicot, another Montreal grocer, but with a longer experience, is also reported to have failed, and owes about $2,000.——L. Azef, clothier, reported last week as insolvent, is offering his creditors 50 cents on the dollar.

The failure is noted of L. H. Chouinard, a general merchant of some prominence, at Matane, Que. He has been engaged in general trade since 1880, but has always been reputed as disposed to spread his interests widely, and more or less irregular in settlements. In 1893, he became seriously involved, and then arranged a composition at the rate of 75 cents on liabilities of some $15,000. During several years past, he has been reported as particularly slow, and numerous suits have appeared against him during the past half-year.

Respecting the Hamilton saddlery firm of Fraser, Johnson & Co., whose difficulties were mentioned under this heading last week, a meeting of creditors was held on the 22nd June, and, as we anticipated, there was much discussion over the bill of sale on part of the firm's stock. It is expected that a legal battle will ensue over the contention of some creditors that the preferential bill of sale to Sykes & Ainley, of $3,000, must be set aside. Meanwhile, Mr. F. H. Lamb has been confirmed by unanimous vote as assignee, and inspectors are appointed, as under: J. C. Notman, of the McKinnon Dash Co., St. Catharines; A. Patterson, manager, Merchants Bank, Hamilton; J. G. Gould, barrister, Hamilton. No offer for the estate has been made by Mr. Johnson.

St. Catharines, Ont., has voted in favor of taking $20,000 worth of stock in the Queenston, Niagara and St. Catharines Electric Railway Company.

"Speaking of cold-blooded methods in business," said a southern merchant, "reminds me of a story they tell about a New York drummer, who died suddenly in an Atlanta hotel. The coroner telegraphed to the firm, saying: 'Your representative died here to-day. I await your instructions.' In a few hours this answer came back: 'Search his pockets for orders. Express his samples to New York. Give his body to a medical college.'"

◆

UNITED STATES FINANCES.

Henry Clews & Co., in their circular letter, dated New York, June 25th, 1904, say: Confidence is gradually strengthening owing to encouraging crop reports, an abundance of money and the absence of disturbing issues in the Presidential campaign. Thus far it has not expressed itself in any decided upward or forward movements, but values are hardening, and good investments are absorbed with encouraging readiness. Much of the buying the last few weeks has been of an investment character, marginal purchases being at a minimum because of the ultra-conservatism induced by the experiences of the last two years. Gilt-edged stocks are firmly held in strong boxes from which they do not seem likely to emerge, so that current demands from investors had to be satisfied by new issues, the floating supply of older securities being exceedingly limited. At higher prices and later on these may come on the market to some extent, but the big owners are not likely to lessen their holdings at anything like present figures. Should events prove favorable during the next two months, the technical position of the market is such as to favor an advance movement. This, however, will not be accomplished without manipulation, and as at present the outlook does not promise any active public support, the heavy operators will be obliged at the start to put up the market on themselves in the hope that a slow but sustained advance will eventually create more activity. Crop prospects just now are as good as could be reasonably expected. Corn is the only backward crop; but nearly all the other crops have had a good start, are in good condition and have reached a degree of maturity that will enable them to withstand ordinary adverse conditions of weather, which, of course, must be counted upon in all calculations. The monetary situation is quite satisfactory from the stock market point of view. Loanable funds are plentiful and bank reserves much higher than for several years at this period. At present rates of interest a number of good dividend-paying stocks yield much better returns than cash, the inevitable result of which must be a preference for the former until such differences are more nearly equalized.

IN HER PUBLIC LANDS
many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W Gibson, Director Bureau of Mines, Toronto.

The Traders Bank of Canada.

Notice is hereby given that after the publication of this notice for four weeks application will be made to the Treasury Board for a certificate approving of the following by-law passed at the annual meeting of the shareholders held this date, viz.:—

A BY-LAW TO INCREASE THE CAPITAL STOCK OF THE TRADERS BANK OF CANADA.

WHEREAS the capital stock of the Traders Bank of Canada is $2,000,000, divided into 20,000 shares of $100 each, the whole amount of which has been taken up;

AND WHEREAS it is deemed expedient that the said capital stock should be increased;

Be it, therefore, enacted by the shareholders of the Bank assembled at the Annual General Meeting, held at the head office of the Traders Bank of Canada, the 21st day of June, 1904.

(1) That the capital stock of the Traders Bank of Canada, be, and the same is hereby increased by the sum of $1,000,000, divided into 10,000 shares of $100 each.

(2) When the directors so determine, and from time to time as they think fit, the said increased stock shall be allotted to the then shareholders of the Bank pro rata, and at such rates as is fixed by the directors, but no fraction of a share shall be so allotted; provided in no case shall a rate be fixed by the directors which will make the premium (if any) paid or payable on such stock so allotted exceed the percentage which the reserve fund of the Bank then bears to the paid-up capital stock thereof.

(3) Any stock allotted from time to time which is not taken up by the shareholder to whom such allotment has been made within six months of the time the notice of the allotment was mailed to his address, or which any shareholder declines to accept, or any shares which shall not be allotted by reason of the provision hereinbefore contained against the allotment of fractions of a share, may be offered for subscription to the public, at such times, in such manner, and on such terms as the directors may prescribe.

H. S. STRATHY, General Manager.

Toronto, 21st June, 1904.

TORONTO MARKETS.

Toronto, June 29th, 1904.

Chemicals, Drugs, Etc.—Values continue steady and a nominally good trade is being done. New York advices speak of a one cent decline in quinine, owing to poor demand, and a lowering in primary markets. Opium continues very dull though no further price changes have occurred. From Great Britain comes word of dullness in mostly all branches of the chemical trade, both for home and export.

Dry Goods.—While business is not being carried on in such a high-strung manner as was the case this time last year, there is not much cause for complaint. Staples keep firm in price, and there is little doubt that this will continue for some time to come, in spite of the easier feeling in raw cotton, which does not as yet really affect values of the finished materials now on the market.

Flour and Grain.—Not much change has taken place in flour, though the market is easier. Ninety per cent patents are selling around $3.55, though, as a rule, more is wanted by the holders, and this causes a certain amount of dullness to be felt. Wheat is dull and unchanged. Barley is 1c lower, and dull at the decline. Peas, rye, and corn are nominally the same. But little business is being transacted.

Fruits and Vegetables.—Strawberries are, of course, the chief centre of attraction just now, and they are selling readily. As to quality, it is middling to fair, though some very good samples have come forward, too. Canadian peas are beginning to make their appearance. Pineapples are still in abundant supply, but prices keep pretty steady. Quotations follow: Apples, $1 to $3 per barrel; cocoanuts, $4.25 per sack; oranges, California navels, $3.25 to $4.50; Valencias, large, $7; ordinary, $3; Sorrentos, $3; lemons, Messinas, 360's, $2.50 to $3; 300's, $2.50 to $3; Sorrentos, $3 to $3.50; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; Egyptian onions, $2.50 to $3 per sack; tomatoes, $3 to $3.50 per crate; pineapples, Floridas, 24's, $3.75; 30's, $3.25; 36's, $3; 42's, $3; Havanas, $3 to $3.50; watermelons, 25 to 35c. each; cherries, 75c. to $1.25 per basket; new potatoes, $4.25 to $4.30 per barrel; tomatoes, $1.50 to $1.65 per case; Canadian peas, 60 to 65c. per basket; cantaloupes, $3.50 to $4 per box.

Groceries.—Sugar made another advance last week, just after our quotations went to press. The movement in this commodity continues good, though perhaps the preserving season will not stiffen it quite so much as usual, owing to the reported comparatively light crops of small fruits. Canned goods continue strong, but no change is likely until the appearance of the new crop. Teas are selling steadily.

Provisions.—Prices of dairy products are still weak. One pound rolls sell at

14c. There is no consumptive demand for packed butter in the city, but a good deal is going into cold storage. Cheese is held around 8½c. In regard to hog products, there is a better demand for smoked meats, but lard, long clear, and barrelled pork continue dull. Mess pork is held at $15. Eggs continue firm at 15 to 15½c., for new laid.

Wool.—New clip fleece is still coming forward in moderate quantities, and prices keep steady. For pulled wools, the demand at the moment is light.

◆

MONTREAL MARKETS.

Montreal, June 29th, 1904.

Ashes.—Business is of a very light character, present receipts being confined to a few odd lots, rarely exceeding five barrels or so each. Prices rule fairly steady at $6.10 to $6.15 for first pots, and $5.50 to $5.60 for seconds. There is a continued absence of business in pearls.

Cements and Firebricks.—No recent big sales of cement are reported, and even the aggregate of business in small lots is quite moderate. Prices are unchanged at $1.70 to $1.95, for Belgian;

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFETIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World's Fair, and consult Grand Trunk Agents for further particulars.

Internal Furnace Saves Ten Per Cent.

An externally fired boiler wastes fuel because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler, the heat is transmitted directly to the water, and air cannot get into the furnace except through the regular drafts. This makes a saving of at least 10 per cent.

Robb Engineering Co., Ltd.

J. F. PORTER, 355 Carlton Street, Winnipeg

English, $1.98 to $2.10; firebricks quote from $16 to $23, as to brand.

Dairy Products.—The decline in cheese has become more accentuated, quotations being lower by a quarter of a cent since last writing. Monday's boat receipts of Quebec cheese realized about 7¼c., and the outside spot figure for fine Ontarios would now be 7¾ to 7⅞c. English demand is still slack. The butter market shows little change since a week ago, and 17½c. seems about the idea for choice Townships; good dairy is worth 14 to 15c. Last week's shipments of cheese were 72,224 boxes, figures just about equal to those of the corresponding week of 1903, but there is a deficiency on the season's figures thus far of nearly 150,000 boxes, when compared with exports at this date a year ago. Butter shipments last week were light, only 6,601 packages, making total shipments since opening of navigation of 52,108 packages, as against 38,617 packages at this date last year.

Groceries.—The week has been without any special feature. Sugars are reported as advanced 5c. to-day in New York by the Trust, and it is deemed not unlikely that our local refiners may follow suit any moment. The present local factory prices are $4.30 for standard granulated, and from $3.80 upwards for yellows. The present demand is fairly active. Molasses is firmer. It is said a syndicate has bought up all available stocks in Barbados, and no further quotations are obtainable from there; the last figure given was 9c. first cost. It is reported that a round sale of old molasses was made here a few days ago at 24c. Thus far only three cargoes of new molasses have reached Montreal. Dried fruits are very hard to move. The high figures quoted last week for new pack of salmon are confirmed, and are affecting the volume of orders.

Dry Goods.—The warehouses present no special activity, and travellers' reports indicate that country dealers are still disposed to buy cannily for the fall and winter. A very fair seasonable sorting trade is in progress, and on the whole remittances are coming in well. No recent changes of moment are reported in the markets, either foreign or domestic, values being pretty steadily held in all lines.

Hides.—The only new feature in the hide market is the advance in lambskins to 30c. each. For No. 1 hides, dealers still pay 9c. per lb., and 13c. is paid for No. 1 calfskins.

Metals and Hardware.—General business is now of a comparatively quiet character, and there is little new to be noted with regard to values, though the tendency is, if anything, towards easiness, and importers do not seem inclined to place heavy orders at the moment. Offers of No. 3 Middlesboro iron, to import, at $15.75 to $16, do not meet with ready response; Carnbroe is quoted at $18.50; No. 1. Summerlee at $19.25, and domestic brands at about $19. Bars rule easy at $1.65 to $1.70. Canada plates, $2.20 to $2.25; Black sheets, $2.15 to $2.20. Galvanized sheets quote in a regular way at $4, but it is said business can be done at lower figures for a fair-sized lot; Ternes, $6.25 to $6.50. Ingot tin continues to rule easy at 28½ to 29c.; lead is rather lower, at $3.10 to $3.15; copper, 13 to 13⅛c.; spelter, $5.50 per hundred.

Oils, Paints, Glass, Etc.—The warehouses in these lines of trade are now beginning to show a quiet mid-summer aspect, and little of an interesting character is to be noted. Turpentine is again easier, with 81½c. the now quoted price for single barrels. Linseed oil quotations, in London, show some strengthening, according to late cables, but local sales are still reported at low prices, ranging from 43 to 45c. for raw, and from 46 to 48c. for boiled. Castor oil is quoted at 7 to 8c. for mechanical, and 8 to 10c. for pharmaceutical. Fish oils are very dull and neglected. Pale whale is quoted at about 45c.; there is no steam refined pale seal oil here, and very little straw, which is quoted at 37½ to 45c., as to grade; Cod oil, 37 to 40c. The nominal quotation for ground lead, chemically pure, is $4.50, but general cutting is still reported. Paris green is sold at 15 to 15½c. in lb. packets, and 14½c. in 50-lb. drums. Other lines show no change.

DAILY ROMANCE.

Says Marmaduke, in the London Times: The "bread-and-butter miss" of half a century ago was familiar with the language of flowers; the cigarette-and-supper miss of the moment has adopted the language of money. The rose, the lily and the lilac each conveyed a meaning to the former; the hundreds, the thousands and the tens of thousands are equally expressive to the latter. Thus:

$500 a Year.—A worthless companion for brothers, and an undesirable acquaintance for ourselves.

$2,500 a Year.—A man of some respectability, but of no importance.

$5,000 a Year.—A man to be amiable to when better men fail.

$25,000 a Year.—A man of character and much ability, whose friendship should be cultivated.

$50,000 a Year.—An altogether admirable man.

$250,000 a Year.—The most charming and able man of the times; one who never ages, and would honour any family on whom he should confer his friendship, whatever form that friendship might adopt.

◆

—"And when you have got the number of hours in a working day down to the minimum, what then?" asked the manufacturer. "Oh, then we'll go in for a thirty-minute hour," remarked the walking delegate.—Yonkers Statesman.

TOWN OF WETASKIWIN, Alberta, N. W. T.

Sealed offers will be received by the undersigned up to Six p.m., Friday, July 22nd, 1904, for debentures as above. Interest at Five per cent., payable yearly.

Particulars of Debentures and Municipal Statistics can be obtained from the office of this publication, or from

J. YOUNG BYERS, Town Clerk.

The highest or any offer not necessarily accepted.

Town of Wetaskiwin, N. W. T.

.. THE GREEN MAN'S BURDEN.

(With apologies to Mr. Kipling's "White Man.")

Take up the green man's burden,
  Stand forth and do your best
To ripen him a little,
  So he can do the rest.
He is not altogether
  Beyond assistance yet,
And promptness still may save him
  From many a trap and net

Take up the green man's burden,
  And let him know that he
Can't monkey down in Wall street
  With great impunity.
Strive earnestly to teach him
  That it is scarcely meet
For lambs, yet young and frisky,
  To butt into the street

Take up the green man's burden,
  Show him that bonds and stocks
And lightning rods and gold bricks
  Are filled with painful shocks;
Teach him the bunco steerers
  Are hot upon his trail
To catch the guileless lobster,
  By interview or mail.

Take up the green man's burden,
  Awake him from his dream
That woman's wiles and witching
  Are always what they seem.
Restrain his fevered fancies,
  Lead him away to cool,
Before the maids and matrons
  Have turned him out a fool.

Take up the green man's burden,
  Show him the devious ways
The wide world is pursuing
  To make a needed raise;
Persuade him, curse him, kick him,
  Do anything you dare,
To make the green man's burden
  Less hard for him to bear.

—William J. Lampton in N.Y. Herald.

◆

ONTARIO FARM CROPS.

The crop bulletin (No. 85) of the Ontario Bureau of Industries, published by the Ontario Department of Agriculture, gives the latest official information as to the condition of crops, live stock, etc., and is summarized from the returns received from over 500 regular staff correspondents. It is hardly necessary to mention that the meteorological data show the past winter to have been an unusually cold and long one, practically every month from November to April, having shown a considerably lower mean temperature than has been the case for several years.

With regards to crops, the last previous report (for November) on fall wheat was favorable; the seed-bed was then in excellent condition, and altogether fields presented a fine appearance. But it emerged from the severe winter in very bad condition indeed, the loss from killing ranging from 20 to 90 per cent. in different districts, much greater than has been the case for many

Quality, Durability, Desirability,

are the distinguishing marks of all our blank books. They are in use in nearly every banking house in Western Canada, and are in use in every agency of some of the largest banking houses in Canada. 4

MISS VEALS, Lady Principal.

years past. However, very little injury from insects has been reported. The most severe winter-killing and greatest damage are reported from the Lake Erie counties, while in Lake Ontario districts the injury was as a rule less severe. The weather since the beginning of May has been very favorable, and many fields have made partial recovery. The clover crop in the eastern part of Ontario is fair to good, in some fields very good, while in the western half, it ranges from good to very poor

THE COMMERCIAL
[illegible]

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MacLEAN CO., LIMITED,
Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

And Still it Leads

As applied to the gain in net amount of assurance in force in Canada for the

5 Years Ending Dec. 31st, 1903.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

still maintains its stand at the

HEAD OF ALL ITS COMPETITORS

among Canadian Life Companies, as shown by the Government Reports.

Pastures, though late in starting, came on with a rush in the favorable weather of early May. Little grain seed was put into the ground in April, owing to the cold forbidding weather, but seeding operations made rapid progress throughout May, with the consequence that the area is almost, if not quite up to the average. Live stock, it is satisfactory to note, considering the conditions, came through the winter in fair shape. Some horses succumbed to the strain of spring activity after the long confinement, but cattle, though looking rather thin at first, appear now to be in good health. Sheep and swine are in good condition. Fruit trees suffered somewhat, especially peaches, plums and cherries, and many sustained great injury from girdling by mice, which is reported from twelve counties.

As to the perennial subject of hired help it remains as difficult to find and as trying to the temper as ever. In some cases, the farmers are crying out for more immigration, while in others they seem to have become philosophic, and are trying to do with as little help as possible, aided by the purchase of more and better machinery, and by putting land in pasture rather than grain or hoed crops. Financially, the agricultural classes seem prosperous, and farm improvements are going on apace.

◆

—Barchard's planing mill and box works in Toronto, was on Tuesday damaged by fire to the extent of $2,000, insured.

—The citizens of Brampton voted last Monday on a by-law to grant a loan of $25,000 to the Copeland-Chatterson Co., of Toronto, who propose to locate in that town. The company intends to repay the loan in seventeen annual equal payments without interest, and will employ 125 hands, with a pay roll of $40,000 yearly.

—At Rouse's Point, N.Y., an important seizure was made on Saturday last by U.S. Customs officer Shaw. It was learned that a St. Johns, Que., firm had shipped Swiss watch movements to the value of $10,000, and that this lot had been seized by the American authorities. The duty on such goods going into the United States is 40 per cent. Confiscation was the natural fate of the lot seized.

Agents Wanted in All Unrepresented Districts.

—The Dominion Post Office Department will instal a pneumatic tube mail system in Toronto for which Mr. John Gault, C.E., is preparing plans and specifications. The system will next be extended to Montreal and, in due time, to other cities.

—Here is an instance of the reversal of what has long been regarded as a normal course of trade for products of the forest. Instead of their being shipped eastward or southward, for the St. Lawrence route to the Old Country, or south and east for the New England States, we find them in this case coming west. Two barges, the "Hilda" and "Nadine" passed through Montreal the other day, in tow, each with 450 cords of pulp wood, from Escoumains, below Tadousac, Que., and proceeded through the canals on their way to Thorold, Ont., probably for the Riordon paper mills. The barges are 166 feet in length, 32 feet beam, and 10 feet draft. They carried about 1,100 tons each.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

THIRTY DAYS' GRACE

for the payment of Renewal Premium is invariably allowed by The Canada Life. During this period the policy remains in full force, and should the Assured die within it, the claim would be promptly paid whether the premium had been paid or not.

This has been the practice of the Company for over 50 years, and is but one of many valuable privileges

Allowed by The CANADA LIFE.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

SETTLEMENT IN THE NORTH-WEST

Our golden west is filling up in a gratifying way, and with a class of settlers which, while not all that can be desired, are yet for the most part valuable settlers. There are some whose national characteristics do not suit us, any more than their "manners and customs" please us; but we must trust to time and the modifying influences of surroundings to amalgamate these people. News comes from Alberta of remarkable activity in settlement, not only close to the United States line, but well northward. The stream of settlement from over the border flows steadily north. Settlers are pouring into Southern Alberta, we are told, along the MacLeod branch of railway. Where formerly the cattle king held undisputed sway there extends a long line of settlements. Every ten miles or so thriving villages are springing up, each a trading centre of its own district. Given a little time and a few good crops, and these will become prosperous communities. "It is but a short time ago," says a recent letter, "that one could travel from MacLeod to Calgary and see little else save the herds of cattle grazing, with the coyotes ever and anon venturing within the range of vision. Corrals and cattle platforms were almost the only buildings to meet the traveller's eye. Now a great and welcome change has come. The plow and harrow are called in, the prairie lands are being broken for grain. Extending away in a wide sweep south-east and north, far out along the sky line, buildings are everywhere ornamenting the landscape."

This is the kind of settlement that we have long been hoping for. The rancher is a picturesque and acceptable figure; the cow-puncher is a feature we would not do away with, but the whole of Alberta and Assiniboia is not to be given over to these two. The man who brings his plough and harrow is the welcome man at this stage. The chief need of this newly-settled district, we are assured, is good roads. Indeed, these ought to have been surveyed ahead of settlement. The longer the work is delayed the more trouble it will mean by and by. The average new town or village of Manitoba or Assiniboia is so much more up-to-date than new Ontario villages used to be that one naturally expects the new farmer of the North-West to have up-to-date roads. Sure it is that good roads mean the saving of thousands of dollars to the farmer; for on every load of grain or any of his products bad roads will certainly take toll.

The growth of the district around Lethbridge has been phenomenal. It is but three years since the town of Raymond was founded, and now, besides this busy place, with roller mill and beet sugar factory, there are, in that south-east corner of Alberta, Stirling, Magrath, and Cardstone—all comfortably-built towns. These are commonly called "Mormon towns" from the fact that they are largely settled by Mormons. Now, Canadians, we must assume, do not relish the idea of the Mormon as a settler. His polygamous practices are opposed to our notions of morality and propriety. And the United States have found it necessary to segregate these people. But read the letter of our correspondent, written from Red Deer on 25th June, after he had sojourned for weeks in these towns and villages and among these very people. "These Mormons are a healthy-looking lot, courteous, usually well-informed, and all right to do business with. . . . Neither of the four towns owns a licensed hotel. They are a very orderly people. The North-West Mounted Police could go out of commission if the residents of our West were all Mormons."

It is more satisfactory, however, to learn that many immigrants who are not Mormons are coming into Alberta from Nebraska, Kansas, and other Western States. And these, we learn, are bringing in stock with them. As an instance of their enterprise we are told of a Nebraska man near Spring Coulée who is breaking six thousand acres of land, which it is his intention to plant with fall wheat this season. Assuredly the change from stock ranching to general farming, or rather the addition of farming to ranching, is bound to make an enormous difference in that Western country during the next few years. Looking to future development of the most satisfactory kind, cultivation of the soil by intelligent American settlers of the kind we have described is to be preferred to Galicians or Doukhobors, who have not only to be acclimated to our methods, so to speak, but ridded of fads and prejudices, religious or other, before they can become good Canadians.

MANUFACTURERS AND THE TARIFF.

The Canadian Manufacturers' Association has expressed its definite conclusions with regard to Mr. Fielding's latest tariff changes. While pleased in a general way with their tendency, which is to give increased protection to Canadian industry, the association does not approve of the changes in detail, nor, speaking generally, does it consider that the Government has gone far enough. The increase of protection to the woolen industry by a decrease in the British preference is deprecated on the ground that it is liable to be misunderstood in the Mother Country. With regard to the enactment attempting to prevent dumping, the association believes that the only true remedy for dumping would be by means of an outright increase of duties on woolen goods. Does this mean that the duties should be made so high that the preference discount would be of no effect? The Government cannot be expected to relish a suggestion that it will stultify itself by such an artifice.

But the association urges other considerations tending to show that dumping could not be prevented by the means proposed. The new regulations are, it is pointed out, attended by numerous defects, such as the evasion of the laws by means of rebates, commissions, and other methods, let alone the difficulty of keeping officers at the 500 Canadian ports of entry properly informed as to what goods are made in the Dominion and other particulars which it would be necessary for them to know in order to determine the application of the clauses in question. The manufacturers, according to the association's statement, are still quite convinced that the changed conditions now prevailing in Canada demand an immediate thorough revision in order to transfer to this country the manufacture of many goods now imported from elsewhere. They, therefore, welcome in no uncertain manner that portion of the Finance Minister's speech which referred to the forthcoming appointment of a tariff commission, and express the hope that it will be of such a character as recommended by the association's resolution passed at last year's annual meeting.

THE WEATHER AND THE CROPS.

Our Winnipeg crop despatch, dated 30th June at noon, stated that the "weather for the past week had continued favorable for the growing grain throughout the whole West. At almost every point weather conditions have been all that could be desired. The rain has fallen off since last week. Warm weather is what is needed now; with higher temperature the outlook could not be improved upon. The report issued at Regina yesterday by the Government of the Territories estimates increased area under crop in our Western Territories at 500,000 acres, and most encouraging reports of the progress of the crops have been received by the department. The general feeling is most hopeful, and the business tone is improved throughout the whole country." This week, for the first time, there is a halt in the uniformly rose-colored accounts from the West, for yesterday's Winnipeg telegram says: "Weather throughout the West during past week cool, with plenty rain. General tone of crop reports not so favorable this week as last. The rainfall has been much heavier than was needed in some parts of the country, and grain on low-lying land suffered accordingly. There has been little damage where the natural drainage was good; on high ground crop looks most favorable. The standing grain is extremely heavy, showing excellent color and development."

In Ontario the June weather did not vary much from the normal, except that the amount of moisture was considerably less than usual. Temperatures were comparatively low, especially at night. The wheat crop in this Province shows material improvement, especially on high, well-drained land, but it is hardly likely to be a full crop. Prospects for hay are very good, indeed. Small fruits have improved, but apples and peaches are unlikely to be abundant. Root crops are doing particularly well in most localities.

In Quebec the month was characterized by dryness and persistent breezes, which somewhat delayed vegetation. Hay, too, looks less favorably than it did as a consequence. In New Brunswick and Nova Scotia the weather on the whole was fine, but two or three more or less serious frosts were reported. Crops are coming on well for the most part, especially hay and grain. Roots promise average results. About the same may be said of Prince Edward Island. Pasturage is fair.

British Columbia weather was cool early in June, and this retarded growth to a certain extent. Greater warmth later on, however, has brought about improvement. In New Westminster district the winds were often very dry, and some damage to fruit was caused by frost. A large crop of cherries is reported, but apples are only fair, and plums, pears and peaches seem to be almost a failure.

THE WOOLEN SITUATION.

Greatly enhanced interest is being taken in the situation of the woolen market just now, the fact being recognized that the new clip of wool will be fully 30 or 40 per cent. less than normal. It may be remarked that this, namely, a gradual falling off in the production of Canadian wool, is a feature which has been noticeable for many years past, whatever may be the cause. Some, who claim to know, state that the annual clip might be much larger than it is if the sheep rearers as a general rule had a more intimate acquaintance with their business, and it is to be remembered that it is only of comparatively recent years that live stock farming has become the really profitable industry it now is through improved methods. Perhaps more education of a similar nature would be attended with equally beneficial results in sheep farming. Meantime, competition among dealers for the new season's wool has become quite keen, with the result that prices are not only much firmer than they were, but higher. While it is true, too, that actual transactions on United States account have not been large, there have been several enquiries thence, and this fact has strengthened the market materially. The prevailing prices for fleece when the quality is right are about 18½ or even 19c. per pound for washed, 14c. for rejected, and 11½c. for unwashed. Pulled wools show also a marked improvement, in sympathy with the better standing of fleece and with the situation in the outside market. Supers are quoted locally at 20 to 21c.; and extras at 22 to 24c. A late despatch from London reports an advance of 10 per cent. in cross-breds at the wool sales this week, and this, of course, is another strengthening factor.

Of course, the future run of the market for wool depends largely upon the situation across the line, and as to this the news which comes to hand is of a very conflicting nature. From Boston, a great woolen centre, comes word that the manufacturers have bought little of anything, and show slight interest in anything but medium and low grades, which they are taking in hand-to-mouth fashion. New wool is arriving freely, and as stocks of old are in light compass, there is no pressure to sell. The consumers or manufacturers consider the prices asked altogether too high, and are waiting to see the outcome of their efforts to boost the prices of light-wear clothing materials before entering the market at all. In the wool-growing districts, however, there is a totally different story to tell. Dealers have become quite excited, are buying freely and at higher prices than ever. It is difficult to reconcile their attitude with that of the buyers in the manufacturing districts. In New York the situation seems to be clearing, and dealers and jobbers seem to think it is no use holding out against high prices much longer. In Great Britain the wool market continues very firm, with only small supplies coming forward. Old stocks, too, are pretty well cleaned up.

Returning to the domestic market, the Canadian mills are showing greater vigor in their orders for pulled wools. It looks as if the fall trade is likely to be an active one. Our mills are showing great enterprise in the turning out of materials heretofore only affected by the European manufacturers, and in some cases the attempt has been crowned with full success. A feature which should meet with general approval from the consuming public is that in design and general appearance these home-made fabrics are, so to speak, a cross between the quietness of the English and the light, *chic* airiness of the French. For climatic reasons and otherwise the compromise is commendable.

MILD-MANNERED THIEVING.

A most unusual thing has happened in banking circles. A bank clerk up in Woodstock has gone wrong and robbed his bank of some seven hundred dollars. And yet he is a man who neither drinks nor gambles; neither plays the races nor the stock exchange; nor does he, so it is said, give way to other expensive forms of dissipation that beset the feet of the young men. He appears to be, indeed, as things go now-a-days, a well-behaved young man, of rather domestic habits. What, then, induced him to steal from his bank? And what did he do with the money he stole? By his own confession he was fond of good clothes, and liked expensive tobacco, and it was to provide these that he became a thief, since his salary would not permit him to buy clothes as "swell" or tobacco as fragrant as he chose. Little by little he took the money—steadily his tailor's bills and tobacconist's bills ran away with the remnant of his salary—month after month he got deeper into the web he was weaving for his own ruin, while all the time an outwardly respectable church-going person, "with no bad habits."

It is an unusual case, as we have said, supposing it to be truly stated as above. Here is a young fellow with no virulent vices, no repellent or disgusting habits, who resolves to be well-dressed *coute qui coute*. As some fellows must have the best horse in a livery stable, the finest bicycle out of doors, the most expensive canoe on the Bay, so this particular fellow must have the best-fitting clothes, the daintiest pipes. It is as if he had said, with the French philosopher, "Give me the luxuries of life, and I will dispense with its necessaries." There are people who, reading of his case, shake their heads and insist that there is a woman in it, unbeknownst. But the bank which employed him seems to have taken Hobbs' measure as belonging to the lighter type of dishonest men, for it has declined to prosecute, and the prisoner was discharged on Monday last. The amount he stole has presumably been made up. An odd sort of villain, surely; out of place on this continent and in this age; nothing dashing or intrepid or wholesale about his vices, for it is only a mouldy sort of dishonesty that robs banks in order to buy tobacco and trousers. We are not even told that he played bridge.

We cannot find warrant in the circumstances, as some appear to do, for any impeachment of the honesty of bank clerks, as a whole or any sweeping condemnation of their habits in private life. Bank clerks are no worse than other clerks (some of them think themselves a great deal better). Fools are among them, and cads, but the honest man, the capable employee, the unpretending gentleman are among them, too, and far outnumber the others. Nearly every case of defalcation which occurs proves, however, that room still exists for reminding people, young and old, of the folly of extravagance, and the safety of living within one's income. These days of show and glitter, of fast life and the expensive fads of fashion have drawn many into expenditures which they cannot afford. If a warning will help some of them to give up foolish and expensive whims, and live honest and rational lives, that warning they now have.

FIRE INSURANCE IN CANADA A HUNDRED YEARS AGO

FIRST ARTICLE.

At a time like the present, when fire insurance matters are attracting so much attention, it may not be uninteresting to glance at the position of fire business in Canada a hundred years ago, a date at which even in England the business was in an experimental stage, and none of the largest corporations of to-day had yet taken being. An unique opportunity of doing this is afforded by the recently completed restoration and embellishment of the old office premises of the oldest Canadian fire insurance company, the "Quebec," on St. Peter Street, in that city. From papers found in the old foundation stone and other documents disinterred in consequence of the alterations some curious and interesting particulars are available. One little pamphlet of fourteen pages, published in France, without author's name, by "The Printer of the Laws of the Very Excellent Majesty of the King," is specially interesting in the glimpses it affords of by-gone days.

It would appear, then, that from 1800 to 1815 communication between the Mother Country and Quebec was more or less hazardous and uncertain in consequence of the privateering, etc., of the French and American wars. At the same time people wanted insurance, for fires "were frequent, and often destructive." About ten of the British offices or underwriters had representatives among the merchants of Quebec, who, "though certainly very respectable," did not guarantee the obligations entered into by them for their principals three thousand miles away. It was the custom to stipulate, before accepting an insurance, that if a fire occurred and did damage to the extent of more than £300 the amount must be claimed direct from the assurers in Britain; and further, that if a loss of less than £300 occurred, and was disputed by the local agent, the claim also must be made direct. With epistolary communication conducted by sailing ship, and interrupted by war, it is not surprising that annoying delays in settlements occured. In fact, cases were known where settlements had been pending nine years without question of *mala fides*. Difficulties were aggravated by lack of knowledge on the part of the insured as to what would be required as proof by the British insurer, and on the other side by lack of acquaintance with local terms and conditions. Rates, too, were high and purely arbitrary. They were limited only, as the public claimed, by their inability to pay more. English directors laid down rules and made distinctions, "odious, inconvenient, and even ridiculous," owing to their lack of acquaintance with the country. For example, they divided Quebec into three districts, the Lower Town and two others to the north and south of Rue St. Jean.

> "Although buildings in the Lower Town were mostly of stone, with very little wood, and had tin roofs, and were near the St. Lawrence (much nearer than they are now, for the portion of the shore where most of the handsome wholesale warehouses now stand had not then been filled in) they could only be insured by paying very nearly one-quarter of their annual rental value for insurance."

For the St. John districts, the more southerly, though lower and nearer the river, the rates were fifty per cent. higher than in the northerly district. This was evidently a burning question with the inhabitants of "La bonne vielle Ville," and their anger was by no means lessened when they reflected

> "That the City of Montreal, which has always suffered much more by the accidents of fire than our capital (note well the slight implied; Quebec was the capital) has nevertheless always passed for being much less dangerous for fire insurance purposes than our Capital, even in its least exposed parts."

Our unknown writer now brings in a compliment to British fire insurance institutions which it is gratifying to think is still merited. "If these difficulties exist in conducting affairs with the British companies, who have always enjoyed the most respectable reputations, and whose integrity in commerce is indisputable," what were the tribulations of those who were induced by "dishonorable agents" to insure with American companies? The hardy "wild-cat" must have begun to flourish early. It seems that sharp-witted parties, representing companies said to be joint stock, and hailing "from some unknown village in some one of the United States," "jealous of the commercial prosperity of Great Britain and her colonies," used to come to the Canadas and secure premiums for policies, which, in case of loss, turned out valueless"; and here follows a passage that might be taken from some utterly up-to-date anti-Cobdenite publication. It referred to the iniquity of allowing such things while no British subject "under any circumstances whatever was permitted to do insurance business in the United States; and, indeed, the States denied each other the privilege among themselves." It would seem, too, that even in eighteen hundred and odd the Yankee had acquired a reputation for "cuteness," for we are assured that these wicked agents "passent pour être trés experimentés dans les affaires"; and further, their sole object "was not the amelioration of the Provinces, but to gain money to spend elsewhere."

SIGMA.

COMPANY PROMOTION.

For several years previous to the autumn of 1902, the number of new companies organized and incorporated was probably unprecedented in the history of the development of Canada. As is always the case in periods of this kind, there were a very large number of spurious promotions, for the public when their attention is once attracted and centred on a particular kind of investment usually lose their better judgment entirely and invest their money in a great many questionable enterprises. As the period above mentioned saw a multitude of new companies on the financial horizon, so the past two years have seen a great many of them disappear entirely, much to the chagrin of the average investor. Looking back over the financial field this past five years, it seems almost certain that the number of liquidations to follow during the next several years will be very much augmented.

It is interesting to note the view that the courts of law have taken during these periods in reference to company promotion in general, and in reference particularly to probably one of the largest promotions of recent years in Canada, viz., "The Canada Cycle and Motor Company, Limited." Respecting this case, we may remind our readers that early in the year 1899 there were a number of large plants throughout Canada which were turning out large numbers of bicycles to satisfy a demand for those machines that was apparently increasing enormously each year, and to which there seemed then to be no limit. At this time one Jaffray conceived the idea of amalgamating all the existing bicycle companies into one large organization, and in company with one Evans, a bicycle manufacturer, with whom he made a written agreement as to the division of profits arising from the promotion of the amalgamation, set about to carry out his plan. This agreement between the parties above provided for the equal division between them of such profits as were earned.

The man Jaffray, after doing all he could toward carrying out his plan, was almost beaten, when he encountered one Ryckman and laid his scheme before him. The result of their conversation was that Ryckman undertook to interest a number of capitalists in the undertaking, and agreed to take over the options of all the large bicycle plants which Jaffray had previously secured. Jaffray was thus relieved more or less from the actual worry and work of perfecting his scheme. Subsequently Ryckman interested Messrs. George A. Cox, Warren Y. Soper, the late W. E. H. Massey, and others, in the proposed enterprise, and one of these men on behalf of his associates offered Jaffray a commission of $50,000 in the event of the consolidation being accomplished.

A large company was consequently formed with an unduly large capitalization, known as the Canada Cycle and Motor Company, and these options on the various bicycle plants throughout the country were closed out and the property sold to the new company at a very large profit. The amounts received by the various men who assisted in the promotion of the company were very large, and if the demand for bicycles had continued to increase in the way in which its promoters apparently thought it would, we should not likely have heard anything further of the sums of money that were expended in the promotion of this gigantic enterprise. However, with the decline of the demand for bicycles and the other attendant misfortunes of trade, the company gradually got into difficulties of various kinds, of which the public generally know a great deal, but the unfortunate shareholders a great deal more.

There has been a regular flood of litigation threatened and actually instituted by reason of the transactions connected with the promotion of this company, but probably one of the most interesting suits was that brought by Evans above against Jaffray, his partner, and against Messrs. Cox, Soper, Ryckman and others; in which action the plaintiff, Evans, claimed an account from the defendant, Jaffray, of all the moneys he had received from the other defendants for his services in promoting the company and for restitution to him of his one-half share of the profits so derived.

Jaffray found, as a matter of fact, that he could not collect his whole $50,000 from the large capitalists interested, and he compromised his claim by accepting from them $20,000 in cash. There is ground to believe that Jaffray's co-defendants in the present action led him to believe that they would indemnify him against any claim that might be brought against him by Evans for a share of his commission. The reason why Messrs. Cox, Soper, and others, were added in the action as defendants was that the plaintiff claimed that they had induced Jaffray to break his partnership agreement.

This case was fought of course very stubbornly from the beginning by the defendants, and through the initial stage of action very technical points were taken, which resulted in interlocutory motions being appealed from one court to another, so that the main question at issue did not come up for trial until very recently, before the duly appointed Mr. Justice Britton. Although the plaintiff in this action produced a written agreement between himself and the defendant Jaffray, setting out the terms of the partnership, and although it was proved that he did not receive his share of the profits which had been paid to the defendant Jaffray, yet the learned Judge saw fit to dismiss his action entirely with costs, which seemed to be a great hardship under all circumstances of the case.

The plaintiff, however, took his case to the Court of Appeal for Ontario, and it was argued by able counsel there in every one of its many important phases. As the Court of Appeal during the past few days delivered judgment in this matter in which they recognized the plaintiff's claim, it is interesting to note that Evans, after several years of litigation, has finally had his rights in reference to the promotion of this company recognized by the courts. The action as against the defendants, other than the defendant Jaffray, was dismissed by the Court of Appeal on the ground that the defendant Jaffray had full power under his partnership agreement to settle with his co-defendants as he did, and that therefore the plaintiff could maintain no claim as against them; and if they were not partnership assets, the plaintiff had no interest in the settlement or in the moneys paid thereunder.

The court thinks, however, that as against the defendant Jaffray the plaintiff was entitled to an account of the moneys he had received from the defendants Cox, et al., and after the account had been taken was entitled under his written contract of partnership, to an undivided one-half of the said money so received. Of course the decision of the Court of Appeal in this action is appealable, and will probably be carried to the Supreme Court of Canada or the Privy Council in England, but in the meantime the highest Court in Ontario has recognized the plaintiff's right to payment for services which he rendered in connection with the promotion of this large enterprise. This litigation, extending over such a long period and implicating so many of our well known capitalists and promoters, has given the general public at any rate an inkling as to the inside workings of a large enterprise of this kind and as to the methods adopted by promoters in advancing their various schemes.

The Nova Scotia Steel and Coal Co., Limited, have declared a dividend of two per cent. on the preference stock of the company for the quarter ending June 30th, 1904.

THE CALGARY CONVENTION.

The convention of boards of trade of the West, at Calgary, to which Westerners have been looking forward with such keen anticipation for a long time past, is now a thing of history. That it will result in benefit to the whole territorial country there is little doubt. Something was needed to bring into harmony the various more or less conflicting views and currents of trade, such as are bound to exist in a new and enormous region like the North-West; and a bringing together of the representatives of so many distant sections, at a place where they could amicably come together and discuss the various pros and cons of each matter, should go far towards achieving this meritorious aim. At the convention, twenty-six boards were represented, and fifty-seven delegates took part in the proceedings. Mr. Thomas Tweed, of Medicine Hat, was elected chairman.

In the proceedings which ensued, the question which seemed to draw most acute interest was the old troublesome one of insolvency legislation by the Dominion Government. A resolution, which was strongly favored and finally passed unanimously read as follows: "That in the opinion of this convention, it is desirable that a general bankruptcy act should be passed by the Dominion Parliament providing for the liquidation of the estates of insolvents by commercial process and to that end that representations by the mercantile interests from the provinces and territories be requested to assemble at some central point to confer with the Government in the framing of such legislation."

Another resolution stated the opinion of the congress that if Hudson's Bay navigation were commercially practicable, it would afford a shorter and more advantageous outlet for western products to Europe, and that Parliament should make all the enquiries necessary to settling the question. And an amendment read to the effect that without a doubt the Bay and Straits are commercially navigable.

Mr. W. Pearce, of Calgary, read a good paper on Oriental trade, and on the wonderful possibilities it holds out for Canadian and particularly western enterprise. In his opinion, when the Panama Canal should be opened, the Vancouver route would offer cheaper rates than the one by way of Lake Superior.

Another topic of great importance to western interests was presented in a paper by Mr. Thomas W. Lines, of Edmonton, who advocated the establishing of a grain inspection point in Calgary. The district around Edmonton will in ten years, it is claimed, the exporting 20,000,000 bushels of grain annually, and it is essential that an economic basis of transmitting this great volume of trade should be secured as soon as possible.

The proceedings of this important gathering of western business men were brought to a close with a highly successful banquet at which Mr. Wm. Whyte, vice-president of the Canadian Pacific Railway Company, was present and made a speech full of allusions to the rosy promise held out to Calgary and other growing Far West centres.

RETAIL MERCHANTS' ASSOCIATION.

The fifth annual convention of the Retail Merchants' Association of Canada met on the 5th and 6th inst., in Toronto, with delegates present from many near and distant parts of the Dominion. Mr. G. J. St. Leger, the central president, occupied the chair. This gentleman explained that the Association's object was protection, and that by protecting themselves they protected the public. Much good had already been accomplished, he said, as one illustration of which was instanced the improvement in the new Assessment Act. Mr. W. Farrar, of Hamilton, spoke in opposition to various schemes often adopted by merchants to increase trade. Another lamentable thing was the adoption by some merchants of methods to crush competition by slaughtering prices. The Association, he thought, deserved credit for defeating many a fake scheme which would work an injustice on the people. The secretary reported that twenty-seven new branches had been added to the Association during the year, and that others were in course of formation. A discussion which created keen interest was upon the subject of how to simplify the existing methods of collecting petty debts. Mr. M. Moyer, of Toronto, proposed that all claims under $100 should be collectible before justices of the peace, instead of in the Division Court; that complaints be heard in any city, town or township in which the person complained against is found or in which the contract was made; the magistrates' fee to be 25 cents, the complainant to have the right to serve his own summons; justices to have power to order payment of judgments by installments, and in default to issue distress warrant, $7 per week to be exempt in the case of a married man.

Other questions which created discussion were the cartage and freight rates charged by railroads, electric lighting for municipalities, fire insurance matters, the price-contract plan of handling goods, etc., etc. The election of officers for the current year resulted as follows: President, A. L. Geen, Belleville; first vice-president, T. F. Kingsmill, London; second vice-president, H. C. Ellis, Ottawa; treasurer, W. B. Rogers, Toronto, re-elected; secretary, M. Trowern, Toronto, re-elected.

DEATH OF JOHN J. LONG.

The death of Mr. John J. Long will be deeply regretted by a wide circle in Canada, more particularly in Collingwood, of whose commercial prosperity he has been a mainstay, and where he was universally respected for so many years. The exact circumstances of his death are unknown, the dead body having been found in the river Don, east of Toronto, on Wednesday last. For some time past Mr. Long's health has been far from good, he suffered from sleeplessness, and only two or three week ago returned from a trip to England, since which time on occasions a certain depression has been observable by his friends. There is reason to believe that this unhappy, nervous condition, of which insomnia and lapses of memory were symptoms, was the result of excessively close application to business and the lack of such change and recreation as would lessen mental strain. We have heard much that was remarkable about Mr. Long's power of work, his mastery of detail in the counting house, his resolute and persistent devotion for long, long hours to business—his own business; his friends' business; the town's business. But it is possible to overdo mental work of the kind and to kill valuable men thereby. Men need to be warned that it is neither good sense nor good business to subject any one's brain to such tension as to make him an unhappy invalid at sixty-one.

Mr. Long's business interests were very wide and important, for besides being a prominent member of the firm of Long Bros., Collingwood, which covers large mercantile shipping and lumbering interests in the northern part of Ontario, Mr. Long was president of the Collingwood Shipbuilding Co.; vice-president of the Collingwood Meat Co.; vice-president of the Anglo-American Fire Insurance Company; director of the Bank of Toronto, of the Confederation Life Co., of the Northern Navigation Co., etc., besides being interested in several land and financial companies. He was born in Limerick, Ireland, in 1843, and was brought to Canada by his brother Thomas, while yet a lad in his teens.

MANCHESTER LETTER.

The Affaire Dundonald brings to mind a bit of history that has been generally overlooked in the press. Financial people may be interested to know that the grandfather of the ex-commandant was implicated—unjustly as the evidence seems to show—in the huge Stock Exchange fraud of 1814. By circulating a report that Napoleon was dead, an uncle of the 10th Earl with some friends, cleared a profit upon £826,000 worth of consols. The uncle fled, and Admiral Lord Cochrane, as Dundonald then was, lost his rank and honors and was fined £1,000. Years after, his decorations were restored to him. Little doubt exists that the Admiral was a much-wronged man who suffered for his loyalty to a relative, and his fidelity to his country. For the 10th Earl had made himself a thorn in the side of the corrupt naval administrators of the day. He would not be silent or tactful. And it is recorded historically of the family that all its members have been "long noted for an original and dashing turn of mind; sometimes called genius and sometimes eccentricity."

For years, municipalities have been hungering after insurance departments of their own, with which they might pay the heavy fire-premiums on commercial property. The Municipal Mutual Insurance Co., Limited, was called into being to satisfy that aspiration. Twelve Yorkshire city and borough councils have decided to form a North of England branch. The company has no capital and no shares, it is supported by the mutual guarantee of its members. Business is taken at the rates each authority has been paying, and rebates, at the dictation of prudence, are to be paid out to members from the reserve funds. It is estimated that in five years a small return and in eight years a larger one will be given. Experts have foreshadowed a less fortunate future but the fact remains that English municipal property is a good risk on the whole. A legitimate objection is taken to condemning one town's ratepayers to share the losses of another, with which it may have nothing in common. The voting power is vested in the constituent authorities, and the services of delegates are purely honorary.

Smith, Payne & Smith, of Lombard Street, is a name that needs no introduction in any part of the globe. One of its partners, Mr. Nigel M. Smith, recently died, and his estate has been disclosed to be worth £35,907. A sidelight on the profits of London bankers is afforded by a recapitulation of the fortunes left by other members of the Smith family.

Mr. Samuel Geo. Smith (d. 1900) leaving	£1,553,965
Mr. Rowland Smith (d. 1901) leaving.....	603,437
Mr. Reginald Abel Smith (d. 1902) leaving.	292,758

Calls have made money perceptibly scarce in the market for the time being. Nevertheless the prophets adhere to their belief in a reduced bank-rate soon after the turn of the half-year. Less confidence prevails as to the course of trade and the prices of industrial shares. Business remains insufficient, freights are low, textile trade recovers very slowly from its blows, electrical enterprise is remarkably nonrenumerative, and retail trade—a good index of spending power—leaves much to be desired. As to mining business it can only be remarked that the Westralian air is full of scandals, and that South Africa still hangs upon precarious hope.

North Country.

Manchester, 24th June.

LIFE ASSURANCE ITEMS.

Our Manchester correspondent tells us of the rumored amalgamation of three British life companies, which do a good deal of business in the North of England, and are in very strong competition. Manchester and Liverpool are the headquarters of the companies. If the amalgamation should be carried through, one large company, with probably a million pounds' reserve, would result.

The embezzlements for the month of March, as reported in "The Bulletin" of the United States Fidelity and Guaranty Company, amounted to $1,057,157. Classified according to professions and occupations, they were as follows:

Banks	$169,034
Benevolent societies and institutions	26,562
Building and loan associations	3,000
Court trusts	142,800
Federal and state	115,044
Firms and corporations	47,465
Insurance companies	2,263
Municipal	36,500
Transportation companies	25,342
Miscellaneous	489,147
Total	$1,057,157

THE INDEPENDENT ORDER OF FORESTERS.

Editor of the Monetary Times:—

Sir,—Being a member of a firm who have been subscribers to your valuable paper for a number of years, I have frequently seen remarks made by you in reference to the management of the Independent Order of Foresters. And being a member of that order for upwards of twenty years and somewhat anxious for the success of the society I have taken much interest in your remarks, which I trust have been without prejudice.

I notice in your paper under date of May 6th last, that a reference was made by the Superintendent of Insurance for the State of New York, in speaking of assessment and fraternal insurance in which he expressed his opinion "that this system of insurance is fundamentally unsound." In your issue of May 13th last, reference was made by you to a letter received from your Montreal correspondent, referring to a gathering in that city of a number of the members of the Independent Order of Foresters, from which you made some remarks under the heading of "An Alluring Blow-Out," and giving the assets and liabilities of the order as follows: Number of certificates in force at the end of last year were 219,492 in all countries, representing an insurance of $238,124,000. Put against this, sum on hand $7,326,582, and we have the munificent sum of $3.07, which statement was corrected by you later and acknowledged to be over thirty dollars per each member. Dr. Oronhyatekha, the Chief of the Order, in his report at the meeting of the Supreme Court held in Toronto in 1898, referred to the advantages to the membership of a fraternal society, in which he said, "No one at the present day can deny the fact that insurance benefits can be given at a less cost by a society with a lodge system than by the old line companies for the following among other reasons. (a) Because in the former system the security of new members is done largely by the Courts or Lodges practically free of cost. (b) Because thereafter the assessments of the members are collected by the Courts and sent to the Supreme Court free of cost. (c) Because no dividends are required to be earned with which to satisfy shareholders. (d) Because all the profits are carried to the credit of the policyholders and used in reduction of the cost of their benefits."

The Dr. then attempts to show the manner in which policyholders are treated by old line companies. He is reported to have said; "In old line companies the insurance must always cost more: (a) Because the greater portion or the whole of the first year's premiums or even more is used to pay agents for securing new members. (b) Because thereafter upon the payment of every annual premium there must be deducted a certain percentage as a renewal commission to be paid to the agent. (c) Because dividends must be earned annually for the shareholders, that being a fundamental of all the proprietary old line companies, and without which they would never be called into existence. (d) Because the profits are used to supplement the interests of the shareholders by bonuses, etc., instead of being used only in reduction of the cost of the benefits as is done in the Independent Order of Foresters and other fraternal beneficiary societies.

I am willing to admit that the members of the Executive Council (the Dr. among others) do not, neither do I think that the members of the subordinate courts expect to have the members of the said Executive give their services for a small amount, the figures for which I will give you as I proceed. I now wish to make some remarks in reference to the economy (?) which the Dr. says is practised in the expenses for management of the I.O.F., which he claims is only 5 per cent. Some of which are as follows, being a few among many others:

Six members of the Executive Council.	$28,000.00	per	year	or	$89.45	per	day.
Organizing salaries and expenses (for 1902)..	184,834	"	"	"	590.52	"	"
General management (for 1902)	97,586.61	"	"	"	311.78	"	"
"Forester" and supplies (for 1902)	72,059.27	"	"	"	230.22	"	"
Branch offices (for 1902)	134,387.10	"	"	"	429.35	"	"
Refunds (for 1902).....	121,063.00	"	"	"	386.78	"	"
Furniture and furnishings (for 1902)	6,132.00	"	"	"	19.59	"	"
Travelling Expenses....	7,658.59	"	"	"	24.48	"	"

BRANCH OFFICES.

Under the above heading in the Dec. 1900 "Forester," an item of expenses appeared as follows: "Chicago, London, Paris, Scandinavia, India and Australasia, including organizing expenses in Australia, amounting to $13,147.31." May I be allowed to ask, do not branch offices in the above-named countries lessen our receipts very considerably when figures are produced showing that for 1902 the cost of that department was $134,387.10, or $429.35 per day as before stated.

THE TEMPLE BUILDING

Is certainly an ornament to the city of Toronto, and one which the members of the I.O.F. may feel proud of as far as appearances go, but financially I consider it not a success. In 1898 it was admitted to have cost the sum of $700,000, to which there has been an addition in an alteration which cost $40,000. The Supreme Chief stated in his remarks a few months ago that the receipts from the Temple Building for three months were $10,326.19. Maintenance yet for the same period were $5,154.52, leaving a balance of $5,171.67, or an average of $20,686.68 per year. The building referred to, of course, is one of the assets of the order, we will now suppose that the $740,000 had been invested at 5 per cent. per annum, which would bring the interest up to $37,050, consequently there is a loss to the order of $16,363.32 per year.

(Remainder Next Week).

◆

LIFE AND ACCIDENT ASSURANCE.

The former district manager of the Sun Life of Canada, at Newport News, Virginia; Mr. E. M. Peterson has been promoted to be state manager for North Carolina, with headquarters at Raleigh. Mr. Peterson has been with the company about a year.

Mr. A. B. Powell, manager of the Ottawa Fire Insurance Company, of Ottawa, having tendered his resignation, to take effect August 1st, we hear that Mr. C. E. Corbold, who has been assistant manager of the company for a year or two, receives the appointment of manager.

The Ontario Accident Insurance Co. issued a policy the other day for $36,000, in the aggregate covering the employees of the Robert Simpson Co., Limited, while on their trip to St. Louis to see the World's Fair. The insurance also covers proportionate benefits for the loss of limbs or sight, and a weekly indemnity for temporary disablement. Both sexes are included in the insurance. Such proofs as this of interest in one's employees, added to the action of the T. Eaton Company in closing their shops from Thursday night to Monday morning to enable their hands to enjoy the Dominion Day holiday, are gratifying proofs that corporations take a humanitarian interest in the lives and the comfort of those who work with them.

The big three, as the Mutual Life, the New York Life, and the Equitable Life are called, are discussing the seriousness of the gambling evil in its effect upon their employees. The Mutual Life, it seems, has recently dismissed several employees who gave more attention to sporting news than to business. And now the Equitable has issued the following circular to its employees: Dear Sir,—For reasons that seem proper to the officials of the society, you are hereby notified that your presence on a race track, in a pool-room, or in future to be seen in company with persons whose business it is to place bets on horse races, will be counted as sufficient excuse on which to request your resignation from the affairs of the society.

TORONTO, CANADA, JULY 8, 1904.

BANKING AND FINANCIAL ITEMS.

From Quebec comes news this week that counterfeit 25-cent pieces have been in circulation in that city. These coins have the late Queen's head and are dated 1900. They are filled with a quantity of aluminum, lighter than the genuine, have a greasy feeling, and have filed instead of milled edges.

The Bank of Nova Scotia has declared a dividend for the half-year at the rate of ten per cent. per annum, and the Royal Bank of Canada has declared one of four per cent. upon its capital stock for the half-year, both payable on and after the 1st of August.

The Acadia Loan Corporation of Halifax has declared a dividend of two and one-half per cent. on its called-in capital for the half year, and the Eastern Canada Savings and Loan Company, Limited, one of three per cent. on the paid-up capital for the half year.

An English friend has sent us a curiosity in its way, namely a 14 by 22-inch calendar for 1904, produced by the London firm of T. J. Marshall & Co., dandy roll and bank note paper-makers, Stoke-Newington, London, N. It is neither printed, etched, or lithographed, but is a fine piece of English paper "Watermarking," from a country inn and a group of horses at the top to the calendar of each month, and the illuminated signature at the bottom. The paper into which the watermarking is worked is from an old English paper mill, that of Messrs. W. Howard & Son, mill No. 33, near Canterbury. The whole is beautifully legible if hung in a window, so that the light may shine through the translucent paper.

The directors of the Great Northern Railway Company of Canada have decided to pass the interest for the quarter ending 1st inst., on the $4,040,000 worth of 5 per cent. bonds. This is preparatory, it is understood, to a practical reorganization of the whole system. Rumors are heard, too, as to a coming amalgamation with the Chateauguay and Northern Railway, which has an entrance into Montreal, and with the Quebec, New Brunswick and Nova Scotia road, the charter rights of which allow building to Halifax.

Mr. W. E. Farwell, president of the Eastern Townships Bank, and Mrs. Farwell have sailed for England per "Tunisian." The general manager of the same bank, when about to leave for a vacation trip in Europe, was presented with a pair of field glasses, and Mrs. Mackinnon with a basket of red and white roses. The presents were given by the staff of the bank.

At the convention of the Western Canada boards of trade in Calgary last month, a resolution was introduced pledging the business men of the Territories to secure the prohibition of American money in Canada. The debate which ensued developed a curious state of affairs. The business men composing the body unhesitatingly approved the proposition in principle, but were not inclined to press the matter at present. According to the Herald, the sentiment was general that the American should not be invited to settle in Canada, bring his family and his property and be greeted with a tax on his money in the same breath. W. F. Mytton, a Regina banker, declared that every settler coming in from the States should have the opportunity to utilize the only cash at his disposal immediately without the least possible delay. If the foreign money, however, was being distributed by pleasure seekers the banks and other institutions should exact a stiff discount. In other words the refusal to accept the American settler's money might operate to discourage this class of immigration. The resolution was lost.

◆

FIRE INSURANCE MATTERS.

It is perhaps well to be reminded of the great fires of the past, so that we may always bear in our memories the risk of conflagration. In a recent issue the St. John Globe recapitulates some facts and figures concerning the great fire of 1877 in that city. For example: "Twenty-seven years ago to-day the city of St. John was laid in ashes. The loss was figured at $27,000,000, and about $7,000,000 of this was covered by insurance. About 2,700 families, or 13,000 people were rendered homeless. The buildings destroyed numbered 1,612. The area burned over was about 200 acres.

The Toronto Board of Control have endorsed several of the Fire Chief's recommendations for increased fire-fighting equipment, and have authorized an outlay of $44,000 for immediate needs. A general and more expensive plan, however, including new stations and a high pressure service, is to be dealt with later.

Major Carlaw, of Toronto, has in his mind a scheme by which the Board of Fire Underwriters might be induced to take over the fire brigade of the city in consideration of an annual grant of one-half of the amount now spent upon it. He has a notion that the underwriters could supply a better service than now exists and yet make money, and Major Carlaw is credited with being a sensible man. The suggestion seems to indicate a belief that our fire-fighting is not always managed in a businesslike way.

◆

At the monthly meeting of the Board of Trade for Goderich, Ont., some important local questions were discussed. A reply was read from the Government Commission on Transportation promising that this body would visit Goderich during their tour of lake ports. Difficulties in connection with the official weighing of grain at the port of Goderich were discussed, and it was decided to make representations to the Government on the subject. The necessity for securing a line of passenger and freight steamers calling at the port was a fact well brought out by various speakers.

◆

—The annual meeting of the Tourist Association, of Vancouver, took place last week. The president, in his address, was able to point to several encouraging features in the past year's work of the Association, especially in respect to the distribution in many parts of the globe of literature setting forth in appropriate language the advantages of British Columbia from a business and sightseer's point of view. The following officers were elected: President, Mr. William Godfrey; 1st vice-president, Mr. F. Buscombe; 2nd vice-president, Mr. J. Buntzen; treasurer, Mr. J. J. Banfield.

◆

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, July 7th, 1904, compared with those of the previous week:

	30th June.	7th July.
Montreal	$19,262,934	......
Toronto	14,571,484	17,414,887
Winnipeg	5,212,229	5,685,446
Halifax	1,613,103	2,231,060
Hamilton	882,131	1,569,592
St. John	918,806	984.181
Vancouver	1,581,148	1,374,959
Victoria	504,796	470,195
Quebec	1,638,109	2,273,162
Ottawa	1,682,410	......
London	734,022	1,182,396
	$48,801,172	

SOUTHERN ALBERTA.

I have told you something of the transformation of great tracts of prairie land in Southern Alberta into farms. Farm houses are being built by scores and hundreds; fences are being run up. The sense of ownership, no doubt, determines a man to build a fence, and he does it to the confusion of all who are using the trail. When out driving it is exasperating to find the trail meandering into the centre of a fence. It is humiliating to a free wanderer to drive around and then as like as not repeat the misadventure many times during the day. This kind of thing is "jarring," and calls for the exercise of more philosophy than the average man is usually endowed with. There are breezy Western expletives used to adorn occasions like these, but the strongest of them fail to do justice to the outraged sense of ordinary mortals. Cattle wintered fairly well in Alberta, and there is now an unprecedentedly large calf crop, one rancher having no less than 4,000 calves to brand.

In a drive through the Mormon settlements great tracks of finely cultivated land can be seen where the sugar beet is grown, and proving very successful. The sugar factory at Raymond promises to be a thriving institution, the directors are well pleased with the first year's business, and more land is under cultivation this year than at any previous time.

Just three years ago the first sod of the town of Raymond was turned, now it has besides the sugar beet factory

Flour Mills.

We build Flour Mills, Oat Meal Mills, Corn or other Cereal Mills, from basement to attic, and can furnish the power plant as well. — Write and ask about the GYRATOR SYSTEM of Milling. Let us know your needs in the mill line and we will furnish you plans and estimates.

a fine up-to-date roller mill, with a capacity of 150 barrels per day. All the Mormon towns are built with an idea of elbow room; every house seems to have an acre of ground alloted to it, in which it sits square, and not only the ordinary garden truck is growing, but flowers of all kinds with small fruits and hedge rows, and trees are being put in by the thousand, and this part of Canada that was regarded only just a few years ago as a hopeless waste, is now being transformed by these people from Utah into a perfect garden.

Fall wheat beautiful fields are showing "Turkey Red," a Kansas variety; the sample has much improved. Conditions seem to favor its growth to the highest standard in Alberta. These Mormons are a healthy looking lot, the women particularly so; the people are pleasant to meet, are courteous, usually well informed, and are all right to do business with. There are four towns; Stirling, Raymond, Magrath, and Cardstone, that may be called Mormon towns. Neither of these own a licensed hotel. They are a very orderly people, the N.W.M.P. could go out of business if the residents of the West were all Mormons. There are a great many people coming in from Kansas, Nebraska, and other western states who are not Mormons. "Prairie schooners" trekking across the plains are just now a very common sight, with a spare horse or so being led, and sometimes with a few head of stock, as if the pilgrim had brought all his earthly possessions with him into this new land of promise. Near Spring Coulée, a Nebraska man is breaking 6,000 acres, which will be put under fall wheat this year. To see, as I have seen, an elevator being erected at Pincher Creek is an indication of what is taking place in the West, and the change is surely a welcome one.

WANDERER.

Red Deer, 25th June, 1904.

BANK CLEARINGS.

The bank clearings for the first half of the present year show, at the two principal cities, a decided decline. This is probably in large measure because of decreased trading on stock exchanges. The total bank clearings at Montreal for the half-year, ending to-day, are $473,392,000, against $559,515,000 for the corresponding half-year in 1903. This decrease of 15½ per cent. or $86,000,000, is the heaviest since 1900, when the decrease in the same relation was $64,000,000. The figures for the first six months of three years at the Montreal Clearing House were as under:

January to June, 1902	$516,517,356
" " " 1903	559,515,060
" " " 1904	473,392,132

At Toronto very similar conditions prevailed. The present has been a dull year for brokers. In June, this year, as in June, last year, there was a considerable drop, and a deal of liquidation. The totals at Toronto for six months of four past years were:

Six months, 1904	$380,079,042
" " 1903	417,951,939
" " 1902	404,048,286
" " 1901	301,654,028
" " 1900	250,164,636

OUR HALIFAX LETTER.

There are two projects in which the business portion of Halifax is now specially interested. One of these is the establishment of a plant for the construction of steel steamships. This has been under discussion for some two years. Liberal bonuses are available from both province and city by any organization taking up the work. It is understood that a strong company is ready to go ahead, providing assistance be given by the Dominion Government. It has been decided that the best way such assistance can be rendered is by a bounty of a certain sum on the tonnage constructed within a period of years. The Dominion Government has made known that it is prepared to aid the shipbuilding industry as soon as the several interests concerned can agree upon the amount of bounty to be paid, and its proper proportionment. It is claimed that there should be a graduated scale of payment, those in the East receiving a larger amount than those upon the Great Lakes. For instance, suppose it be decided to grant the Nova Scotia shipbuilder six dollars a ton bounty, the Toronto shipbuilding firm should receive four dollars a ton, while that at Collingwood should be content with two dollars. The reason for this is that the Halifax shipyard would have to compete directly with the old established plants upon the Clyde, in Scotland, in a manner in which the Toronto and other yards being further inland, are largely exempt. The plants at Collingwood being above the canals, experience no competition from across the ocean, as the cost of taking a steamer through the canals in sections would be so great as to prevent the attempt.

The president of the Halifax Board of Trade, accompanied by a delegation, recently returned from Ottawa after a fruitless effort to obtain a mutual understanding between the Halifax, Toronto and Collingwood interests. The Toronto people recognize the justice of the claim for a larger bonus in the East, and agreed to support Halifax's claim to the bounty on the basis above outlined, providing the lesser amount is granted to Collingwood. The latter, however, has failed to agree. At the recent meeting in Ottawa, an agreement was come to that the matter should be left to the Finance Minister, as arbitrator, to decide the proportion of the bounties. When the facts were laid before the Minister, however, he refused to be placed in that position, holding it an imperative condition to Governmental action that the interests must first come to a mutual understanding, promising that when they laid before the Cabinet a definite proposition on which all were agreed, it would be acted upon. Another attempt will shortly be made to reconcile the several interests. The other matter alluded to is the state of the Intercolonial Railway ocean terminals in this city. These have been allowed to fall into a state of decay, and great insufficiency. A year ago, after much agitation, the Board secured Government sanction to a plan for the repair and rearrangement of the piers, but up to the present little has been done. It appears now, however, that matters are to be pushed and the campaign of agitation seems likely to bear fruit. The Minister of Railways and Mr. Fielding expressed surprise that this important matter had not been attended to. The general manager of the Intercolonial was summoned to Ottawa, and in the presence of the Board of Trade delegation was ordered to proceed at once with the work.

The annual meeting of the Nova Scotia branch of the Canadian Manufacturers' Association was held in this city last Thursday. There was a good attendance of business men. Among those from outside the province were R. J. Younge, of Toronto, secretary of the Association, and A. D. Campbell, of Toronto, organizer of the Industrial League. It was decided to ask that Mr. Miller, the transportation expert of the C.M.A., be sent to Nova Scotia, and that he visit in turn Amherst, New Glasgow, Sydney, and Halifax to discuss with the members transportation grievances. R. M. Hattie, who has been secretary of the branch since its organization, announced that owing to pressure of work in his own profession, he had placed his resignation in the hands of the Executive. The following new officers were elected: President, Alfred Dickie, Stewiacke; vice-president, W. J. Clayton, Halifax; executive, Nelson B. Smith, F. J. Ward, J. R. Henderson, T. M. Cutler, G. S. Troop, Halifax; C. J. Sillner, A. F. Pelton, Amherst; Harvey Graham, New Glasgow; H. L. Hewson, Amherst; H. H. Hamilton, Pictou; J. P. Longard, Halifax; Ernest Hill, Dartmouth; W. B. Taylor, Halifax; James Munro, New Glasgow; Alex. McNeil, Halifax. Among other intelligence in the address of Mr. Younge was the announcement, of special interest to this community, that the Postmaster-General had assured the Association that a parcel-post service to Trinidad would shortly be established.

An agreement has been entered into with the Dolliner Mountain Gold Mining Company, whereby the Government of the province will pay half the cost of sinking that company's shaft 1,000 feet below the present depth, which is

Halifax, 4th July, 1904.

OUR SAINT JOHN LETTER.

There is said to be some prospect of the Maritime Sulphite Pulp Mill, at Chatham, being started at an early date. The mill was built chiefly by Hamilton, Ontario, parties, and after many difficulties finally went into liquidation. It has now been idle for two or three years. A few days ago the ratepayers of the town of Chatham agreed that if purchased and operated the mill would be exempted from all town and county taxes, except the school tax, and that this would be on a $100,000 valuation. At the meeting those promoting the movement gave the others to understand that there was a prospect of a good strong company taking hold of the enterprise, but it was not disclosed who the company are. The big mill at Mispec, a few miles from St. John, has now been closed down for some weeks, and there does not seem any likelihood of business being resumed at it this season. The Scotch owners are, it is understood, sending a representative out to look after winding up proceedings, which have already been commenced. It is hoped that there will be some reorganization and that business will again be started, but no announcements have as yet been made that give any idea of the intentions of the owners on this point.

Mr. George S. Cushing, head of the lumber business of Messrs. André, Cushing & Co., is one of the most progressive men in his line in the province. Mr. Cushing was for some time managing director of the Cushing Sulphite Pulp Mill, erected mainly by Captain Partington, of Glossop, England. On retiring from this position, he devoted his energies to considering some means of utilizing the ordinary waste from his lumber mill in making pulp. His experiments were successful, and he finally built and had patented a machine that grinds the wood up so that it can be satisfactorily used. Mr. Cushing has built a small pulp mill in connection with his lumber mills, and is now manufacturing a superior grade of sheathing paper that finds a ready sale. He is now considering the addition of new machinery that will enable him to use up old paper, and if this is installed he will become a genuine public benefactor, for a commercial use will be found for material that now goes in cartloads from the newspaper offices, binderies, etc., to the city dumps.

The Marine and Fisheries Department of Canada is arranging to build on Grand Manan island, at the mouth of the Bay of Fundy, a large building with freezing plant to keep therein bait to be supplied to the fishermen who carry on trade on the bay.

Willard Ogden, of Sackville, who has been carrying on some boring operations in his neighborhood, has discovered a large quantity of red sandstone. He will open a quarry at once. There are two other quarries in or about Sackville, both producing a building stone that is in demand all over the Maritime Provinces.

The St. John Street Railway Company will put into operation this week its new line to Seaview Park, on the shores of the Bay of Fundy. This is the first move made by the company to give the people an out-of-town service. A fine property on the bay shore has been secured, and the line extended to it. Probably bands and other attractions will be provided to influence travel.

Messrs. A. C. Smith & Co., produce dealers in West St. John, have leased from the Canadian Pacific Railway a site on Rodney wharf, and will build thereon a large warehouse. Messrs. Smith & Co. ship large quantities of hay and grain, and the warehouse will be used in connection with their business.

George Whittaker, a St. John merchant, is promoting a scheme to build a floating hotel for use in the St. John river. He is having plans for the same prepared by W. M. Mitchell, a local architect, and his idea is to provide a comfortable hotel with 130 sleeping rooms, and all the other necessary accommodations. It is hoped to get the hotel in operation by another season.

JOHN BULL AND HIS ISLAND.

Some of the self-satisfied manufacturing folk of the dear Old Country are waking up to the fact of modern competition by the United States and Germany, and the necessity of their doing something to combat it. This is gratifying, but oh! dear, there are so many of them to be aroused and converted. A few more trips of a few more hundred to Canada, like those of 1903, would work wonders: it would help to leaven the lump. It has been suggested by a London paper that the British manufacturer should extend his opportunities for employing his intelligence by travel. "There is, we are assured, one wealthy gentleman, well known in Manchester, who boasts of a single excursion to Boulogne and his safe return as a latter-day miracle, and it tells against us sadly. The German is prospecting in every part of the world; his goods are far inferior to ours, but he gets them into foreign markets where he would stand no chance if British wares were properly introduced." On this the Canadian Gazette comments: "In the earlier part of the last century, the grand tour was a necessary part of a nobleman's education. It should be so to-day, our contemporary thinks, for our commercial men. It certainly should, and we are glad to think that in these latter days the British manufacturer is taking a far wider view of his business chances. The visit of British men of commerce to Canada last autumn was an eye-opener to many, and many who went there and saw will go again." We have been more than ever struck with the soundness of a remark made by the Canadian agent in Birmingham on one occasion. "As a manufacturer, the Englishman is first rate—there is none better. But as a salesman of goods he makes he is third rate."

CONFLAGRATIONS AND INSURANCE.

At a recent meeting in New York of the National Board of Fire Underwriters, addresses were made by Captain Sewell, of the United States Army Engineer Corps, who had been detailed to report on the Baltimore fire by the United States Government; and others, among them, J. L. Cunningham, president of the Glen Falls Company, with a speech that held his audience to the last. A part of his address follows:

"The lessons of recent conflagrations are a compelling

incentive to underwriters to persistently advocate and every way influence as fast and as far as in them lies protection against recurrence of these fearful catastrophes. It is primarily our duty to provide a sound fire indemnity at the least possible cost, and it follows as a logical conclusion that conflagrations threaten impairment of insurance indemnity and also increase its cost.

"Our business added another glory to its honorable history in its prompt and magnificent response to the multitude of Baltimore conflagration claimants. It was the greatest financial sufferer in that fearful loss of property. Yet it was also the one sure source of hope, recuperation and consolation to an otherwise almost impoverished people. No wonder that a prominent Baltimore authority declared that fire insurance proved itself a surer reliance than fireproof construction or the combined fire departments of several cities, for it largely repaired a loss which these could not prevent.

"Suppose, however, that the Rochester and Toronto conflagrations had each equalled that of Baltimore, or suppose that Philadelphia, or New York, or Chicago, should suffer a fire proportionate to that of Baltimore—not at all an impossible supposition—the one reliance for conflagration help, the chiefest reliance against fire loss, large or small, everywhere, would become so weakened as to produce business chaos, which would involve unburned property owners and trade and commerce and even firemen.

"Remember, too, that notwithstanding insurance proved equal to its obligations in Baltimore, millions of property value was lost and the country is that much poorer. Insurance companies are poorer by the millions they paid. It was but a transfer of money for ashes. The property loss itself exists as a loss, and this fact adds to the duty of underwriters to the public and of the public to itself to not only advocate but to actively, heartily and unitedly co-operate in every effort which promises protection against this devastating danger to our towns and cities.

* * * * * * * * * * *

"In the meantime, let us not forget for ourselves, or fail to impress upon the insuring public, the fact that fire insurance is a tax which must be honestly assessed so as to produce a sufficiency of premium, not only to meet the everyday ordinary fire loss, but also to provide for such extraordinary conflagrations as have occurred and which are liable to occur again under continued unsafe general conditions, and wherever these conditions are flagrantly worse than the average let it be known to the property owners of that locality by 'pink slip' or other visible and distinctly manifest evidence, that their rates have been advanced to cover a local extra liability, and in this one of many ways fulfil the duty which underwriters owe to the public in advocating and influencing protection against conflagrations."

◆

HUSTLING ENGLISHMEN IN CANADA.

When so many lazy people, here and elsewhere, are airing their supposed grievances in the public press, finding fault with and abusing Canada because they cannot make a living out there, without exerting themselves (for they hate good, hard, honest toil), it is refreshing to hear the other side of the story and to know that there are some persons who have gone from this side of the water that can out-hustle the hustling Canadians themselves. I will give you an example: Two young men of solid business type, with determination written in every feature, thought seriously of going from England to South Africa to carve out a living; but they were dissuaded by some of their friends who spoke to them about the possibilities of trade openings in Canada. This friend gave them a card of introduction to a gentleman whose knowledge of all kinds of business in Canada and United States is considered by his friends as of the soundest. An interview with this gentleman soon decided them in the opinion that the Canadian North-West was the place for them; and he, on his part, feeling satisfied that they were honest and intelligent men who meant business, offered them letters of introduction to several people who would be of service to them in Canada; he also gave them some good advice, which they appear to have acted upon implicitly.

The following extracts from a letter just received from these young men, written in the North-West Territories of Canada, show that they were estimated at their true worth; that they are the right sort and bound to succeed. They are doing business as the Seton-Smith Company. I have given you these particulars because I know that you are always interested in the introduction to Canada of desirable people.

London, 18th June, 1904. CANUCK.

"Edmonton, Alta., Canada, May 18th, 1904.

Dear Sir and Friend,—

You see we have arrived at our destination. Our trip has been very pleasant and your introductions have certainly paved the way for us and acted like a passport in many cases. We wish to say that Mr. K——, the assistant freight agent at ———, is about the finest gentleman we have met in this country, and as for your brother, in Winnipeg, he has put us on the right track. Through his instrumentality we have secured some very fine business in this town.

We arrived in New York all safe and spent three days there, then went straight to Montreal for five days there; to Toronto for four days, then on to Chicago, where we made arrangements with wholesalers and the canned meat people; then to St. Paul and Minneapolis, where we were introduced to the leading merchants, so that we could do business with them when necessary; next, on to Winnipeg—a grand town, but the laws don't suit us. First, you must be a resident three months before you can get an auctioneer's license; a transient dealer's license costs $375; and there are several other drawbacks, so having made all necessary arrangements for the transaction of business with the leading merchants, we came on here, arriving last evening, and have already secured the finest business position in town and have something to start with and some good things in sight.

To-day we cabled a large order to England, so you see we are not sitting looking out of the window. Once our printed matter is ready, in a week or so, we will send it to you to see what you think of it. You have proved to us that your knowledge of the country and general business methods is thorough. Will also send you a photo of our business premises; we are opening a store besides our estate and auction business. We wish to again thank you and your son for all your kindness, and hope to be able to repay it some day."

◆

—On Monday last was held the annual meeting of the Quebec branch of the Canadian Manufacturers' Association. The retiring president, Mr. G. E. Amyot, read the annual statement of the work done by the branch during the year. Mr. R. J. Younge, general secretary of the association, from Toronto, was also present, and spoke of a scheme of fire insurance by which it was thought a considerable saving in premiums might be effected. The election of officers for the ensuing year resulted as follows: President, J. A. Vandry; vice-president, W. Marsh; executive committee, Henri Carriere, Dr. Morin, Major T. H. Hetherington, J. S. Langlois, and G. E. Amyot; representatives to the general committee, G. E. Amyot, James Timmons, and C. Blouin, M.P.P.

◆

—It is significant of change, perhaps of a return of reason, to find so persistent an Anglo-phobe, such a despiser of anything Canadian, as the New York Sun, writing in these terms of recent doings in the over-free United States and telling his countrymen to look to Canada for an example: "That part of Colorado, in which the disturbances are taking place, is on the verge of civil war. No progress can be made towards the 'blessings of liberty' until order is restored, if necessary, with ball and shrapnel. Shall it be said that an American commonwealth cannot protect the citizens and enforce respect for law when on the other side of the border the Canadian administration never fails in its duty? A squadron of North-West Mounted Police could bring order out of chaos in Cripple Creek in forty-eight hours."

Mercantile Summary.

Cape Breton mining interests are agitating for a trolley freight service over the Sydney and Glace Bay electric railway.

The North Star mining interests are to be reorganized, we understand, and a preliminary dividend of 8c. per share is being paid to shareholders. The receipts of the company last week were $114,292.

The contract for constructing a gravity ore tram line from Britannia Landing, on Howe Sound, B.C., to the present workings of the Britannia mines has been given out, the price being $72,000.

The Ames-Holden Company, of Montreal, Limited, held their annual meeting the other day, and elected the following officers: Mr. J. H. Holden (re-elected) president; James Redmond, vice-president; W. A. Matley, secretary; R. C. Holden, treasurer.

The Dominion Government announces that sealed tenders for the purchase of the South Shore Railway, the United Counties Railway, and the East Richelieu Valley Railway, or for any two of them, will be received by the Registrar of the Exchequer Court of Ottawa up to noon on August 3rd.

The Mic Mac gold mine at Bridgewater, would appear to have become one of the most profitable properties in Nova Scotia. Lately it has produced gold at an average of from $3,500 per month. Considerable improvement has been made in the equipment, and it is the intention also to run the plant by electricity.

As an illustration of what is being done in the way of shipbuilding in Nova Scotia, we clip this from the Maritime Merchant: "The Virginian, a fine schooner of 99 tons register, was launched from the shipyard of H. Elderkin & Co., at Port Greville, last week. Mr. D. A. Huntley has purchased from E. Churchill & Sons a lot of land near his shipyard at Riverside, Parrsboro, and will put down a set of blocks for docking vessels in need of repairs. He will also shortly commence the construction of a tern schooner of 125 feet keel. Shipbuilding on the Parrsboro shore is a little quieter than usual this season."

The Ontario Medical Council at its session last week came to the conclusion that the large and rapidly increasing sale of proprietary medicines, including snuffs and cosmetics, together with many alleged unwarranted statements in their advertisements, justified a memorial to the Dominion Government to make it a misdemeanor to state in an advertisement that an article is a cure for any specific ailment which the ingredients do not warrant. They would also ask for Dominion legislation to require the formula on each package in order to prevent imposition by selling poisonous and injurious drugs and strong alcohols as medicine.

MONEY RECEIVED ON DEPOSIT.

ABSOLUTE SECURITY

3½% interest allowed. Compounded half-yearly.

EVERY FACILITY

The Corporation is frequently made the Depository of large sums which firms and individuals may have on hand and of which they may not require to make immediate use, or which they may be holding or accumulating for some specific purpose. While such deposits may be withdrawn when required, if left for a specified time they may be received on special terms.

We shall be glad to meet or correspond with any merchants, manufacturers, or others, who have funds at their disposal for which they desire to obtain a liberal rate of interest combined with undoubted security.

SECURITY

Place your money with a strong company—one that enjoys the confidence of the public, where your money will be absolutely safe. That means purchasing our 5% Debenture. You may invest any amount over one hundred dollars.

Mention this paper when you write, and we'll mail our booklet entitled "An Investment of Safety and Profit." 5

Figures recently published show that the imports into Toronto have increased 1.9 times in the last ten years, and 2.9 times in the last thirty years. Between 1898 and 1903 they increased by the large sum of $20,152,447. Last year they totalled $42,971,437. In Montreal the growth of imports has also been very rapid, they having amounted last year to $79,725,553, or an increase of $26,442,204 between 1898 and 1903. Even Quebec city, which for some time showed great inactivity on account of the decline of her lumber trade and to the removal of shipping, shows up well in this respect, there having been an increase in her value of imports from $3,873,702 in 1898, to $7,530,777 in 1903.

Mercantile Summary

—The Canadian Hansa Cement Company, Ottawa, capital stock $500,000, has been incorporated under Dominion charter.

It is said that the American International Harvester Company, are contemplating the erection of a factory in Brantford, Ont., for making plows.

The total value of the buildings erected in Calgary during the six months ended with June 30th last, was $377,548.

The T. Eaton Company, Toronto, have purchased a block of land in a central district of Winnipeg, and will build thereon a large departmental store.

—The Star Chrome Mining Company, Limited, Montreal, capital stock $450,000, has been formed for the purpose of acquiring and working mineral lands throughout the Dominion.

The annual meeting of the shareholders of the London and Southeastern Railway Company was held in London, Ont., last week. The directors were unanimously re-elected as follows: Messrs. W. J. Reid, J. A. Campbell, T. H. Smallman, John Labatt, M. Masuret and Col. Little; as were also the following officers: President, W. J. Reid; vice-president, T. H. Smallman; secretary, Colonel Little.

Walter Hebert, a storekeeper of Thetford Mines, Que., who effected a settlement last May at 40 cents on the dollar, did not apparently find this sufficient to relieve him, for he has again assigned.——George Morin, general dealer at Windsor Mills, whose assignment has already been noted, is now offering 40 cents on the dollar.——A small milliner of Sorel, Que., Miss Beaudreau, has assigned, owing $900.

A news item emanating from Fernie, B.C., says that T. R. Stockett, general manager of the Crow's Nest Pass Coal Company, has resigned to accept a similar position with another company at Nanaimo. It seems now to be practically an assured fact that the proposed zinc smelter at Fernie will be built, a satisfactory site having at length been chosen. Its probable cost will be $100,000. Concentrates will be shipped to this smelter from Rosebury, where works are being erected for its initial treatment.

The iron ranges in the Michipicoten district appear more valuable, the more they are explored. Mr. J. M. Bell, acting for the Crown Lands Department of Ontario, reports that at McDougall's claim, a few miles north of the Pacaswa River, there is a wide band of magnetite in hornblende schists, where the ore body is about 200 feet by 350 feet in size, and appears to be a valuable property. Other areas are close by. Mr. Bell says he has encountered a number of quartz veins, of which he has taken samples for subsequent analysis.

The Singer Sewing Machine Company announces its intention to build at St. John's, Que., a large factory at a cost of about $1,000,000, which will be one of the largest of its class on the continent. The Dominion Bridge Company, Lachine, has already received a contract for the steel required.

Mercantile Summary.

A serious fire in Dresden, Ont., on Tuesday, did damage to Currie's grocery store, the Noxon Company's implement warehouse, and two or three other buildings, to the extent of about $15,000 in all.

The Canadian Pacific Railway people are about to construct a large new passenger train yard, also a twenty-stall round-house, in Westmount (near Montreal), to relieve the pressure on space at the Windsor Station.

A small grocer of Point aux Trembles, Portneuf County, Quebec, who assigned a short time ago, has succeeded in getting creditors to accept 25 cents on the dollar cash on their claims, amounting to $650. His name is Joseph Magnan.

Forest fires have lately been doing considerable damage around Sydney mines, C.B., several buildings of the Nova Scotia Steel Company were injured and more put in danger. Its new hotel was destroyed at a loss of $5,000. On Tuesday last serious forest fires were raging in the vicinity of Sydney. Flames swept in on the outskirts, destroying five houses.

It is proposed that the Canadian Manufacturers' Association shall open an office with additional space for sample rooms in London, England, in order to secure direct representation for the Association in that city, and in order to advertise Canadian firms. It is pointed out that such an office may likewise secure special information for Canadian firms respecting Government contracts, and perhaps secure labor, as well as information about raw materials or markets. The proposal appears to meet with acceptance in many quarters.

We have seen, upon a recent visit to Orangeville, the first of the buildings for the works of the Superior Portland Cement Company, Limited, at that place. It is of white limestone. A large quantity of machinery is arriving on the ground for installation, and the mill is expected to be completed within a year. This company's factory is situated nearer Toronto than any other cement works in Ontario, and with the large and conveniently situated deposits of raw material near at hand, the enterprise has, in the opinion of its projectors, good prospects of success.

"Most persons knew very little about the stones of which they so glibly talk," remarked J. W. Beath. "Very few have any idea of what a bloodstone is, though the red-spotted green heliotrope commonly goes by that name. Here are two pieces of real bloodstones, the bloodstone of the ancients. As you see, they are black. By rubbing one on the other I draw what looks to be blood. Touching it to my hand, it leaves a blood-like stain. No, there's no trick about it. These bits of black stones are simply hematite, and hematite is the real bloodstone. No one person in 10,000 seems to know this."—Philadelphia Record.

A syndicate, more or less in the control of the Great Northern Railway Company, is reported to have secured a large interest in the Granby Mining Company, which owns mines at Phoenix, and the smelter at Grand Forks.

Mercantile Summary.

The first Western Canada stock train of the season left Calgary for Montreal last Sunday. It consisted of 11 carloads of stock, to be rushed through at 20 to 25 miles per hour.

The building permits issued in Toronto during the month just past, totalled $1,099,820, or an increase of $672,375 over that month last year. For the half year, the value was $2,625,933. This list comprises 728 dwellings, 25 factories, 23 warehouses, and 21 stores.

The Quebec dealer in wholesale shoe findings and leather, Charles E. Roy, who became embarrassed a short time since, has assigned. His statement shows nominal assets of $94,487, and liabilities of $86,632. Beginning in a small way in 1877, he gradually worked up a large trade, which proved profitable for some years. But subsequently his business became too widespread. He also got overstocked last winter, and made some heavy losses by bad debts.

Word has come from Scotland of the death at Pollokshields, of Mr. Samuel Gunn, formerly of the firm of Bryce, McMurrich & Company, of Toronto. Mr. Gunn came to Canada fifty odd years ago to be a clerk for J. D. Bryce & Company, as the firm was then known, and worked up into a partnership. About 1870 he was appointed the manager in Glasgow, and held that position until the partnership was dissolved.

The annual meeting of the shareholders of the Ames-Holden Company, of Montreal, Limited, was held a week ago. The statement and report showed the most satisfactory year's business since the formation of the company. The directors elected are: J. C. Holden, S. H. C. Miner, W. A. Matley, A. N. Erskine, C. Bonnick, James Redmond, H. B. Ames, R. C. Holden, A. L. Johnson, A. C. Flummerfelt, W. M. Angus. Mr. Holden is president; Mr. Redmond, vice-president; R. C. Holden, treasurer; W. A. Matley, secretary.

Mr. W. E. H. Carter, who has been on an investigating tour among the mines in Sudbury district, reports great activity at Massey Station, the Elmore oil concentrator system for treating the ore being successful. It is proposed to extend this before long. The Shakespeare gold mine at Webbwood is being operated with success. The Creighton, Copper Cliff and North Star nickel mines are all in operation. The former is believed by some to be the richest nickel mine in the world, and already from 800 to 900 tons of ore per day are being turned out. The West smelter at Copper Cliff was destroyed by fire a few days ago, but the new plant which is being installed by the company will be ready very soon, so the loss of the West smelter will not be felt very much. The Vermilion mine yielding nickel, copper and other metals, which has been closed for several years, is now being thoroughly developed. The Mispickel property in Net Lake is also being developed.

Debentures for Sale.

Sealed tenders addressed to "The Mayor and Council of the City of Regina" will be received up to and inclusive of Saturday, the 30th day of July, 1904, for the purchase of debentures of the city of Regina issued in pursuance of a by-law in that behalf authorizing the raising of $135,000, for the construction of a system of water works, sewerage, etc., for city purposes.

These debentures will bear interest at 4½ per cent. per annum, and are made repayable within fifty years as follows:—

During the first five years succeeding issue thereof, interest only at the said rate will be paid annually, after which period the whole debenture debt of $135,000 will fall due and be payable in forty-five equal annual instalments of $7,047.30, principal and accrued interest combined.

Debentures can be issued at the option of the purchaser in sums of $5,000, or over.

The highest or any tender not necessarily accepted.

Dated, Regina, N.W.T., 29th June, 1904.

J. KELSO HUNTER,
Secretary-Treasurer.

$25,000 DEBENTURES.

For Twenty Years. Repayable in Equal Annual Instalments.

TOWN OF WETASKIWIN, Alberta, N. W. T.

Sealed offers will be received by the undersigned up to Six p.m., Friday, July 22nd, 1904, for debentures as above. Interest at Five per cent., payable yearly.

Particulars of Debentures and Municipal Statistics can be obtained from the office of this publication, or from

J. YOUNG BYERS, Town Clerk.

The highest or any offer not necessarily accepted.

Town of Wetaskiwin, N. W. T.

SAINT JOHN

CITY DEBENTURES

I am directed to receive bids at the office of the Chamberlain of the City of Saint John, for the purchase of Saint John City Debentures, for the whole or any part of the sum of

One Hundred and Thirteen Thousand Five Hundred Dollars—$113,500.00

to be issued in the sums of five hundred dollars each, under the provisions of Act of Assembly 52 Victoria, Chapter 27, payable in 40 years, with interest at the rate of three and one half per centum per annum, payable half yearly on the 1st day of May and the first day of November.

The proceeds of said debentures are to meet expenditures for Public Civic Works and needed Civic Improvements.

First coupon (5 months interest) payable 1st November, 1904.

FRED SANDALL,
CHAMBERLAIN, ETC.,
City of ST. JOHN, N.B.

Chamberlain's Office, June 27th. 1904.

J. Frank Crosby Co., (not inc.), dry goods, Ottawa, whose failure was noted last week, were unable to carry through their offer to compromise and have now assigned.

Another Quebec failure, is that of Alfred Poirier, manufacturer of shoes, with direct liabilities of some $19,000 and indirect of $29,000. At one time Mr. Poirier was interested in a grocery business with a brother-in-law, which proved unsuccessful, and when he started making shoes in 1897, his wife registered as sole owner of the business under the style of A. Poirier & Co., but she assigned in April, 1903. The assets were bought in for him, and having obtained a clearance from old matters, restarted in his own name.

Village of Maxville.

Tenders for School Debentures.

Sealed tenders will be received up to Friday noon, July 15th, 1904, at the Village Clerk's office, Maxville, for the purchase of $5,000 debentures, with accrued interest on coupons next maturing, being ($7,358.20) school debentures, on sums not less than $100 each shall be issued on the 1st day of August, 1904, each of which debenture shall be dated on the day of issue thereof, and shall be payable within twenty years thereafter, namely, on the 1st day of August, 1924. Each of said debentures shall bear interest at 4 per cent. per annum, payable yearly, on the 1st day of August in each and every year during the currency thereof, and are made payable at the Bank of Ottawa, Maxville. The highest or any tender not necessarily accepted.

D. P. McDIARMID, Clerk.

Maxville, Ont., June 17th, 1904.

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFE-TIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World's Fair, and consult Grand Trunk Agents for further particulars.

The Traders Bank of Canada.

Notice is hereby given that after the publication of this notice for four weeks, application will be made to the Treasury Board for a certificate approving of the following by-law passed at the annual meeting of the shareholders held this date, viz.:—

A BY-LAW TO INCREASE THE CAPITAL STOCK OF THE TRADERS BANK OF CANADA.

WHEREAS the capital stock of the Traders Bank of Canada is $2,000,000. divided into 20,000 shares of $100 each, the whole amount of which has been taken up;

AND WHEREAS it is deemed expedient that the said capital stock should be increased;

Be it, therefore, enacted by the shareholders of the Bank assembled at the Annual General Meeting, held at the head office of the Traders Bank of Canada, the 21st day of June, 1904.

(1) That the capital stock of the Traders Bank of Canada, be, and the same is hereby increased by the sum of $1,000,000, divided into 10,000 shares of $100 each.

(2) When the directors so determine, and from time to time as they think fit, the said increased stock shall be allotted to the then shareholders of the Bank pro rata, and at such rates as is fixed by the directors, but no fraction of a share shall be so allotted; provided in no case shall a rate be fixed by the directors which will make the premium (if any) paid or payable on such stock so allotted exceed the percentage which the reserve fund of the Bank then bears to the paid-up capital stock thereof.

(3) Any stock allotted from time to time which is not taken up by the shareholder to whom such allotment has been made within six months of the time the notice of the allotment was mailed to his address, or which any shareholder declines to accept, or any shares which shall not be allotted by reason of the provision hereinbefore contained against the allotment of fractions of a share, may be offered for subscription to the public, at such times, in such manner, and on such terms as the directors may prescribe.

H. S. STRATHY, General Manager.

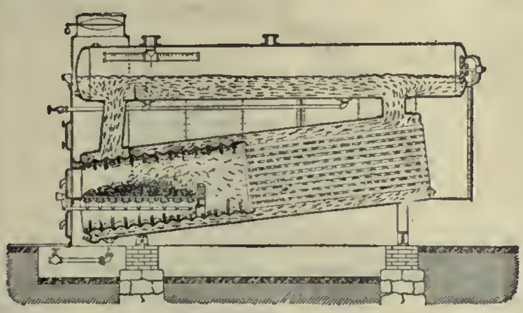
Internal Furnace Saves Ten Per Cent.



An externally fired boiler wastes fuel because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler, the heat is transmitted directly to the water, and air cannot get into the furnace except through the regular drafts. This makes a saving of at least 10 per cent.

TORONTO MARKETS.

Toronto, July 7th, 1904.

Chemicals, Drugs, etc.—Quinine is weak, in sympathy with the recent decline in New York and the primary markets. Opium continues very dull. The market otherwise is on a very similar footing to what has been observed for some time past, with prices keeping steady.

Dry Goods.—The movement of goods of an assorted character is very fair, and encouraging reports are coming to hand from the majority of districts. Travellers report prospects bright. Prices of staple goods keep very firm.

Flour and Grain.—In spite of more encouraging cables from Europe, and of consequent tightening of the market on this side, prices for flour keep merely fairly steady, and but little business is being done. Ninety per cent. patents are quoted at $3.65, with extra brand a little higher. Manitoba flour is steady, with no new feature. Millfeed and oatmeal are both steady, to firm. In wheat no change in quotations has occurred since last report, nor has there been any alteration in any of the other grains. Business is still rather slack.

Fruits and Vegetables.—Strawberries are at present about as plentiful as they are likely to become this season, but the severe winter killed many vines, and berries are comparatively scarce. Those that offer are not sold at very high prices accordingly, the quality in many cases being soft and poor. Cherries are becoming more abundant, and easier in consequence. Tropical fruits are weaker, with the exception of lemons. The following gives the usual range of quotations: Strawberries, 5 to 9c.; cherries, per basket, sour, 90c. to $1.10; cherries, per basket, sweet, $1 to $1.50; raspberries, 14c.; Lawton berries, 15c.; apples per barrel, $3.50; gooseberries, per basket, 50 to 60c.; red currants, small baskets, 40 to 50c.; red currants, large baskets, 90c. to $1. Oranges, California navels, $3.50 to $4.50; Valencias, large, $7; Valencias, ordinary, $5; lemons, Messinas, $3 to $3.50; Sorrentos, $3 to $3.50; bananas, 1sts, per bunch, $1.75 to $2.25; 8's, per bunch, $1.25 to $1.50; pineapples, Floridas, per case, $3 to $3.50; Havanas, $3 to $3.25; watermelons, each, 30 to 35c.; cantaloupes, per box, $3 to $7; California plums, per box, $1.50 to $1.75; California apricots per box, $1.50; Georgia peaches, $1.75; Baltimore apples, half-bushel basket, 50c.; Canadian peas, per basket, 35 to 40c.; Canadian cucumbers, per dozen, 55c.; Canadian new potatoes, 50c.; Southern new potatoes, per barrel, $3.50 to $3.75; Egyptian onions, per sack, $2.50; Baltimore cucumbers, per hamper, $1.50 to $1.75; Baltimore beans, $1.50; Southern tomatoes, per case, $1.10 to $1.25, southern cauliflowers, per dozen, $1.75; southern cabbage, per barrel, $2.25; Kalamazoo celery, per dozen, 40c.

Groceries.—Little actual change has been made in list prices of general groceries, and trade continues fair to good. Sugars remain about as reported last week, with a fair movement, though not an extraordinary one, the demand for preserving purposes being slacker than usual at this period of the year, owing to comparative scarcity of berries. Japan teas are usually quoted a little lower. So are canned apples and one or two other lines of canned fruits. Payments have been fair to good.

Hides, Skins and Tallow.—Hides just now are scarce, though larger supplies are expected in the near future. Prices are quite firm. Calfskins have gone down a cent, the dealers coming to the conclusion that former rates had been unprofitably high. The tallow market which has been weak for some time past, has now declined about ¼c. all round. Not much is being done in the leather trade just now, though prospects for a good fall trade are described as excellent.

Hardware.—A fairly good volume of trade is reported on behalf of shelf and general hardware merchants. Seasonable goods are meeting with a good sale, though the latter is described as nothing extraordinary for this season of the year. In heavy metals, the movement is normal. Pig-iron is a little on the easy side, but not much actual change has occurred in values. A report from

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

Glasgow says that the pig-iron market has been firm but irregular. A few days ago Cleveland warrants were forced to 43s. cash, owing to scarcity of cast iron, but since then prices have been easier. Home buyers are only buying to cover immediate wants.

Provisions and Dairy Stuffs.—No export demand of any account exists for butter, and any but good quality is in small demand. There is some, however, of June make, coming forward which is of very fair grade, and this as a rule commands a ready sale. Cheese is in moderately good request, and prices are firmer. The good demand for eggs, especially for this time of the year, keeps up excellently, and prices are quite firm, still at 15 to 15½c. For poultry there is a good demand, especially for spring chickens. Hop merchants are not doing much business just now, and they are awaiting crop developments. It is satisfactory to note that a shipment of hops recently from British Columbia commanded highest prevailing prices in London. For smoked meats the demand is very good, particularly for hams, which are very firm just now.

◆

MONTREAL MARKETS.

Montreal, July 6th, 1904.

Ashes.—There has been no change in potashes, of which the offerings continue very small, consequently business is quiet, and prices rule steady at $6.10 to $6.15 for firsts, and at $5.50 to $5.60 for seconds per 100 lbs.

Cements and Firebricks.—The tone of the market for cement remains steady, but the volume of business pressing for the season is small, the demand being only of a jobbing nature. Sales of Belgian have taken place at $1.70 to $1.95, and English at $1.95 to $2.10 per barrel, ex-wharf. The demand for firebricks is fair, at prices ranging from $16 to $23 per 1,000, as to brand, ex-wharf.

Groceries.—A fair volume of business has been done in sugar, and the market is moderately active with a firm undertone in sympathy with the strength in raw beet. Granulated was sold at $4.40, and yellows at $3.50 to $4.20 per 100 lbs., as to quality at the factory. In molasses there has been considerable activity on spot, and quite a few sales of round lots of Barbados have taken place to arrive at 24c. per gallon, but sellers are now asking more money. It is reported that the crop at the Island has been all disposed of. The shipments to Newfoundland this season have been about 13,000 puncheons, and the lower provinces have taken about the same quantity. Other lines have been quiet, and prices show no important change.

Dairy Products.—Since this day week a firmer undertone has characterized the cheese market, and prices are somewhat higher, but exporters here in some cases state that there is nothing in the situation to warrant any bull movement at present, as the make is large for which the demand from foreign sources continues slow, in consequence the volume of business transacted has been comparatively small, at the wharf on Monday 3,000 boxes were offered, which sold at 7⅝ to 7¾c., showing an advance on prices realized the previous week of ⅜c. to ½c per lb. On spot fancy Western white and colored have been offering at 8¼c., and Quebecs at 7¾c., with buyers bidding ⅛c. per lb. less. The exports of cheese for the week ending July 2nd, were 83,751 boxes, as

Thorough English Course. Individual Attention. Pupils prepared for the Universities and for Examinations in Music and Art. Large staff of Resident and Visiting Teachers.
MISS VEALS,
Lady Principal.

against 129,334 for the corresponding week in 1903. The total shipments this season to date have been 421,178 boxes as compared with 613,625 for the same period last year. The tone of the butter market continues weak, and prices have a downward tendency, owing to liberal receipts for which the export demand is limited, in consequence stocks are accumulating. Some business has been done in finest creamery for export account at 17¼ to 17⅜c., and undergrades are offering from the above

THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MacLEAN CO., LIMITED,
Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade.

And Still it Leads
As applied to the gain in net amount of assurance in force in Canada for the
5 Years Ending Dec. 31st, 1903.

The Mutual Life OF CANADA
still maintains its stand at the
HEAD OF ALL ITS COMPETITORS
among Canadian Life Companies, as shown by the Government Reports.

figures down to 16c. At the boat on Monday some 500 packages of Quebec creamery sold at 17c., which figure shows a decline of ¼ to ½c. per lb. for such stock since the week previous. The shipments of butter for the week ending July 2nd, were 15,479 packages, as against 13,428 for the same week last year. The total shipments for the season to date have been 67,587 packages as compared with 52,045 for the same period in 1903.

Hides.—Business has been quiet owing to the small receipts, and the tone of the market continues to rule steady. Dealers are paying 9c. for No. 1 beef hides, and 30 to 35c. for lambskins and clips.

Metals and Hardware.—In general hardware the volume of business has been better. The demand for arms and ammunition has increased some, and cutlery has also been moving fairly well. The trade in mowers and lawn goods is much quieter now as buyers generally have filled their wants for the season. In heavy iron material and metals trade has been rather quiet, as is usually the case at this season, but the tone of the market for all lines is about steady. No. 3 Middlesboro iron to import is quoted at $15.75 to $16; Carnbroe, at $18.50; No. 1 Summerlee, at $19.25, and domestic brands at $19. There is still an easy feeling in bar iron at $1.65 to $1.70. Canada plates are selling at $2.20 to $2.25; black sheets, $2.15 to $2.20, and Terne plates, $6.25 to $6.50. The feeling in Ingot tin continues easy at 28½ to 29c., and copper at 13 to 13⅛c.

Oils, Paints and Glass.—There has been no important change in this market. The volume of business has been about up to the average for the season. Turpentine is steady at 81½c. for single barrel lots. Linseed oil is unchanged at 43 to 45c. for raw, and at 46 to 48c. for boiled. Castor oil is quiet at 7 to 8c. for mechanical, and 8 to 10c. for pharmaceutical. Straw seal oil is offering in round lots at 42½ to 44c., The market is now bare of pale steam refined seal oil, and the indications are that none of the new crop will come to this market, owing to the great demand for the same from Europe. Lead oil is in small supply on spot at 37½ to 40c.; pure white lead is quoted at $4.50, and paris green in packets at 15 to 15½c., and in drums at 14½c.

◆

—The collections at the Montreal Custom House during the fiscal year which ended on June 30th, show an increase of $634,629, when compared with the previous year. Thus: 1903-4, $12,437,927; 1902-3, $11,803,298. At Toronto the total duty collected for June, 1904, was $750,322, an increase of $137,667 over June, 1903. The total for the fiscal year, 1903-4 is $8,185,258, an increase of $1,136,483, over 1902-3.

◆

—Active preparations are going on for the Calgary fair. The new main building is two stories high, with a dome, and has room for additions. The grand stand is quite a feature of the grounds. It is large, and its alteration will make it more convenient. There will be dressing rooms for the athletes who take parts in the various events, and lavatories will also be placed under the stand. Lunch counters have not been forgotten. It is said that $1.000 has been expended on the athletic grounds. There is a place for playing polo, too. The people around Calgary are sports—at least many of them are.

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Company,
Temple Building, - Toronto.

◆

—Good news comes from Winnipeg as to the increase in building; it is very remarkable. But the complaint is loud of the scarcity of labor, both skilled and unskilled. According to a recent telegram the number and cost of buildings erected in that city during the first half of 1904 was as follows. The statement is made by the Building Inspector to the city council:

July.	Permits.	Buildings.	Aggregate Cost.
1900	257	313	$760,400
1901	356	469	1,112,350
1902	496	595	1,386,550
1903	600	781	2,782,300
1904	999	1,351	6,072,450

THIRTY DAYS' GRACE

for the payment of Renewal Premium is invariably allowed by The Canada Life. During this period the policy remains in full force, and should the Assured die within it, the claim would be promptly paid whether the premium had been paid or not.

This has been the practice of the Company for over 50 years, and is but one of many valuable privileges

Allowed by The CANADA LIFE.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

PROSPECTS OF THE WESTERN CROPS.

Some telegrams received on Wednesday from points in Manitoba and the Territories were disquieting, for they announced that drouth was doing harm to the growing crop. Our Winnipeg despatch of yesterday noon, however, is calculated to dispel any such feeling of depression. We quote it below:

"The weather has been hot and dry throughout the West during the past week. Many points reported need of rain, stating that actual damage was being done for want of moisture. There was a general rain throughout this Western country last night, however, which will greatly relieve the situation. In spite of heavy rains during the early part of the season grain has not shown any marked tendency to go to straw. The straw is heavy, and will carry a heavy grain head. A majority of places heard from report grain heading out. The crop on high land is showing best growth, the crop on low lands being somewhat backward. Conditions on the whole promise bumper yield."

◆

SHORTER CREDITS.

The question of shorter credit by merchants was taken up the other day by the Board of Trade of Neepawa, Manitoba. We hardly supposed it would be deemed necessary by any Western retailer to defend the giving of time to his customers, supposing that the cash system would instantly commend itself. But there were a number in the gathering who deemed it unwise to make any change. It was apparently to convert these that the president of the board, Mr. G. M. Gibbs, gave an address upon the general subject, parts of which we shall quote in order to help in dispelling the fears of merchants elsewhere who are timid about altering their system of giving credit just because their customers have got used to it. Assuming that no one will dispute the contention that a system of cash trading is for the merchant's interest superior to a credit system, Mr. Gibbs combatted, first, the notion that a cash system will drive trade away from a town. He denies this, both on theoretical and practical grounds. Theoretically, the question needs no argument, he says, and "as regards the practical side of the objection, I am equally positive. It will not drive trade away from town, but rather increase it." Then he instances the large cash trade—all cash, indeed—done by the departmental stores in the cities. "They take away thousands of dollars worth of trade from every town in the country. Perhaps you may think this is because they offer tremendous inducements. Possibly they do in some cases, but in offering them to the outside public they rely principally on their catalogue to make their sales, while you have your goods, and, what ought to be besides an exceedingly strong factor in selling them, your personality."

Here the speaker made an excellent point. If a merchant has goods which are bought right, and which he understands, he has an enormous advantage in being on the spot to sell them for he is face to face with his customer, where his knowledge, his earnestness, his civility, can be brought to bear in convincing the man or woman. As against all this the department store, a thousand miles away, has to depend on catalogues and correspondence. Dealing with the sort of people who run accounts for six months in certain shops, and then when they sell their produce go to other shops to spend the cash (there are plenty such people—the Ontario woods used to be full of them), Mr. Gibbs gives such faithless folk a piece of his mind:

> "There is no excuse for dealing away from home. Money should be spent in the locality in which it is made, otherwise the growth and success of the district is impaired. The conduct of those people who buy on credit in town and outside for cash cannot be too strongly condemned. The merchants know what they have to contend with in outside competition,

and consequently mark things down to the lowest possible prices, so that if they cannot obtain cash or its equivalent in value, they suffer loss. Be loyal to your own district. Assist the merchants so far as lies in your power to take advantage of every trade discount by giving him the cash with which to do so and you will find that every effort put forth in this way will redound to your own interests. It is true that the large departmental stores may be able to buy cheaper in larger quantities, but this is offset by the cheaper rentals and cost of labor locally. You will also have the satisfaction of feeling that you are doing what you know is right.

It is a well known fact in some instances people have reached their credit limit in every store in the place, and have then gone to neighboring towns, so that if there is any driving of business away, the credit system and not cash one will do it in the long run. It may not be possible to introduce a cash system at once, but I do not think we risk anything in giving the subject all publicity possible.

◆

THE LIVE STOCK TRADE.

Trade in cattle at both the Toronto Western market and the Junction yards has been somewhat slow, especially at the former, where the quality of animals usually offered has not been of the best. As a result prices have ranged distinctly easier for exporters, and in some cases 40 or 50c. per hundred lower than a week ago. At the same time values for really good cattle ranged at very little less than before. For butchers' cattle, too, there was a certain degree of firmness, especially for good grades, the offerings being on the short side. Hogs were quoted 10c. per hundred higher, while calves were easier. Stockers and feeders retain practically the prices of a week ago, but values are nominal and the market was easier. Sheep and lambs were not in very keen demand, and the poorer qualities did not sell at all readily. The following quotations show the range of prices at the city market: Export cattle, ex choice, $5.25 to $5.50; do. medium to good, $5.25; do. cows, $4 to $4.50; butchers' picked lots, $4.60 to $5; good to choice loads, $4.30 to $4.70; fair to good do., $4 to $4.25; butchers' bulls, $3 to $4; bulls, export, heavy, $3.50 to $4; do., medium, $3 to $3.40; do., light, $2.75 to $3; stockers, $3.60 to $4; do., light, $3.25 to $3.50; do., common, $2.50 to $3; light bulls, $2.25 to $2.75; feeders, short-keep, $4.50 to $4.70; do., good, $4 to $4.50; do., medium, $4 to $4.50; do., common and rough, $2 to $2.50; milch cows, each, $25 to $50; export ewes, cwt., $3.65 to $3.85; do., bucks, per cwt., $3 to $3.25; cull sheep, $2 to $3; lambs, each, $3.25 to $4.25; calves, per lb., 4 to 5¼c.; do., each, $2 to $10; hogs, selects, per cwt., $5.25; do., lights, $5; do., fats, $5.

In Montreal the record seems to have been brighter. There has been a distinctly improved demand for cattle at that point, and prices went up ¼c. per pound from those paid a week ago. An active trade was done at the advance. This applies more particularly to butchers' cattle, but for exporters' animals, too, there was a keener enquiry. Freight space rates, too, went up 50c. to $1 per head. The prices ruling for choice beeves were 5¼ to 5¾c. per lb., while others sold at 2½ to 3½c. for common to 4½ or 5c. for good. Calves were in fair demand at $2 to $10 each.

Cables just to hand report a stronger feeling for cattle in Great Britain, with an advance of ¼ to ½c. per pound. Choice Canadians sell at 12½c. The report says that conditions for domestic animals in the Old Country are good, pastures being excellent, but remarks that if the prices on this side were lower, no doubt a considerably larger business would be the result.

◆

THE FIRE WASTE.

Successive months of the present year do not afford much comfort to fire underwriters in the figures of fire loss presented. The aggregate loss for the half year closed with June is shown to be $172,534,000 as compared with $83,754,000 in the first half year of 1903; with $87,105,000 in the period of 1902; and $88,926,000, $103,298,000 and $65,698,000 in three preceding similar half years. True, the conflagrations of February and April swelled the figures to abnormal size this half. But the striking fact remains that even if we deduct the extraordinary burnings at Baltimore and Toronto the losses in the first half of the year are greater than in the same time of 1903.

The fire loss of the United States and Canada for the month of June, as compiled from the carefully kept records of the New York Journal of Commerce and Commercial Bulletin, shows a total of $10,646,700. The following table exhibits the losses by months for the first six months of the years 1902, 1903 and 1904:

	1902.	1903.	1904.
January	$15,032,800	$13,166,350	$21,790,200
February	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,212,150
April	13,894,600	31,549,000	23,623,000
May	14,866,000	16,366,800	15,221,400
June	10,245,350	14,684,350	10,646,700
Totals	$87,105,850	$83,754,950	$172,534,450

The June losses are less than the average of June losses for half a dozen years, but the loss to fire underwriters seems to be heavier. "This is largely due to the extensive forest fires in June, 1903, which, of course, involved no insurance. The fires this June were on property which was, as a general rule, very fully insured, and some insurance companies complain that their losses are nearly double those of June, 1903.

◆

MINERALS IN QUEBEC.

A report has been submitted by the Department of Lands, Mines and Fisheries of the Province of Quebec of mining operations in that Province for the year 1903. Its table of totals of minerals raised or shipped is somewhat disappointing. One would certainly expect to hear of a larger sum than $2,772,762 as the value of mineral and metal product of that great Province for a whole twelvemonth. Separate statement is made of the number of workmen employed in these industries and the wages they received. The number of workmen employed was 4,662, and the amount they earned in wages was $1,308,925, or a trifle over $280 per man for the year.

The largest item in the list by far is asbestos, the output of which exceeded twenty-nine thousand tons, and its value nearly a million dollars; copper ore and mica are the items next in value; bog iron ore and chromic iron together reached an output of 80,000 tons. Phosphate has declined from its proud figures of former years to a beggarly $8,214. Bricks were made to the number of 120,000,000, and the output of stone and lime was good. Slate is a considerable item, and cement has been made to the quantity of 40,000 barrels. The following table gives the total products of the mines shipped or used on the spot, from the operators' reports, with their gross value at the nearest shipping point:

Summary statement of the yield of the mines in the Province of Quebec for the year 1903:

Minerals. (Tons of 2,000 lbs.)	Quantities Shipped or Used.	Gross Value.
Titanic iron ore	112	$ 300
Bog iron ore	12,035	34,985
Chromic iron	3,020	45,300
Copper ore	26,481	109,875
Asbestos	29,261	916,970

FIRE INSURANCE IN CANADA A HUNDRED YEARS AGO.

CONCLUSION.

It was in consequence of these abuses and difficulties and the belief that one, or at least two, respectable local offices could carry the business of the two Provinces, that the formation of the "Quebec" Company came about. Several attempts were made from 1815 onward. The first was on the mutual plan, but it had to be abandoned, as being confined to Quebec and the district around it sufficient members could not be obtained who were known to each other to give an average experience. It was then decided to form a joint stock company, which should operate in both Upper and Lower Canada, but progress was slow. The promoters did not know how much capital an insurance company ought to have, and the joint stock principle was little understood. "People who would make good stockholders or directors had to have to have it explained to them." Even after the capital had been subscribed the shareholders were afraid to commence operations without Government sanction, the liabilities they might be incurring being almost unknown. Bills were, therefore, introduced into both Chambers and passed, not without difficulty, only to be denied the Royal Assent. This happened again and again, and they were even referred to England. This appears to have made the colonists very angry. They said: "Here you let unknown Yankees come in and do a business without restriction that you will not allow your own well-tried and well-known subjects to carry on." Here was a clear mistake of the Colonial Office, even at that early day. Another thing that irritated the Quebecers even more was that they were not told why the Royal Assent was withheld.

Finally, in despair of obtaining authority, it was resolved to begin business without it, and this was accordingly done on the second of April, 1818, not quite three years after the battle of Waterloo. The Articles of Association of the Quebec Fire Assurance Company were signed on that day, and the first policy was issued on the 21st of the same month for £2,100 covering a number of non-hazardous buildings, mostly stone-built, and netted a premium for the twelve months' insurance of £12 3s. (a pound was then worth about 16s. sterling). This quaintly-worded document—the first stock policy issued in Canada—was included in the late Fire Exhibition at Earlscourt, London, England. It contains eleven conditions, and two, that regarding arbitration and that as to proofs of loss, are almost identical in wording with conditions of many British offices of this day.

When the company began business and premiums began to come in a new difficulty cropped up. What was to be done with the cash? There were no banks, and a considerable sum had to be kept on hand to meet possible losses, for the policy provided that in the event of fire an assured was to have "immediate satisfaction." It would appear that the management endeavored to meet the case by massive stone vaults below the office, and by filling in the ceiling over it with heavy beams and concrete. Watchmen also, it seems probable, were employed. A few years later the directors were to their joy relieved of this responsibility, banks being "unforeseenly" established. The directors of the Quebec even got interest on their deposits, and thereby made "several thousand louis." The first president and the secretary of the company both bore Scottish names, being respectively McNider and Henderson. A descendant of the latter is still in the employ of the company.

In 1826 the Quebec Assurance Company received its first Act of Incorporation. It is very pleasant to note that even so soon after the French wars the board was about half French and half English, a characteristic of the office ever since. The sitting president is the Hon. Pierre Garneau, M.L.C., one of the oldest and best-known merchants of the city, and one of the most efficient Ministers of Public Works which the Province ever had, while the vice-president is Sir Alphonse Pelletier, the city solicitor, and the respected chairman of the Senate of the Dominion.

In 1810 there were about ten agencies of foreign insurers in Quebec, besides the small American wildcats above referred to. Our chronicler estimates that these, together with the Quebec Company, insured each year a property to the value of three million pounds at an average rate of 11s., which would give an annual premium of £16,500, in addition to which £1,000 was charged for policies. In its first year's.

business (1818-19) the "Quebec" Company took £2,328 in premiums at an average rate of ten and sixpence, and £636 in expenses of all kinds, of which £264 went in salaries. There were no losses. Even thus early there appears in the disbursements an amount for subscription to fire engines. At the end of the reign of King William the business had grown to: Amount insured, £1,100,000; premiums, £7,231; expenses, £1,307; losses, £17,100, so we see "bad years" were not unknown even in the "good old times." Note a significant asterisk in the account of the year just chronicled. It reads: "Secretary's salary reduced £100." This, it is to be supposed, was in order to make him more careful in his acceptances. A parchment in the old foundation-stone of the company's building records that it was laid with great ceremony and Masonic honors by the "Right Worshipful Claude Denechaud, Provincial Grand Master, attended and assisted by officers of the Provincial Grand Lodge and visiting brethren of distinction in Free Masonry," His Royal Highness Prince Augustus Frederick, Duke of Sussex, being Worshipful Grand Master of United Grand Lodge. Many old coins (some even of Charles II.) then circulating in Canada were placed in the stone, with documents from which the information above is taken. The building fronted at first on Sault au Matelot Street, extending through to St. Peter Street the "rear" being now the "front)." It is almost vertically under the Grand Battery, and cannon and other balls, probably fired by the English in the operations recorded by De Bougainville, have frequently been found in the vicinity, notably in the premises about the Bank of British North America. The alterations just completed have made it a handsome, up-to-date structure, with elevator, electric light, vaults and all modern improvements, and an ornament to the good city of Quebec.

ANOTHER ANTI-UNION DECISION.

A few days ago a decision was given in the Appellate Court of Cook County at Chicago which is likely to have far-reaching results so far as present-day methods of the trades unions are concerned. The origin of the case was the strike some months ago of the employees of the Kellogg Switchboard and Supply Company, Chicago, in order to compel the company to sign contracts with its machinists binding it to hire only members of unions. The employers refused, and the strike which ensued was marked by threats, picketing, intimidation, assaults upon non-union employees, and general disorganization of the company's business. The upshot was the arrest of twenty-four strikers and their sentence to fines and imprisonment. The important part of the decision of the Appellate Court is comprised in the fact that its judgment lays down the law that closed-shop agreements exacted from employers by labor unions constitute a violation of contract rights, are in restraint of trade, are an illegal combination to wrong and injure others, and are in violation of both civil and criminal law. It is also held that an employer who voluntarily signs the closed-shop contract is also in violation of the criminal law for conspiring to injure the property rights of workmen in their labor; while contracts signed under compulsion of threats tha otherwise there will be a strike are null and void, an claims under them are not enforcible.

It is to be noted that the confirmed sentence wa not for violence or intimidation, but for their insistence upon their employers signing an agreement t employ only union labor. The union-shop agreement it is held, strikes at the right of contract, discriminating in favor of one class of men against others This, together with the often-quoted Taff Vale decision, serves to draw the cordon still closer aroun the neck of the unions. After a time they will onl be allowed a fair fight.

OUR FORESTS.

A week or two ago an interview with Professo Austin Cary, of the Yale School of Forestry, wa telegraphed to the New York Tribune from Bangor Maine. In this interview the professor stated tha he had recently made an extended tour of investigation throughout the Canadian forests—we follow th language of the despatch—and the following is wha he found:

"Contrary to the boast of the Canadians tha their country has practically an inexhaustible suppl of timber, I find that the extent of the Canadia forests has been greatly over-estimated, and that th growth of timber there, even in the North-West, i nothing like what it has been reported by Canadia authorities. Their forests are very disappointing both in extent and character of the growth."

It will strike one that the language used in th sentence last quoted is strong, even pungent. W possess nothing like what we claim, says this writer both the extent and character of our forests are ver disappointing. Has he seen them all, from Nov Scotia to British Columbia, or has he skimme around some of them here and there on canoe tri or in pleasant autumn holidays? A man should ha ability to judge and opportunities of judging befo he ventures on a statement of the kind. Howeve Mr. Cary is a Yale professor, and his words abo Canadian forests have doubtless been widely read.

Have Canadians anv definite information th will enable them to show that Professor Cary's co clusions are wrong in this particular. We have n observed any contradiction of his statement. Indee a circumstantial denial of what he says is not eas for we appear to lack definite information of our ow resources in this direction. And it is of importan to Canadians to know accurately what forest r sources they possess. We have, in the Year Book an other books, plenty of figures showing our exports wood, the lumber lands under license in different Pr vinces—we have even the area of salt marsh and dy marsh tabulated, but of the extent of our forest lan we have only estimates. Of late the authorities different Provinces and of the Dominion have be aroused to look with care into their valuable mine resources, and very satisfactory has been the resu There is quite as much reason that we should sy tematically investigate our timber wealth, devote ti and money and effort to it. Not enough to have forest ranger or an explorer take an Indian and a anoe up one stream and down another, and so estimate the timber contents and value of tens of thousands of acres. Something more exact is needed. We commend the subject to the consideration of the Ottawa Government. There is no sense in our living n a fool's paradise, as we have been doing if what Professor Cary's statements are true. It is well for us to know the truth at the earliest moment.

◆

NORTH OF ENGLAND LETTER.

An article appearing in The Manchester Guardian, one of the soberest and weightiest of British papers, deals with the broad question of Canada's finance. The writer recapitulates the facts as to the Dominion's National Debt of $260,000,000; the provincial debts, with especial regard to the $200,000,000 of Quebec; the municipal indebtedness and the liability of the Canadian public for sundry enterprises. Within the next few years he estimates that $200,000,000 will be required to complete the railway and other works now supported by public credit. It is not suggested that these need ever become a claim on the Government purse. But there is a liability and there is a need for extraneous borrowing, and it is whispered that perhaps matters have gone far enough. The point with which this suggestion is supported is contrasted with Australian financial methods. The Commonwealth "does not endorse"; the Dominion does. And it is argued that it would be better for Canada if she dropped her easy-going system of giving guarantees; and promptly.

The matter is not one that need be labored to become intelligible. There must be a limit somewhere to the pledging of credit, although the pledge costs nothing immediately to the national purse. Should the view become general in responsible circles in England that Canada is lax on this point, its influence on her affairs would be soon appreciable. If the article in question were sensational in character or were published by a less influential organ its effect would be smaller. But the contribution deals mildly with the subject in a way calculated to leave an impress upon a banker's mind. Therefore, it has been thought well to reproduce its general tenor so that reassuring messages may be given in early time. To hazard an opinion as to the writer's identity is, perhaps, dangerous, but one fancies he sees in it the hand of an authority on Australian economics whose words are to be read in The Statist periodically.

Now that the full text of the Canadian Budget has been assimilated, the Resolution No. 3 is provoking some remark. The clause provides for the special taxation of goods sent in at rates beneath reputed "fair market value." Merchant shippers, taking a practical view of the case, point out that collusion to defraud the customs would be extremely hard to detect in most cases. Rogues, they urge, would slip free, and honest dealers are likeliest to be caught. Cheap stock and job lots are constantly coming into being in a perfectly natural way. They change hands to the benefit of both parties in the normal course. But if these fair transactions are to be interfered with—and their circumstances are intricate and complex at times—shippers feel that trade will suffer. Organized "dumping" and occasional cheap trading are two distinctly different things.

The Belgian method of checking valuations that are purposely made low to evade full duty is a simple one. The Government reserves the right of buying-in any lot of goods at the declared value less duty and a fine. Although the Canadian and the Belgian objects are not identical in this case, the effects must be similar. At least the Belgian practice gives the trade some security against ill-considered punishment. Both parties have something to lose. If the customs have no money at stake and no incentive other than to raise revenue, injustices are perpetrated readily enough. An arrangement such as the Canadian leaves merchants at the mercy of the administration. They suffer according to the interpretation the departmental heads put upon the official functions.

The winding up of the Perseverance Home Assurance Company, Limited, of Leeds, marks the removal of one blot from the good fame of British insurance offices. The company was one of several that seek to combine house-purchase with life insurance; a form of business that is in no good odor. The concern was practically a one-man affair despite its nominal capitalization of £105,000. It was registered in 1898, and seems never to have been solvent since. As the books have not been entered up since 1902, investigation is carried on with difficulty. It is estimated, however, that 5,000 of the 7,500 members sensibly allowed their policies to lapse. About £3,000 of the £50,000 receipts remain, but there are no free assets of any description yet traced. The man, Cooper, who promoted and organized the swindle, has thus far eluded every charge of direct fraud. As investigation proceeds more material for a prosecution may be discovered. Meantime, the only man to profit from the wretched business declines to give any assistance to the liquidators until the sum of £125 is paid to him. As might be guessed, a number of thrifty workmen lose their all.

A disgusting feature of low-class insurance and building society business is the readiness to use religious agencies for shady financial purposes. Bible-readers and lay preachers are used as decoys. The Perseverance concern is not alone in this respect. The name of another company, whose expenses formed a ratio of 99 per cent. to premium income last year, is mentioned significantly. Indeed, the collapse of more than one is regarded as imminent, and the prospect is agreeable enough to those engaged in the legitimate branches of insurance business.

North Country.

Manchester, 30th June, 1904.

◆

MONTREAL LETTER.

It has been made known by the civic report that a profit approaching a thousand dollars a day was made last year out of the citizens by the Montreal waterworks; that is to say, $862,453 was collected, being $165,692 for meter rates, and $696,771, a tax on householders for water. Almost $300,000 of this is profit, and people are asking one another why they should pay 40 per cent. more for water than it costs, especially when in Toronto the water rates are 40 per cent. lower than in Montreal, and in five American cities from 40 to 100 per cent. lower than ours? In this connection, the defenders of the surplus revenue employ such curious logic as the following: "Of course the charge for water is too great, and we cannot defend it on its merits. But you see, the city wants revenue very badly and it is difficult to secure this by other methods; so now that we have a plan which secures us so much more than we need, why not hold to it?" That this doctrine will not hold water is shown by Mr. Roy, the consulting attorney, who says the city, not being a business concern, has no right to engage in a business pursuit which takes large profits out of the taxpayers. A curious and unjust feature of the matter is that something more than 22,000 persons were disfranchised last year because their water bills were not paid, and the poor people said the rates were so high they could not pay them. If the surplus earnings were set aside to pay off the debt on the water plant there would be less remark, but they are not. The Mayor and a few of the aldermen declare that the price of water must be reduced.

There is almost always a difference between census figures and municipal figures of population, and we have always contended that Montreal had more people than the census declared. But now comes the Montreal directory, which makes a higher claim for Montreal in this particular than has ever before been made. It argues from the fact that there are 105,000 names in the directory, that the population of city and outskirts is 373,000, viz., 294,000 in the city proper and 79,000 in the outskirts. I may add that the census of 1901 gave the population of the city proper at 267,230 persons. Montreal has 820 streets, including outskirts; 50,500 residences, 9,100 stores and offices. Unoccupied stores, houses, and tenements number about 800, which is several hundred less than last year, a fact which speaks for itself as to industrial activity and demand for houses. I am sorry to have to admit, however, that unsanitary conditions are helping to lessen, during these summer months, the population of the city. There were 217 deaths last week!—133 of them under one year old. This is a serious rate of mortality, much more due to dirt and overcrowding than to hot weather, of which we have not had much. The quality of the milk supply is blamed, too, and efforts are being made by the authorities and by private enterprise to improve it.

Quite a lively discussion took place in the city council yesterday over the proposal to give to the Industrial Exhibition Association $10,000 to help in the establishing in Montreal of a permanent Exhibition, the city to own grounds and buildings and to control finances of the same. It was contended, on the one hand, that so important a city as Montreal ought to have an Exhibition annually or biennially, and that this donation by the city would secure a larger grant from the Government. On the other hand, it was contended that many other things were far more needed than this, which was likely to prove an expensive affair. Besides, it was doubted whether the Exhibition could be made to pay. Nevertheless, the $10,000 was voted, the division in council being 20 to 10. Some support was gained for the project by the argument that the Canadian Manufacturers' Association would support it. But from what I have heard from local members of that body, I very much doubt the enthusiasm in its favor of the members generally.

Railway corporations are not modest, we all know, but a stronger word than immodesty has been used by some of our city fathers in respect of a request made by the Grand Trunk Railway for a reduction of its Montreal assessment by some $320,000. As instructed by the finance committee of the council, Mr. Robb, the city treasurer, made a report upon the gifts the city has already made to that company and the C.P.R. It is there shown that in 1864 Montreal gave $1,000,000 for a central terminus at Bonaventure depot. In 1883 the city waived its claim of $300,000, held since 1861 against the G.T.R., as purchasers of the old St. Lawrence and Atlantic Railway, which got a loan of $500,000 from the city and only paid $200,000 of it. Then in 1898 the city ceded land bounded by McGill, William and St. Paul streets to the company for removing their offices from Point St. Charles into the city, and limited its taxation value for twenty years to $250,000; but the company wants the whole of their property in the city and at the Point to be fixed at $1,000,000 for twenty-five years, whereas the city authorities say its value is $1,380,000.

Now for the C.P.R. Thirty years ago the city paid out $1,000,000 for the Northern Colonization Railway, which was acquired by the Canadian Pacific. Ten years ago the city gave a quantity of land and $150,000 in cash towards the building of an east end station for the C.P.R., getting some land at Bellerive Park and elsewhere in exchange. In 1899 the city gave the company the privilege of closing Bisson street in order to extend their offices on Windsor street, and also gave a strip of land to widen Donigani street. Again in 1902 a concession was made to the railway in the reduction of valuation for assessment purposes of their workshop properties in the east end, making it $400,000 for a period of twenty years. Thus it will be seen that this city has done a very considerable share in the way of welcoming the big railways.

I have nothing very noteworthy to tell you about the conditions of city business generally. The manufacturers continue, as a rule, busy, and have not had serious trouble recently with their employees. Wholesale trade is only moderately active, although the duties on imports for the year closed with June were $12,400,000, as compared with $11,800,000 in the previous twelve months. Retail trade is described as disappointing.

Montreal, 12th July, 1904. MOUNT ROYAL.

◆

The Bank of Montreal has just finished building new premises at Goderich. The new quarters are roomy and comfortable, and have the advantage of being situated more centrally than the old stand.

PETERBORO HYDRAULIC LIFT LOCK.

On the 9th inst. an event took place in the Trent Valley Canal which may be looked upon as one of the most auspicious in the history of Peterboro, and that important section of Ontario; namely, the long-looked-for opening of the hydraulic lift lock on that canal, the largest of its kind in the world, and the only one, we believe, on the American continent. It was build to overcome the fall in the waters of the river Otonabee, the difference in elevation being 77 ft. The canal is now open for continuous navigation from Heeley's Falls, on the Trent river, to beyond the shores of Balsam lake, a distance of 126 miles, through a rich agricultural district, and, so its advocates claim, offers the shortest route from the North-West wheat fields to Europe. Of the above difference in levels, the lift lock disposes of 65 ft., the other being overcome by a lock of ordinary type at the debouchment of the canal into the lake. The lift lock, it is calculated, is equivalent to at least five ordinary locks, when the elevation to be overcome, the time in which this is to be done, and capacity for a large quantity of traffic are all considered. An enormous quantity of cement was used in the construction of the body of the lock. It would occupy too much space to give full and minute details of its operations or of the materials which entered into the construction of this gigantic work, but it may be stated that there are two steel plate chambers, each of them 140 ft. long by 33 ft. wide, and 9 ft. 10 in. deep. The guide towers measure 100 ft. from their foundation, while at their base they measure 26 ft. 6 in. by 40 ft. 8 in. The breast wall is 80 ft. high, 40 ft. thick, and 126 ft. long at the base. The outside diameter of the cylinders is 8 ft. 3½ in., diameter of ram, 7 ft. 6 in., working stroke, 65 ft. The weight of water in each chamber is about 1,300 tons. The time occupied by lockage is 12 minutes, while the actual vertical motion is accomplished in 1½ minutes. From these few particulars may be conceived something of the nature of this great undertaking, and of the importance which may rightfully be attached to it not only with respect to Peterboro, but from a national standpoint. The opening ceremony on Saturday last which was shared in by Hon. H. R. Emmerson, Hon. A. G. Blair, Prof. James Mills, and many other prominent people, was very successful, in spite of rainy weather. Everyone will wish for a continuance of success in the management and development of this work, which, one may say with pride, from conception to completion, may be credited to purely Canadian brain and enterprise.

THE PROPOSED LIFE ASSURANCE AMENDMENT.

We have already referred to the Bill before Parliament proposing alterations to the Insurance Act. In the opinion of scores of individual insurance men and of the Canadian Life Officers' Association the proposed measure, under the guise of affording relief to these interested in one concern, the Mutual Reserve Life, would injure other companies. For the sub-committee appointed to consider it, Sir Mackenzie Bowell reported on Wednesday that their powers had been deputed to the superintendents of insurance, Mr. Bradshaw and Mr. Eldridge. These gentlemen had prepared a bill, now submitted, which Sir Mackenzie thought would suit the views of everybody. He proposed on behalf of the sub-committee to move an additional clause protecting the rights of those who had entered suits against the Mutual Reserve Fund Life Association.

Clause 3 asserts the rights of assessment of policyholders and provides that an assessment policyholder may become either level premium policyholder for the amount which his premium for his age at the birthday nearest the date of issue of the new license would secure at the rate of 3½ per cent. interest, or with a reserve lien, which may be paid off, or he may continue his policy for the full amount by paying the usual premium. According to Mr. Eldridge, this bill was submitted to every assessment policyholder. The answers received had been largely favorable. Mr. Fitzgerald considered that the interests of the insured were fully protected. Sir George Drummond, chairman, pointed out that the bill was not permissive. It had been prepared by the sub-committee, and the officials, who described it as fair and equitable. Hon. L. O. David, as representing a large number of policyholders, desired the bill as it stood. There might be some amendments suggested in the House. The clause to premit the reviving of lapsed policies was amended by extending the time limit to ten years. A clause exempting outstanding actions from this operation of the act was added. The title was changed to an act representing the Canadian Assessment Insurers in the Mutual Reserve Fund Life Association of New York, and the bill was reported with minor amendments.

NORTHERN ASSURANCE CO.

As one of the strong and progressive British fire insurance companies, the Northern has long been known to Canadian insurants. It has total funds of over thirty millions of dollars to protect its fire and life business, and is yearly adding to these large reserves. The net fire premiums of the Northern for the past ten years have gone from six, seven, and eight hundred thousand pounds annually to £960,000, in the year 1902, and over £1,000,000 in 1903, while the average of its fire losses has been only 50.33 per cent. of the premiums, a rate which, with say 33 1-3 added for expenses, leaves the comforting profit of more than 16 per cent. This is very creditable progress. Perhaps it may be more convenient to state in dollars some of the Northern's figures for 1903. The fire premiums for that year were $5,096,640, as compared with $4,802,430 for 1902. Losses incurred amounted to $2,460,760, equal to 48.3 per cent., a very low ratio. After some prudent additions to reserve, the amount of $552,000 is carried to the profit and loss account. Judgment, thrift, and business-like caution are said to characterize Aberdonians, and we look naturally for safe measures and favorable results from a company whose headquarters are in Aberdeen.

The Canadian business of the company has for thirty years or more been considerable. It began here in the Confederation year, but during the last two decades has grown by great leaps. In 1875 the managers of the Northern in Canada seemed satisfied with premiums of $61,885, and a total at risk of $7,280,000. Since that day the figures have changed somewhat, for we find them at intervals, as follows:

	Premiums.	Amount at Risk.
1884	$218,781	$18,479.000
1891	231,388	20,318,000
1899	258,008	28,476,000
1902	360,501	34,247,000

In the year 1902, its fire losses incurred were only $114,058, showing the remarkably low record of 31.64 per cent. of premiums. The amount deposited by the Northern with the Receiver-General of Canada is $244,306, consisting of British Columbia bonds and city of Toronto bonds.

BOOKS RECEIVED.

Investment Directory, Insurance Companies, 1904; compiled by S. H. Wolfe, consulting actuary, New York City. The Insurance Press.—The volume of more than 1,000 pages gives a description and classification of bonds and stocks by insurance companies doing business in the United States and Canada. They run into many hundred millions in value, for besides state, municipal, and United States bonds, there are railway and miscellaneous bonds, foreign bonds, Canadian bonds, bank and trust company stocks and railway stocks. The first half of the book is devoted to showing what amounts in what particular bonds and stocks are held by individual companies. Then come security schedules of insurance companies of all kinds, as at 1st January, 1904. The last hundred pages are devoted to a synopsis of the laws pertaining to the investments of insurance companies, and to a minute index. The book has been issued because "until now there has been no way of finding out what insurance companies hold certain investments without laboriously going through the reports of state insurance departments." It will appeal, no doubt, to a large class of private investors, executors and administrators, bankers and dealers in securities. Mr. Wolfe cites the fact that in the wills of two prominent financiers who died in 1902 and 1903, there was found a provision directing the executors to invest the proceeds of the respective two estates only in the securities found upon the list of one of the large life companies of New York. Thus, he argues, the wisdom of the finance committees of insurance companies appeals forcibly to the intending investor as a good guide.

BANKING AND FINANCIAL

The Traders Bank has reason to be proud of its new bank building at Kincardine, Ont. It presents a very handsome appearance.

The Canadian Bank of Commerce is making good progress with its new bank building at Orangeville, Ont. It is being built of red brick with handsome stone facings.

First New Orleans Broker—I notice this paper says the day of classical quotations is at an end in England. Second New Orleans Broker—Never did have them in any of the exchanges in this country, did we?—Times-Democrat.

Edward W. Yates & Co., bankers, of Liverpool, who conducted a private bank for many years have been absorbed by the Union Bank of Manchester. Founded in 1836, the Union is capitalized at £2,500,000. Its £25 shares (£11 paid) return 10 per cent., and are valued at £25 3s. 8d.

The first number has been issued of the Michigan Banker, published by the Michigan Bankers' Association. It is edited by W. W. Waine, assistant secretary. It is a four-page sheet, devoted exclusively to objects of interest to the members in Michigan.

A gift has been made by the Bankers' Section of the Toronto Board of Trade to the Canadian Club, of a bronze tablet, which the latter body has placed upon the old building standing on the south-east corner of King and Frederick Streets in this city. The inscription reads: "On this site stood the first bank in Toronto—the Bank of Upper Canada—opened here in 1822." The original vault of the bank still remains within the walls of the old building referred to.

An interesting address was delivered before the Louisiana Bankers' Association by Byron E. Walker, D.C.L., general manager of the Canadian Bank of Commerce. In the course of it he said: "You cannot make a great nation by material progress, or excellent government, or well administered churches, or technical schools. You cannot make a great nation unless there are halls of learning where the duties of citizenship and all the things that go to make the ethical side of life are taught in their fullest form." Mr. Walker is a man of studious habits and a broad mind. He has so well informed himself, not only on banking and finance, but upon geology and art, that he has been made a D.C.L. of Trinity University. The distinction is well deserved.

In answer to a subscriber, who asks for some particulars of "a society with a French name which lends money in Ontario, and which, I think, is called a Case d' Economie," we would say that he probably refers to the Credit Foncier Franco-Canadien, which has been in business in Canada since 1881, and has had a branch in Toronto for some years. It has a paid capital of $1,196,172; reserve and contingent funds of some $500,000; has issued debentures of $6,500,000, and made loans on real estate of $7,058,000. It pays about 4¼ per cent. for its debenture money, and paid shareholders 6.4 per cent. dividend in 1901. There is a Caisse d' Economie (the French name for savings bank) in Quebec, and a similar thing in Montreal. The Montreal one has some $15,000,000 of deposits, the Quebec one over $7,000,000. They number their depositors by thousands. The latter has ample assets in provincial securities, municipal and school debentures, and loans secured by collaterals. The bank has also cash on hand or in chartered banks to the extent of $628,538.

TORONTO, CANADA, JULY 15, 1904.

ANSWERS TO ENQUIRERS.

Merchant, Ontario.—For something like two years, we published gratis week by week the applications made to the London offices of the Canadian Government, and those made to the Canadian section of the Imperial Institute of persons asking to be put in correspondence with Canadian merchants with a view to trade. We have discontinued publishing them, for the reason that we could but rarely trace any business accruing from these weekly "Trade Enquiries." In all that time, after publishing many hundreds of requests, we had not more than a few dozen responses. Some of these, we are glad to say, did result in business.

S. C. F., Winnipeg.—It is too early to expect the figures for the fiscal year 1903-04. The receipts of the Dominion Government on Consolidated Fund account in the year 1901-02 were $58,050,790.

J. C., Fredericton.—About a year ago the Halifax Banking Company was amalgamated with the Canadian Bank of Commerce. This will, perhaps, explain the difference in the lists.

Abashed.—Do not allow yourself to be worried about such a wicked report. No man of sense will believe it. Some day the dastardly author of it will be found out and disgraced. He is worse than a fool; confound his knavish tricks.

What can ennoble fools, and knaves, and cowards?
Alas! not all the blood of all the Howards.

TORONTO STOCK TRANSACTIONS.

The volume of trading this week has been somewhat larger, and values have been quite steady. No especially important feature, however, presents itself. The following is a summary of the transactions in the most talked of stocks: C.P.R., 1,713 at 124¼-125⅜; Bell Telephone, 195 at 144-144¼; Rich. & Ont. Nav., 270 at 72¼-72¾; Toronto Railway, 135 at 99⅞; Twin City, 461 at 94⅞-95¼; Sao Paulo, 161 at 103⅞-104; Dom. Steel, 1,425 at 7⅜-8¼; bonds, $3,000 at 57⅞-58; Nova Scotia Steel, 1,144 at 61½-68½; Dom. Coal, 205 at 40¾-43; pref., 110 at 105.

GROCERS AND PROVISION DEALERS.

Gallagher, Holman, Lafrance Company have been authorized by Ontario charter to buy the business and assets of the Rat Portage (Ont.) Meat Company, to do a general importing and exporting business in live stock and farmers' produce, etc., and to own and operate vessels, but they must not use in Ontario a larger amount of capital than $77,000.

Advices from Oregon state that dry weather is having a steadying influence upon hop values. Dealers are reported as paying 20c. on contracts of 1904 hops, and some sales have been made at 25 to 25½c. These quotations, however, are above the average. Prospects for the German and English hop crops at present look good. In British Columbia no very definite information is to hand, but the acreage is somewhat larger than last year.

Shipments of cheese last week from Montreal were larger than has been the case for some time past, in fact, during the present season. They were 104,252 boxes, but this is still some 32,000 boxes behind the figures for the corresponding week of last year. Total shipments since navigation opened have been 525,430 boxes, compared with 750,519 boxes at this time a year ago. The exportation of butter was also larger last week, being 18,512 packages. Altogether, there have been shipped this season 86,099 packages, against 60,989 packages last year at same date.

The amalgamated Meat Cutters' and Butchers' Workmen's Union have called a strike of their men, and already nearly 13,000 men in Kansas City, Mo., are out, the chief packing houses affected being Armour, Swift and Cudaby. In St. Joseph, Mo., some 5,000 hands are out, while in St Louis, Sioux City, Omaha, and one or two other packing centres, several hundred men are also affected by the strike order. Later reports say that now at least 50,000 men are affected. Already prices have made a jump as a result of the trouble, and it is not unlikely that some effect will be felt here also, as, should it continue any length of time, the American packing houses will have to stop export shipments in order to supply the local demand, which would throw more export trade into the hands of this company.

—During October, two hundred members of the Institute of Civil Engineers of Great Britain are to visit New York and St. Louis, at the invitation of the American Society of Civil Engineers. Efforts are being made in this country to have them lengthen their visit so as to see Montreal, Ottawa, and other Canadian cities.

The Canada Permanent Mortgage Corporation, Toronto, have put in an important improvement in the shape of switches, enabling them to shut off the electric current in any part of the building during a fire, which in so many cases is apt to interfere with the work of the firemen. Plans are being prepared, we understand, for still further protection, including a method by means of a Siamese connection, for refilling water tanks by steam engines.

—The annual meeting of the Hudson's Bay Company was held in London on the 4th inst., Lord Strathcona in the chair. The total profits of the company for the year were £268,730, and the directors recommended the payment of a dividend of 35s. per share. Fur sales had shown a decline of prices, partly owing to the Russo-Japanese war, in the opinion of the chairman. During the year, 180,000 acres of farm land had been sold, against 368,000 acres for the year previous, but the revenue for the past year was largely in excess. An interim dividend of 10s. per share, payable at the end of the year, was recommended.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Housese for the week ended with Thursday, July 14th, 1904, compared with those of the previous week:

	14th July.	7th July.
Montreal	$20,589,392	$20,386.267
Toronto	16.736,602	17,414,887
Winnipeg	6,270,587	5,685,446
Halifax	1,971,206	2,231,060
Hamilton	1,177,936	1,569,592
St. John	1,081,674	984.181
Vancouver	1,674,665	1,374,959
Victoria	931,132	470,195
Quebec	1,607.464	2,273,162
Ottawa	2.097,415	2,115.178
London	949.380	1,182,396
Total	$55,039,608	$54,687,323

THE INDEPENDENT ORDER OF FORESTERS.

(CONTINUED.)

THE I.O.F. AND OLD LINE COMPANIES.

The Chief rightly admits there are no shareholders in the I.O.F. with which to share dividends, but the Dr. might have saved himself the trouble of announcing such a fact, as all members of the Order are on equal footing with himself and any other member of the Supreme Court, consequently have a right to request, as did the members from Manitoba, as have also others of a later date, and also to *demand* a statement of the affairs of the order in detail, which up to this date has been denied them. I would also suggest that two or more disinterested parties be appointed periodically as auditors to examine the books and furnish a report. Reference is then made as to the manner in which business is conducted by "old line companies" as follows: "On the payment of every annual premium there must be deducted a certain percentage as a renewal commission to be paid to the agent." In this respect what is the difference between those parties who are called agents in the old line companies and those parties called "organizers" in the I.O.F., and who were paid for their services the sum of nearly $200,000 in 1902, and how do those figures compare with the statement made by the Dr. where he states the securing of new members in the I.O.F. "is practically free of costs?"

WYLD-DARLING COMPANY LIMITED, TORONTO **Wholesale DRY GOODS, and Clothing MANUFACTURERS**

Your remarks in reference to rewards in the I.O.F. in your issue of May 6th, for "meritorious work by various brethren," viz.: A grand cross of merit for the P.H.C.R.: gold watches by the half dozen," etc., recalls to my mind a presentation in 1898 of the sum of $5,000 to one of the executive members of the order, who was then drawing a salary equal to or more than the Premier of Canada, as a slight mark of appreciation of his valuable services and untiring work. There were also two other favorites of the order who were made the recipients of $500 each at the same session of the Supreme Court, an account of which up to the present time I have failed to notice having been placed under the heading of expenditures, the sums referred to may have been made up by private subscription out of the purses of those governing the scheme (?) if not I would like to have the matter accounted for in the bill of expenses, and also to be informed if the sums mentioned above were not obtained by private subscriptions, what right had those concerned in the matter to squander the money which belonged to the general membership. In view of the above facts, I consider all members of the subordinate courts have a right to demand and also insist that a statement in detail be furnished of the receipts and expenses of the order on the 1st July and 1st January in each and every year in the future.

Other Expenses.

In the report of the Superintendent of Insurance an item amounting to $88,871.69 is mentioned as being the cost to the order of the triennial meeting of the Supreme Court held in Los Angeles in 1902, which has not appeared in the official organ during the year named. Why has that amount been omitted? An explanation from the officials will be desirable. I am unable at the present to obtain the information as to the number of delegates who attended the aforesaid triennial meeting, but estimate the number to be 175, if correct, the cost would be $507.84 to the order for each member for that memorable trip, yet in the face of the omission of the item referred to above, which did not appear in the "Forester," we will take for granted that the total income for the year 1902 was $3,311,170.48, as per statement furnished the Government Superintendent. In the above-mentioned statement a balance is shown to the credit of the society of $869,600.63. We will take for granted that the income was as stated, and apply the figures as given in the "Official Organ" for the expenses, then add the amounts which were given to the Government for 1902, but omitted in the "Official Organ," and which figures up to $216,270.66 and reduce the balance to the credit of the order of $555,139.90 instead of $869,600, which of the statements are we to suppose to be correct?

Advertising.

The amount sent to the Government as expenditure under the above heading is reported to have been $49,014.78 for the benefit of the order. The proper authorities in that department will confer a favor to the subordinate courts by explaining how such a large sum is used for such a purpose, I also notice that in each number of the "Forester" there are quite a number of advertisements in each issue during the year 1902, which should bring in something to the credit of the order and to offset the expenditure mentioned above, If such items are not accounted for, why not?

"Forester" and Supplies.

Referring to the above item in connection with the matter, I am free to admit that for years past I have considered it an excessive charge for the articles furnished. In the government statement for 1902 the price named for supplies ("net".) is $8,118.26, and the "Official Organ," $42,173.87, equal to $3,514.49 per month, yet in view of this statement in the July, 1903, number, the following figures appear, for "Forester" and supplies, $1,916.26, and take the figures $72,059.27 as represented being the cost for the year 1902 for the two articles, it leaves a balance of $49,104.15 for supplies, of what value are those goods as an asset?

Refunds.

The figures under the above heading are represented entirely different in the statement presented to the Superintendent of the Insurance Department at Ottawa and that laid before the membership; in the former the amount is placed on debit side of the cash account as being $1,355.68, the latter on the credit side of the cash account, and stated as being one hundred and twenty-one thousand and sixty-three dollars, can this error be accounted for?

Annuity Benefits.

In this department of the society, which is a commendable one, and which no doubt is highly appreciated by those who are recipients of such benefits, but I was surprised to find the immense addition in the outlay in this department alone for 1903 compared with that of the year 1900, which is on an average over twelve hundred and fifty per cent., therefore if the drain on the surplus continues in like proportion as the society gets older, it will not be a difficult matter to lessen the surplus if the expenditures increase in like proportion in other departments without such methods as giving to three favorites $6,000, as in 1898, or gold watches, etc., of a more recent date, I therefore think as I have already stated that a strict examination by competent and disinterested parties should be made of the books of the order every six months, and a detailed statement of such examination be published of receipts and expenditures, as requested in 1898, by some of the representatives of the Supreme Court and also, some of the members to the High Courts as I have already noticed.

In conclusion I may say two or more auditors are appointed by the order at a salary of $2,000 per year each and am surprised that on comparing the figures in the two statements as here presented, that there is a difference in the expenditure of $216,270.66, and to that end think that a thorough investigation should be made by some competent members of the order, or others who are not connected with the society as to what value has been received for many of the large items, also why there should be such a difference in the expenditure in the two statements. Hoping you will consider this matter worthy of your attention and apologizing for the space occupied in your very valuable paper, I beg to sign myself,

An Old Forester.

Ontario, June, 1904.

Our correspondent here encloses figures occupying four pages foolscap, giving statements of receipts and payments in the order for 1902 as published by the "Forester," and by the Superintendent of Insurance respectively in order to show their discrepancy. We have not room for these.

FIRE INSURANCE MATTERS.

The actuality of the conflagration hazard on this continent seems lately to be making an impression on the minds of people in high places. The Wisconsin superintendent o insurance devotes part of his report to the subject. He wonders, as we have often wondered, at the criminal negligence as to fire which characterizes both Canada and the States

The governing committee of the Western Insurance Union has instructed the Illinois State Board of Fire Underwriters to secure information as to the conflagration hazard and fire protection in the smaller towns of their territory It is understood that all third-class towns are to be included. The field men of other States are said to have been asked for similar information.

The shortness of the public memory for disasters and their causes is one of the features of society which often cause the publicist to wonder. One would have thought that the extensive fire in Paterson, New Jersey, two or three years ago, and like disasters since, would have been sufficient to cure the town councillors of indifference, and the fire brigade of carelessness. But it now appears, by the admission of the Chief of the Brigade to underwriters, that the cit fire protection is altogether inadequate. He acknowledges that the city water mains are too small; that when six engines were at work streams cannot be thrown above the second story; that if a bad fire started in the big mills, th

department would not be able to control it; that of the ninety-nine men in the department, thirty-five were absent from duty for one cause or another, and that the supply of hose is inadequate. Hence, before the end of July the whole city will be "pink-slipped" by underwriters, unless there is a change in the conditions. Those familiar with conditions in the city say the whole trouble is politics.

We hear that Mr. H. N. DeWitt, who was inspector of the National Bank of Ireland for several years, has been appointed inspector for Ontario of the Guardian Assurance Company.

The Liverpool & London & Globe and the North British & Mercantile paid between something like $5,500,000 for claims arising from the Chicago fire. The Ætna, Hartford, paid $4,100,000, and Home of New York $3,070,000. Suppose these companies had gone on the principle which so many advocate of "living from hand to mouth," where would the funds come from to pay fire claims caused by a conflagration?—London Review.

In case people forget, as they do forget, what havoc conflagrations have produced in Canada, we take from Mr. Garrow's pamphlet a list of ten conflagrations in fifty years whereby the loss was almost fifty millions of dollars:

1852—July 28th, Montreal, property loss, $5,000,000; 1,100 buildings destroyed.

1866—October 16th, Quebec, $3,000,000; 2,500 buildings destroyed.

1876—June 18th, St. John's, Que., $3,000,000; insurance (estimated), $1,500,000.

1876—September 3rd, St. Hyacinthe, Que., $1,250,000; insurance (estimated), $600,000.

1877—June 20th, St. John, N.B., $13,500,000; insurance, $6,600,000.

1897—October 17th, Windsor, N.S., $1,500,000; insurance, $700,000.

1898—September 10th, New Westminster, B.C., $2,000,000; insurance, $1,000,000.

1900—April 26th, Hull, Ottawa, $7,500,000; insurance, $3,662,098.

1901—January 23rd, Montreal, $2,500,000; insurance, $2,000,000.

1904—April 19th, Toronto, $10,350,000; insurance, $8,375,000.

The annual meeting of the trustees of the Toronto Firemen's Permanent Relief Fund was held last week. There were present Mayor Urquhart, President J. F. Ellis and Secretary F. G. Morley, of the Board of Trade, Chief Thompson and City Treasurer Cody. The treasurer shows a balance on hand up to June 30th, including interest, of $55,656.59, as against $54,727.89 on June 30, 1903. The following disbursements were ordered for the year: To the widow of F. G. Russell, $30 per month; of Harry Clark, $35; of Walter Collard, $15; of Thomas Deacon, $12; children of D. J. Nolan, $30; Mrs. Everest, $5; widow of Arthur Potter, $20.

A recent circular sent out by the Manchester Assurance Company to its agents shows that the company will continue to do business in Canada. The following is from the circular letter sent by Mr. James Boomer, manager for Canada, to the company's agents in the Dominion: "Referring to our previous communication, under date of the 17th of May last, I beg to advise you that the provisional agreement entered into for the transfer to the Atlas Assurance Company, Limited, of the Manchester Assurance Company, has now been ratified by the shareholders of both companies. The Canadian business of the 'Manchester' will be continued as formerly, with head office at Toronto, under my management."

◆

LIFE AND ACCIDENT INSURANCE

Embezzlements for April in the United States, as taken from the Bulletin of the United States Fidelity and Guaranty Co., amounted to $902,361. Classified according to professions and occupations, they were as follows:

From banks	$537,828
Benevolent societies	1,568
Building and loan associations	50,000
Court trusts	4,300
Federal and State	101,000
Firms and corporations	56,537
Insurance companies	2,690
Municipal	53,800
Transportation companies	8,438
Miscellaneous	86,200
Total	$902,361

It is to the credit of Messrs. Eastmure and Lightbourn that they were early in perceiving the eligibility for business purposes of the property on Adelaide Street, just east of the post-office. They have secured a part of the old County Court House of York, and have rebuilt and modernized it. Indeed, the heavy and cavernous appearance of the structure is largely taken away by the new doors and reasonable windows to which the County Council have treated themselves, and by the cleansing process to which the walls of the Eastmure & Lightbourn building has been subjected. The new entrance to the Eastmure & Lightbourn building, with its Ionic pillars and carved arch, relieves and ornaments the front; and in fact the whole block between Toronto and Church Streets is improved by this up-to-date structure, the interior of which is so altered as to be practically new. Messrs. Eastmure & Lightbourn have removed to these premises from No. 3 Toronto Street, which they had occupied for a dozen years or more, and the head offices of the Ontario Accident Insurance Company, the Queen City Plate Glass and Mirror Co., Limited, the Registry Company of North America, Limited, and the head office for Canada and Newfoundland of Lloyd's Plate Glass Insurance Company of New York will in future be situated at 61 to 65 Adelaide Street East.

Lives of great men all remind us
We can hustle like the deuce,
And departing, leave behind us
Ducats for our widow's use.

Life is real, life is earnest,
And if we are well insured
The stern sorrows of our parting
May much better be endured.

Geo. W. Hatch.

LONDON ENGLAND—The National Bank of Scotland.

Northern Assurance Co.

The Sixty-Eighth Annual General Meeting of this Company was held within their house at Aberdeen, on Friday, June 10, 1904, when the Directors' Report was presented.

The following is a summary of the Report referred to :—

FIRE DEPARTMENT

The premiums received last year amounted to **$5,096,040**, showing, in comparison with the premiums of the previous year, an increase of **$294,215**.

The losses incurred amounted to **$2,460,760**, or 48.3 per cent. of the premiums. This is the lowest ratio which has been experienced by the Company since the year 1878. The general average of the experience of the Company from the beginning is now 57.7 per cent., or, including its provision for losses on current risks 59.8 per cent.

The expenses of management (including commission to agents and charges of every kind), came to **$1,710,240**, or 33.6 per cent. of the premium, a ratio 1.4 in excess of that of the previous year.

The directors have thought it desirable to increase from 40 to 45 per cent. the provision for liability under current policies. After charging the account with **$2,793,220** to meet this liability, and crediting it with **$1,920,730**, the amount charged in 1902, there remains a credit balance of **$552,550**, which, as usual, has been transferred to the profit and loss account.

FIRE ACCOUNT

Amount of fire fund at the beginning of the year	$5,000,000	
Amount transferred from profit and loss account, in terms of resolution of General Meeting held 12th June, 1903	500,000	
		$ 5.500,000

Mercantile Summary.

Foley Bros. contemplate building a chair factory in Fort William, Ont.

East Toronto ratepayers have voted in favor of raising $55,000 to establish an independent water system.

C. A. Graham's carriage shop in Napanee has been destroyed by fire at a loss of $5,000, partially covered by insurance.

The sites are now being marked out for the paper, pulp and flour mills projected by the Backus Company, at Fort Frances, Ont.

T. Blouin, of Quebec city, a soapmaker in a small way, has made an assignment of his estate, and proposes a settlement at 40 cents, on an indebtedness of about $3,000.

A voluntary assignment has been made by Adelard Robert, of St. Jerome, Que., in the grocery business since 1900, and previous to that a clerk. His wife is reported to have a dower-claim of $1,000, which will largely eat up the estate.

The Resources Publishing Company, Hawkesbury, Ont., has been incorporated under Dominion charter, with an authorized capital of $100,000. Among the incorporators are Messrs. Frank Maltman, G. O. Kerr, and F. H. MacKey, all of Montreal.

A great convenience will be afforded to the people of New Glasgow and Pictou, N.S., when the new ferry steamer "Hiawatha" is completed. She is to ply between Pictou and Pictou Landing, and was launched last week. She is large enough to accommodate horses and carriages on board.

The National Retail Furniture Dealers' Association of Canada, held a successful convention this week in Toronto, the president, Mr. J. F. Brown, in the chair. This gentleman, in his address, referred to some of the evils at present existing in the trade, such as the sale of goods by manufacturers to people not retailers, bad packing, excessive freight rates and so forth.

The Grand Trunk Railway will build in East London a very large roundhouse. It is to cover an acre of ground, will be provided with the most modern appliances, will be ready by December 1st, and its cost is estimated at not less than $75,000. The present roundhouse is to be torn down and the site used for switching purposes.

"Previously a farmer." Such is the not uncommon description sent us of the antecedents of J. E. Bergeron, who has carried on a small store business several miles from Jonquieres, Que., since 1901. He has not succeeded, and is now reported as having assigned to a Quebec accountant.——J. Fisher & Co., general storekeepers of the same place, who were reported in these columns as insolvent several weeks ago, are offering 30 per cent. on liabilities of $5,648.

The Atlin district promises to become the scene of a good deal of activity this season in hydraulic operating. The dredge which the British-America Dredging Company put in last year on Dixie Creek has given excellent results and they are now about to instal another and larger one, and there is the possibility that they will put in another as well. The British Columbia Dredging Co. is also putting one on Spruce Creek, to be ready for operation by October 1st. The Switzer Robinson Corporation have started up the hydraulic plant which they placed on Otter Creek last summer, at a cost of $60,000.

MONEY RECEIVED ON DEPOSIT.

ABSOLUTE SECURITY

3½% interest allowed. Compounded half-yearly.

EVERY FACILITY

The Corporation is frequently made the Depository of large sums which firms and individuals may have on hand and of which they may not require to make immediate use, or which they may be holding or accumulating for some specific purpose. While such deposits may be withdrawn when required, if left for a specified time they may be received on special terms.

We shall be glad to meet or correspond with any merchants, manufacturers, or others, who have funds at their disposal for which they desire to obtain a liberal rate of interest combined with undoubted security.

WHY lock your money up in a bank to bear an insignificant rate of interest when you can purchase our Debentures, which are issued for one, two, three, four or five years, and bear interest at five per cent. per annum. Half-yearly interest coupons, made payable to bearer, are attached to these Debentures. . . . .

The Debentures are transferable. Remember your money is safe here. There is absolutely no chance for loss. Write us for further information. . . . 6

The shipping returns of the port of Vancouver for the year ending June 30th last, are a source of great satisfaction to its citizens during the year, the total number of vessels leaving the port was 452, with an aggregate registered tonnage of 490,398 tons. Only fifty-nine of the outward bound craft were of British register, but they carried more cargo than the foreign vessels. Inwards the total was 507 vessels, with a registered tonnage of 465,612 tons, of which 57 were British, with 65,100 tons weight of freight. Coastwise during the year there entered the port 3,442 vessels of an aggregate registered tonnage of 654,274 tons, and outwards there were 3,462 vessels of an aggregate registered tonnage of 656,974 tons.

Mercantile Summary

The Union Hat Works at Brockville, formerly belonging to Saulnier and Decelles, have been sold to the Walthausen Hat Corporation, of South Norfolk, Conn.

The Canadian Pacific Lumber Company's large dry kiln at Port Moody, B.C., has been burned down at a loss of $75,000. Several stores and cars loaded with lumber were also burned.

The Grand Trunk Railway spring and blacksmith shops at Point St. Charles, Montreal, have been destroyed by fire at a loss of $10,000 or more. About 120 skilled mechanics are thrown out of employment.

We hear from Sydney that the forest fires which during some days devastated thousands of acres in that district, and came perilously near the city itself, have at length been quenched by heavy rains. The damage, however, is believed to have reached $200,000, mainly to lumber lands and sawmill property.

The general practice in America seems to have settled down to a height in buildings of from 16 to 20 stories, the extreme presented by two buildings 27 and 25 stories high not having justified general imitation. Remoteness of lofty floors from the street, and the excessive expense of maintaining elevators, tend to make the venture commercially unsuccessful. Electric elevators are more liable to over-running at the landing places than are those on the hydraulic system; but in this naturally, much depends on the operator. The peculiar advantages of electricity, in distribution of power over long distances do not apply in the case of the elevator, since the source of power is close to the work. The electric elevator stands today an economic failure for schedule service; while in point of simplicity, ease of maintenance, and control, the hydraulic elevator has maintained its reputation.—Engineering.

A broker, who desires to impress upon readers of his circulars the beauty and advantage of dealing in options—i.e., paying a fixed sum for the right to buy or sell a stock at present price at a future date—has this to say: "The present moment is peculiarly fraught with reasons for option-dealing. The war and its outcome, the unrest in Russia and the Balkans, the depression in South Africa; labor troubles in various parts of the world, the Presidential election in America, and the probability of a general election at home, are factors which make a Put' option the most desirable of safeguards. On the other hand, the extraordinary cheapness of money, the low level of most securities, the likelihood that the afore-mentioned bogeys' will vanish into thin air, and that after the prolonged depression a natural and vigorous counter-movement is due, all point to good profit accruing from the call

Mercantile Summary.

Preston, Ont., ratepayers have decided in favor of raising $27,000 to purchase the present arc and incandescent electric lighting plants, and to provide for the installation of a fairly large plant, to be run by the municipality.

The Empire Salt Company, Limited, Sarnia, has received an Ontario charter. It will search for, raise and deal in salt, acquire or build wharves, etc. The share capital of the company is placed at $50,000.

Mr. Cornelius Shields has been reappointed general manager of the reorganized Lake Superior Company. The steel plant at the Soo, it is understood, will be put in operation just as soon as the raw material and skilled labor can be got together.

The Quebec Improvement Company have purchased about 1,000 acres of land at the southern terminus of the Quebec Bridge now in course of construction. They believe a thriving town can be created on the site as soon as the bridge is open for traffic, there being an abundance of water power for manufacturing purposes and good docking facilities. Among the gentlemen interested are Senator C. A. P. Pelletier, president; Mr. John T. Ross, Hon. N. A. Belcourt, M.P., Col. C. E. Allen Jones, Butler Lowry; managing director, Hon. Sir Frederick Borden.

A bill has been filed in the New Jersey Court for the dissolution of the Standard Oil Company, charging that the company is illegal and that it exists in violation of the anti-trust laws of the United States, and of the decision in this state relating to the monopolies. The bill charges that the Standard Oil Company, in Ohio, was declared illegal by the courts of that state, but that the company, instead of dissolving in obedience to that decision, has, by subterfuge, evaded the Ohio decision, and that the New Jersey corporation is merely a holding company for the Ohio concern. The bill asks that not only the company be dissolved, but that its assets be distributed among its stockholders by a receiver after paying off its outstanding securities.

We are informed that the De Beers Mines Company, Ltd., Kimberly, South Africa, have cabled an order for a third Westinghouse-Parsons steam turbine generating outfit of 1,500-k.w. capacity for their power plant at Kimberly, to be similar in every respect to the two which have been in operation for over a year. That a concern with the standing of the De Beers Company should install machinery built at such a distance speaks well for the confidence which they place in it. The new turbine unit will operate at 150 pounds boiler pressure, 35 degrees superheat and about 23″ vacuum. Taking into account the altitude of Kimberly, this would be equivalent to about 27″ vacuum at sea level. The new unit will be shipped via New York in about six months.

At Thamesville, Ont., three by-laws, to install a water-works system for fire protection and private use throughout the town; to purchase the electric light plant, and run it as a municipal concern, and to spend $6,500 for additional granolithic walks, were carried on the 11th inst., by large majorities.

CHARACTER AND CREDIT.

At the annual convention of the Credit Men's Association, held in New York a few days ago, there was an address delivered by Mr. E. D. Page, which is worth summarizing for our readers' benefit. At the start he contended that the operations of mercantile business have become so extended and complex that character is no longer a question of abstract morals, but one of enormous practical importance. It is impossible for those actually distributing the products of industry, and having many customers who are themselves local dealers, to ascertain the responsibility and trustworthiness of all to whom they sell, and yet it is a necessity of business to extend credit as freely as possible. It is out of this necessity and the need of some means of knowing where and how far credit may be safely extended that the system of employing special credit experts has developed, and these have been constrained to look for a widespread organization in order to devise methods of making their work effective. And here it is that character as an index to credit safety comes so largely into play. This is a practical business matter which concerns even the mass of consumers who are the ultimate purchasers of goods, for the prices they have to pay are determined in some measure by the chances of loss among dealers, who have nowadays to calculate closely the margin of profit. It is the consumer who in the end pays the losses of fraud and dishonest bankruptcy. The close enquiry into credit and the exacting of a high standard of trust is not only a safeguard for honorable business men and an assurance of the lowest cost to consumers, but it tends strongly to inculcate and enforce a sound business morality, the influence of which cannot be overrated. The basis of credit that has to be inquired into includes personal character of the debtor, his business ability, his financial responsibility, determined by the amount and value of his assets and their relation to liabilities, and various local conditions that may affect his own chances of success in his line of trade.

It is important that the business man shall have sufficient capacity and sufficient capital to carry on what he undertakes; but it is essential, if he is to be trusted, that he shall have integrity of character, the purpose and the will to pay what he owes, according to the tenor of the obligation he assumes, at any reasonable sacrifice. Character, capacity and capital; these three, but the first is character. Credit on an extensive and complicated scale has become necessary to the successful conduct of the vast operations of commercial business, and the more solid and sound its support the better for the whole industrial system and the material well-being of the community. Nor is the moral effect upon the character of the people in their daily relations to be ignored. In banking and in commerce it is essential as a business policy, if

Debentures for Sale.

Sealed tenders addressed to "The Mayor and Council of the City of Regina" will be received up to and inclusive of Saturday, the 30th day of July, 1904, for the purchase of debentures of the city of Regina issued in pursuance of a by-law in that behalf authorizing the raising of $135,000, for the construction of a system of water works, sewerage, etc., for city purposes.

These debentures will bear interest at 4½ per cent. per annum, and are made repayable within fifty years as follows:—

During the first five years succeeding issue thereof, interest only at the said rate will be paid annually, after which period the whole debenture debt of $135,000 will fall due and be payable in forty-five equal annual instalments of $7,047.30, principal and accrued interest combined.

Debentures can be issued at the option of the purchaser in sums of $5,000, or over.

The highest or any tender not necessarily accepted.

Dated, Regina, N.W.T., 29th June, 1904.

J. Kelso Hunter,
Secretary-Treasurer.

$25,000 DEBENTURES.

For Twenty Years. Repayable in Equal Annual Instalments.

TOWN OF WETASKIWIN,
Alberta, N. W. T.

Sealed offers will be received by the undersigned up to Six p.m., Friday, July 22nd, 1904, for debentures as above. Interest at Five per cent., payable yearly.

Particulars of Debentures and Municipal Statistics can be obtained from the office of this publication, or from

J. YOUNG BYERS, Town Clerk.

The highest or any offer not necessarily accepted.

One Hundred and Thirteen Thousand Five Hundred Dollars—$113,500.00

to be issued in the sums of five hundred dollars each, under the provisions of Act of Assembly 52 Victoria, Chapter 27, payable in 40 years, with interest at the rate of three and one half per centum per annum, payable half yearly on the 1st day of May and the first day of November.

The proceeds of said debentures are to meet expenditures for Public Civic Works and needed Civic Improvements.

First coupon (5 months interest) payable 1st November, 1904.

FRED SANDALL,
Chamberlain, Etc.,
City of ST. JOHN, N.B.

Chamberlain's Office, June 27th, 1904.

---

enduring success is to be attained; and, if the sentiment that demands and enforces it can be diffused into the management of corporate interests, the administration of public affairs and the social life of the people, it will constitute a powerful antidote to the influences that tend to corruption and degeneration.

The British Columbia Permanent Loan & Savings Company.

Dividend No. 12.

Notice is hereby given that a dividend at the rate of EIGHT PER CENT. PER ANNUM has this day been declared on the Permanent Stock of the Company for the half-year ending June 30th, 1904, and that the same will be payable at the Head Office of the Company, No. 321 Cambie Street, Vancouver, B.C., on and after July 15th, 1904.

By order of the Board.

THOS. T. LANGLOIS,
President.

Vancouve , July 8th, 1903.

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFETIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World"s Fair, and consult Grand Trunk Agents for further particulars.

The Traders Bank of Canada.

Notice is hereby given that after the publication of this notice for four weeks, application will be made to the Treasury Board for a certificate approving of the following by-law passed at the annual meeting of the shareholders held this date, viz.:—

A BY-LAW TO INCREASE THE CAPITAL STOCK OF THE TRADERS BANK OF CANADA.

WHEREAS the capital stock of the Traders Bank of Canada is $2,000,000. divided into 20,000 shares of $100 each, the whole amount of which has been taken up;

AND WHEREAS it is deemed expedient that the said capital stock should be increased;

Be it, therefore, enacted by the shareholders of the Bank assembled at the Annual General Meeting, held at the head office of the Traders Bank of Canada, the 21st day of June, 1904.

(1) That the capital stock of the Traders Bank of Canada, be, and the same is hereby increased by the sum of $1,000,000, divided into 10,000 shares of $100 each.

(2) When the directors so determine, and from time to time as they think fit, the said increased stock shall be allotted to the then shareholders of the Bank pro rata, and at such rates as is fixed by the directors, but no fraction of a share shall be so allotted; provided in no case shall a rate be fixed by the directors which will make the premium (if any) paid or payable on such stock so allotted exceed the percentage which the reserve fund of the Bank then bears to the paid-up capital stock thereof.

(3) Any stock allotted from time to time which is not taken up by the shareholder to whom such allotment has been made within six months of the time the notice of the allotment was mailed to his address, or which any shareholder declines to accept, or any shares which shall not be allotted by reason of the provision hereinbefore contained against the allotment of fractions of a share, may be offered for subscription to the public, at such times, in such manner, and on such terms as the directors may prescribe.

H. S. STRATHY, General Manager.

Toronto, 21st June, 1904.

"WE WILL BOND YOU."

Corporate bonds are more reliable and in every way more desirable.
Only where it is indicated that men possess integrity of character can they obtain a bond in a surety company.
Regard your name as a bondsman as an encumbrance on your property.
Personal sureties are subjected to questions as to the worth of the bond filed which they would rather not have made public.
Once a corporate surety bond has been used, no further use for personal surety can be found.
Rates of premium on surety bonds are always moderate.
A surety company is required by law to carry reserve against its risks and is possessed of large resources.
The UNITED STATES FIDELITY AND GUARANTEE COMPANY executes bonds covering all positions and trusts.
Existence of surety companies makes it unnecessary for the employe to ask friends to become surety for his integrity.

Surety companies protect the home and family.
Unlike personal surety, the bonds issued by surety companies can always be collected.
Resolve to never have your name used as a bondsman.
Embarrassing positions may be escaped by not becoming surety on a bond nor asking others to do so.
This Company does not surround the person bonded with annoying restrictions.
You cannot afford to incur obligations by asking friends to become surety for you.

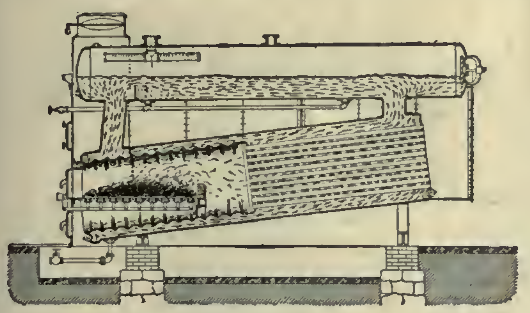
Internal Furnace Saves Ten Per Cent.



An externally fired boiler wastes fuel because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler, the heat is transmitted directly to the water, and air cannot get into the furnace except through the regular drafts. This makes a saving of at least 10 per cent.

TORONTO MARKETS.

Toronto, July 14th, 1904.

Chemicals, Drugs, etc.—There is no noteworthy feature visible in this market at present. Prices continue normal and the average amount of business for this season of the year is being transacted. New York reports speak of a somewhat firmer feeling for opium owing to some speculative buying in primary markets. The demand for quinine is somewhat easier, and a decline is deemed not improbable. The market for lithia carbonate is very unsettled. A good demand is reported for medium grade Mexican vanila beans.

Dry Goods.—The volume of business which has been transacted during the past week, ever since the weather became really seasonable, in fact, has been quite satisfactory. Fair orders covering a wide range of goods are coming in from all parts, and travellers report prospects for fall trade to be very good indeed. All staple goods retain their firm values, and so far as can be seen, there will be no appreciable decline tor some time to come. There is a good demand for dress goods.

Flour and Grain.—A steady market without prominent features exists for flour. Ninety per cent. patents sell for $3.60, though holders stand out for $3.65, and in buyers' bags, while choice brands go a few cents higher. In rolled oats no change has taken place. Bran and shorts continue about the same as last week. Wheat is 1 to 2 cents higher and in good demand at the advance. Oats are up 1c. Peas have gone down 1c. The rest remain unchanged. The coarser grains are dull and quotations are nominal.

Fruits and Vegetables.—The feature this week has been the appearance in somewhat larger quantities, of a few domestic-grown vegetables. New potatoes, however, still seem scarce and sell around $1.40 or $1.50 per bushel. Peas are firm and sell at about 20c. per basket. Strawberries have been fairly abundant, but many have been of comparatively poor quality, which have been sold at 5 to 6c. Good and fancy berries bring 6 to 10c. Raspberries are beginning to come in, prices realized being 10 to 14c. Gooseberries and red currants are now becoming more plentiful. The following will point out the range of prices: Strawberries, 5 to 10c.; cherries, per basket, sour, 75c. to $1; cherries, per basket, sweet, $1 to $1.40; raspberries, 11 to 14c.; lawton berries, 15c.; gooseberries, per basket, 50c. to $1; red currants, large basket, 60 to 75c.; huckleberries, per basket, $1.25 to $1.50; Oranges, California, navels, $3.50 to $4.50; Valencias, $5 to $7; Messina, ovals, $2.25; lemons, Messinas, $3 to $3.50; Sorrentos; $3 to $3.50; Verdillis, $3.25 to $3.75; bananas, 1sts, per bunch, $1.75 to $2.25; 8's, per bunch, $1.25 to $1.50; pineapples, Florida's, per case, $3.50 to $4; Havanas, $3 to $3.25; watermelons, each, 30 to 40c.; cantaloupes, per box, $3 to $7; California plums, per box, $1.50 to $1.75; California apricots, per box, $1.25 to $1.50; Georgia peaches, $1.50 to $1.75; California peaches, $1.25 to $1.75; Alberta peaches, 4-box case, $1.50; 6-box case, $2.50 to $3; Baltimore apples, half-bushel basket, 50c. Vegetables, Canadian peas, per basket, 15 to 20c.; Canadian cucumbers, per dozen, 20 to 25c.; Canadian potatoes, per basket, 40 to 50c.; Canadian beans, per basket, 50 to 60c.; Southern beans, per barrel, $3.50 to $4; Egyptian onions, per sack, $2.50; Baltimore cucumbers, per hamper, $1.50 to $1.75; Baltimore beans, per hamper, $1 to $1.25; Baltimore beans, small basket, 50 to 60c.; Southern tomatoes, per case, $1 to $1.25; southern tomatoes, New Jersey, $2.50; southern cauliflowers, per dozen, $1.75; southern cabbage, per barrel, $1.50 to $2; Kalamazoo, celery, per dozen, 45 to 50c.

Hides, Skins, and Tallow.—There is a steady market for hides, though they are now in comparatively good supply. Sheepskins are steady, and so are calfskins. Tallow is a little firmer. Quietness is the prevailing tone in the leather market.

Groceries.—Not much change has taken place in the situation of general groceries during the week except in connection with canned goods. Great strength is looked for in canned salmon, as several of the factories have made no preparations for reopening. The Canners' Association gives a hint that an advance in prices is quite possible any time now in any of several lines of fruits, vegetables and meat. Old stock has been selling freely, and is now nearly out of market. Tomatoes are particularly firm, as stocks of old crop in hand are very light, and there will not be any new stock offering for the two months or more. Corn also is very firm, and there is little old left. Sugars retain their strength at the recent advance. The statistical position both as regards American and Cuban stocks is much stronger. Molasses is scarce and may become higher. Smaller arrivals of coffee have brought about a stronger feeling. The crop in Brazil also is reported quite light. For first-class teas the demand continues good, but somewhat irregular. Japans are particularly strong, while Ceylons are abundant. Inactivity is the rule in dried fruits, but considerable interest is taken in currants owing to the recent changes in the Retention Law.

Provisions.—The supplies of butter are large, and the demand is confined chiefly to small lots of choice dairy for table use. Prices are tending towards the easy side. Cheese is moderately firm. Eggs are even firmer than they

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

were, but their quality is giving cause for complaint in many cases. The market for poultry is firm under light offerings. The hog product market is firm under the good demand created by hot weather.

Wool.—The new clip of wool is held more firmly owing to advancing prices at the London wool sales, and to the strong situation in the United States. There has also been some export this week to that country, and many enquiries have been made for fleece and combing. Offerings of fleece continue light, and the demand is good. The market for pulled wools also is firmer, and some cars have this week been sent to the United States.

◆

MONTREAL MARKETS.

Montreal, July 13th, 1904.

Ashes.—The volume of trading is limited, and there is practically no stock in store. There has not been a barrel of pearl ash received for some months, and extreme prices would be paid for some moderate supplies, as high probably as $7.50. For first quality of pots the quotation is still $6.05 to $6.10 per cental.

Dairy Products.—The shipments of cheese to Britain last week were about the largest of the season thus far, being 104,252 boxes, but they were still some 32,000 boxes behind the figures of the corresponding week of 1903, and the total shipments since opening of navigation are 525,430 boxes, against 750,519 boxes at this date a year ago. Butter shipments are somewhat larger, the figures for last week being 18,512 packages as against 8,944 packages for corresponding week last year, and total shipments to date are 86,099 packages, as against 60,989 packages last year at same date. The cheese market continues irregular and unsettled. Boat receipts of Quebec cheese this week brought about 7¼c. on the wharf; Townships is quoted at 7½c., and fine Westerns at 7¾ to 7⅞c. The butter market is comparatively dull. Finest creamery is quoted at 17 to 17¼c., while seconds are slow of sale at 16 to 16½c. per pound.

Dry Goods.—Matters continue rather quiet in this line. Travellers are not doing much as yet in the booking of fall orders, having to contend with quite a pronounced disposition on the part of a good many retailers to defer buying until they are more sure of their actual needs, and the business being done is still largely of a sorting character. Money is coming in fairly, except from the North-West. Some of the larger manufacturers in the West of knitted woolen goods have advised a withdrawal of all quotations. Linens are advancing strongly, and a letter received this week from Belfast states that manufacturers are quoting advances of from 25 to 30 per cent., presumably due to the difficulty in getting supplies of flax, owing to the war, which is interfering with farming operations in Russia.

Groceries.—Sugars have been showing increasing strength, and the local refiners established a further advance of 5c. a cental on Thursday of last week, making the present factory price for standard granulated $4.45, with soft grades running from $3.85 to $4.25. The demand is good, and prices are expected to continue steady for some time. Two large cargoes of raw West Indian sugars have arrived in port within the last few days. Molasses is assuming a much firmer tone, and 27c. is being asked by some importers for round lots. The amounts of new crop on spot is limited, only from 3,500 to 4,000 puncheons having come to hand this season, instead of 11,000 to 12,000 puncheons as usual, and it is said further supplies are not available. In other lines nothing new is reported.

Hides.—There is now but a light business being done in calfskins, for which, however, 13c. is still being paid for No. 1 quality. A rather better demand is reported from tanners for hides, and dealers are still buying No. 1 at 9c. Lambskins are advanced this week to 40c.

Leather.—Boot and shoe men seem fairly busy on orders for fall footwear, but are not reported as large buyers of leather, and the jobbing demand is also reported rather quiet. In export to Britain there is a fair trade doing. Quotations have not undergone any recent change; sole is being sold on the basis of 23½ to 24c. for No. 2 manufacturers,' and black leathers are very steady at last given figures.

DELAYS ARE DANGEROUS.

The Accident and Sickness Policies
ISSUED BY THE
CANADIAN CASUALTY and Boiler INSURANCE CO.
22-24 Adelaide St. East, TORONTO.
are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Metals and Hardware. — American manufacturers of iron products are apparently feeling a slackening up of business, and are reported as quite anxiously drumming up Canadian orders, with the result that the market is rather in buyers' favor. Pig-iron is dull, and No. 1 Summerlee is quoted easier at $19; domestic brands continue at about the same figure. It is claimed that manufacturers of domestic bars are oversold, and some dealers are now quoting $1.75 for ordinary jobbing lots. Iron pipe is easier at

And Still it Leads

As applied to the gain in net amount of assurance in force in Canada for the

5 Years Ending Dec. 31st, 1903.

Head Office - Waterloo, Ont.

The Mutual Life OF CANADA

still maintains its stand at the

HEAD OF ALL ITS COMPETITORS

among Canadian Life Companies, as shown by the Government Reports.

$4.25; boiler plate, $2. Canada plates are cabled a shade easier in Britain, but the local jobbing quotation continues at about $2.20; black sheets, $2.15 to $2.20; Ternes, $6.25; galvanized sheets, $4.25 for standard brands; copper sheets, 19c. Ingot tin, 28½ to 29c.; ingot copper, 13¼.; lead, $3.20; antimony, 7¼c.; spelter, $5.50.

Oils, Paints and Glass.—Business is now very quiet in these lines, and there is very little new to note. Linseed oil shows some gain in strength in Britain, and some dealers are firmer in their quotations at 45c. for raw, and 48c. for boiled. Turpentine is quoted at 8½c. in single barrels. Fish oils dull and neglected. Leads, glass, etc., are without change.

◆

ENGLISH SHIPPING TRADE.

A news letter from England states that the depression existing in the shipbuilding and ocean carrying trades in that country has hardly been equalled within the last half century. Every branch of the industry seems unanimous in stating that prices for new tonnage never were so low, that freight rates and charters never were so reduced and that stagnation never was more complete than now. About the only exception which London ship-owners make to this generalization is with Argentina. The statement is openly made that there is scarcely a single ship-owner at present earning the annual allowance for depreciation. A fair proposition for depreciation is usually about 6 to 8 per cent. for the average ship, though in exceptional cases, 5 per cent. maintained through many years has given satisfactory results. Some of the big companies have made heavy losses during the past year. At present there is still about 800,000 tons of shipping in British yards, but this is 600,000 less than at the same period of 1901. The price of new tonnage has also declined 20 to 30 per cent. In the words of one man prominent in shipping circles, the depression in the shipbuilding industry and carrying trade is due to two main causes. In the first instance during the boom period too much capital went into shipping. That resulted in overproduction of tonnage. This was accentuated when the ships employed in the South African War returned to resume their business. The depression set in first in Germany, then in Great Britain and South Africa, and now in America. With more ships and less freight it was inevitable that shipping should suffer severely.

◆

The Dominion Line steamship "Vancouver," which went aground off Sorel on the 2nd inst., has been successfully floated. She was practically uninjured, and will sail from Montreal for Liverpool on the 23rd.

A Montreal tailor of some years standing, G. B. Sadler, who was once doing quite a fair trade, which has shown signs of recent decline, is reported as having assigned, and owes about $9,000.——I. A. Moquin, also a Montreal tailor, in business about a year and a half, has assigned, owing $2,500, while assets appear to be only some $800.——Aurel Parent & Co., dealers in men's furnishings, etc., Montreal, have assigned on demand. Mr. Parent first started in business about six years ago, but failed in 1899, and has since made use of his wife's name as a cover.

WANTED

The General Agency for Vancouver, or the whole of British Columbia, of a substantial Fire Insurance Company. Large business can be placed immediately. Address,

JOHNSON, EDWARDES & Co., Ltd.,
Vancouver, B. C. P. O. Box 775.

The Colonial Portland Cement Co., of Wiarton, Ont., are completing the erection of their $750,000 plant just outside the town. The works will be in operation within a few months. The walls of all the buildings are of cement, and the framework of steel. The Colonial is fortunate in having the marl beds very near the works, which being built near the water's edge give them important advantages in the matters of coal supply and distribution of finished products.

A produce commission dealer of Montreal, A. B. Rattray, previously for a short time in the grocery trade, has made an abandonment of his estate, and is estimated to owe $14,000. It is feared the estate will turn out poorly.——James Brothers, a saloon-keeper in Montreal, is insolvent, and shows liabilities to the amount of $4,500.——Louis Glauberson, of the same city, doing a small dry goods and clothing business, under the very pretentious style of the European Importing Co., and who recently asked an extension, has now assigned.

Much elation has been shown by the inhabitants of Medicine Hat, Assa., in consequence of the striking of a strong flow of natural gas at a depth of 1,010 feet. For two years or more drilling for "gas wells" has been going on at intervals with some success, but the present find indicates a supply and a force which was unexpected. Indeed it is stated that mercury gauge and water gauge tests show that the flow of gas is over one million and a quarter cubic feet per day. The pressure showed steady increase and the inhabitants are confidently proclaiming that there will be not only gas for lighting but gas for heating and gas for manufacturing. Certainly the gratifying result was deserved by the authorities who persevered with deep drilling in the confident hope of success. May their best wishes be realized. But the experience of the Essex and Welland gas wells in Ontario show that there are disappointments now and then.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

THE POSITION OF COTTON.

The report of the Agricultural Department at Washington upon the condition of the cotton crop of the United States, recently issued, acted very bearishly upon prices already apt to be easy. It is not surprising that such high prices as prevailed last year for cotton should have induced the planting of a considerably increased acreage; nevertheless, those interested may with propriety be reminded that it is a hazardous proceeding to attempt a close estimate of the production this year at this early stage. Drought, too much rain, the boll worm, and one of a dozen contingencies may happen to reduce the total yield very largely, and make to-day's calculations altogether beside the mark. Many people seemed to have arrived at the conclusion that cotton goods are now about to be cheap, but the notion seems to us based upon insufficient data. In the first place, while it is true that prices for raw cotton have already dropped perceptibly from what they were a few months ago, yet even now they are much above what may be considered the normal range. Again, the goods offered by the domestic mills at the present time were made before the decline in raw material. Still further, it is a fact that they never at any time during the excitement of the Sully corner put up their prices sufficiently high to be on a parity with the top range, so that it would not be fair to expect their schedule to be scaled down to the same extent as though they had followed close behind the upheaval.

In the meantime, a waiting attitude is being adopted by the manufacturers; and purchases of raw cotton are being made only in a hand-to-mouth way. So far as the trade in finished goods is concerned, however, it is hardly likely that any great change in a downward direction will take place for some time to come.

THE ANTI-RECIPROCITY ARGUMENT.

In New England reciprocity with Canada finds considerable acceptance, but in the same region some of its strongest opponents have their abiding-place. Many of the eastern manufacturers are keenly on the alert lest reciprocity with Canada should prove the wedge which eventually may break up the wall of high protection which they now enjoy. Among this numerous, and, it must be confessed, important class are the wool manufacturers of Boston, who oppose all reciprocitarian arguments on the ground that on the whole the trade of the United States with Canada is satisfactory as matters now stand, and that at any rate there is nothing to justify a breaking up of the present American fiscal policy. As an indication of the correctness of this view they point to the fact that while the value of goods entering Canada from Great Britain decreased from $68,000,000 in 1873 to $58,000,000 in 1903, those from the United States increased from $47,000,000 to $137,000,000 in the same period. Even since the inauguration of the preferential tariff with Britain, United States trade with Canada has shown a wonderful gain, its increase between 1898 and 1903 having been from $78,000,000 to $137,000,000, while British trade only increased from $32,000,000 to $58,000,000.

Some of the clearer-sighted of the American journals are not deluded by this specious argument of the ultra protectionists. Granted that the United States trade with Canada has increased largely, they point out that it has not increased proportionately with the latter country's entire foreign trade, nor has it been in such a large measure as should be warranted by Canada's growingly flourishing condition. Because it has grown is no proof, they say, that it might not have been by this time, under fairer conditions, still larger and more profitable, and that there would have been no gain in increasing imports from

Canada largely. New England and the North-West need Canadian ore and coal, and the whole of the United States needs Canadian lumber and several raw materials.

And the New York Journal of Commerce puts its finger on another weak point in the anti-reciprocity argument (from the American standpoint—for we in Canada have reached a state of mind where the matter seems to concern us very little). That journal points out that it is not now merely a question of leaving well enough alone, a policy which the New England woolen manufacturers commend, but the "well enough" may be altered any day. The preference of Canada to the Mother Country is liable to be increased, while the Canadian tariff against the United States is just as likely to be increased also. It is not a question, as our contemporary says, of leaving well alone, but of improving the conditions as an alternative to their being made much more unfavorable by the other party to the bargain.

"DEAR LIVING" IN CANADA

It is a pity that persons with limited chances of observation or with little sense of proportion are occasionally put in a position to do much harm by random statements or generalizations. The brief glances of a critical tourist rushing about in railway cars for a week, are not sufficient to make him an authority upon the affairs of the country, a part of which he thus sees. Nor are the housekeeping experiences of a literary woman, living in a city at one extremity of Canada for a few years, to be taken as accurate data from which to advise persons in quite different circumstances, or of different tastes, as to the folly or otherwise of emigrating to Canada. An article in the Contemporary Review for June, by Mrs. Margaret Polson Murray, upon life in Canada, contains statements curiously exaggerated, some of them entirely misleading.

This article of Mrs. Murray's was referred to by the Manchester correspondent of the Monetary Times on June 10th, as having been widely copied by English provincial papers. He instanced certain details she quoted (to prove that middle-class life in Montreal needed two shillings income where in England but one was needed), as "at variance with one's own information from Canadian settlers." They were so decidedly at variance with the experience of Canadians generally as to cause the writer to have prepared some experiences and lists of prices on the subject from Montreal and Toronto householders. Some of these we append:—

> The letter of Mrs. Murray, I am convinced, is wrong in stating so dogmatically that it costs twice as much to live here as in England. And some of her statements are queer. If we ship apples to England, it is surely not with the philanthropic object of helping the British poor by taking half price for them! The question of quality comes in. M. tells me *we* would not eat the quality of apples they sell in London as Canadian, but they are cheaper than what we do eat here. Only in the matter of dress does she admit Mrs. Murray's claims, for she could dress as well in England for half the money it costs her here, with the exception of boots and shoes, which in England are dear and poor in quality. Then, again, comes the point you mentioned, namely, the enhanced wages and salaries paid in Canada. I am fully convinced one can live better and more comfortably in Montreal than in London in a similar walk or position in life. That was my conclusion when I was last over. At retail, eatables and wearing apparel are about the same prices here as in your own city of Toronto, so you can judge by your own prices. Rents are higher in Montreal than in Toronto; but that's the general rule, the larger the place the more expensive to live in; but the chances for making more are also usually greater.
>
> H. McL.

> Mrs. Murray, whoever she may be, is not far wrong in saying Montreal is a dear place to live in. It is getting to be one of the most expensive cities to live in in Canada, if not on the continent. But I think some of her statements about Montreal and Canada are much exaggerated, more particularly with regard to clothing. My wife tells me the ordinary three-pound loaf costs here 8 to 9c.; steak and roast beef, 15 to 18c. per pound, as to cut; forequarters of lamb, $1 to $1.25; hind ditto, $1.50 to $1.75; ham and bacon, 18 to 20c.; fish, such as doré, bass, etc., 12½c.; salmon, 15 to 18c.; eggs, 18 to 20c. for case goods; boiling eggs, 25c., and in winter, 50 to 60c.; milk, 6c. a quart in summer and 8c. in winter; cream, 25 to 30c. a quart; good, sound apples generally range from $2.50 to $3 a barrel (10s to 12s. sterling) in fall and winter, sometimes more and sometimes less, according to crop. Rents, which were already high, were advanced this spring from 15 to 25 per cent. But she is wrong in some of her sweeping statements. To call prices of textiles here "four times English prices" is absurd, and I don't believe it needs two shillings income to live in Canada where one shilling would do in England."
>
> A. M.

The basis of the false impression of Canada such articles as Mrs. Murray's are calculated to give is that they make no allowance, in comparing prices of necessaries or luxuries of life, for the higher wages received here by artizans, and by clerks, agents, tradesmen, and other middle-class people. Even if the comparative figures given in her Contemporary article were true ones, they would still be misleading unless accompanied by a statement of the altered scale of income in this country, and the greater comforts of life enjoyed here by the average household. Much of what she says about "Protectionist Canada" is illusory, for what she calls the effect of protection upon the housekeeper, burdensome as she attempts to make it out, is wide of the mark. In fact, Mrs. Murray, clever writer as she may be, has shown that she lacks practical knowledge of a commercial kind, that she has no clear head for figures, and that she could not have been a good housekeeper. Some of her quotations are altogether out of the way.

Writing to the Birmingham Post in comment upon an article in that journal based on Mrs. Murray's paper, Mr. P. B. Ball, the Canadian agent at that city, states facts and quotes comparative prices in Canada and Britain in a most convincing way, for Mr. Ball knows intimately what he is talking about. He has been for years a merchant in various parts of Canada, has been a householder in Toronto, and is well informed in matters commercial and social. He makes very small mincemeat of some of Mrs. Murray's alarmist statements. We are disposed to agree with the Post's remark that he would have done even better to address his criticism to the Contemporary Review itself. That publication could hardly afford to ignore corrections of statements and inferences that present in a false light the conditions of every-day life in Canada, and are calculated to hinder desirable people from coming here to live on very moderate means in comfort and happiness.

◆

PROSPECTS OF THE WESTERN CROP.

It is pleasing to find the crop prospects in Manitoba and the Territories continue favorable. The people in Winnipeg who are most keenly interested appear to maintain their customary buoyant frame of mind. From different sources in that city we get the same story. "Red River," whose letter was written on Monday last, uses very much the same hopeful strain as our other correspondent, who, wiring us yesterday noon, says: "The weather throughout the west during past week has been warm with general showers. Nearly all points report that conditions of growth could scarcely be better. In practically all parts of the country wheat has commenced to head out, so that the crop will likely be in good time."

◆

THE BUSINESS MAN'S BODY

"Indigestion, irritation, insomnia, insanity." Such was a medical student's category of ills with which a man is likely to be beset who neglects his body for study, for money-making, or for any sedentary pursuit, while drawing upon his nervous energies and neglecting to restore the balance of his physical system by proper rest and exercise. Repeatedly we have heard medical men say of a man who had gone to his grave through overwork, or who had made himself a chronic invalid, "If he had only taken a week or a fortnight off when I told him to, this infernal ailment would not have got such a hold upon his system."

By taking a week or a fortnight off, the doctor meant that length of time devoted to travel, to recreation, or to some variety of physical pursuit which would relax the pressure upon his brain and nervous system, that over-taxing of his excretory organs, or of his heart, which now-a-days carries off so many men. Business men and professional men are alike prone to working in a groove for long years to the neglect of refreshing the strength and spirits after toil or worry. They do this, thousands of them, under the mistaken notion that they cannot spare the time or afford the expense of a holiday, that there is no room in their lives for sport or travel, no necessity for diversion, no chance for change of occupation. And many a man dies in his prime because he has neglected just such things.

Merchants often permit themselves to believe that their business cannot go on if they do not give it their entire attention for twelve or fifteen hours a day three hundred and thirteen days in the year. And so, with their noses to the grindstone, they plod along month after month with no thought of the benefit they may derive from a short sojourn away from home and the cares of "the shop." Many of them have never taken a consistent holiday since launching out in a mercantile career. But a man is never too old to change from the mistaken ways that he has always followed. If he begins to feel his energies flag and his spirits droop, our advice would be to try the effect of a change before he resorts to "temperance" patent medicines (so-called), or to stimulants. Sometimes one of these is as bad as the other.

Not a few will say that they have never called in a doctor, and that they do not propose to begin. Such a resolve is short-sighted if there is a physician of skill and good sense within reach, who might advise them as to diet and exercise—what not to do, as well as what to do. But there are hundreds of ailing men who may be their own doctors if they will. What they need most is probably a rest and a change. Horseback exercise, automobiling, golf, polo, are perhaps not to their taste or within their means. But a trip round the lakes on a steamboat, a series of country walks, a daily game at bowls on the green, an hour or two at gardening will do wonders for a man who will break away from his business for part of every day. Let him give his over-worked heart and his over-trained nerves a fair chance.

◆

SYSTEM AND NEATNESS.

To be neat and methodical are praiseworthy points in a clerk, and those of a bank's staff who are deficient in these habits will do well to acquire them. Numbers of men are handicapped more than they know by a slipshod manner of doing things, by a lack of neatness about the desk, of cleanliness about the person, of orderly procedure with their work. Some may say that these are minor things, and if a clerk is intelligent and energetic his slovenliness does not matter. But it will be found that the cleanly and orderly hand, other things being equal, is preferred nine times in ten.

A paper upon the subject of neatness and system in the office was read before the Kansas Bankers' Association the other day by Miss Marie Meyer, of the First National Bank, Hutcheson, Kan. She insists very strongly upon the necessity of neatness. "Let an office be neat and tastefully appointed, and it will be a pleasure to work in it, and a delight to frequent it." And she makes the point that one cannot draw the line between neatness and accuracy. "The lack of neatness will eventually issue in errors and mistakes. To be careless and indifferent as to the entry made is to be careless and thoughtless of the figures and facts which constitute the entry. Perhaps it is too late to begin the habit of neatness when one enters the work of the bank."

It is never out of place to remind young people entering business life that whatever is worth doing is worth doing well. Here is the way Miss Meyer conveys that lesson:

> The clerk who can keep the books and follow the system assigned to him a little better than anyone else, if it be just a little neater, so surely has that clerk taken an advance step towards future preferment. All bad work is wicked, and work that has to be done deserves to be done well. Not, perhaps, so much for the sake of the books and the pages and the papers, but for the sake of the future of the person who does the work. Carelessness, thoughtlessness, indifference and slip-shod work have been the cause of more failures than the world knows.

Anyone who is watching the signs of the times in business must be impressed with the growing sentiment for orderly and beautifully-arranged stores, shops, halls, and offices. These people are quick to discern the attractive window or the corner arranged for their comfort. Clean, fresh paper upon the desks, pens frequently renewed, ink that shows it has not stood long in the using—all these are small things, perhaps, but not small if what the "Sage of Concord" has said be true, that "If a man can write a better book, preach a better sermon, or make a better mouse-trap than his neighbor, though he build his house in the woods, the world will make a beaten path to his door."

HIRED MAN AND BOSS.

How different things often are when a man becomes a merchant from what they were when he was a clerk is illustrated by the following story from a Philadelphia paper. One man asks, speaking of a fellow named Quimby: "He's still employed by that big wholesale house, isn't he?" But the other replies: "No. I think Quimby is in business for himself now. He used to take an hour for lunch, but now he takes a bare five minutes." The same thing happens among the labor-unionists. Let the man amongst them who shouts loudest for a thirty-minute hour and an eight-hour day become an employer, and you will straightway find him working from twelve to fourteen hours a day. He may not do it, either, because he is making money so fast, but most often because of competition and the difficulties of business. What employees need most of all is some understanding of the troubles that perpetually beset business men. But the labor union men seem to think every manufacturer has got "money to burn."

PROTECTION FOR GARDEN PRODUCE.

In an article on fruit and garden produce, under the caption of "Is Protection Necessary?" the Canadian Grocer remarks that foreign-grown fruit and produce which might under ordinary circumstances compete with that grown in Canada, as a matter of fact does not do so to the injury of the latter, since it comes on the Canadian market before the domestic article is ready, and ceases to be imported directly the domestic article is ready for the market.

We are not advocates of a system of high protection for foodstuffs or other of the necessaries of life, but it certainly seems to us that this is hardly a fair statement of the case. The Canadian grower of garden stuff, when he wants to ship his produce across the line is usually met by a forbidding duty sufficient to eat up all possible profit, even if he had any climatic advantage inducing him to ship at all. On the other hand, for the American grower, the way into the Canadian market is an easy journey; all he has to pay is a comparatively small duty, and as this is generally ad valorem, it really cuts but little figure in protecting the Canadian producer. Let us give one or two illustrations of what we mean. The United States tariff duty against cabbages is 3c. per head, practically a prohibitory duty, and practically more than the vegetable is worth at any time when Canadian gardeners could think of sending them across the line. On the other hand, the farmer or gardener in the southern states, can send his cabbages north, with almost no competition to meet, and finds arrayed against him on the Canadian border a duty which, being chargeable on the value of the stuff at the place of origin, is little better than nothing.

Again, take potatoes. The Canadian duty is 15c. per bushel, which at the average price of the article, taking it through the whole year, is perhaps fair enough. But, when American competition is most felt, and at the time referred to by our contemporary, the early season, potatoes range in price around $1.50 to $2 per bushel. Fifteen cents on such a price as this hardly counts at all. To this, of course, it may be replied that it is a very good thing that Canadian producers thus meet with some check to prevent them extorting from the public such exorbitant prices. The reply is that to a large measure these high prices are paid by the consumer in any case, only they are paid now mainly for the American product. It should be remembered, too, that in order to produce this high-priced early stuff, extra care and a higher order of skill are requisite. The yield is small in any case, and the only return that can rightly be expected is in the shape of higher prices, the cream of which under existing circumstances goes to the foreign farmer. The Canadian gardener is handicapped largely by his climatic surroundings, so far as competition with his southern neighbors is concerned. Surely if the purpose of protection be, so far as possible, to equalize conditions, here is a case for its operation, if the whole theory upon which it is based be true, and as it is acted on along other lines of industry.

MEXICAN TRADE.

Mr. J. H. McLeod, a Canadian residing and doing business in Mexico, writes to confirm the opinion held by many that good opportunities exist for the developing of a large trade between Canada and the southern Republic. He has been one of the principal agents in the formation of what is styled the Canadian Commercial Club, whose aim is to supply Canada with data and useful information concerning the trade between the two countries. In this connection, it may be mentioned that the British Consul in the city of Mexico writes to a British Columbian paper giving a few hints for the guidance of exporters of goods to Mexico. He reminds them that they should pay particular attention to the Mexican customs regulations, consular invoices, etc. Intending traders would do well as soon as the proposed steamship line is an accomplished fact, to send a travelling representative to look over the ground. The new line will meet with considerable opposition from the German and American lines, who successfully ousted the Anglo-Chilian companies.

LUMBER.

In last report under this heading it was announced that business was less active, and that prices in some lines had shown a decline. This tendency to easiness of the market cannot be said to have become accentuated. Building appears to be going on rather more rapidly, in Ontario at least, than seemed likely a month or two ago, and this has improved matters. Values seem now quite steady, no further appreciable change having taken place during the last few weeks. The following summary of a circular received from Yarmouth & Jardine, Liverpool, will give an idea of the conditions existing on the other side of the water:

Business during the past month has been dull. The arrivals, though large, have, with few exceptions, been less than the corresponding month last year, but the demand generally continues very quiet, and values for some of the leading articles lower; stocks are ample. With regard to Canadian woods, new season's waney is now coming forward, chiefly on contract, and will go largely direct into consumption; values are fairly steady, but stocks are sufficient. There has only been a small import of square pine, but the demand is quiet, and stocks are ample. Red Pine—There have been no arrivals, the consumption nominal, and the stock unaltered; values are steady. Oak Logs—There has been no import; the demand is very quiet; the deliveries have been small, and stocks are ample; values are unchanged. Of elm, the arrivals have been chiefly on contract, and for first-class rock elm there is fair enquiry; stock is light; values rule high. Ash is only in very limited request. The import of pine deals shows a considerable reduction as compared with the same month of the two previous years; the deliveries have been fair, but stocks are large and sales difficult. The demand for red pine deals is dull; values are weaker. The import of New Brunswick and Nova Scotia spruce and pine deals during the past month has been large, and slightly exceeds that of the corresponding month last year, viz.: 16,800 stds. against 15,630 stds.; the deliveries have been fair, but stocks have increased, and are too large; values show a further decline. The demand for pine deals is exceedingly quiet, and sales are difficult. Of birch logs the arrivals have been chiefly contract shipments from Quebec, and one small line from St. John, N.B.; the deliveries have been satisfactory and prices are steady; stocks are not large. Planks have arrived moderately; there has been a good consumption, and stocks are light; there is more enquiry at firmer prices. British Columbian and Oregon Pine—There have been no arrivals; the deliveries have been satisfactory, but stocks are heavy; values are steady.

TRADE OF THE ARGENTINE IN 1903.

The Austrian Consul in Buenos Ayres gives the following official figures relating to the foreign trade of the Argentine. The total value of the trade of the Argentine with foreign countries in 1903 was 352,191,124 gold dollars, against 282,525,983 gold dollars in 1902, an increase of $69,665,141. The imports in 1903 amounted to $131,206,600, against $103,,039,256 in 1902, and the exports to $220,984,525, against $179,486,727 in 1902. An increase is thus shown of $28,167,344 in the imports and of $41;497,797 in the exports. Bar gold was imported to the value of $26,086,184 in 1903, against $8,909,086 in 1902, an increase of $17,177,098. The following table shows the imports and exports for the past five years:

	Imports. Gold dollars.	Exports. Gold dollars.
1899	116,850,671	184,917,531
1900	113,485,069	154,600,412
1901	111,959,749	167,716,102
1902	103,039,256	179,486,727
1903	131,206,600	220,984,525

It is seen, therefore, that the value both of the imports and exports in 1903 far exceeded that for any of the previous four years. The increase of trade thus indicated can only be interpreted as a sign of economic progress in Argentina. The increase of $28,167,344 in the value of imports took place chiefly in the following groups: Cattle, articles of food and drink, tobacco and tobacco manufactures, textile goods, vegetable and mineral oils, drugs and chemicals, timber, paper and paper manufactures, leather and leather goods, agricultural machinery and implements, iron and steel and manufactures thereof, metals and metal-ware, stoneware and earthenware. The increase in the exports was chiefly in the products of the agricultural and pastoral industries.—British Chambers of Commerce Journal.

CHARTERED ACCOUNTANTS' INSTITUTE.

The Institute of Chartered Accountants of Ontario held their annual meeting on Friday last at Niagara Falls, Ont., to which place they had made the lake trip from Toronto. Dinner was taken at the Government building in Queen Victoria Niagara Falls Park. The party inspected the new hydraulic works and other interesting points in the vicinity. Mr. George Edwards, the retiring president, in his address drew favorable attention to the conditions which marked the termination of the twenty-first year of the institute as an incorporated body. The active membership stood at 92 persons, against 85 a year ago, while the Students' Society numbered 78 young men, as compared with 64 the same time last year. The headquarters of the Institute have been improved by the securing of better accommodation, and the furnishing of a blackboard, seats, tables, desks and literature. The attendance at meetings and lectures during the twelvemonth was greater than in former years. Considerable advance had been made toward the formation of a library. In concluding, Mr. Edwards thanked the council for tendering him the presidency for the ensuing year, but made known his intention to retire, and the announcement was received with general regret. The Institute decided to be represented at the United States convention, which will be held at St. Louis in September. The following gentlemen were elected officers for the coming year: President, Mr. W. T. Kernahan; first vice-president, Mr. W. Tyndall, Toronto; second vice-president, Mr. T. H. Macpherson, Windsor; secretary-treasurer, Mr. David Hoskin.

REMINDERS OF THE TORONTO CONFLAGRATION.

The pamphlet which has been compiled by Mr. Garrow, secretary to the general committee of fire underwriters formed to facilitate the adjustment of losses by the great fire of April, in Toronto, contains some instructive matter. It does not confine itself to statistics of the fire, but sensibly takes cognizance of faults and failings, public and private, which were brought into the light by the great blaze, and commends valuable features here and there but always dispassionately. One of the dangerous conditions common alike to Montreal, Toronto, and indeed Canadian and American cities generally, is thus referred to by the pamphlet. It is describing the telephone wires, telegraph wires, electric light wires: "Fairly heavy strings of overhead wires ran along the south side of Wellington street, east side of Bay and south side of Front streets. They proved, as usual, a source of inconvenience and delay."

Describing the buildings, we are told that all buildings were of brick with the exception of the McLaughlin flour mill, corner of Bay and Esplanade, which was built of stone. No "fireproof" buildings were involved. The average character of the buildings is thus given: Ordinary mercantile wooden joist construction prevailed. Flat roofs, covered chiefly with gravel (composition). Skylights mostly light metal frames with thin glass. Exposed side and rear windows, were, as a rule, not protected. Average thickness of walls about foundation, 18 inches. Average height, four stories. Average ground floor area, about 5,000 square feet.

The sprinkler system was employed in only three buildings, those of the W. R. Brock Company, Limited, Kilgour Bros., and and the Evening Telegram. This system was highly effective, the protection of the second named factory reducing the effect of the fire on the Minerva Building.

AREA AND LOSS.

The total area covered by the fire was 19.7 acres. This includes 4.4 acres of street allowances, leaving the total block area of the conflagration 15.3 acres. In all ninety-eight (98) separate buildings were destroyed.

The committee adjusted losses totalling $9,850,000, but it is estimated that the losses of foreign unlicensed companies and other losses not reported would bring the aggregate to $10,350,000, of which 20 per cent. was in buildings and 80 per cent. in contents. The total losses of the companies represented by the committee was $8,200,000. Estimating the losses suffered by unlicensed companies at $175,000, the total insurance loss would appear to be $8,735,000, or 80 per cent. of the total value of property destroyed. The percentage of insurance to value upon buildings was about 65 per cent., and contents about 85 per cent. The 75 per cent. co-insurance clause was operative under the rules of the Toronto Board of Fire Underwriters upon both buildings and contents, and was found in nearly all policies.

◆

FIRE INSURANCE ITEMS.

Ratepayers of Picton do not want their town to be modernized, they do not want to be protected. Last week they voted thus on proposed by-laws: $25,000 for municipal building—For, 37; against, 228. $25,000 for street walks and culverts—For, 69; against, 198. $8,500 for electric light—For, 66; against, 199. $5,500 for waterworks—For, 68; against, 186.

A deputation from the Toronto Board of Trade, consisting of Messrs. Morley (secretary), Allan, Ellis, Dignum and Oliver, waited on the police commissioners and asked that the police department adopt the same rules regarding the "fire lines" as are in operation in other large cities; that is, that owners of and employees in buildings threatened be allowed to pass the lines. The deputation showed letters from Chicago, Philadelphia, Boston, New York and London, showing that this is the custom in these cities. The thing asked is so reasonable, and the stubborn attitude of certain policemen at our last big fire so unreasonable, that we cannot doubt what the view of the commissioners will be.

If any one should contend that creditors of Canadian retail merchants are a hard-hearted lot, we might point him to an occurrence of last week. A retail merchant at Wakefield, north of Ottawa, in business for twenty years or more, and reputed to be worth somewhere between $10,000 and $15,000, was burned out, and his creditors agreed to accept fifty cents in the dollar from him as in full. The fact of a compromise was not remarkable—we hear of that sort of thing almost every day in the week—but the circumstances of this one were remarkable. It turned out that the merchant in question had buildings estimated worth $4,500, and a stock of merchandise valued at $15,000; and upon these he had insurance of only $3,000 while he owed to creditors more than $6,000! Now, when his assets in goods and buildings are swallowed up by fire, he falls back upon the forbearance of creditors, pays them one-half of what he owes them, and gets a quittance. Is this fair to his creditors? The man knew that fires occurred; he knew that fire insurance companies existed; he should have reflected that if his shop and its contents burned he could not pay his debts in full. What excuse, then, was there for him not to carry more insurance? It was his duty to himself and to his creditors; for the ashes of houses and fragments of burned or smoke-damaged goods are poor assets with which to pay debts.

◆

LIFE AND ACCIDENT MEMORANDA.

James H. Stone, auditor of the Maryland Casualty Co., of Baltimore, and J. W. Mackenzie, the company's chief agent for Canada, are making a tour of the Dominion, and report healthy progress all along the line.

Mr. J. A. Kennard, formerly of Kirkpatrick & Kennard, managers for Canada of the United States Fidelity and Guaranty Co., has been appointed to the co-managership of the New England department of the same concern, with headquarters at Boston. Before associating himself with the company Mr. Kennard was for some years connected with the Fidelity and Deposit Co., having served in every one of its departments. Mr. A. E. Kirkpatrick will continue to look after the company's interests in Canada. The results thus far obtained by this company in the Dominion are, we are told, most gratifying, and to this very promising field the company intends to spare no effort or expense.

The Supreme Court of the State has declared the newly-elected officers of the Massachusetts Grand Lodge of United Workman to be legally in control of the lodge. The case reached the Supreme Court by the filing of a petition for a writ of mandamus by seceding members, asking that they be recognized as the legal officers, and that the property of the Grand Lodge be turned over to them. By the decision of the court John Symonds is grand master workman instead of Carlan A. Brown, and Chas. Fearing grand recorder, instead of J. Edward Burt. The dispute in the Grand Lodge arose about an extra assessment which had been levied by the Supreme Lodge. Some members objected to this.

One of the companies in the United States has made a compilation from which we take the following: In New York City the deaths from accident during 1903 were 3,143, or nearly five per cent. of the deaths from all causes. A tabulation of the most sensational of the railroad catastrophes of 1903 in the United States places the number at 21; the list of killed amounts to 311, and of injured, 566. Of accidents due to any one cause we find "Run Over or struck by Street Car," with a total of 457. Falls were responsible for 1,255, personal violence for 1,156, steam and elevated roads for 914, and teams and vehicles for 893. Of mishaps in the street, 363 were caused by falling from wagons, and 376 by being run over or struck by teams. Of falls, 270 were on the sidewalk, 157 on the street, 169 down stairs, 116 from scaffolds, 111 from building under construction, and 78 from ladders. Many were due to carelessness in boarding street cars or in getting off them.

Contradicting an American insurance journal, which evidently did not know its Shakespeare well, and had denied that the three lines quoted below were to be found in Shakespeare, the Insurance Chronicle, of Montreal, refers that writer to the play of Macbeth. In Act V, Scene 5, he will find the words:

> "And all our yesterdays have lighted fools
> The way to dusty death, Out, out, brief candle,
> Life's but a walking shadow."

The last line, continues the Chronicle, might make an expressive motto for a life company. An insurance solicitor would find an intimate acquaintance with Shakespeare very helpful in getting into touch with a large class of persons. In urging the wisdom of taking out a life policy on a sound company were he to quote, "I'll make assurance double sure," he would fix and impress this advice in the mind of the probable applicant as no words of his own could do. There are numbers of happy phrases on the Shakespearean dramas, the apt use of which by an insurance canvasser would be like a letter of introduction to thousands of men.

That some of the insurance commissioners of the various States of the American Union are "on the make" has unhappily been shown. Canadian underwriting companies have had sufficient experience of that sort of thing. The Wisconsin Commissioner, Mr. Host, is catching it just now from the United States newspapers. Asking, "Where the money went," the Insurance World, of Pittsburg, declares that the examination of the Prudential cost $21,000. Mr. Host says he had a verbal agreement with Mr. Woolf, the actuary who did the work, and is stated to have received about $3,000 for the job. Mr. Host himself $1,100, another actuary about $1,500, an examiner $1,000, a deputy commissioner $830, the Attorney-General $750.

◆

—When the Halifax Board of Trade advertised for a secretary, they had fifty applicants. From out this number they selected and appointed Albert T. Weldon, chief clerk in the freight office of the Intercolonial Railway at that city. Mr. Weldon, who assumes his new duties on August 1st, has been fourteen years in the service of the Intercolonial.

FOR GROCERS AND PROVISION DEALERS.

A Halifax dispatch says that about 10,000 mackerel were taken the other day in St. Margaret's Bay, chiefly near Fox Point and Croucher's Island. They were packed and shipped mainly to the American market.

Messrs. H. N., H. G., H. A., G. C., and F. Bate, of Ottawa, have formed themselves into a joint stock company, under the name of H. N. Bate & Sons, Ottawa, grocers and warehouse men. The capital stock will be $100,000.

The Athabasca Fish Company, Limited, capital stock, $100,000, headquarters, at Selkirk, Man., has been authorized by the Government to catch fish and preserve the same, also to do a general mercantile business.

The C. Robin-Collas Company, Limited, Halifax, capital stock, $1,000,000, will carry on a general fish, catching and curing, trading, commission and export business. They will also take over the business now carried on by Collas, Whitman & Co., Limited.

A report from London, dated 8th inst., said that imports of Canadian butter were increasing steadily, and that notwithstanding the large supplies from abroad the demand for the former on the spot was improving every day, especially for saltless. Choicest salt was making 86 to 88s. per cwt., and finest, 82 to 84s. Choicest saltless was worth 88 to 90s. per cwt. under rather limited supplies. The remark is made that there has been no recurrence this year of the mould in saltless butter, such as was so prevalent last year.

For old Canadian cheese the demand in Great Britain has been moderate, it being considered the best value on the market, but for new there has been only a hand-to-mouth buying. Old is selling at 39 to 42s. per cwt., according to condition, and new, 39 to 40s. C.i.f. quotations are down, showing that the recent advance was a speculative operation. For Quebec cheese the c.i.f. quotation is 36s. 6d. to 37s., and for Ontario, 38 to 39s.

Recent reliable estimates calculate the wheat crop of the United States for the present season at 610,000,000 bushels, which means that the surplus for export may be 142,000,000 bushels. Last year it was 121,000,000, while the average for the fifteen years has been 170,000,000 bushels. According to the same estimate, the world's whole wheat crop for 1904 is 140,000,000 to 150,000,000 bushels less than last year. An increase in Asia, it is declared, will offset the decrease in the United States. The decrease is chiefly in Europe, and mainly in Russia, Roumania, Austria, Hungary, and Italy.

A recent letter to the Globe from England asks the question. "Who was Dalrymple Crawford, who died in Toronto in 1874 and whose name is recorded on a brass plate close to the altar rails within which repose the remains of the Shakespeare family?" Mr. William Davies, of Toronto, thus replies: "Mr. Crawford was a soap and candle maker and spice grinder; the business is carried on by his successors, Dalton Bros. He was well known in the city for many years, but, of course, those who knew him are getting fewer every year. D. Crawford built and occupied the house at the corner of Isabella and Huntley streets, and at his death it was bought by the late Alderman Hallam, whose family still reside there." It is added that Mr. Crawford was a connection of Lord Dalrymple.

A report from New York on the state of the currant market in Greece says that much interest is centred in the new Retention Law, just passed at Athens. Its virtual effects will be to enhance the retention to 35 per cent.; the prohibition of any further plantations; the abolition of the export duty; and the continuance of the authority extended to the Currant Bank to buy up the surplus crop as heretofore. The only opposition that arose to the Act was from the British Government, who viewed the proceedings as intended to enhance the value of currants, and hence as a violation of the cheap food treaty mutually existing between Greece and Great Britain. The objections have been overcome by a set-off in the Greek import duty on some such articles as codfish, tinned goods, etc. The Currant Bank must buy all currants offered to it at 136 drachmas per 1,000 ven. lbs., and must sell whenever the price of the commonest provincial currants reaches 200 drachmas, so that market fluctuations apart from variations in exchange must be limited to a fixed minimum and maximum. It is the element of exchange, however, that is the most unstable factor.

The Dominion Wholesale Grocers' Guild held their annual meeting in Montreal this week. Several matters of interest to the trade were discussed, but the meetings were not open to the public. The chair was occupied by Mr. G. E. Bristol, of Hamilton.

In the Dominion Parliament, this week, the question of exterminating the dog-fish pest in the Maritime Province fisheries came up for discussion. Opinion in general was favorable to the taking of strong measures adapted to that end, but the Minister of Marine and Fisheries announced that he had a scheme for establishing factories for converting the nuisance into fertilizer, and making use of their oil.

Denmark is the country that Canada has to supplant in the trade in butter and creamery. As she lives almost totally out of the British market, a hard fight may be expected. I gathered from conversation with a proprietor of dairies that Denmark sends us not only our butter, but most of the separating machinery used by our own producers. It is wrong perhaps to discredit the efforts of home machinists, but the fact that Danish machines are preferred tells its own tale. To show the cost of transport from Denmark some figures are appended: Copenhagen to Manchester (via Hull), 640 miles of sea. Butter, 47s. 0d. per ton; eggs, 48s. 6d.; bacon (stone lots), 31s. 0d. Six lines of steamers are in the trade of carrying these goods, and one only is subsidized. Butter, too, was the subject of some talk with a butter-buyer whose views are typical of others of his kind. Of their accuracy, I am in no position to speak. If the prevailing impression is wrong, exporters will know how to correct it. The Canadian article he classed as a "cooking," not an "eating" quality. Canadian butter, he had found, was often flavored artificially in such a way that it underwent change in storage, and soon lost its palatability. The average grocer, I was assured, dared not risk his customer's dissatisfaction, and was driven perforce to Danish goods. A smaller margin of profits is obtainable upon the latter than upon Canadian, so that the opinion may be regarded as in good faith. By use of one's eyes it is manifest that margaric mixtures are gaining rapidly in popular favor. Substitutes sold by the name of "Cloth Lumps" are shown everywhere hereabout. The name is presumed to take birth from the oval form of the pats and the cloth which covers them. In these ways they resemble country-butter, more or less, the low price appeals to working-class families.

◆

BANKING AND FINANCIAL.

One day last week, near Plattsburg, N.Y., Mr. M. J. A. Prendergast, general manager of the Hochelaga Bank, gave a brief talk to the New York State Bankers' Association, there assembled in convention. His subject was "Note Issues under the Canadian Banking Law."

There is some encouragement for frozen-out minority shareholders, in the following judgment handed out by Justice Greenbaum, of the United States Supreme Court: "The courts will not enjoin the carrying out of a business policy conceived in good faith, even though it may be probable that such policy will prove to be unwise; but, if it is apparent that the scheme of the majority of the stockholders is founded upon a plan to oppress the minority stockholders, or to operate as a fraud upon their rights, and not to further the interests of the corporation, but to accomplish unfair advantages and benefits to those in control, then the court of equity will promptly use its power to restrain the accomplishment of such iniquity."

TRUST COMPANIES AND BANKS.

The trust companies throughout the United States, as is well known, have gone extensively into commercial banking, in rivalry with the banks, and accept deposits, subject to withdrawal by cheque, and in some cases even buying commercial paper. The banks have, in many instances, suffered severely from this competition, and the result has been some friction between the banks and the trust companies, a recent manifestation of which, in this city, has been the withdrawal of trust companies from the Clearing House and the starting of a trust company association.

The trust companies, says the Wall Street Journal, in a recent issue, having to so large an extent invaded the field of the banks, the question has arisen as to whether the banks will now retaliate by invading the field of the trust companies. This question has been given a large significance by the action of the First National Bank of Chicago, one of the greatest credit institutions in this country, in annexing a trust company department to its business. This has been done in a way that is altogether novel and effective. Taking $1,000,000 of its accumulated surplus, the bank paid this to the stockholders, and then took the money back from them in way of subscriptions to the capital stock of a trust and savings bank. Instead of issuing separate certificates to represent the shares of this trust and savings institution, the First National took the certificates which had been issued to its own stockholders and stamped on their backs a statement that these certificates also represented a proportionate share in the capital stock of the trust and savings bank. In this way it made it impossible for the trust stock to be ever separated from the bank stock. A stockholder could not sell his bank stock without selling his interest in the trust company. Then the trust company stock was put in the hands of trustees, who are officers of the bank. In this way the trust and savings institution is, for all time, tied up to the bank, and becomes, in effect, one of its departments. The First National of Chicago, with its large business and extensive connections, is able to obtain much business which would naturally go to trust companies, and is also able to attract large savings deposits. President Forgan, of the First National, who is one of the ablest bankers in the country, is credited with having originated and put into effect this remarkable method of uniting a trust company and a savings institution with a National bank.—Trust Companies.

—The National Association of Master Plumbers held their annual convention in Toronto this week. They discussed business, made some trips to outside places, held a successful banquet, at which some two hundred and fifty guests were present, and had a very enjoyable time generally, members of the city council helping them.

—Contracts for the construction of the James Bay Railway from Toronto to Parry Sound have been let to Angus Sinclair, C.E., and the firm of A. R. Mann & Arch. Mackenzie. These parties have been engaged until recently on contracts on various portions of the Canadian Northern Railway in the North-West. The new contracts call for the completion of the work by September, 1905.

—In referring to the opening of the new stock exchange in this city recently, says the London Financial Times, a Montreal newspaper, in the exuberance of its admiration for the architectural beauties of the building, exclaims: "The new Stock Exchange is not a bee-hive, but a shrine." The Times adds: "The illustration published by our contemporary strongly suggests the gateway of a cemetery, and if business in Montreal be no brisker than in London the design is extremely appropriate."—Mail.

—Armstrong & Co., the English gun and ammunition manufacturers, have made arrangements with the Dominion Government to establish at or near Ottawa a cartridge factory with a capacity of 20,000,000 rounds annually. The capacity of the Government factory in Quebec is about 24,000,000. Provision is made for the establishment of similar factories in Manitoba and British Columbia when found to be needed. The company, in accordance with the wishes of the Government, will also manufacture cordite at their Canadian factory.

—A syndicate of North-West American capitalists has submitted to the Canadian Pacific Railway Co. a proposition to build a beet sugar factory at Calgary at an approximate cost of $800,000, and to bring upon the lands which are tributary to the C.P.R. irrigation system in Southern Alberta from 500 to 900 families. At the head of the scheme is Senator G. Theden, of Minneapolis. Such proposals as this are illustrative incidents in the progress of our Canadian North-West. It is likely that the people whom Senator Theden intends to place are among the kinds of settlers that Canada should welcome.

—The report of the British Tariff Commission on the iron and steel trades, appointed at the instigation of Mr. Joseph Chamberlain, has issued a lengthy report, giving a mass of evidence on industries in Germany and the United States, besides many statistics. In its opinion the decline of the British iron and steel industry is due to the fact that the manufacturers of America and Germany have secured control of the home markets by means of high tariffs and an organized system regulating their export trade; that they are in a position to dump their surplus products on the British and other markets irrespective of cost, and that the dumping could not be carried on except for the British system of free imports. The committee expresses the opinion that the situation can only be remedied by a system of tariffs arranged as follows: (a) A general tariff, consisting of a low scale of duties for foreign countries, admitting British wares on fair terms. (b) A preferential tariff, lower than the general tariff for the colonies, giving adequate preference to British manufacturers, and framed to secure freer trade within the British Empire. (c) A maximum tariff, consisting of comparatively higher duties, but subject to reduction by negotiation to the level of the general tariff.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, July 21st, 1904, compared with those of the previous week:

	July 21st.	July 14th.
Montreal	$21,431,378	$20,589,392
Toronto	16,044,618	16,736,602
Winnipeg	5.704,549	6,270,587
Halifax	1,823,372	1,971,206
Hamilton	1,115,559	1,177,936
St. John	1,005,288	1,081,674
Vancouver	1.710,568	1,626,820
Victoria	753,162	931,132
Quebec	......	1,607,464
Ottawa	2,180,249	2,097,415
London	860,137	949,380
		$55,039,608

THE WINNIPEG SUMMER FAIR.

Next week will see the opening of the Winnipeg Exhibition, for it opens on Monday, 25th July and continues until Saturday, 6th August. The event, never a disappointing one, is this year likely to be more than usually attractive because of the new buildings and altered arrangements we have already described, and because of various deserving features. Let those who have never seen Winnipeg take this opportunity to go. They will see a striking city, and they will meet the very cream of modern Canadians. But they need not confine themselves to Winnipeg. There are the wonderful wheat fields of Manitoba to be seen and brisk towns nearby to be visited. Manitoba will present at this fair its various products on a scale of representation never attempted before, and the manufacturers of Canada will put up a great display of the results of their industrial skill and enterprise. A great deal of the best pure-bred live stock of Eastern Canada will be there, as the competitions are open to the world. Winnipeg is well supplied with hotels, and it is stated that the City Accommodation Bureau has over 10,000 beds in addition, alloted for visitors to fill. The railways are offering special single fare excursion rates, beginning with July 23rd, and good to return August 20th, for about $32.80. It illustrates at once the enterprise of our manufacturers and the importance of this exhibition to learn as we do that Mr. W. S. Fisher, of Emerson & Fisher, hardware merchants, is going

MOODY'S MANUAL OF SECURITIES.

We have received a copy of the fifth annual issue of Moody's "Manual of Corporation Securities," brought up to 1904. It is an enlargement and improvement of last year's edition, though that was a volume very full of information. It consists of 2,464 pages, and gives particulars of over 11,000 different corporations, has a complete directory of the members of all the Stock Exchanges in the United States and Canada, with the addresses of over 2,400 of the most prominent financiers in the country. Among the sections into which this work, which may well be styled a monumental one, is divided are the following: Steam railroad securities, covering the whole of the United States and Canada, guaranteed railroad and other stocks, unique, we believe, to this manual; gas and electric light companies, electric traction companies, water companies, telegraph, telephone and cable companies, mining and oil companies, banks, trust companies and financial institutions; also a large portion devoted to every kind of business and industrial security. Added to all this information is a general alphabetical index, which, for convenience, cannot be commended too highly. There is also an index of cities. For the investor or the ordinary business man, who at times has to look up information concerning securities and investments of any nature, we know of no book more likely to be of constant use than Moody's Manual. It is a financial reference book, broker's compendium, corporation lawyer's handbook, corporation director, railway's officials' directory, sellers' and buyers' directory, book for purchasing agents and managers. A true encyclopedia, in short. It is published by the Moody Publishing Co., 35 Nassau Street, New York. Price, cloth, $10; leather, $12.

FACTORY REPORT.

The inspector of factories for the western district of Ontario has issued his annual report. He confirms the view that industrial and commercial conditions have been very satisfactory, and that 1903 may be termed a bright one, speaking generally for the whole Province. It was thought, he continued, that the year 1902 was remarkable on account of the nature and extent of the commercial progress which was then apparent, but the succeeding twelvemonth was far ahead of it, as it carried with it large investments of capital and exceptionally good and remunerative agricultural yields, together with a large output from various factories, and both skilled and unskilled labor shared in the general prosperity. The number of accidents reported during the year in the district was 397, of which 21 were fatal. The inspector for the central district reports everything to be fairly satisfactory, and adds the gratifying remark that manufacturers, generally speaking, strictly comply with the law.

BANKING AND FINANCIAL.

While excavating on the Sovereign Bank's new property on St. James Street a workman's pick laid bare the ruins of probably the oldest wall in Montreal. Ten feet at its base, four feet at its extreme height, it is still strong and capable of defying the ravages of time. The wall is built of rough stone, some round boulders as from the bed of the river. The situation of this interesting fragment of the past is just east of what was the old cemetery, and almost across the road from the powder magazine. South of it, towards the river, lay the property of the Recollets. The general manager of the bank was notified of this discovery of the wall by the secretary of the Natural History Society, and he has arranged that a portion of the wall will be preserved, where antiquarians may view it.

R. S., Calgary.—The metaphor used by Mr. W. J. Bryan, former Democratic candidate for the United States presidency, will be found in the following lines. It was used at the Chicago convention, in 1896: "If they dare to come out and in the open defend the gold standard as a good thing we shall fight them to the uttermost, having behind us the producing masses of the nation and the world. Having behind us the commercial interests and the laboring interests, and all the toiling masses, we shall answer their demands for a gold standard by saying to them, You shall not press down upon the brow of labor this crown of thorns. You shall not crucify mankind upon a cross of gold." That the present Democratic candidate for the presidency has declared unequivocally for a gold standard is enough to paralyze the western silver advocates.

FROM SUCH AS THESE, GOOD LORD, DELIVER, US.

A mild sensation has been created in the Montreal fur trade by the failure of the Russian Fur Co. in that city, of which concern Isaac Levi was the sole proprietor, and the Franklin Fur Co., in which business Adolphe Franklin was the only party interested. The facts of the case go to show that there was a clear case of premeditated steal, conceived and carried out by Levi and Franklin. These two worthies were formerly associated together in business under the style of the Russian Fur Co., and a recent dissolution and a pretence made by each of being on unfriendly terms with the other were merely accessories to the plot made to defraud their creditors. Both men are now absentees, and the curator placed in charge of the estate estimates the liabilities of the Russian Fur Co. at $23,000, with assets of about $100, while the Franklin Fur Co. shows an indebtedness of about $5,000, with apparent assets of, say, $1,000. The antecedents of Levi are of a decidedly unfavorable character. Some twenty years ago he failed in Montreal, and afterwards he was heard of as having defrauded his creditors in London, England, absconding thence with the plunder to New York. Some five or six years ago he returned to Montreal, and shortly afterwards associated himself with Franklin, a younger man, who is said to have come from Bucharest, and whose antecedents were not wholly clear.

FIRE PROTECTION AND OTHER MATTERS IN WINNIPEG.

Innoculated with a fear that they might be overtaken by a disaster similar to those when the business heart of Rochester and the wholesale district of Toronto were devoured by flames, the citizens of Winnipeg have risen to the occasion and taken steps to equip their fire department with the most modern and effective apparatus, besides increasing the fighting force. Ever since the Toronto calamity the local brigade has been subjected to a continual fire of criticism, and, of course, the severest critics were the board of fire underwriters. It is scarcely three months ago that a recommendation of J. E. Buchanan, chief of the fire department, for more apparatus was ferreted out from some dusty nook of the city hall. It was then revealed that the chief's request had been made last fall, and had been pigeon-holed by the old council. Indignation was rife, and a torrent of abuse was heaped upon the heads of those responsible for the secreting of the precious document. This wave of indignation, which rolled back and forth among the residents of the city, finally flinging itself against the present council, resulted in Ald. Gibson, chairman of the Fire, Water and Light Committee, and Chief Buchanan being sent upon a tour of inspection through the fire halls of some of the leading American cities. It was on the strength of their recommendation, on their return, that the city council resolved to purchase another 1,000 gallon steam engine, a water tower and an 85-foot aerial ladder, besides increasing the strength of the department by twelve men. At the present time, although Winnipeg compares moderately well

with other Canadian cities, she does not in this respect come up to the standard prevalent to-day in the United States. The lack of confidence felt in the brigade's ability to grapple with a serious fire has now been dispelled in the purchase of the new apparatus described.

The Canadian Northern Railway are seeking to have Broadway east closed up in order that they may build their projected new terminals there. The land in question is that which lies east of Main Street, and between it and the Red river, extending one block north and south of Broadway east. Should this be granted them it will cut off the one remaining connecting link with St. Boniface, Winnipeg's most valuable suburb, and the very idea of the thing is arousing the citizens. On all sides Winnipeg is surrounded by railways, and it is thought that should Broadway east be closed now, that street will only have to be re-opened within five years' time at the cost of many thousands of dollars. The matter is hanging in the balance, as the by-law giving over this property to the railway company has passed its second reading. All that the company offer in return for the land, which, by the way, is valued at $200,000, is to construct another street connecting Winnipeg and St. Boniface, but as this will be a mile and a half longer the proposal is not met with the approval of the citizens. The council has been threatened by several persons that should the by-law be passed an injunction will be issued.

More than one who is eminently capable of judging has prophesied that this year's Manitoba wheat crop will beat all previous records, and not only astonish Westerners, but stagger the outside world. I know that you disparage this rosiness of view and boastful talk, but I tell you what these men say. All over the Province the wheat is looking fine. The excellent weather has hastened growth, and, although we have had quite a quantity of rain during the past two weeks, it has not been so heavy as to be detrimental to the crops one jot.

Almost the sole topic of conversation in town at the present time is, of course, the Dominion Exhibition, which opens here on July 26th. Everything is practically in readiness for it, and it is predicted, with apparently good reason, that the fair will be a triumphant success in every way. In the organization of an accommodation bureau the council stepped out half way to meet the question of housing the crowd of people who are expected, and there need be no fear on the part of Exhibition visitors in this regard.

Winnipeg, July 18th. RED RIVER.

FROM THE EDMONTON COUNTRY.

It is with a grateful feeling that one reaches Edmonton. After leaving illimitable flatness behind, the wooded glades, and steep banks of the River Saskatchewan are "bonnie." The town is on the north side, and sits queen-like 200 feet above the river; the steep climb up the winding roadway is made with difficulty by our spanking fine team; in making the ascent we are enraptured with the scenery, shrub and tree alternating in varied shades of green, the river gurgling by, its banks now perfumed by the "bonnie briar," its sweet flowers bloom on every bush. A flood of golden sunlight fills the valley, the river is as of gold, and the reflection is caught by every leaf and every twig and cone. A sunset in Paradise!

One notes the serviceable bridge that spans the river, the abattoirs and brick yards on the far side, the lumber mills almost hidden yonder by the sudden twist in the stream. The barges or scows that are moored adown, are being loaded with supplies for the settlements at Lloydminster. The grist mill standing plumb in the valley with its elevator towering high above, its zinc coated roof glistening in the setting sun. In the gardens big pumpkins, cucumbers, and all variety of vegetables are raised to perfection. Here one may see Galician women in picturesque attire weeding with surprising diligence. The crest of the hill is reached, and in passing we note what remarkable changes are taking place. There are new buildings galore, here a fine business block, there a bank, and again an hotel. We remember the old hotel building, a quaint, squatty, old-fashioned hostelry whose presiding deity used to make cunning salads, now quite refreshing to recall. The beds were approached with awe, they were fearfully and wonderfully made, requiring an acrobat to get into them. Now the site is graced with a handsome brick and stone building in possession of all modern appointments, and the inconsequent old building is ingloriously packed in behind. One of the phases of Edmonton's growth is in its hotel accommodation; it is not excelled by any city in the West in this respect.

The city is growing; not making any fuss, but forging ahead just the same. Edmonton occupies a strong natural position. To see traders gather from away back, as far as the Arctic circle, is a matter of common and every day occurrence. The making up of large orders in the city stores for points hundreds of miles distant. And now with the opening up the these rich farming lands by which she is surrounded, one has abundant assurance that Edmonton with all her resources and unrivalled situation is, in the language of the street, a "sure thing." Unfortunately, the impression has gone broad that Edmonton is "booming." This is not admitted by the residents. Real estate values, I am told, remain normal. Among Edmonton's citizens are not a few, who are quietly making investments, shrewd Americans amongst these are picking up, as opportunity offers, property that before many years have passed, is sure to become very valuable. Edmonton has her aspirations, tired of isolation, she longs to have a real railway enter her gates. Almost two years ago the present excuse for a railway service began, the toot of the locomotive, the first to cross the North Saskatchewan, was the signal for a holiday for the townsfolk. In all innocence and lightness of heart, storekeepers left their stores, and a day of general rejoicing was held. Donald Ross, an old-timer of more than local fame, held the throttle. The aged engine puffed along the north bank with a flat-car, box-car, and a seedy looking coach, into which old and young tumbled, delighted that deliverance had come. A new epoch for their goodly city had been entered upon; all classes unaffectedly rejoiced. All this was a little premature, for up to now this bit of track has remained an isolated stretch, doing duty as a conveyance from Edmonton to the twin city Strathcona on the south bank where passengers take the C.P.R. This insignificant bit of track is a "far flung" part of the C.N.R. line, which at present is making forced marches across the prairie to its relief. When that day comes and the G.T.P. also enters the city, Edmonton will become a great railway centre of the North-West.

WANDERER.

Maple Creek, Assa., 15th July.

PRICES OF COMMODITIES.

The London Economist's Index Number on the first of June stood at 2130, compared with 2197 at the end of last December, and with 2111 a year ago. The chief cause of this slight decline is the fluctuation in cotton and cotton manufactures, other commodities having kept fairly steady during the half-year. While metals are considerably lower than they were, say four or five years ago, current prices for other staples, excepting cotton, show few important changes. It is to be noted, however, in speaking of the ordinary staples, that while the course of values since December has been of a somewhat see-saw character, the tendency to a lower level has been distinctly more marked during the second quarter. Scotch pig iron has taken on a nominal price, warrants being almost non-existent. Wool, which declined during the first three months, has fully recovered its former level. Flax and hemp have receded, while jute has become dearer. Wheat rose about the middle of the six-months period, but is now at about the same level as in December. Meat remains high. Sugar continues to advance, and tea and coffee have both become dearer. Coal oil, on the other hand, is cheaper. Taken on the whole, the cost of living remains very much the same as a half-year ago.

DRY GOODS.

Belfast linen manufacturers announce advances ranging from 25 to 30 per cent., mainly due to the difficulty of obtaining supplies of flax, the war interfering with farming operations in Russia.

The Canada and Stormont mills, the two big factories at Cornwall of the Canadian Colored Cotton Goods Company, which were closed for two weeks, have resumed operations, and are now running full time.

Mrs. Goodun—My poor man, will you always waste your money gambling with dice over bars? Bulk Butters—Oh, no, mum. Just as soon as I kin git a dress suit an' enter society, I'll play bridge whist.—Chicago News.

Thomas May & Company, Limited, Montreal, received a Dominion charter, and are authorized to acquire the assets and assume the liabilities of the Canada Ribbon Company, and carry on the business, generally, of importers of fancy dry goods, ribbons, millinery goods, etc.

Says Mrs. Farmer to her husband: "Josiah, I'm goin' to buy a new carpet for the parlor. What kind had I better git" And Farmer Josiah replies: "Any kind ye like, Belindy. It makes no difference—bustles, ex-minster, croquette or ingrate. Suit yourself."—Kansas City Journal.

There are in Canada about sixty wholesale manufacturers of boots and shoes, with a capital of about $5,000,000, employing over ten thousand hands, giving an annual product of about $10,000,000 (estimated). These factories are scattered through the Maritime Provinces, Quebec and Ontario. The greatest centre of the industry is in the city of Quebec, where there are about twenty-five factories.—Industrial Canada.

Sig. Andrea Villani, we understand, has established a colony of Italians in Labelle County, Que., on the slope of the Laurentides Mountains, for the purpose of carrying on a Canadian silk industry. It is a surprising thing to hear, but it seems to be a fact that Sig. Villani has succeeded in producing silk of what is described by Italian Government experts as being of finer and more consistent quality than the Chinese and Japanese varieties. Sig. Villani is very enthusiastic as to the prospects for the new industry.

The glove clerk who opens up on a customer with a string of questions will make no money for the store. Here is an example met with recently:

"What size?"
"What price do you want to pay?"
"What color?"
"Lined or unlined?"
"Do you want them button or clasp?"

And a lot of other foolish queries that make a customer nervous and puts him in a bad buying mood. The best rules laid down by an old glove man are these:

1. Quietly measure the hand, or better still, pick up the old glove and look for the size in it.
2. Judge from the customer's appearance what price he will pay.
3. Try on the glove you think will suit and confine your remarks to the weather.—Clothier and Haberdasher.

A forecast of the character of dress materials that are likely to be worn during the spring season of 1905, is made thus early by the Dry Goods Economist of New York, which says: In cotton fabrics, sheer goods will have the principal call, this prediction being based on the present limited demand for heavy cotton fabrics and the strong movement in light-weight stuffs. In wool dress goods there will be a departure towards more pronounced crepon weaves, though not by any means the exaggerated effects which were popular seven or eight years ago. Eoliennes and other diaphanous fabrics will maintain their present strong position. A large sale is indicated for suitings in mohairs, worsted and light-weight woolen materials. As to silks, the prominence of this material at spring race meets both in France and America and the probability that the raw-silk market during 1905 will permit of the production of a good quality of silks to retail at popular prices, are factors which should be carefully noted.

A despatch from the South says that cotton has continued to make rapid growth in most localities, except Texas, where, although, well cultivated and fruiting nicely, advancement has been checked by dry weather, and from portions of the Carolinas, Florida, Alabama, Missouri and Louisiana, complaints of grassy fields are heard, and in some sections of these States too rapid growth of stalks is reported. In Georgia the crop is in a very promising condition, little complaint of damage from any source being received from that state. Dry weather and abundant sunshine have checked the ravages of the boll weevil in Texas.

—Referring to a review of "Historic Amherstburg," and other like pamphlets in our issue of 24th June, and to a proposal therein made, a well-known Toronto gentleman writes: "I am particularly pleased with your suggestion with respect to the desirability of securing historical landmarks of the Province of Ontario as public property. Until the Canadian people have been educated to this point, we shall always remain a non-patriotic people in the true sense of the word patriotism. You lived long enough in Scotland, yourself. to know how deeply are burned into the consciousness and personality of Scotsmen, all that relates to the vicissitudes of Scottish history; and I have no hesitation in asserting that this condition is mainly due to the historic evidences which have been so long preserved merely as monuments, and which serve to illustrate the stories of ancient heroes and their achievements."

—An important body was recently organized in New York under the name of the National Importers' Association. Its purposes are described as being to promote, foster, and aid in protecting the lawful rights and commercial interests of its members. To secure a prompt and unbiased administration of the customs laws. To prevent undervaluations; to endeavor to ascertain and establish correct market values; to secure the proper classification or rates of duty on imported merchandise, and to aid in securing equitable tariff legislation consonant with a proper consideration of the interests of the importers of the country. Among its officers are some of the most prominent members of the commercial fraternity in New York. It is very evident from the first three of these stated purposes that the evils of adroit smuggling, "greasing," and undervaluation are rife at Uncle Sam's custom-houses on the Atlantic. As to the fourth, the combined manufacturers will wonder what interest importers have in the tariff? Many persons honestly think that a tariff should be framed to suit manufacturers only.

—Our live contemporary, the Maritime Merchant, in its desire to forward every enterprise redounding to the benefit of the provinces by the Atlantic, discusses the question of establishing a fishery board and points out the success which such a body has achieved for the fishing industry in Scotland. There the board has no political affinities, and it is entirely free from political control; its business being merely to keep in touch with progressive methods and with everything affecting the welfare of the fishing business, and to set a standard of excellence. As a practical consequence of the system involved, the Scotch Fishery Board's approval of a product is a guarantee that it will sell. Some such institution is very desirable in the Maritime Provinces of Canada, and it is suggested that the newly organized Board of Trade of Halifax, of which great things are expected, might, with propriety, prepare the way for it by forming, in the initial stage, a committee whose duty it would be to attend exclusively to this matter. This might lead the way to something similar to that which has already been beneficial in the case of Scotland. At any rate, it could collect together much valuable information which would form a starting point for a campaign to set the Canadian fisheries on a better footing.

Mercantile Summary.

The People's Bank of Halifax has opened a branch at Sawyerville.

The directors of the Eastern Townships Bank have decided to open a branch of that institution in Cookshire in the near future.

A 40 x 40 ft. extension, three stories high, has recently been added to the Corticelli Silk Company's Canadian factory at St. Johns.

Gaudias Curodeau, of Berthierville, Que., doing a business in fruit, confectionery, etc., under his wife's name, owing to former unsuccess, has assigned.

A. Derome, of Quebec, who started business in the fish and fruit line a few months ago, with assistance from his father, has already assigned, owing about $1,500.

According to the Gazette, a Boston firm is anxious to start a last factory at Richmond. It guarantees to expend $50,000 a year for wages and material on condition that it gets free power, water or steam.

A tailor named Joseph Daze, living at Shawville, Que., has assigned. He bought, a year ago, the insolvent stock of R. Green, of Arnprior, Ont., which he removed to Shawville. He had previously been a clerk in Arnprior.

The Maritime Merchant tells us that Mr. W. H. Sterns, the surviving partner of H. H. Fuller & Co., Halifax, has purchased the interest of the late W. C. Brine and admitted Howard L. Lawrence into a partnership, and these two gentlemen will continue the business at the old stand under the old firm name of H. H. Fuller & Co.

The Canadian Telephone Company held its eighth annual meeting at Sawyerville, Compton, a few days ago. The company have now in operation 497 boxes in the counties of Compton and Lake Megantic, etc. Mr. G. G. Hurd is president, A. Adam vice-president, W. T. Oughtred and Jos. Lemieux managers, and Mr. A. G. Hurd, secretary-treasurer.

A by-law has been passed by the corporation of the village of Ormstown, in the Eastern Townships of Quebec, which provides for the installation of a system of waterworks and drainage in that municipality at an estimated cost of $30,000. A tariff has been framed, rates ranging from $6 to $15 per annum for hotels, churches, schools, and livery stables.

It is reported that the creditors of G. Patterson, general merchant at Wakefield, Que., have agreed to extend him a compromise arrangement of 50 cents on the dollar. For the past twenty-three years Mr. Patterson has carried on business successfully, but he was unfortunate, to use no stronger word, in being burned out lately with an insurance of only $3,000, on stock of some $15,000, and buildings valued at $4,500. His liabilities, in which above arrangement is based, amount to $6,500, or thereabout.

Mercantile Summary

Remember, business success doesn't depend upon smartness or luck, or accident. It is based upon exact principles. These principles are thoroughly taught in the Dominion Business College, Limited, Confederation Life Building, Toronto. Its free booklet gives full particulars.

Plans were submitted for a modern mill of 100 tons daily capacity, and work will be commenced at Palmer Rapids this fall. So great is the demand for corundum that the entire output of this mill has been sold a year in advance. The mineral is used in large quantities for abrasives, and the deposits in the United States have become exhausted. The company has purchased outright from private parties or acquired from the government 1360 acres of rich corundum lands in Renfrew, and on this tract will employ a large number of men. Several tenders for the underwriting of the bonds of the company, which amount in value to $250,000, have been already received, and one, it is understood, has been accepted.

We acknowledge receipt by yesterday's mail of a printed story which if directed into the right channel might create intense interest—addressed to juveniles or females, for instance. It is entitled "The Parachute Man, of the manufacturers of Sweet Caporal cigarettes, Toronto, Ont." It describes his feelings as he soared skyward and then plunged to earth. He is met with "a roar of applause as I ran down the hotel steps. The band blared in salute and the crowd opened up for me as I hastened. The parachute was stretched out from the straining balloon. * * * The aeronaut was the excited one. I was in a semi-stupor: a bitter indifference filled me as I looked at the ugly swaying monster which was to bear me to affluence or death," and so on and so on for several hundred words. But we cannot think of inflicting it upon our readers, who are mostly business men. They should not be thus excited.

A string of minor failures in Montreal is noted as follows: B. Steinberg, designated as an agent, has assigned. His assets are said to consist of a balance of 99 cents in the Merchants Bank, 5 cents in the Hochelaga Bank, and a few cents in a third bank.——J. G. Paulin, for twelve years a shoe clerk, began business for himself as a shoe merchant in the spring of 1903, and now has assigned.——Whitefield & Mayall, a commission firm, formed about a year ago, have assigned on demand. They have shown a conspicuous lack of management, and must have had to pay a good many hundred dollars in law costs, having been involved in almost continuous litigation during the past six months.——A. B. Rattray, produce dealer, reported lately as failed, is offering 25 cents on the dollar.——The European Importing Co., referred to last week, have settled at 50 cents, payments being spread over eighteen months.

Mercantile Summary.

Moosomin and Arcola business men are forming a company to construct an electric railroad to connect the Canadian Pacific main line on the north, with the Estevan and Soo lines to the south. A charter will be applied for authorizing it to supply power in adjacent towns and install a telephone system.

The Metal Shingle and Siding Company's plant at Preston, Ont. was, on the 15th inst., totally destroyed by fire at a loss in the neighborhood of $40,000. A temporary factory will at once be built, and manufacturing carried on as usual, for the company's orders are extensive.

The Richelieu and Ontario Navigation Company have decided to run their steamers from Toronto to Montreal on Sundays, in order to accommodate the large number of tourists and other travellers who arrive in the city on that date. The steamers "Toronto" and "Kingston" will be utilized at the beginning for this purpose, and will connect at Charlotte with New York and Boston trains. The company's vessels have been running from Montreal to Quebec for years on Sundays.

A news letter in one of the Vancouver papers mentions that Ymir seems to be on the eve of a placer excitement. It has been satisfactorily proved that the flats bordering on some of the rivers and creeks in the neighborhood, and especially those that show signs of having changed their course materially at some remote date, all carry auriferous gravels, susceptible of operation with modern machinery. Work is progressing on a number of locations recently made. On the Hall Creek flats, taken up by local men, tests showed that the gravel averages about 50 cents to the cubic yard. The Peterson Bros., who first staked the North Foley placer grounds and subsequently sold out for a large sum, have staked claims out of the Salmon River, a few miles above Ymir, and are working on that ground.

Replying to the suggestion made last week by a Montreal gentleman that existing high prices for pot-ashes and pearl-ashes might induce shipments to Montreal from the county of Essex, we have a letter from Amherstburg, dated 18th instant, from which we quote: "Respecting the potash suggestion:: Meloche Bros., in Anderdon Township, and Stokes, in Malden, are both manufacturing but they never make any pearl. They both claim that there is more profit in the ordinary potash. The Montreal people are not paying as much for it as the New York people, and Stokes' product will all go there; it is quite possible that the Meloche boys will ship theirs to New York, too. There is too much inspection and cooperage charges in Montreal. Stokes shipped over 100 barrels a year or two ago and it all went to New York. The Meloche boys will have some to ship during this month."

The Cariboo Consolidated Company cleaned up from its hydraulic claims on the Quesnel River, it is said, about $60,000 in gold. By next season it is hoped to have additional sources of water supply available.

Mercantile Summary.

The directors of the Corundum Refiners, Limited, at a meeting in Toronto the other day, came to the decision to work next summer the valuable corundum mines in Renfrew county, Ontario.

The wide vein of galena quartz is reported to have been struck on the Goodenough mine, Ymir, B.C. It has been opened at different points for a distance of 700 feet, and shows several pay streaks of rich galena ore.

It appears that the Dominion Government is about to enlarge and improve the present offices of the Inland Revenue Department in Montreal, at a cost of $140,000. Application has been made to the city council for a plot of land supposed to belong to the city immediately behind the present Inland Revenue Building, and the application was favorably received.

A syndicate is being formed to take over the Dundee mine in the Cariboo district of British Columbia, from Mr. A. E. Rand and his associates of New Westminster, investigation having shown promising results. Development work is to be done as speedily as possible, and will include a new tunnel to tap the present shaft, and the installation of a compressor plant.

◆

WELL SERVED.

He had got left and went across to a restaurant to get a bite. He was very common in appearance, and would be assessed at two fish balls and a cup of coffee. So when he took his seat at an unoccupied table and asked the waiter when the next train went west he got an answer:

"I dunno; dis ain't no deepo."

But, to the surprise of the red-headed cashier and the watchful waiters, the common-looking man ate an expensive and extensive dinner, winding up with a good cigar. As he gathered up his checks and started for the desk the now attentive waiter extended his hand and asked him if he had not forgotten something. To the admiration of all beholders and the joy of the cook, who was peering from the kitchen door, he answered:

"I guess not; dis ain't no bank," and business went on as usual, and the traveller went out to look up his train.—

◆

MONTREAL MARKETS.

Montreal, July 20th, 1904.

Ashes.—There is a reported demand, both local and English, for pearl ash, but not a barrel has come to hand this year, the high prices being realized for pots having probably diverted makers' attention from this line of product. First quality of pots is generally quoted at $6.05 to $6.10, though it is said $6.15 has been paid for good tares. Second pots would bring about $5.50 to $5.60. For pearls probably $7.50 per cental could be realized.

Cements and Firebricks.—Nothing beyond a moderate jobbing business is being done, sales of round lots being few and far between. The receipts of a lot of 1,600 bags of German cement is reported this week, the first lot since the imposition of the surtax. Other receipts for the week ending to-day are 2,350 barrels and 2,528 bags of Belgian cement. For the previous week receipts of cement were nil, of firebricks, 42,000. There have been no recent changes in quotations.

Dairy Products.—The shipments of cheese from this port last week aggregated 82,254 boxes, figures some 6,000 boxes less than for the same week of 1903. In the market there has been comparatively little change since a week ago, and low prices continue to rule. Spot prices are quoted as follows:—Quebecs, 7¼ to 7½c., Townships, 7½ to 7¾c.; Westerns, 7¾ to 8c. Exports of butter continue to show some little increase over last year, and last week's

shipments 14,724 packages, 3,812 more than for the corresponding week a year ago. The demand from Britain is rather better, and values are a little firmer at 17¾c. for fine creamery; seconds, 16¾ to 17¼c.; dairy, 14 to 14½c.

Dry Goods.—Since a week ago there has been little change in the general situation. Some travellers are about completing their first fall trip, with results noticeably short of this date a year ago, many retailers having apparently a considerable proportion of last fall's purchases of goods still on hand. The sorting trip may make up some of the shortage, but there does not appear to be any general expectation that autumn trade will be up to the level of last year. City retail trade is also quiet, but collections, both in the city and country keep up very well.

Groceries.—The most interesting feature in this line is the fact that, as the result of a general agreement among wholesale dealers, the credit limit has been fixed at thirty days on all lines of groceries, with the sole exception of teas, which may be sold at 90 days.

Debentures for Sale.

Sealed tenders addressed to "The Mayor and Council of the City of Regina" will be received up to and inclusive of Saturday, the 30th day of July, 1904, for the purchase of debentures of the city of Regina issued in pursuance of a by-law in that behalf authorizing the raising of $135,000, for the construction of a system of water works, sewerage, etc., for city purposes.

These debentures will bear interest at 4½ per cent. per annum, and are made repayable within fifty years as follows:—

During the first five years succeeding issue thereof, interest only at the said rate will be paid annually, after which period the whole debenture debt of $135,000 will fall due and be payable in forty-five equal annual instalments of $7,047.30, principal and accrued interest combined.

Debentures can be issued at the option of the purchaser in sums of $5,000, or over.

The highest or any tender not necessarily accepted.

Dated, Regina, N.W.T., 29th June, 1904.

J. Kelso Hunter,
Secretary-Treasurer.

SAINT JOHN

CITY DEBENTURES

I am directed to receive bids at the office of the Chamberlain of the City of Saint John, for the purchase of Saint John City Debentures, for the whole or any part of the sum of

One Hundred and Thirteen Thousand Five Hundred Dollars—$113,500.00

to be issued in the sums of five hundred dollars each, under the provisions of Act of Assembly 52 Victoria, Chapter 27, payable in 40 years, with interest at the rate of three and one half per centum per annum, payable half yearly on the 1st day of May and the first day of November.

The proceeds of said debentures are to meet expenditures for Public Civic Works and needed Civic Improvements.

First coupon (5 months interest) payable 1st November, 1904.

FRED SANDALL,
Chamberlain, Etc.,
City of ST. JOHN, N.B.

Chamberlain's Office, June 27th, 1904.

The British Columbia Permanent Loan & Savings Company.

Dividend No. 12.

Notice is hereby given that a dividend at the rate of EIGHT PER CENT. PER ANNUM has this day been declared on the Permanent Stock of the Company for the half-year ending June 30th, 1904, and that the same will be payable at the Head Office of the Company, No. 321 Cambie Street, Vancouver, B.C., on and after July 15th, 1904.

By order of the Board.

THOS. T. LANGLOIS,
President.

Vancouver, July 8th, 1903.

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFE-TIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World's Fair, and consult Grand Trunk Agents for further particulars.

THE PURITY AND EXCELLENCE OF
COWAN'S PERFECTION COCOA
IS ACKNOWLEDGED BY THE WONDERFUL SALE IT IS HAVING.

This step has been well considered, and is a move in the right direction. The present trade movement is not a very brisk one, but sugar refiners report quite a good demand from jobbers, in anticipations of further probable advance, the market being a strong one. Raws are reported as showing much stiffness in New York, and advices of an advance there seem to be momentarily expected. Some further considerable receipts of West India raws are noted for local refiners. Molasses keeps firming, and the jobbing price for Barbados has now been fixed at 28c. in puncheons, 30½c. in barrels, and 31½c. in half-barrels. The Canners' Combination has announced prices for fruits which are just about the same as last year. Pears are lower, beans about the same. Figures for canned tomatoes

The Traders Bank of Canada.

Notice is hereby given that after the publication of this notice for four weeks, application will be made to the Treasury Board for a certificate approving of the following by-law passed at the annual meeting of the shareholders held this date, viz.:—

A BY-LAW TO INCREASE THE CAPITAL STOCK OF THE TRADERS BANK OF CANADA.

WHEREAS the capital stock of the Traders Bank of Canada is $2,000,000. divided into 20,000 shares of $100 each, the whole amount of which has been taken up;

AND WHEREAS it is deemed expedient that the said capital stock should be increased;

Be it, therefore, enacted by the shareholders of the Bank assembled at the Annual General Meeting, held at the head office of the Traders Bank of Canada, the 21st day of June, 1904.

(1) That the capital stock of the Traders Bank of Canada, be, and the same is hereby increased by the sum of $1,000,000, divided into 10,000 shares of $100 each.

(2) When the directors so determine, and from time to time as they think fit, the said increased stock shall be allotted to the then shareholders of the Bank pro rata, and at such rates as is fixed by the directors, but no fraction of a share shall be so allotted; provided in no case shall a rate be fixed by the directors which will make the premium (if any) paid or payable on such stock so allotted exceed the percentage which the reserve fund of the Bank then bears to the paid-up capital stock thereof.

(3) Any stock allotted from time to time which is not taken up by the shareholder to whom such allotment has been made within six months of the time the notice of the allotment was mailed to his address, or which any shareholder declines to accept, or any shares which shall not be allotted by reason of the provision hereinbefore contained against the allotment of fractions of a share, may be offered for subscription to the public, at such times, in such manner, and on such terms as the directors may prescribe.

H. S. STRATHY, General Manager.
Toronto, 21st June, 1904.

"WE WILL BOND YOU."

Corporate bonds are more reliable and in every way more desirable.
Only where it is indicated that men possess integrity of character can they obtain a bond in a surety company.
Regard your name as a bondsman as an encumbrance on your property.
Personal sureties are subjected to questions as to the worth of the bond filed which they would rather not have made public.
Once a corporate surety bond has been used, no further use for personal surety can be found.
Rates of premium on surety bonds are always moderate.
A surety company is required by law to carry reserve against its risks and is possessed of large resources.
The UNITED STATES FIDELITY AND GUARANTEE COMPANY executes bonds covering all positions and trusts.
Existence of surety companies makes it unnecessary for the employe to ask friends to become surety for his integrity.

Surety companies protect the home and family.
Unlike personal surety, the bonds issued by surety companies can always be collected.
Resolve to never have your name used as a bondsman.
Embarrassing positions may be escaped by not becoming surety on a bond nor asking others to do so.
This Company does not surround the person bonded with annoying restrictions.
You cannot afford to incur obligations by asking friends to become surety for you.

Head Office for Canada,
6 Colborne Street, Toronto.
A. E. KIRKPATRICK,
Manager.

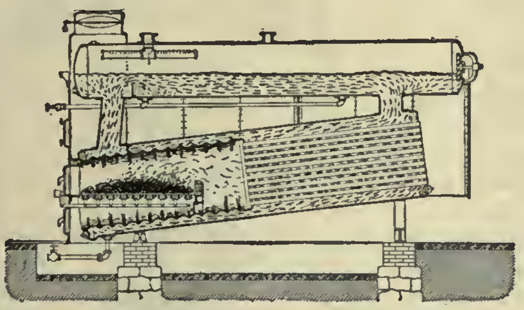
Internal Furnace Saves Ten Per Cent.



An externally fired boiler wastes fuel because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler, the heat is transmitted directly to the water, and air cannot get into the furnace except through the regular drafts. This makes a saving of at least 10 per cent.

are not yet announced. Messina advices regarding filberts announce a crop less than half of last year, resulting in an advance of 3s. a bale. It is said Tarragona almonds may also be short. The new crop of Valencia raisins is said to be looking well, but spot stocks of last year's fruit are described as still large, and first orders for new crop are being placed sparingly. Comparatively high quotations are expected for new Sultanas, as the yield will be light, it is reported.

Hides.—Owing to better prices for wool, lambskins are again advanced 5c. this week, making the present market quotation 45c. each. Beef hides and calfskins remain just as quoted last week.

Metals and Hardware.—The week has developed little of special interest, and the demand in all lines is somewhat restricted. There is little present enquiry for pig-iron, and quotations rule easier as noted last week. Domestic bars are firmer, the result it is said of a probable getting together of producers in this line, and quotations are now given at $1.70 to $1.75. Tinplates are firmer in Britain, probably due to advance in ingot tin, and Canada plates, which were easy, have advanced 2s. 6d., local prices in these lines, however, are unchanged. Ingot tin is dearer at 29½ to 30½c., and copper is also firmer at 13½c. for ordinary lots.

Oils, Paints, Glass, etc.—Trade keeps quiet. Owing to altered tariff conditions, which favor one or two importers of English glass only, the quotations for glass have been reduced, the figures for first break being now $3 to $3.10; second break, $3.20; third do., $3.70; fourth break, $3.95. Linseed sems to be gradually firming up in Britain, but no material advance has yet been established here. Turpentine is firmer at 82½c. for single barrels. Other lines are unchanged.

TORONTO MARKETS.

Toronto, July 21st, 1904.

Drugs, Chemicals, etc.—There is hardly any feature worthy of particular record so far as the local market is concerned. In New York a firmer feeling is reported for opium, following upon comparatively strong advices from Smyrna. In quinine, orders are more frequent, especially from the south and a fair business is now being done. A continued good demand exists for vanila, especially the Tabiti beans. Advices from Manchester, England, are to the effect that business in chemicals has been quiet there during the month. Demand from the textile trades has improved but slightly if at all. The feeling all round, however, is hopeful. Heavy alkalies are quiet, at unchanged values. Bleaching powder is moving fairly well, Ammonia alkali continues strong.

Flour and Grain.—The flour market is firm in sympathy with the higher values for wheat, and the reported poorer prospects for the American crop. Ninety per cent. patents are quoted at $3.65. Rolled oats continue at about the same price. Millfeed is steady at unchanged quotations.

Fruits and Vegetables.—Raspberries are the feature of the market, and as they become more plentiful, are attracting public attention away from strawberries. New Canadian potatoes are becoming more abundant, but prices keep fairly firm. The following are the usual prices quoted:—Strawberries, 7 to 10c.; cherries, per basket, sour, $1 to $1.15; sweet, $1 to $1.35; raspberries, 9 to 11c.; Lawton berries, 15c.; gooseberries, per basket, 50c. to $1; red currants, large basket, 75 to 90c.; small basket, 35c.; huckleberries, per basket, $1.10 to $1.35; Oranges, California, navels, $3.50 to $4.50; Valencias, large, $7; ordinary, $5; Messina, ovals, $2.25. Lemons, Messinas, $3 to $3.50; Sorrentos, $3 to $3.50; Verdillis, $3.25 to $3.75. Bananas, 1sts, per bunch, $1.75 to $2.25; 8's, per bunch, $1.25 to $1.50; pineapples, Florida, per case, $3.50 to $4; Havanas, $3 to $3.25; watermelons, each, 25 to 30c.; cantaloupes, small, per box, $2 to $2.25; California plums, per box, $1.50 to $1.75; California apricots, per box, $1.25 to $1.50; California pears, $3 to $3.50; California do., $1.25 to $1.75; Elberta pears, 4-box case, $1.50; 6-box case, $2.50 to $3; Baltimore apples, half-bushel basket, 50c.; Canadian peas, per basket, 15 to 25c.; Canadian cucumbers, per basket, 50c.; Canadian potatoes, per basket, 35 to 40c.; Canadian beans, per basket, 35 to 45c. New potatoes, per bushel, $1.10 to $1.15; per barrel, $3.25 to $3.50; Egyptian onions, per sack, $2.50; per basket, 40c.; Baltimore cucumbers, per basket 50 to 75c.; Southern tomatoes, per case, $1.25 to $1.50; New Jersey, $2.50 to $3; cabbage, crates, $1.25; Kalamazoo celery, per dozen, 45 to 50c.; Canadian celery, per dozen, 60 to 75c.; Canadian, pink, 50 to 65c.

Hardware.—The volume of trade is fair, but not more than might have been expected at this time of the year. Prices remain very much in the state they have been for some time past. The chief items of interest lately have been guns and ammunition, and cutlery. Cement is quiet, but shows no appreciable change in prices. Builders' supplies are in good demand. In heavy metals, the movement is fair, but this is seldom a time of great activity in that branch of trade.

Hides, Skins, and Leather.—No further change has taken place in hide values, though as receipts continue light, and they are wanted, the tone is firmer. Calf, sheep and lamb skins are quite steady. In leather not much business is passing, perhaps owing to the poor prospects for grain in some sections.

How the
Royal Automatic
Smoke Preventer
and Fuel Saver
Reduces Cost of Power

If you have not a device on your boilers by which you can have complete combustion, would it not be worth your while to do a little investigating.

Others have done so and it **PAID.** In the Royal Automatic Smoke Preventer and Fuel Saver the following advantages have been demonstrated:—

It is not an expensive appliance.
It can be applied without shutting down.
No interfering with grate or brickwork.
Produces perfect combustion.
Increases draft in smoke stack.
Reduces the heat in smoke stack.
Saves in amount of fuel used.
Increases evaporation of water.
Simple in construction.
Does not produce clinkers.
Completely cuts away the smoke.
Leaves the boiler and tubes clean.
Easy on the boiler.
Being automatic it needs no attention.
Can be easily attached to one or more boilers.
Adds to the life of the grates.
Aids the boiler on a quick demand.

All these points have been shown in many plants. — Not one time and another, but all on each boiler.

No oil, no fans, no fancy stoking, no troublesome machinery.

Royal Automatic Smoke Preventer and Fuel Saver Company, ***ROOM "Z,"***
Confederation Life Bldg.,
TORONTO, Ont.

Provisions.—For dairy produce the market is quiet. Butter and cheese are in abundant supply and there is no feature of special moment. There is an improved demand for smoked meats, but prices remain the same as before. Lard continues in slow demand. Eggs are still firmer and the price now asked is 17 cents.

Live Stock.—Both butchers and exporters' animals are easier, and at last market, prices fell off a few cents in some cases. In the case of the former, the cause may be the extremely hot weather. Only the best qualities are wanted. Stockers and feeders were in somewhat small supply, but not many were needed. Prices continue the same. A firm feeling was noted for sheep and lambs, but for calves the tone was easier.

Wool and Tallow.—Only light supplies of new clip fleece are coming forward. The crop is small and holders are standing out for higher prices. Pulled wools are in good demand, both from the domestic mills and for export. There is an easy feeling for tallow.

◆

THE BURNED DISTRICT OF TORONTO.

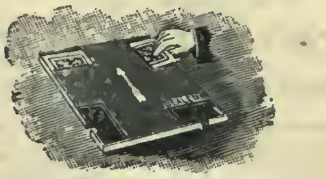
It is now three months since the disastrous fire which made ruins of so much of the Toronto business quarter, and some account of what has been done towards rebuilding it will be of interest. Bay street and Wellington show most activity in new buildings, for on the south side of Front street very little change is shown in the aspect of things since April. But this is largely because of the uncertain state of the negotiations for a new railway station, which delays new leases from the city. Gordon Mackay & Co.'s new building on the corner of Bay and Front is steadily rising, however, and will be an ornament to the neighbourhood. It is being built of red brick and white stone, will be of similar dimensions to the former warehouse, but of safer and more modern fire-resisting construction.

A property on Spadina Avenue, west side, close to the corner of King street, has been purchased by the W. J. Gage Company, on which to erect a wholesale stationery establishment. The lot measures 120 feet by 204 feet, and the structure to be placed upon it will be of a modern and substantial kind.

A Kingston contractor has set a force of men to work on a new warehouse fifty by one hundred and twenty-six feet, six stories high, to be occupied by Cockburn & Rea, wholesale milliners, before Christmas. The architect will employ heavy mill construction, the floors throughout being five inches thick of hard southern pine and maple, and large pine beams replacing the ordinary joisting. The exterior is to be of red Portage Entry stone and light buff pressed brick with granite piers and capitals. The location of the building will be at 54 Wellington street west.

Near it will be a seven story mercantile and factory building for E. & S. Currie, Limited. Materials, stone, brick, and terra cotta, cost probably a hundred thousand dollars. The building will be not far from Bay street, on Wellington. Suckling & Co.'s new

PLANET WHIST TRAYS



It you play whist use our trays that are enclosed in neat boxes at the following prices:

No. 16 containing 16 Trays..$5.00.
No. 20 " 20 " .. 6.00.
No. 24 " 24 " .. 7.00.

This tray is highly recommended by the best known whist players in Canada, and is undoubtedly the best in the market.

THE PLANET, - Chatham, Ontario

$4,500 Required

On Security of Manufacturing Plant, Value $15,000. Reduced $200 every three months (if necessary). Operated twenty-five years, recommended and valued by manufacturer of absolute integrity. Particulars apply, R. F. SEGSWORTH, Barrister, 103 Bay St., Toronto.

THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA? —

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

And Still it Leads

As applied to the gain in net amount of assurance in force in Canada for the

5 Years Ending Dec. 31st, 1903.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

still maintains its stand at the

HEAD OF ALL ITS COMPETITORS

among Canadian Life Companies, as shown by the Government Reports.

Wellington, are not being rebuilt. Since the dissolution of the firm, Mr. Smith has bought a building on Church street, corner of Court, opposite the Monetary Times establishment, and intends to carry on lithographing there. The Messrs. Rolph, his former partners, have joined Mr. Clark, of the Lombard street lithographing works, and under the style of Rolph & Clark, are doing business at the premises erected for the Clark Lithographing Company. They are about to put up, in addition a three story stone and brick warehouse, corner Simcoe and Adelaide.

The Government examining warehouse on the Esplanade, near Yonge street, which had so narrow an escape from destruction in the conflagration, is to have an addition made to it four stories in height, at a cost of some $40,000. This will be a much-needed accommodation for the building was too small. Just west of the Union Bank, on Wellington street opposite Jordan, the new building of Kilgour Brothers is rising; brick and steel, and slow-burning construction will lend their aid to make this a worthy modern structure as well as a handsome one. Further west on the same side the warehouse of Bradshaw & Son is also being rebuilt.

Next the Queen's Hotel, the burned warehouse of Warwick Brothers & Rutter is not being rebuilt, but next door east there are three stories of the new Copp, Clark Co. premises already up, on the former site. The material of the front of this building is cream colored brick; metal cornices, steel posts and beams are also in use.

Judicious use is being made of fireproof material in the extensive new premises of the W. R. Brock Company, whose deep red brick walls are steadily rising on Wellington and Bay streets. Great girders and beams of steel; door and window casings of steel; pillars of steel; cement, brick, and stone in plenty, but by no means the usual proportion of wood. Just beyond this pile, to the west, the warehouse of Brown Brothers, Limited, is being rebuilt, and apparently the lessons of the past have been heeded, for the place is being made very substantial. There are other buildings or the beginnings of buildings that deserve mention, but we have perhaps written enough for this time.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.,

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in increase of Assets

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

THE POSITION IN WHEAT.

While at the present time there is nothing in the situation of wheat similar to the great strength of the market for that grain two or three months ago, still the tone of the market is very strong. For this there are several reasons. So far as can be seen just now, which would be a premature judgment, however, the crop in the Canadian North-West will be a good one—indeed, unless something unforeseen happens, it may be reasonably expected to be larger than ever, in accordance with the acreage. But what counts is the actual visible supply of wheat, and this is decreasing somewhat rapidly. In Canada and the United States, the visible supply is reckoned at 12,619,000 bushels, as compared with 13,067,000 bushels at this period of last year. It must be remembered, however, that the total visible supply of wheat in the world to-day is actually in excess of last year at this date. A stronger reason for the firm market is the report of the Washington Department of Agriculture, issued a few days ago. The improvement noted in that bulletin in winter wheat was only one per cent. whereas one of at least two or two and one half per cent. had been looked for. The Government estimate of this crop in the United States is only 340,000,000 bushels, which is at least 25,000,000 bushels less than had been looked for. The trade in Great Britain, too, evidently looks for shortage in the supply, as is evidenced by recent rises in price, despite the fact that the quantity held in the United Kingdom at the present time almost beats the record for size.

Probably the factor which counts most largely in the minds of European wheat buyers, is a recognition of the fact, or of what looks like the fact, that supplies of wheat from the United States are very likely to have an increasing tendency to become shorter year by year. The population in that country is growing rapidly, but while the quantity of fresh land being put under farm crops is growing that put under wheat is not increasing in due proportion. Besides this, in many sections, wheat lands are deteriorating in fertility. All this means that there will be a constantly diminishing quantity of American wheat not required for the home population, or in other words, exports of wheat from the United States will diminish to such an extent that not only will the wheat resources of the Dominion be drawn upon, but prices will tend to keep high, at least until some sort of equilibrium be re-established.

◆

CROP PROSPECTS IN WESTERN CANADA.

Accounts from Manitoba and the North-West Territories continue to give promise of excellent grain crops. The following is our Winnipeg crop bulletin of Thursday noon: "Crop reports throughout the West show considerable rain in some localities, but it has not been excessive. On the lighter soils there is still some need of rain, but crops are not suffering yet. The greater portion of the crop is headed and shows every indication of a good yield."

◆

THE WINNIPEG SUMMER FAIR.

This important fair was formally opened on Tuesday last by Hon. Clifford Sifton, Minister of the Interior for the Dominion. It is now in full swing. A despatch from Winnipeg to this journal, dated 1 p.m. Thursday, states that large crowds of sightseers have been in attendance for the first two days. "To-day is citizens' day, and a half-holiday in Winnipeg, and it is expected that the attendance will be a record breaker. Great interest is manifested in the exhibition by the people of the Province, thousands of people crowding in from all parts of the country. Several large excursions will come in from the states of North

Dakota and Minnesota, just across the line. The city's accommodation will be taxed to the utmost.

The exhibition grounds present a very animated scene; several new buildings have been erected by the Association this year, chief of which is a large colonnade, copied after some of the World's Fair buildings at St. Louis. All available space has been taken up in the different classes of exhibits. One of the chief centres of interest is the manufacturers' exhibit, which is one of great extent and importance, entries having been made from all over Canada. The competition in the live stock is very keen, entries having been made from all parts of the Dominion. The stock parade this year will assuredly be one of the finest ever witnessed. "The Pike," as it is called, the "Midway" of the fair, has the largest and best variety that ever came to Winnipeg, and is being well patronized. All that is needed to make the Dominion Exhibition an assured success, and by far the greatest ever held in the West, is a continuation of the ideal weather, which thus far is cool and fine.

THE STRIKE AT SYDNEY.

The steel workers' strike at Sydney, Cape Breton, is now at an end, the men having become convinced that they stood no chance of obtaining their demands. The public had been previously convinced that they did not deserve to have their demands conceded, for it was apparent to any one who cared to inform himself of the circumstances that the Dominion Steel Company was keeping its men on when its own immediate financial interests would have been better served by laying most of them off. The company agrees to show no discrimination against any of the men who went on strike, because of either their past or future connection with the union; but insist, and properly insist, on the right to discharge employees who through incompetency and other causes are deemed unfit for their duties.

The strikers have gained nothing save the knowledge that no matter how popular a labor organization may be it will not be upheld by the public when it makes injudicious demands or countenances illegal methods for their enforcement. Hitherto the P.W.A. has succeeded, largely because it was backed by the sympathy of the public; but in this instance it has lost, and the fair fame of Nova Scotia has been tarnished by deeds of attempted violence which necessitated the calling out of the militia forces. The strike, it is estimated, resulted in a loss of half or three-quarters of a million dollars to the Steel Company, and a loss of a quarter of a million dollars to the men. The men go back to work on the old terms, and the company will re-employ as many of the old workmen as it can find places for. The P.W.A. blames the Government for its defeat, in spite of the efforts of the deputy Minister of Labor, and has decided to bring out a labor candidate at the next federal election.

Plenty is heard now-a-days about the tyranny of capital: we do not need to go farther away than silver-tongued Bryan, or the more recent Thomas W. Lawson, of Boston, to learn about corporate wickedness and the greed of gold. And doubtless it is often true that wealth is greedy and capital unscrupulous. But the labor unions on this continent have shown themselves to be cruel and tyrannical in their methods while lacking in the intelligence and breadth of action which capital displays. This greater intelligence, this wider view, must defeat labor in the long run if the latter, in pursuance of what may be legitimate ends, uses unjustifiable weapons.

BANKING REVIEW.

We present below a condensation of the monthly statement of Canadian banks for June, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, etc.:

CANADIAN BANK STATEMENT.

LIABILITIES.

	June 1904.	May 1904
Capital authorized	$99,546,666	$97,546,666
Capital paid up	79,193,029	78,801,319
Reserve Funds	52,312,308	52,309,458

Deposits to secure note circulation	3,229,002	3,130,844
Notes and cheques on other banks	20,147,353	18,624,100
Loans to other banks, secured	859,693	891,539
Deposits with other banks in Canada	5,340,321	5,265,062
Due from banks in Great Britain	5,304,928	3,262,168
Due from other banks in foreign countries	16,864,751	13,593,721
Dominion or provincial Govt. debentures or stock	10,674,984	10,547,439
Other securities	54,384,532	54,400,300
Call loans on bonds and stocks in Canada	36,738,423	36,960,202
Call loans elsewhere	37,030,301	38,767,494
	$239,309,550	$233,717,067
Current Loans in Canada	413,392,863	409,210,958
Current Loans elsewhere	19,183,302	19,235,635
Loans to Dominion and Provincial Governments	2,490,441	2,776,475
Overdue debts	2,002,934	2,026,693
Real estate	734,197	688,522
Mortgages on real estate sold	742,679	754,477
Bank premises	9,662,251	9,492,347
Other assets	6,788,018	6,977,226
Total assets	$694,303,415	$684,879,573
Average amount of specie held during the month	16,108,626	15,849,340
Average Dominion notes held during the month	30,858,721	30,186,800
Greatest amount notes in circulation during month	60,876,184	60,258,489
Loans to directors or their firms	10,642,121	10,664,253

The circulation of the banks has gone to high figures during the last few months. At one time this year it exceeded $67,000,000; at the close of last month, it stood at $60,000,000; the highest point it reached in June was $60,858,000. Deposits continue to increase. Their aggregate last month was $424,000,000 in round figures, as compared with $415,000,000 a year ago, and $380,000,000 in 1902. There was $116,000,000 of this most recent aggregate held on demand and $308,000,000 at notice. Besides these, the Canadian banks have nowadays usually between thirty and forty millions of deposits outside of Canada. According to the above statement, their amount last month was $35,292,092. Some twenty millions of this belonged to the Bank of Montreal, much of it doubtless being in London, England, and part in New York and Chicago. The Bank of British North America carries a round sum on deposit in its New York and San Francisco offices; the Canadian Bank of Commerce, the Bank of Nova Scotia, the Royal Bank, the Union Bank of Halifax and the Merchants' Bank of Canada helping to swell the total in this column.

Here are additions of 26 millions, 34 millions, 43 millions, 52 millions of dollars made to the savings of the people in a single year, as comparisons of recent individual years will indicate. These figures show that in the three years of 1901 to 1903, the Canadian people added $129,000,000 to their deposits in the banks. Besides the deposits here noted in the chartered banks, it must be remembered, the people of Canada have $20,000,000 deposited with loan companies; $23,000,000 more in the Caisses d'Economie in Montreal and Quebec; and $61,000,000 in the Government Post-office savings banks. This practically adds a hundred millions to what the chartered banks hold and makes the aggregate savings of Canadians at this date $524,000,000. It may well be questioned if any country of six millions can show greater evidences of thrift, or a greater addition to its spare capital in so brief a time than are exhibited by these remarkable figures.

The growth of deposits during last year is not so great, either actually or relatively, as in several years immediately preceding it; from 1899 to 1903 the yearly increase was unusual. But an increase in ten years from deposits of $175,000,000 to $424,000,000 is something worthy of special remark. We compare below the figures for the fiscal years 1893-4 to 1903-4:

End of June,	1904,	deposits	$424,000,000
" " "	1903	"	415,174,000
" " "	1902	"	380,681,000
" " "	1901	"	337,413,000
" " "	1900	"	285,186,000
" " "	1899	"	258,402,000
" " "	1898	"	227,935,000
" " "	1897	"	201,141,000
" " "	1896	"	183,770,000
" " "	1895	"	180,664,000
" " "	1894	"	174,930,000

During this period of rapid expansion, say since the year 1900, the complaint was frequent that the volume of circulation of the banks did not grow with the growth of the business of the country. A comparison of the Canadian bank circulation over a series of years, shows how greatly its increase outran the increase of bank capital:

	Circulation.	Paid-up Capital.
July, 1896	$29,738,000	$61,794,000
July, 1897	32,709,000	61,952,000
July, 1898	36,553,000	62,300,000
July, 1899	40,270,000	63,390,000
July, 1900	46,007,000	65,039,000
July, 1901	48,947,000	67,147,000
July, 1902, ...	52,070,000	69,733,000
July, 1903	53,953,000	69,584,000
July, 1904	60,098,000	79,193,000

A considerable stride was made between 1902 and the present time, however, by increasing the capital of several established banks, as well as by the founding of new ones. And the volume of circulation is thereby made to hold a better proportion to the currency requirements of the country.

Among the assets of the banks, which amount to $694,303,000, items which are classed as "readily available" amount to $239,309,000, equal to almost thirty-five per cent. This consists of specie, Dominion notes, cheques and notes on other banks, current balances due from other banks in the United States and Britain, call loans, government debentures, railway securities and municipal securities. The current loans and discounts have reached the great total of $432,000,000, namely, $413,392,000 in Canada and $19,183,000 "outside of Canada," which means in the United States.

ACCIDENT ASSURANCE RATES.

It has grown to be an old story that rates of premium in accident assurance have gone down beyond a paying point, that there is not the profit there should be in the business. One office blames another for this state of things; one office, A, says of another, B, that it started the increasing of benefits; then C blames D for lessening restrictions in policies; and so the wordy fight has gone on. It is hardly needful to say that these concessions, the result of excessive or senseless competition, are mistakes. Indeed it is just such irregularities as these that should be combatted by some authoritative body in the interests of accident underwriting companies generally. Possibly the mistakes that have been made are in part the result of misapprehension, or a lack of experience, for we hesitate to charge deliberate bad faith upon offending persons or companies whose rates or whose regulations are not what they ought to be.

We should not be surprised if the result of such conferences among accident insurance people as that just held at Portland, Maine, will be found to be a lessening of friction in the business, as well as a far better understanding of its principles and the proper method of working. They are likely to result, too, in a greater respect shown by managers of companies to each other, which is not a small thing. By compiling and tabulating their statistics as to the working out of certain plans; by confiding in, and relying upon each other as to matters of detailed experience in meeting unreasonable claims; by approximating the phraseology of policies which ought to express the same thing—in these and other directions the association can assist its individual members and conduce to the soundest practices.

Instances have come to our knowledge of ill-feeling between accident policy-holders and the companies in which they were insured, this ill-feeling arising out of a misunderstanding of the meaning of the terms of the policy, or perhaps, more often from some unauthorized statement or promise made by an agent. And a policy-holder has found, to his not unnatural annoyance, that when an accident happened to him, he was not insured to the extent he thought he was. An example or two may show this more clearly.

Mr. W. X., is a contractor, and his business takes him to many parts of the Dominion. His principal occupation is that of visiting localities where his prospective contrasts may lie, negotiating with railway men or with sub-contractors, calculating the cost of certain work. He does no manual labor, nor machine work, nor has he anything to do, as a rule, with machinery. He takes out an accident policy under the non-hazardous class, and pays let us say $5 per $1,000, being classed, may be, as "proprietor, not working." While this policy is in force, he visits the yard where his plant is kept. In this yard are horses, lorries, steam engines, cranes, drills, and what not. Seeing a loaded crane working badly, and the man in charge apparently rattled, Mr. W. X., rushes forward towards the machine which is whirling wildly, is struck by one of the waving handles, and his arm and several ribs are broken. By and by he sends in a claim for compensation at so much per week, he having been laid up for so many days or weeks. He is not at all prepared to be told that the company cannot pay him more than half his claim, for the reason that the accident occurred to him when he was engaged in a hazardous occupation which his policy did not cover.

Take again the case of a merchant, Mr. Y. Z., who takes out an accident policy, non-hazardous, at a low rate. This low rate is given him because his occupation lies in the counting house, or about the counters of his warehouse. Such a thing as his meddling with dynamos, steam engines, or any machinery in the premises is not contemplated in his contract. But suppose that one day, in the pressure of shipping goods, he undertakes personally to run the freight hoist and gets injured, being confined to his house for a fortnight, and limping about for several weeks with a broken leg. On what scale should his compensation from the accident company be calculated? On the pro-rating scale, according to the terms of his policy.

But he contends that an accident policy should compensate him fully for the result of this accident, inasmuch as the agent through whom he took it out gave him to understand that so much per week would be paid him. He has not himself read the conditions of the policy, but he understands that a neighbor merchant, not as badly injured as he, got so much a week for a greater number of weeks from another accident company. And he is vexed at being, as he considers, unfairly treated. Let him, however, be fair to the insuring company, remembering what is in the application he has signed. If an insurance agent has not told him the truth, so much worse for that agent. But Mr. Y. Z. may be himself to blame. In the application forms of at least two Canadian companies which we have seen the following phrase occurs:

> "I agree that . . . for any injury received in any occupation or exposure classed by this company as more hazardous than those above stated, I or my beneficiary shall be entitled to recover only such amount as said premium will procure for such increased hazard."

This sentence in the application corresponds with a clause in the policy, therefore, any one signing an application to this effect has no right to complain, as Mr. Y. Z., did, that he got less than he bargained for. This application clause, we are told, is used by companies generally.

Another feature that occurs to us in connection with accident insurance, is this: the common neglect of the clause in the policy respecting notice. This clause usually requires that written notice be given not later than thirty days after the accident, at the head office of the company, of any accident covered by the policy, with full particulars. Some policies are very strict on this point. It would be an advantage if the insuring public understood more generally than it does the importance of complying with this regulation. But as a matter of fact, it is treated very often with unjustifiable neglect.

A UNION STATION FOR TORONTO.

The plan for a new and up-to-date union station at Toronto is gradually taking more definite form. The expense of such a station is likely to be shared in equally by the Canadian Pacific, Grand Trunk, and Canadian Northern railroads. With regard to details of the scheme and to the question of elevated ways over the tracks and so forth, it is some satisfaction to know that the chief engineer of the railway commission is studying the whole matter, and will no doubt before long have ready a well digested proposition. The travelling public and the citizens of Toronto are pleased thus far with the spirit which the railway commission has shown in its hearing of the different interests. Petty claims, needless delays, or mere legal hair-splitting, were given but little weight by the tribunal. The broad facts that seemed first to appeal to the good sense of the commissioners were: Here is, since the fire of April, a desolated area in the front of the city which three important railways say is the very place for a railway union station. Such a station is a necessity alike for the railways and for the convenience of the travelling public. Having these facts established, it only remains for them to decide upon the exact location of the station and grounds, and the price to be paid by the railways for what they get.

It is agreeable to find the commission—or at least the chairman of the commission, for he was very outspoken on the subject—holding strong views of the necessity of overhead bridges at the points in this city where crowds of citizens are daily and hourly crossing the railway tracks on the level. A collision which occurred since the commission last sat, calls attention thrillingly to the disgraceful state of things existing at the foot of Yonge street. There, where people by thousands are crossing the tracks to go to or from the Island ferries, the Niagara boats, the Hamilton boats, the Montreal boats, shunting of trains from one track to another has gone on for years. Whether by day or by night, it is a common sight to see scores or hundreds of people and a string of hacks or waggons held back for minutes while a freight train of thirty or forty cars crawls leisurely past on the esplanade between them and the wharves. One day last week, a cab containing several persons, strangers to the city, while being driven between the wharves and Yonge street was crushed between two sections of a moving train, the vehicle injured, and its occupants narrowly escaping a fatal accident. The marvel has long been that there were not many persons killed at that point everv year. We have been a heedless and good natured community to put up for so long a time with this inconvenience and danger. But Toronto has become too large a place to trifle longer with the lives and limbs of her residents, who ought to be permitted to go upon their water excursions with convenience and safety, instead of through annoying delays and real peril.

OUR MANCHESTER LETTER.

The resolution forwarded to Ottawa by the Halifax (Eng.) Chamber of Commerce will hardly have escaped Canadian notice.

It prompts Canada to raise the general tariff to forty-five per cent. on woolens and worsteds, and to continue the preference to England of one-third off. The origin of the resolution is a matter of which the present writer knows something. Mr. A. F. Firth, carpet manufacturer in Yorkshire and in the States, was its bold initiator. He is one of the most pushful of the new school of fiscal reformers. A Liberal of the Liberals in all else, he is Chamberlainite to the core. His motion was brought forward at the tail-end of a sitting, and although it may excite some attention, and even create an impression, it must be added that its passage was due to a very few members of a Chamber of comparatively small consequence. So much ought to be made known in the interests of modesty and candour.

In a "delicatessen" shop the other day, one saw and tasted exceptionally fine Canadian cheese, selling at the low price of 5½d. per pound. The expert opinion of the manager was sought upon the subject. He pronounced the best Canadian to be better than the best United States cheese, and predicted an early rise in price from the wonderfully low rate prevailing at the present time. About the merits of September cheese, he was especially enthusiastic. His firm, he said, were selling the products of a selected dairy in the Dominion, under an arrangement made by a visiting principal.

What Canada can do in the way of advertising novelties, one does not know. It may be worth saying that several United States printers are doing satisfactorily with calendars, celluloid and kindred articles tastefully got up. Smart salesmen are pushing the trade in all parts of the country. To some people the words "Printed in U. S. A.," which are necessitated by our Merchandise Marks Act, form a deterrent. To Canadian goods there would be less objection, and if prices and the cuteness of the notions compare favorably, producers in your country might be encouraged to try tentatively, at least, to compete. My information is that the American agents for printed celluloid novelties are all bound to our common schedule of prices.

In the financial world, a disquieting tendency to brush away shareholders' preferential rights is noted. When the modern over-capitalised company finds itself in difficulties, one of the first steps it proposes is to encroach upon the rights of preference shares. The absurdity of mere fair-weather preferences scarcely needs expounding. When in addition, directors coolly suggest to further weaken the priority by the creation of new debentures, public opinion rebels. After all that has been said as to the impudence of some re-constructors, we shall perhaps see more discretion shown henceforward.

Yields from some Colonial securities are now so high that industrial preference shares are expected to ensure 5½ per cent. at the least. Unless a good record of profits can be shown, this limit is not enough to attract full subscriptions. Temporarily—and for how long the condition may continue nobody dares to say—businesses that rely upon the sale of luxuries for their dividends are likely to find a contracting market. Hotel companies, for example, are badly smitten by the inability of the public to buy wines.

Bank statements are appearing daily, and from them it appears that the twelve months prior to July 1st has been slightly less favorable to remunerative banking than periods previous The London City and Midland—that Aaron's rod among banks—maintains its 18 per cent. divident truly; and Parrs' Bank its 19 per cent.; but the National Provincial has thought best to declare 8 rather than 9 per cent. One institution, the International of London, finds itself in a bad way. Its managers have involved the concern too deeply with speculative trading enterprises. It was an "accepting" bank, and thus not comparable with our greater and more stable ones. Probably the International will pass from the stage. Absorption into some foreign institution trading in England is predicted for it.

Small deposits in the Post Office Savings Bank show a disposition to decline. Sums between one shilling and £50 are taken in any one year. Not more than £200 in all can stand in any one name, and the statutory interest is 2½ per cent.

Investors are doing better with their money. Board of Trade Blue-book show that the insurance companies in endowment policies are doing a rapidly increasing business. In five years the sums under this head have multiplied five times; or from 34 to 183 millions sterling. As the small investor gets nearer 4 than 2½ per cent. perhaps the decline in Post Office deposits is not wonderful.

From cabled intelligence it appears that the Dominion Government is not too likely to confirm the preferential operation of the tariff to goods shipped over Canadian ports. This is agreeable reading to exporters on this side who point out that their interest in the matter is identical with that of your importers and with a large proportion of your public. Shipment is made pretty usually as buyers direct, and if a United States port be employed, that is because of advantages that Canada cannot as yet give. It is thought that the ordinance that has been suggested would be a needless piece of self-denial under all circumstances. One shipper protests that the indefinite future will be soon enough for the innovation. Let Canada wait, says he, until her own facilities are improved to such a pitch that the change won't hurt her. NORTH COUNTRY.

MONTREAL'S STREETS.

Although the occasional visitor to Montreal is apt to remark as he drives about, that her streets are vastly improved of late years, still her own residents are by no means disposed to be satisfied with pavements as they are, still less with the administration of the road department on the scale on which it is supplied with funds. An old resident, writing last week to a Toronto friend about a certain locality in the East End and its marvellous growth, took occasion to criticise the front of the city. "I look," he says, "at the city front as I come down on the Laprairie ferry, and I say to myself, there is a good front—there is a handsome substantial solid city. But if I land and walk along to the custom house, or up to the canal basin, I pick my steps and curse the carelessness that lets so much dirt accumulate." Speaking of the widening of streets, he seems to grudge the expenditure for that purpose and to think it wasteful. We do not know about the wasting of money, that is always possible in municipal affairs; but it must be borne in mind that all old cities, laid out originally on a small scale and with narrow streets, must undergo the wideing process, and money may well be expended for this purpose.

A slip of paper which this friend encloses, taken from a Montreal newspaper, shows that a considerable sum is being devoted this year to improving streets and sidewalks in that city. For example, there is put down in the city estimates $236,000 for the following purposes:

Repairs to macadam	$44,000
Repairs to pavements	130,000
Repairs to permanent sidewalks	10,000
Repairs to wooden sidewalks	12,000
New sidewalks	40,000

Out of this total of $236,000 only seventeen per cent, goes for new sidewalks, the other eighty three per cent. goes for repairs. And we should think a good deal of the $196,000 alloted for repairs is practically wasted. The clipping goes on to say: "Last year over five miles of new sidewalks were laid in various parts of the city. It is one of the best pieces of public work done in Montreal for ten years. This year the same work is going on, but owing to the big drain on the civic funds to pay for widened streets, it is not quite so extensive. It should be remarked that to the $40,000 voted by the city for sidewalks, must be added the proprietors' half, or $40,000 more. . . . This year only two small parts of streets are to be paved, one is the west side of Victoria square, from Craig to the foot of Beaver Hall Hill; the other, is on Montmorenci street." Evidently the city council is feeling poor. Periods of free borrowing and lavish spending are always succeeded by times of repentant economy.

A MEMORABLE CONVENTION.

The Michigan Bankers Visit Toronto.

On Wednesday afternoon last the members of the Michigan Bankers' Association, to the number of 130, accompanied by their wives and daughters in sufficient number to make the party 200, reached Toronto from Buffalo, crossing Lake Ontario by boat. They were soon housed at the King Edward Hotel, and were not long in making themselves comfortable. It might afford a lesson to future Canadian conventions, whether of bankers or of any other class of business men, if they would take note of the way in which this group of two hundred American citizens managed to combine business discussions with holiday enjoyments, and still seemed to have ample time and relish for both.

The Michigan bankers did not hire a hall, they hired a steamboat—a splendid steamboat, the "Eastern States," twin sister of the equally beautiful "Western States," both of them plying daily between Detroit and Buffalo. Leaving Detroit on Tuesday at four, the members of the Association dined, and then held a session on Tuesday night, when Mr. O'Brien, president of the People's Savings Bank, of Detroit, welcomed the gathering on behalf of the bankers of that city. Hon. Chas. E. Townsend, of the State Savings Bank, Jackson, Mich., responded on behalf of the Michigan bankers. Then came the annual address of the president, Mr. William Livingstone, of Detroit, followed by a discussion and the appointment of committees. After breakfast on the boat at Buffalo on Wednesday, a special train took the party to Niagara Falls, where "go-as-you-please" was the order; in fact the whole day, and much of the day which followed it, was, as the event proved, given up to individual choice of occupation or amusement.

This was not for want of any definite programme for the excursionists, for, Toronto having been reached, the Bankers' Section of the Board of Trade had arranged to take them round town, and afterwards to drive them in tally-hos to the Lambton Golf Club. But it rained until two o'clock; and lowering skies and damp grass proved no sufficient inducement for ladies to drive miles into the country, however enticing the club houses when they should be reached, so tram-cars were substituted. A number of the Executive of the Association were taken by members of the Canadian Bankers' Association to lunch at the Toronto Club, where, snugly ensconced,

> The storm without micht rair and rustle,
> Tam didna mind the storm a whussle.

Would that we might be privileged to describe the banquet of the Association at the King Edward Hotel. But that event can be viewed at the present writing (4 p.m., Thursday) only with the eye of fancy. One can, however, imagine, from the calibre of some of the speakers named beforehand, that the reputation of Americans as the readiest after-dinner speakers in the world, would be well maintained by those of this gathering. Mr. Livingstone is to be the chairman and toast-master. Now, some one of the Toronto papers described a group of the visitors as Sybarites. No such term fits the chairman. Firm, fit, and weatherbeaten, framed on "Scotia's rugged strand," matured and finished on the shores of the Great Lakes, he has nothing, surely, in common with the residents of Sybaris—such workers as he have little time for luxury; and as a banker he cannot reasonably look for soft things in life. Of the other speakers at this banquet one has heard from time to time. They are: Hon. Julius C. Burrows, of Michigan; Hon. C. H. Keep, assistant secretary of the Treasury, Washington; H. P. Hilliard, St. Louis; Col. James R. Branch and Andrew Smith, of Indiana. Mr. Keep's name is well known to financiers, and Mr. Branch is the well-known secretary of that extensive organization, the American Bankers' Association; while Mr. Smith performs a like office for the Indiana bankers. Nor should the services of the singers, on such occasions as this, go unacknowledged. That the Michigan bankers brought with them a well-known musical organization, the Orpheus Club, of Detroit, is testimony that they are susceptible to "Music's golden tongue." It further bespeaks their knowledge of what constitutes dainty and charming entertainment for their hours of ease.

Officers elected for 1903 were: Wm. Livingstone, president, president Dime Savings Bank, Detroit; Orrin Bump, first vice-president, president Old Second National Bank, Bay City; Scott Field, second vice-president, vice-president and cashier Merchants' Savings Bank, Battle Creek; Fred E. Farnsworth, secretary, director Union National Bank, Detroit; H. V. C. Hart, treasurer, vice-president and cashier Lenawee County Savings Bank, Adrian.

Executive Council (all ex-presidents): Wm. Livingstone, chairman ex-officio; Perry Hannah, Traverse City: M. W. O'Brien, Detroit; H. C. Potter, Saginaw; Peter White, the "Grand Old Man" of Marquette; George H. Russel, Detroit; L. H. Withey, Grand Rapids; Clay H. Hollister, Grand Rapids; John T. Shaw, Detroit; George B. Morley, Saginaw.

The itinerary of the Association gives them Thursday night in Toronto, leaving at 9 a.m. for Buffalo, which city their steamer will leave at 5.30 p.m., reaching Detroit on Saturday morning. A concluding business session will be held on the boat on Friday evening, and officers for the coming year will be elected and installed. May their recollections of Toronto be agreeable ones!

The questions for discussion by the present convention are stated as under:

What is the best method for the care of special deposits?

What is the best plan for handling joint accounts?

Burglary insurance. Is it desirable?

Should the use by customers of their own cheques in payment of bills away from home be discouraged?

What plan can be adopted to secure for the bank the exchange it should have on drafts sold, and how best regulate the charge for same between competing banks?

How can we best educate the public to refuse to endorse drafts or cheques for people they "think" they know; and would not frequent cautions to such operate to reduce the number of bogus drafts passed?

Are fidelity bonds desirable security for bank employees?

Has the sending of currency by insured registered mail proven satisfactory?

Are chattel mortgages desirable as security for bank loans, and is it desirable for commercial banks to loan on real estate?

Would it be good policy to abolish par points for collections and to abolish paying interest on daily balances?

Should not bankers encourage the use of bank money orders rather than post-office or express orders?

Is the Group System a success as a general thing?

Responsibility in escrow matters.

QUESTIONABLE LIFE INSURANCE TACTICS.

Several "representative citizens" of Toronto, Hamilton and Winnipeg and other cities have lately had placed before them by the State Life Insurance Company of Indianapolis, U.S.A., a somewhat novel scheme of insurance, the features of which are worthy of some consideration. "Representative citizens" are invited to become members of what is termed an "Advisory Board," or a member of the "Department of Information and Inspection" of the company. The membership in the board is presumed to be limited to 100, 200, 300, or whatever number may be determined. The condition of membership is that a $5,000 or $10,000 policy of insurance must be applied for, and the first premium thereunder paid; the member is entitled to, say, one share in the scheme for every $10,000 of insurance. When the entire number of shares have been applied for, or, in other words, when a sufficient number of persons can be induced to apply for the amount of insurance referred to, the board is then complete, the vacancies arising through deaths and lapses not being filled.

The board members receive remuneration at the rate of $1 per each $1,000 of insurance in force in the district in which the board is constituted, the total amount thus credited to be divided amongst the board members in proportion to the amount of insurance carried by each one.

The scheme on its face would appear to the unsuspecting "representative citizen" an attractive one, but when that citizen investigates it on its merits he begins to realize that he has been talked into an unsavory scheme by a smart Yankee canvasser. Glittering estimates are put forth of the profits to be realized by "representative citizen" as a member of the so-called board (the members of which, however, never meet). In one instance which has come under our notice an annual premium of $327.80, under a twenty-payment life policy, age at issue forty, amount of policy, $10,000, is estimated to be wiped out at the end of ten years, and the assured is led to believe that the policy will be maintained in force without the payment of further premiums, and in addition that he will receive an annual income in cash for the last ten years. We have no hesitation in saying that "representative citizens" who have taken out policies on the foregoing understanding have, to use common terms, simply been "loaded up" and badly "taken in."

In the first place, the "Advisory Board" plan is a scheme resorted to by second rate institutions, such as the Federal Life, Chicago, Des Moines Life Insurance Co., Minnesota Mutual Life, Western Life, Mutual Reserve, etc. No first rate Canadian or United States life company has to resort to such questionable tactics to attract business to it. There are, however, a number of assessment and second rate companies which apparently have to resort to this method to swell their new business.

Then, again, it will be observed that the profits under the scheme depend entirely upon a large amount of insurance being written. Can such be accomplished? It is simply inconceivable to imagine that policy-holders can be secured to join a company operating such a plan when they realize that out of every premium they pay, some favored "representative citizens" will receive a "rake off." Moreover, the system is little less than a palpable fraud upon the ordinary policy-holder, inasmuch as out of every premium he pays, an important percentage goes to the credit of the "representative citizen's" policy. When this condition is known, as it will be made known throughout Canada by the agents of competing offices, it is not likely that the State Life will be able to attract many new policy-holders, and consequently it is not likely that the glittering estimates laid before "representative citizens" will be realized.

The scheme has been tested and tried in the United States. It has been condemned by nearly every State Insurance Department, and is prohibited in many of the States, because it is claimed to be illegal and a fraud upon policy-holders generally. It is somewhat similar to the attempts made to give certain officers or promoters of companies a special bonus of percentage of stock.

The system has been condemned by Hon. F. Hardison, Dept. Ins. Com. of Massachusetts; Hon. J. B. Barry, Ins. Com. of Michigan; Hon. E. H. Dearth, Ins. Com. of Minnesota, and many others. Hon. Wm. Vorys, Superintendent of Insurance for Ohio, states: "On July 19, 1900, this department, with the approval of the Attorney-General, ruled that the so-called 'Special Renewal Contracts,' or so-called 'Executive Agents' Contracts' [the same as Advisory Board Contracts.—Ed.], then under consideration by the department, were violations of the law. I have read over the grounds of that decision, and can summarize them as follows:

"First—In case of default by either party to the contract, there could be no damages or any enforcement of the contract.

"Second—The contract is against the public policy, and therefore void.

"Third—The contract is framed in a manner calculated to mislead.

"Fourth—The contract is impossible of execution, according to its terms.

"Fifth—The contract provides for discrimination and rebating."

ANSWERS TO ENQUIRERS.

Cautious, Guelph.—It would be the part of wisdom to accept the lower rate and leave your money where it is. Remember that any concern which pays more than its neighbors for deposits is presumably taking greater risks in its investments to enable it to do so. Surely you have not forgotten the Central Bank. A man who had $30,000 on deposit in the Bank of Montreal, at four per cent. was greedy enough to remove to the Central Bank, which offered him five per cent. When the Central burst, and was liquidated, he had lost three years' interest, $4,500 and lost $750 of its principal besides, for the bank's assets paid only 98½ cents in the dollar.

C. B., Rat Portage.—The bounty on lead has helped the Hall Mines Limited, shares, which went down in price in London from 3s. 6d. in 1903, to 1s. in May last, were quoted in London on 24th June, this year, at 1s. 6d.

C. W. P., Regina.—Have replied to you by letter.

—It is not only city people who can take outings in the parks on automobiles. Country folk can enjoy themselves in these machines. And tourists, hunters, fishermen, are encouraged by recent experience to use them. We have just heard of a trip made by Mr. Westren, of Toronto, and three other men. They took a four hundred mile fishing trip to Jones Falls on the Rideau River and back. He used a Stevens-Duryea automobile, carrying three other gentlemen besides himself, and the entire trip was made without an accident or break of any kind. We have heard much in criticism of the average country road in South Western Ontario, but what this party say of the roads through the Lake Ontario counties eastward to Gananoque is flattering. Mr. Westren goes so far as to say that with the exception of the Kingston road, near Toronto, those they traversed resemble park drives. And the rapidity with which auto trips can be made is not a small part of their attraction.

TORONTO, JULY 29, 1904.

LIFE AND ACCIDENT ASSURANCE.

The arrangements which have been under way for some time past for the amalgamation of the Victoria Board of Fire Underwriters with the Mainland Board whose headquarters are at Vancouver, are now, we understand, completed.

In writing about speed versus safety, the Insurance Spectator, of London says: "Celerity is in itself an indirect peril. It is probably the actual cause of the vast majority of accidents of all kinds, and unfortunately there seems no remedy for the evil except, indeed, in taking all round insurance. It is certain that in a world constituted as the present one now is, insurance is simply a vital necessity for every man, woman and child in every civilized community."

Wills are easily disputed; says the Union Mutual: life insurance payable to a special person places the settlement beyond argument.

It was contended in a recent issue of the New York Sun, that while total abstinence pledges, prohibition laws, the exhibition of "horrible examples," and the preaching of intemperance as a sin may have had a certain amount of influence in deterring men from drinking, still the social sentiment against intemperance as an imprudence which has grown up during the last generation, has accomplished far more. That is to say, drunkenness has become disreputable or is looked on as a deplorable disease. People are more sensible. We think, however, that in addition to this the action of life insurance companies in frowning upon "free drinkers" and the action of the medical examiners in showing the folly of daily or hourly cocktails and the danger of too great indulgence in beer or spirits, has had a great effect in altering people's preconceived opinions upon the necessity of drinking grog several times every day, to say nothing of the wisdom of taking several cocktails in succession to demonstrate good fellowship.

For some time past, the city of Winnipeg has been in the habit of continuing the wages of men incapacitated for work until they recovered, and this is found to have involved an average expenditure of about $700. But the more extensive public works necessitated by the growth of the city has resulted in proportionately greater exposures to danger. The use in particular of a large trestle shovel for sewer excavation has increased the number of accidents. Another fruitful source of accidents is the extended use of machinery at the quarry, asphalt plant, waterworks, and on the streets. The Board of Works has been looking around for some plan for making provision for dealing with accidents, and now it contemplates making an experimental contract with an insurance company to insure all its employees against accident. By the proposed contract the company would pay to the city in the case of death of a workman from accident a sum equal to, but not exceeding, one year's wages, such sum, however, in no case to exceed $2,500.

◆

A branch of La Banque Nationale was opened on July 4th at Saint Evariste, on the Quebec Central Railway, in the county of Beauce.

We are advised this week by the Bank of British North America of the opening, on the 19th instant, of a branch of that bank at Trail, British Columbia, under the management of Mr. H. H. Rowley, manager of the Rossland branch.

DRY GOODS.

The cotton manufacturers at Fall River, Mass., have decided to reduce wages by 12½ per cent. owing to the unprofitable nature of their present output, and a strike is imminent. About 25,000 hands are involved.

A note from Belfast says: The linen market is rather featureless at present. Demand keeps quiet, but prices, on the whole, are maintained, and there is a fairly confident tone throughout. Though fresh business is still very moderate, spinners maintain prices fairly steady. There is a somewhat better enquiry for yarns. Tows are the turn easier, but prices of line yarns are firm. There is still a number of old contracts to work off. Shipping trade is keeping up very well. Current demand from the United States is moderate, but there is the hope of better things shortly.

A bulletin issued recently at Lyons, referring to the raw silk market, said that the movement of business had been checked by the higher prices demanded by holders. As regards European production, activity has been manifested chiefly in the form of contracts for delivery at stated intervals during several months, notably on the part of America. Certain Italian filatures apparently have their production engaged from the present time until the fall. American manufacturers, regarding price conditions as reasonable, have taken advantage of the opportunity to liberally provide for their wants. Swiss and German manufacturers, less optimistic and less tranquil as to the future, have operated with much more moderation, a circumstance on which producers of raw material cannot but congratulate themselves, seeing that this action will help to maintain business at a higher level during the summer months.

FOR GROCERS AND PROVISION DEALERS.

The Canadian United Milling Company, Limited, Montreal, capital stock $150,000, has received a charter from the Dominion Government. It will acquire and operate cement and sawmills, and will produce and sell electric power.

The canners of the Pacific Coast have been in close conference lately, discussing matters of great importance to their business. Among these was the question of establishing a close season in British Columbia waters and on Puget Sound during which no salmon shall be caught, the object being to permit the salmon to ascend the Fraser River to the spawning grounds in greater numbers than in past seasons. Another matter before the meeting was the possibility of the establishment of large hatcheries on the Fraser River. The Puget Sound canners state that they are willing to aid in defraying the cost of the operation of hatcheries on that stream in addition to those already installed by the Dominion and Provincial Governments. Still another question to come before the conference will be that of arranging some mutually satisfactory agreement whereby neither association will invade the other's particular territory for the purpose of purchasing sockeyes, which in past seasons has caused considerable trouble.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, July 28th, 1904, compared with those of the previous week:

	July 28th.	July 21st.
Montreal	$20,236,588	$21,431,378
Toronto	15,340,305	16,044,618
Winnipeg	5,585,811	5,704,549
Halifax	1,771,816	1,823.372
Hamilton	913,425	1,115,559
St. John	978,905	1,005,288
Vancouver	1,350,301	1,710,568
Victoria	481,810	753,162
Quebec	1,464,230	1,583,602
Ottawa	1,840,931	2,180,249
London	795,431	860,137
	$50,759,546	$54.212,482

TORONTO'S NEW HOTEL
KING EDWARD,
EUROPEAN & AMERICAN PLANS,
ABSOLUTELY FIREPROOF

OUR HALIFAX LETTER.

As you stated last week, the Halifax Board of Trade has appointed its new secretary, on whose shoulders will rest the responsibility of carrying on its recently inaugurated "Forward Movement." Mr. Weldon is a young man of good judgment and ability, and his knowledge of transportation matters will be valuable in his new office. The Board has for some months been taking much interest in the development of trade between Canada and South America, and at the last meeting of the council a resolution was passed asking the Government to consider the advisability of changing the contract with the company operating the direct South African service so as to have the steamers on that route call at a South American port, both going and returning.

This Province has always done a large business in exporting fishstuffs to Cuba, but since that island came under the tutelage of the United States a number of regulations have been enacted to harrass our people and turn the trade into American channels. The latest of these is a tax of ten dollars on every ship entering Cuba, and an additional tax of a cent per ton of the ship's tonnage. The following is the text of a resolution passed by the Annapolis Board of Trade regarding this matter:

"Whereas a new regulation is proposed to be adopted by the Government of Cuba imposing a tax of $10 on every ship clearing for Cuba, and an additional tax of one cent per

ton of the ship's tonnage, regardless of the quantity or value of the shipment;

"And whereas the said tax is to be imposed whether the ship clears for a Cuban port direct or for a port in some other country for the transhipment of the goods;

"And whereas transportation companies have given notice that their present freight rates will not cover the said tax, which will be charged against the goods;

"And whereas a large trade has hitherto been carried on between the town of Annapolis Royal and Cuban ports, which will be seriously crippled by the imposition of the said tax, especially small shipments;

"Therefore resolved,—That this Board of Trade considers it a retrograde movement, which must retard rather than develop trade; and we respectfully enter our earnest protest against the imposition of such a tax. We particularly protest against the tax, as the ship carrying goods would be subject to a similar tax at the port of transshipment.

"And further resolved,—That a copy of these resolutions be sent to the Consul-General to Cuba at Halifax, N.S."

In the death of Captain John Taylor Wood, which occurred at Halifax last week, a somewhat distinguished man passed away. At the time of his death, and for years previous, he was secretary of the Halifax Pilotage Board, and formerly did a good business as steamship agent here; but it is not to this the above sentence refers. Captain Wood was a grandson of General Zachary Taylor, at one time President of the United States, and was a nephew of Jefferson Davis, of the Southern Confederacy. At the time of the Civil War he plunged into the strife, taking the side of the South. He was the hero of the fight between the ironclads "Merrimac" and "Monitor" at Hampton Roads, and as commander of the "Tallahassee" he became the terror of Northern commerce, in three weeks capturing thirty-three vessels. His escape from Halifax harbor with his ship on a dark night, by an unusued passage from the harbor to the sea, while American men-of-war were on the watch outside is a never-to-be-forgotten feat. The first Canadian to fall fighting for British honor and prestige in South Africa was his youngest son. Another son, Zachary Wood, is a major in the North-West Mounted Police, and was in Halifax at the funeral of his father. The deceased was seventy-three years of age.

Nova Scotia refused to join with the Provinces of New Brunswick and Prince Edward Island in the appeal to the Privy Council over the reduction in the representation in the Dominion Parliament following the last census. That this appeal has failed is, therefore, not a matter of much concern. In fact, such an ending was anticipated. A suit in which greater local interest was taken was that of Perry vs. Hayes. This was a suit on which hinges the management of the Canada Atlantic and Plant Steamship Co., operating the popular steamship service between Halifax and Boston. The case rested largely on the legality of a new issue of 4,500 shares of stock, which was so alloted as to transfer the controlling interest from Perry to Hayes et al. Mr. Justice Graham recently decided in favor of the plaintiff, and granted a restraining order. This has been upheld on appeal to the Supreme Court. A number of Halifax capitalists were financially concerned in the decision.

The Nova Scotia Press Association was in session at Halifax last week. The city council gave the journalists a drive through the park and a steamboat excursion on the harbor, while Attorney-General Longley gave them a luncheon on the lawn of the Nova Scotia Hospital for the Insane. The business sessions were generally interesting.

The Nova Scotia Government crop reports indicate a short hay crop, owing to drought. Hay on the uplands is placed at 75 per cent. of the average, and at 83 per cent. on the dyke-land and intervals. Abundant showers which have fallen since the publication of the report will increase the yield on the dykes, and also improve the prospects for roots and vegetables. The indications are that the fruit crop in Nova Scotia will be very good, indeed. Bush fires were raging in different parts of the Province, but were checked by yesterday's heavy rainstorm.

Halifax, N.S., 25th July.

CAUSES OF FIRE.

Knowledge of the causes of fire would often be a boon to honest people. Many a man has come under suspicion of incendiarism, because neither he nor the man who discovered the fire was able to account for it in any other way than by the supposition that such and such a place had been set fire to. Everybody knows that there are incendiaries, and there is no one who would not have such scoundrels punished. But not everyone knows that fires sometimes break out because certain materials have been thrown together, or certain substances exposed to the air which result in combustion. Here are a dozen instances, supplied by Mr. Jas. T. Burke, one of the Ontario Factory Inspectors, showing how easy it is to start a fire by accident, which is afterwards properly attributed to spontaneous combustion:

A wad of cotton used for subbing a painting, etc., has been known to take fire when thrown through the air. The waste from vulcanized rubber, when thrown in a damp condition in a pile, takes fire spontaneously. Coal stored in a pile either in the yard or alongside boiler casing of brick, has been known to take fire without a spark being applied. Cotton seed oil will take fire when mixed with twenty-five per cent. of petroleum oil; but 10 per cent. of mineral oil mixed with animal or vegetable oil will go far towards preventing combustion. Olive oil is combustible, and mixed with rags, hay, or sawdust will produce spontaneous combustion. Coal dust, flour dust, starch (especially rye flour) are all explosives when with certain proportions of air. New starch is highly explosive in its pulverized state; also, sawdust in a very fine state, when confined in a close chute and water directed on it. Sawdust should never be used in oil shops, or warehouses to collect drippings or leakages from casks. Dry vegetable or animal oil inevitably takes fire when saturating cotton waste at 180 degrees Fahrenheit. Spontaneous combustion occurs most quickly when the cotton is soaked with its own weight of oil. The addition of forty per cent. of mineral oil (density .89), of great viscosity, and emitting no inflammable vapors, even in contact with an ignited body at any point below 338. degrees Fahrenheit is sufficient to prevent spontaneous combustion, and the addition of twenty per cent. of the same mineral oil doubles the times necessary to produce spontaneous combustion. Greasy rags from butter, and greasy ham bags. Timber dried by steam pipes, or hot water on hot air heating apparatus, owing to fine iron dust being thrown off in close wood casings, or boxings around the pipes, from the mere expansion and contraction of the pipes. Patent dryers from leakage into sawdust, etc., oily waste of any varnish, or turpentine, are liable to spontaneous combustion.

ACCIDENT UNDERWRITERS' CONVENTION.

The seventeenth annual convention of the International Association of Accident Underwriters held last week, July 19th to 22nd, at Portland, Maine, was largely attended. There are forty-nine companies in the United States and Canada members of the Association, and some forty-two of these were represented. There were usually from seventy to eighty delegates present at each day's discussions and there must have been one hundred and twenty-five delegates present in all. The chairman was Mr. Edson S. Lott, of New York, president of the United States Casualty Company. That gentleman made an interesting address, some sentences of which we may quote. After making the striking statement that close upon $13,000,000 was collected in the United States last year for premiums on accident assurance, he said that more than nine-tenths of it was received by members of the Association. The speaker advocated free discussion, close but friendly criticism, one of another, in matters pertaining to the business, and went on: "It must be admitted that uniform classification of risks; that uniform phraseology in those clauses common to all policies; that co-operation in the adjustment of claims; that co-operation in securing statistics concerning certain risks—not to men-

tion other things the Association might accomplish—would be good for the accident assurance world." It was further his opinion that there is crying need for reform all along the line, so far as health insurance is concerned, the entire business being very sick at present. The nature of its sickness, it came out on discussion, is that it is badly nourished, as the medical men would phrase it; that is to say, the rates of premiums obtained are insufficient.

Discussion was free on a variety of questions: indeed, the general tone of the debating throughout the convention was intelligent and high. The subdivisions of agency questions numbered three, namely, the compensation of agents, the twisting of risks, and the twisting agent—who if not as numerous as his serpentine brethren in other departments of underwriting, is yet sufficiently numerous to be troublesome and, (it is perhaps well we should know it) held generally in contempt by first-class companies.

The general topic of Accident Assurance was on this occasion subdivided into the following subsections. Thus:

(*a*) For what length of time should weekly indemnity be paid?

(*b*) Uniformity in the classification of risks.

(*c*) Securing statistics regarding physicians, surgeons, and dentists.

(*d*) Should blood-poisoning be covered without an additional premium?

(*e*) Should the age limit be reduced?

(*f*) The accumulative feature—is it good under-writing to increase the benefits of the policy yearly, without a proportionate increase in the premium?

(*g*) Upon what theory of underwriting is beneficiary's insurance based?

Health Insurance was discussed at the convention under the following queries:

(*a*) Is it advisable to insure policies covering a limited number of named diseases?

(*b*) Should higher rates be obtained for general health policies?

(*c*) Should the premium be based on the age of the insured? If so, should attained age govern in renewals?

(*d*) Does the occupation effect the hazard the same as in accident insurance?

(*e*) Is it advisable to allow indemnity for partial disability?

(*f*) For what length of time should weekly indemnity be paid?

Marked attention was paid to the members of the convention by the people of Portland. The mayor of the city was present at one of its sessions, and welcomed the gathering as one of distinct importance. Mr. Carr, the insurance commissioner of Maine, was in attendance, as was also his deputy, Mr. Fletcher. Canada was well represented. Mr. Arthur L. Eastmure, of the Ontario Accident Insurance Company, who was last year chosen a vice-president, was re-elected at the Portland gathering, and took a prominent part in the proceedings. His company had the distinction of having more representatives at last week's meeting, than any other company. Mr. Fitzgerald, the Canadian superintendent of insurance, and Mr. Blackadar of the insurance department at Ottawa, were unable to be present, but Mr. Dinnick, of the Canadian Casualty and Boiler Insurance Company, was appointed on the reception committee, and Mr. Young, of Toronto, one of the directors of that company, was at the convention. The name of Mr. J. E. Roberts, of the Dominion of Canada Guarantee and Accident Co. was placed upon the committee for choosing a place for the next convention. There were three places proposed for the convention of 1905, Detroit, Put-in-Bay, Lake Erie, and the Royal Muskoka hotel in Ontario. But as the Portland Daily Argus puts it, "Mr. Eastmure, of Toronto, finally carried conviction by his eloquence, and the Association voted to go to Muskoka."

The report of the information bureau contained interesting statistics for the year ended 30th June, last. The number of accident claims reported during these twelve months, was 96,956, as compared with 76,008, in the previous twelve months. Sickness claims reported during the year, numbered 31,029, as compared with 22,336, in 1902-3. Liability claims last year were 2,212, in number. Sixteen companies have adopted the clauses recommended by the uniform phraseology committee.

Mr. George C. Pratt, of the New Amsterdam Casualty Company, contributed an able paper on Uniformity in the Classification of Risks in Accident Assurance. It dealt with the difficulties the companies have to contend with, through carelessness in writing applications, and also by attempts to secure lower rates than applicants are fairly entitled to by omitting in describing the occupation of an applicant any references to certain duties which insurants are likely to and do quite frequently perform. He gave graphic instances of the divergence in descriptions of occupation, and cited cases of improper stretching of the conscience of agents, which have placed applicants in wrong classes. Said Mr. Pratt: "I believe that the uniform wording of the "Duties of Occupation' is quite as important as a uniform classification of risks. . . . When we state in our contract the duties of occupation of an assured, we should make that statement so plain that he who runs may read."

In a discussion upon this paper, Mr. Eastmure suggested, as a means of curing the difficulties which thus arise, more minuteness on the part of agents in describing an applicant's entire occupation and greater care in checking applications. "It is almost impossible to tell from the information the applicant furnishes just what the duties are; and risks are sometimes accepted in classes 'Select' and 'Preferred' which should be classed as 'Ordinary' or even 'Medium.' "

One of the subdivisions of Section 14, relating to Accident Insurance reads thus: "The Accumulative Feature—is it good underwriting to increase the benefits of the policy yearly, without a proportionate increase in the premium?" A discussion was had upon this point, in the course of which the Ontario vice-president declared, that "as mercantile practice of the better class is not in accord with the theory that it pays to give something for nothing, the query should, I think, be answered in the negative. . . . We believe in progressive methods. Our aim has been, however, not so much to try and find out how much we can give in return for a $5 premium, but—quoting Mr. Franklin J. Moore's familiar remark—our endeavor is to offer what the people want, charging an adequate premium for the benefits."

◆

OUR AUSTRALIAN LETTER.

The advent of colder weather has brightened up business a little, but in New South Wales and Queensland, it is still poor, in Victoria and South Australia fair, in Western Australia and New Zealand good. There have been some rains early this month, which have brightened the prospects for the next harvest, which even yet are not as favorable as is desirable. Dry weather has prevented the ploughing of new ground and the start of growth where sowing could be done. There is plenty of feed and water for stock. The drought still prevails over large areas, but the stock has been removed to better country.

Young Australians are still leaving their native country for Canada, South Africa and the Argentine, and the exodus and a lowering birth rate have begun to create some concern—not very deep, however. The Australian in the mass is a happy-go-lucky sort and always expects that things will turn up all right shortly. Still there is concern. The Canadian Commissioner, in a recent address to the Institute of Incorporated Accountants, called attention to some figures that are striking. According to the Statistician of the Government, who is accepted as a good authority, the production per head in New South Wales was £26-12-6 per head, but the expenditure was over £43 per head. The expenditure has been greater than the production for years, but the production is less than it was ten years ago, while the expenditure is greater. It is no marvel that with such national extravagance money lenders are turning the cold shoulder upon further borrowings. The Accountants could see more clearly than the average man the necessity of

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

restoring the balance between the two, and the speaker urged them as instructors to the public to observe the situation, pressing home the duty of increasing the production on the one hand, diminishing the profuse expenditure, particularly in the excess upon liquors, tobacco and amusements. Droughts, he said, were not to be accepted as a reasonable explanation of the present state of affairs. They were the normal condition of the country, as frosts were the normal occurrences in Canada, and Australia should either meet its contingency as Canada has met the winter frosts or abandon the country as a white man's home. If but the amount spent in Canada on liquor and tobacco were expended in New South Wales, and the remaining three millions used in irrigation, the drought problem in two-thirds of the State would be settled in five years. Between 1891 and 1901, notwithstanding the severe drought which so much reduced incomes, the number of persons engaged in the sale of intoxicants and narcotics, catering to amusements and employed in games of chance, had increased more rapidly than the general population, and much more rapidly than the number of persons employed on the land.

One of the extraordinary facts in connection with the depression here is that the Eastern Division of New South Wales contains sixty million acres of land with so good average rainfall that it could sustain comfortably a population of six millions, and yet with only a population of less than a million and a half in the whole State, young men are leaving the country to get land elsewhere, and thousands of able bodied men are out of work and sustained by charity.

The trouble with New South Wales and Australia generally is that they have been governed by the great cities. In New Zealand, as in Canada, the backbone of the electors live outside the cities and compel attention to the settlement on the land. The consequence is that the production in New Zealand has increased both per acre and per worker, and this has enabled that Colony to bear so lightly the experimental legislation in which it has engaged with some degree of liberality.

Not much change is to be expected here, until the great cities feel the pinch of the consequences more severely than they have done yet. Melbourne has had a sharp taste of it and Victoria is taking steps that New South Wales will by and by follow with as great a need, and it is to be hoped with even better results.

It must not be understood because Australia is not as prosperous as it might be nor public sentiment as alert as it should be, that it is ruined, or any need for despair of the future. The trade of the country is large, its large merchants are meeting their engagements well, there is some growth of industries, and increased settlement on the land though slow, and there are signs of an awakening of the public conscience and patriotic intelligence.

These letters have not recently referred to defects in Canadian business methods, but they abound all the same, and are of the same old kind. A large Canadian establishment spent some money in opening up a trade, and when orders began to come in, it neither acknowledged them nor filled them for months. Goods ordered by Australian firms from Canada, due in February are not here yet, and the season for which they were wanted is over.

Said an agent: "I arranged for the trade of some Canadian lines, and promised my customers catalogues twelve months ago. I have not received a catalogue from the Canadian firm though eighteen months ago I was assured they would be immediately forwarded." I can give you half a dozen complaints like that which I heard of last week. Luckily all Canadian exporters are not like this, or there would be no business done with your country.

◆

FIRE AND MARINE INSURANCE MATTERS.

A cable despatch from St. Petersburg, Russia, announces the destruction by fire on Wednesday last, of the largest electric cable wire factory in that city, with the loss of about $1,260,000. A great quantity of cables and wires for the torpedoes and mines intended for the Russian Baltic squadron was destroyed.

One of the district chiefs of the Toronto Fire Brigade, Mr. Smith, has come home after visiting New York, Philadelphia, and Atlantic City. While in Philadelphia, he inspected the new high pressure fire main system, and is satisfied that it could easily and satisfactorily be adapted to Toronto's requirements.

We learn that the New York Underwriters' agency, which was recently elected a member of the Canadian Fire Underwriters' Association, has extended its business to Canada. Mr. T. D. Richardson, of this city has been appointed superintendent to take charge of the business of the organization in the Dominion. Mr. Richardson has been for some years assistant manager of the Manchester Assurance Company at the Canadian head office of that company. He is well known and competent.

The North British and Mercantile Insurance Company has made public the appointment of Mr. J. M. Bascom, as an inspector of the company, to date from 1st August. Mr. Bascom has filled the position of secretary of the western branch of the Canadian Fire Underwriters Association with marked efficiency and to the entire satisfaction of head offices, and it is to be expected that he will prove himself most valuable to the company and its agents. His head quarters will be in the Toronto branch office of the North British, 26 Wellington street, East.

The final report of the General Loss Committee, which was organized shortly after the great Baltimore fire last February, was issued this week. It shows that 3,778 separate claims were handled by the committee, and that the amount of insurance paid on these claims was $29,074,358.51. There are still eleven claims unsettled, and in addition there were probably about 1,000 or 1,200 smaller claims which were settled direct by the companies. The amount involved in these small claims will not exceed $1,500,000, so that the total insurance paid to those who lost in the fire will be about $30,500,000.—U.S. Review.

Dividends declared this month by the several Hartford insurance companies were as follows: Aetna Life, 2½ per cent. quarterly, $43,750; Aetna Fire, 3½ per cent. quarterly, $140,000; Connecticut General Life, 4 per cent., semi-annual, $6,000; Connecticut Fire, 6 per cent., semi-annual, $60,000; Hartford Life, 4 per cent., semi-annual, $20,000; Hartford Fire, 10 per cent., semi-annual, $125,000; Hartford Steam Boiler, 6 per cent., semi-annual, $30,000; National Fire, 6 per cent., semi-annual, $60,000; Phœnix, 3 per cent., quarterly, $60,000; Travellers, 5 per cent., quarterly, $50,000; total, $694,750.

◆

—The Montreal Witness refers to the interest felt in local shipping circles regarding the establishment on a satisfactory basis of two steamship lines plying to that port. The management of Canadian Lines, Limited, are said to be trying to make arrangements with an English shipping concern whereby a regular line of modern vessels will be placed on the St. Lawrence route with Liverpool and Montreal as summer terminals, and touching also at some of the continental ports. The Elder-Dempster people, too, are desirous, it is said, of putting on a fast service between Canada and the West Indies.

◆

—There is apparently no limit in these days to municipal endeavor in the way of trading, says an exchange. In a recent magazine article by J. Keir Hardie, M.P., a number of instances were pointed out. It was stated that several large towns have municipal baths that are free to school children; Glasgow, London, Sheffield, and Manchester supply municipal music and indoor concerts in winter time. Lille has a municipal theatre where 400 free seats are allotted to citizens at each performance, and Doncaster town council has a municipal race course, furnishes bookmakers, who ply their vocation on the streets, and clears £27,000 a year for municipal purposes.

Mercantile Summary.

There isn't a business in which a sound knowledge of bookkeeping, arithmetic, commercial law, etc., will not be of the greatest value. These and other subjects are taught by experts at the Dominion Business College, Limited, 4 Richmond Street, Toronto.

After lying idle for eighteen years, the Middleditch moulding shop was started up Saturday with Robert Sample in charge. Mr. Sample learned his trade there years ago, and has been living in Cleveland until lately. Messrs. Woods & Son purchased the foundry some time ago, and have refitted it into a machine shop.—Amherstburg Echo.

Fortunat Motard, doing business in Montreal under the style of the Motard Piano Co., has consented to assign on demand. He is a sculptor by trade, and only a few months ago acquired the small business formerly carried on under the style of the Haydn Piano Co. by one Coallier, which had become pretty well run down.

A general storekeeper at Blackville, N.B., named Moses Schaffer, is heard of as offering his creditors 40 per cent. of their claims. He was originally a peddler, and subsequently carried on a store at Chatham, N.B., where he failed in 1898.—W. P. W. Fenety, doing a small business in stationery and fancy goods at Fredericton, N.B., is trying to compromise liabilities of $1,500 at 50 cents in the dollar.

The failure is noted of J. P. A. DesTroismaisons & Co., jobbing milliners in Montreal, for the second time in four years. In 1900 Mr. D. arranged to pay 27½ per cent. on liabilities of $24,000. His present indebtedness is not yet ascertained. He is the colonel of the district militia regiment, which position, it is thought, absorbed more of his time and money—or other people's money—than could well be spared.

The Durham Manufacturing Co., makers of the Oxford cream separator, a firm that has been established at Durham, Ont., only a year, are, under the able management of Mr. T. Livingston, organizing selling agencies of this machine in the Maritime Provinces. The factory gives employment to forty-five hands, who are kept pretty busy at present to keep up with the orders, which come in in a most gratifying manner.

A brief business record has been that of Charles Morrier, grocer, at Lennoxville, Que. He was formerly a clerk in the Hochelaga Bank branch at Sherbrooke, and only began as a shopkeeper in October last.—Camille Vincent, of Joliette, Que., dealing in furniture, carriages, etc., has abandoned his estate.—The liabilities are small.—T. A. Bedard, a boot and shoe retailer in St. Hyacinthe, Que., has assigned on the demand of his mother, who is a creditor for $1,000. He owes $5,000 in all.—P. Courville, also in the boot and shoe line at St. John's, Que., is offering his creditors 35 cents on the dollar.

Philias Durand, a Montreal saloon-keeper, has consented to assign, and is said to owe about $4,500.—A demand of assignment has been made upon Hector Gariepy, commission agent, Montreal. He was recently sold out for rent.

At a recent meeting of the Cowansville Board of Trade a tribute was paid to the memory of the late Hon. John McIntosh. It was unanimously resolved that the board, recognizing the great efforts made and work accomplished by the deceased gentleman in furthering the interests of the farming community in the Eastern Townships of Quebec, that a suitable monument be erected to his memory, and that subscriptions be taken for that purpose.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 30th June, 1904.

A. J. PATTISON, - MANAGER.

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

The Grand Falls Water Power Company, represented by Barton E. Kingman, of New York, and his associates, have paid into the provincial treasury of New Brunswick $10,000 on account of the deposit required as evidence of the company's bona fides in the proposed development of the great water power at the falls. Evidently, says the Gleaner, the company intends to begin at once the work of development, and the establishment of works by the Electric Manganese Company at Grand Falls is to follow.

Mercantile Summary

We hear from Nelson, B.C., that the Bayonne group of mines, west of Kootenay Lake, have been sold to H. Winchell and other capitalists of Butte, Mont., the price being reported at about $125,000. On one claim there is a tunnel 600 feet long which shows a fairly long stretch of ore high in gold value. Development work is to be pushed.

The Crow's Nest Pass Coal Company has entered into an agreement with the C.P.R. for the lease of the latter's branch line from Fernie to Coal Creek mines. This line is about five miles long, and was built for the purpose of tapping the coal mines. There will now, therefore, be no necessity for the former company to build a road of its own as contemplated.

The Dominion Exhibition number of the Winnipeg Commercial is a very handsome and creditable issue. The illustrations of the city are recent and the portraits of business men good. It contains a paper by Mr. W. K. McNaught, of Toronto, on the value of an exhibition, and articles or lectures on grain, flour, etc., statistics of Winnipeg's growth, besides much that is of general commercial interest. The illustrated cover is a striking piece of work.

It is learned that the Richelieu & Ontario Navigation Company's steamer "Canada," sunk in a collision some weeks ago, is more damaged than was supposed. The entire upper portion of the boat, which was separated from the hull, has been broken up by the wind and tide, and carried down the river. The only portion of the steamer that will now be of any use is, it appears, the hull; chains are at present being fastened in order to haul it into the company's works at Sorel.

Mr. F. W. Bradley, consulting engineer for the Le Roi Company, Rossland, B.C., recommends the immediate construction of a concentrator to handle 250 tons daily. Such a mill, he thinks, would treat ore at less than $1 per ton, and could be built at a cost of $100,000. The plans allow for the doubling of the capacity whenever it is deemed desirable to bring in additional water. The idea is to break 500 tons of ore daily in the mine, ship half and concentrate the balance. This entails doubling the present crew.

The Canadian Association of Plumbers, which met last week in Toronto, have elected officers as follows for the ensuing year: President, R. Ross, Toronto; vice-president, A. J. Hammond, Winnipeg; treasurer, F. G. Johnson, Ottawa; secretary, J. G. Gordon; presidents for Provinces—Ontario, H. Mahoney, Toronto; Quebec, W. J. R. Hughes; New Brunswick, Wm. Watson, Moncton; Manitoba, Jas. Mould, Winnipeg; British Columbia, J. Coughlin, Victoria. It has been decided to hold the next annual meeting in Winnipeg.

The art features of the coming Industrial Fair at Toronto will be unusual. We hear, for instance, that three original masterpieces in oil, aggregating in value $200,000, are to be a feature of the Art Building at the Canadian National Exhibition, Toronto, August 29th to September 10th. Through the kindness of Sir George A. Drummond, these paintings have been loaned to the management, who have reserved a separate room for their proper hanging. We are told also that the number of specimens of Canadian paintings in oil and water, of statuary, china painting, drawing and photography will far exceed that of any previous such display held in Canada.

Mercantile Summary.

The Canadian Kodak Company, Toronto, are about to erect an extension to their factory so as to double their present output.

Mr. Johnson, representing Chicago capitalists, is said to be looking for a site in Brantford on which to establish a large plough factory.

The people of Bordeaux, near Montreal, have decided by a large majority in favor of borrowing $25,000 for the installation of a waterworks and a sewerage system.

The Toronto Feather and Down Company's works have been damaged by fire to the extent of $3,500, and those of Mr. J. McCausland & Co.'s stained glass factory about $2,000. The losses were covered by insurance.

The Caraquet Railway, a line some eighty-five miles in length, running from Bathurst to Tracadie Mills in New Brunswick, has been purchased by Mr. Peter Ryan and other Toronto capitalists, who propose to put it in better shape.

Extensive forest fires have been raging in the vicinity of Fernie, and for a while the northern and western ends of the town were seriously threatened. The Elk Company's sawmill and one season's cut of lumber were damaged to the extent of $20,000.

The Clinton Fireproofing Company, of New York, and the Clinton Wire Cloth Company, of Boston, are about, according to a Montreal daily, to establish offices, yards and warerooms in Montreal to employ a large number of hands. This will be the Canadian headquarters.

Work is to be started at once on the construction of the C.P.R. branch line from Romford, near Sudbury, to Byng Inlet, on the Georgian Bay, south of French River. The route is rocky, so that the cost of the line is expected to reach $35,000 per mile, besides which several bridges will have to be erected, the one at French River to cost $300,000.

The Montreal Street Railway announces record receipts for several days recently. To such an extent, indeed, is their business growing that the company is seriously thinking of enlarging the plant on an extensive scale. Several new lines of track are to be constructed and many other improvements made in the service.

The Singer Sewing Machine Company have awarded a contract for erecting factories at St. John's, Que., the price being in the neighborhood of $1,500,000. Some two thousand hands are to be engaged in these when finished, it is said. The entire Canadian requirements in the matter of Singer machines are, it is understood, to be made at St. John's. Work on these factories is to be pushed forward with all dispatch, so that, if possible, operations may be begun before the end of the present year.

We learn that Messrs. H. McLaren & Co., of 706 Craig Street, Montreal, long in the metal commission trade, have been appointed agents for Canada of the well-known house of John Williams & Co., iron, steel, tin-plate and general metal merchants, 6 Billiter Street, London, England.

"I'll try to steal her heart," quoth he,
"And win her sweetest smiles."
"I'll try to steel my heart," said she,
"Against Love's subtle wiles."
So both in steel began to deal,
And, as you may opine,
Love soon declared a dividend
And started a combine.

Toronto. Montreal.

IN HER PUBLIC LANDS
many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.
Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.
For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

HE WAS THE PROMOTER.

How Jim Wardner, the mining man, managed to secure a fancy drink when he was working the famous Bunker Hill and Sullivan mine in the Coeur d'Alenes mountains under lease, nearly twenty years ago, is going the rounds of the newspapers. One day after paying his men off with cheques on a bank at which his account was overdrawn, but the bank was in a little town that could not be reached in midwinter, Jim entered a saloon and addressed the barkeeper in the cheery and breezy way of the West:

"George, I'll tell you what let's do. If you'll furnish the sherry, I'll furnish the fresh eggs, and we'll mix up a drink that is out of sight."

As fresh eggs were worth a dollar apiece in the Coeur d'Alenes that winter, the barkeeper accepted the offer.

Then Jim went out and to a store near by, and said to the storekeeper:

"William, if you'll furnish the eggs, I'll furnish the sherry, and we'll have something worth while in the way of fancy drink."

Sherry was almost as high-priced as eggs, and the storekeeper agreed to the deal. A few minutes later Jim and the storekeeper and the eggs were in the saloon, and the barkeeper was soon at work mixing the fancy drink. The drink was made, and Jim had swallowed his share. Then, all of a sudden an idea struck the barkeeper.

"Say, Jim," he demanded, "where do you come in on this deal, anyway? William furnished the eggs and I supplied the liquor. How do you get in."

"Oh," said Jim, "I'm the promoter."

The barkeeper had nothing more to say.

◆

THE FURNITURE EXHIBITION IN TORONTO.

In our issue of the 1st inst. we inadvertently made an error in referring to the exhibition of furniture in Exhibition Park, Toronto. The facts are as follows:

There are two organizations in the furniture trade, one, the Canadian Furniture Manufacturers' Association, composed only of manufacturers, and the other, the National Retail Dealers' Association of Canada. The Canada Furniture Manufacturers, Ltd., is a body corporate, and is as such a member of the Canadian Furniture Manufacturers' Association. This company has its own permanent exhibit at its head offices at 136, 138 King Street East, Toronto, and, therefore, does not find it necessary to exhibit with the other members of the association at the annual furniture exhibition at the Exhibition grounds, Toronto, this month, but at the same time the company operates with the others, and visitors and customers wishing to see all the samples and the whole show must visit both places. It was wrong, therefore, to state that the exposition at the Exhibition grounds was put up by the Canada Furniture Manufacturers, Ltd., as it was really shown by the independent manufacturers.

◆

HOW THEY ADVERTISE IN RUSSIA.

"In Moscow," said Nathan Haskell Dole, translator of Tolstoi, "I saw a little child crying miserably one afternoon. He walked slowly down one of the principal streets, and his howls soon brought a big crowd around him.

"What is the matter, my child? What troubles you?" every one asked.

"The boy paused finally. He looked at the multitude which had assembled. Then, lifting up his voice, he shouted in a shrill treble:

"'I am lost. Will somebody please take me home to Ivan Troubetsky, the champion clothier of the South End, who has just got in his new stock of spring overcoats, suits, neckties, shirts, hats and umbrellas, which he will sell cheaper than any one else in the city.'"

Debentures for Sale.

Sealed tenders addressed to "The Mayor and Council of the City of Regina" will be received up to and inclusive of Saturday, the 30th day of July, 1904, for the purchase of debentures of the city of Regina issued in pursuance of a by-law in that behalf authorizing the raising of $135,000, for the construction of a system of water works, sewerage, etc., for city purposes.

These debentures will bear interest at 4½ per cent. per annum, and are made repayable within fifty years as follows:—

During the first five years succeeding issue thereof, interest only at the said rate will be paid annually, after which period the whole debenture debt of $135,000 will fall due and be payable in forty-five equal annual instalments of $7,047.30, principal and accrued interest combined.

Debentures can be issued at the option of the purchaser in sums of $5,000, or over.

The highest or any tender not necessarily accepted.

Dated, Regina, N.W.T., 29th June, 1904.

J. Kelso Hunter,
Secretary-Treasurer.

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stopover at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFE-TIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World's Fair, and consult Grand Trunk Agents for further particulars.

MONTREAL MARKETS.

Montreal, 27th July, 1904.

Ashes—Receipts are still very light in all kinds, and there is practically no stock in the inspection stores, all arrivals being readily absorbed. Quotations are unchanged at $6.05 to $6.10 for first quality pots, from $5.50 to $5.60 for seconds, while pearls would probably realize about $7.50, if such goods were obtainable.

Dairy Products.—Shipments of cheese continue to show a falling off from the figures of last year. Last week they were 23,000 boxes less than for the corresponding period of last year, returns being 79,054 as against 102,148. The total shortage for the season thus far as compared with 1903 is some 264,000 boxes. As regards butter exports, last week was the busiest of the season, 25,806 packages having been taken out by steamers for Britain, making the total export to date 126,629 packages, figures considerable ahead of this date last year, but a little behind those of 1902. The cheese market has shown little recent variation, and the conditions in England do not seem to improve. Quebec makes are quoted at about 7⅜c.; Townships, 7½ to 7⅝c., and fine Westerns, 7¾ to 7⅞c. Butter prices are about steady at last week's figures, with no special activity in the demand. Finest Townships creameries are quoted at about 17¾c.; seconds, 17 to 17½c., and about 14½c. for dairies.

Groceries.—The anticipations of further advance in sugars, referred to in last report, have materialized, and standard granulated is now quoted at $4.50 in barrels at the factory, with yellows ranging from $3.90 for No. 1 to $4.30 for bright coffee; Paris lumps, $5.05 in barrels and $5.15 in boxes. Raws are said to be still advancing, and refiners report a good, strong demand. A cargo of Barbadoes molasses is now discharging at the wharves, said to be the last likely to arrive this season, and stocks here are very small as compared with former years. Some lines of new canned goods are coming forward, principally peas, strawberries and raspberries. The tea market is a very dull one, and Japans

MUNICIPAL DEBENTURES FOR SALE.

Offers will be received addressed to the undersigned and marked Tender, for the following issues of Town of Pembroke, 4 per cent. Debentures, until 15th August next, at 6 o'clock p.m.

$15,000.00 payable in 20 yearly instalments of $1,103.73, from 10th June, 1904.

$10,695.10 payable in 20 yearly instalments of $786.96, from 10th June, 1904.

$10,190.09 payable in 20 yearly instalments of $749.81, from 30th June, 1904.

Offers to cover each issue separately and accrued interest. Delivery at Bank of Ottawa, Pembroke.

show easy values; some fair supplies of new crop goods in this line are coming to hand, ranging in value from 18 to 30c. The making of Ceylon greens is being curtailed owing to the lower prices of Japans. New Ceylon blacks now arriving are showing good quality. There is nothing specially interesting in latest Mediterranean advices as regards fruit, etc.

Dry Goods.—The wholesale warehouses show at present comparatively little activity. A good many travellers are taking their holidays, and those who are out find it difficult to induce buyers to place any important orders. City retail trade is also said to be very quiet, even duller than usual at the season, but, all things considered, money is coming in very fairly, and there is an absence of any failures of consequence, which is cause for general congratulation.

Hides.—The local hide market is unchanged, though there have been reports of firmer prices in the West, and 9c. per lb. continues to be the figure paid for No. 1. Only a few odd lots of calfskins are now coming to hand, and for No. 1 the figure is still 13c. per lb. Lambskins, 45 to 50c. each.

Leather.—The movement is just a moderate one. There have been no recent changes in quotations, but the tendency is to firmness, and Western tanners claim that hides are costing them more.

Metals and Hardware.—In these lines trade is very quiet. In pig iron there have been no recent transactions of any note, and quotations show an easier tendency. A cargo of 2,000 tons of Middlesboro' iron is reported, for which $16.50 is quoted; Summerlee No. 1 sells at $19, and No. 2 selected at $18.50; domestic brands unchanged. Bars are steady at $1.70 to $1.75, and iron pipe at $4.25 for inch. In sheets and plates nothing new is reported. Ingot tin is again firmer at 30 to 30½c., and lead at $3.20; spelter, firmer at $5.60 to $5.75; copper, 13¼ to 13½c.

Oils, Paints and Glass.—The painters' convention is now in session here, and travellers are all home looking after their customers, but we do not hear of much business being done, and the delegates appear to be pretty much on pleasure bent. Turpentine is a shade firmer at 83c. for single barrels. For linseed 44 and 47c. is the normal quotation for raw and boiled, respectively, but there is general complaint of much cutting in prices. In other lines there is nothing new.

◆

TORONTO MARKETS.

Toronto, July 28, 1904.

Drugs, Chemicals, etc.—The general trade in local drug circles continues quite active for this period of the year. Quinine is firm, but not much business is passing. Opium is still very dull. Camphor is stronger. For cod liver oil no permanent firmer feeling can be recorded, as what little demand there was has fallen away again. Nitrate of silver has advanced a little. There is no new feature in either the British or the New York market.

Dry Goods.—A feature during the last few days has been the increasing strength in woolen goods. Repeat orders have in several cases only been filled at a substantial advance. This, of course, is due to the enhanced value of wool in all the world's markets. The indications point to a continuance of this upward tendency. There has been a very fair trade done during the last week or two in practically all parts of the country. Retailers report their stocks becoming much lighter, and are showing much more confidence as a result. Prospects for a good fall trade are very satisfactory, and some houses report even better orders for this period of the year in a few departments than came to hand a year ago. Payments are a little on the slow side, but it is believed this is merely temporary.

Flour and Grain.—The tone of the flour market is firm, ninety per cent. patents, in buyers' bags, middle or east freights, being quoted at $3.65 or $3.70, and choicest brands a little higher. Millfeed is without change, and so is oatmeal. Wheat is from 1 to 2c. higher, and firm at the advance. Peas are a cent or so lower. Barley, rye, corn and

"WE WILL BOND YOU."

Corporate bonds are more reliable and in every way more desirable.
Only where it is indicated that men possess integrity of character can they obtain a bond in a surety company.
Regard your name as a bondsman as an encumbrance on your property.
Personal sureties are subjected to questions as to the worth of the bond filed which they would rather not have made public.
Once a corporate surety bond has been used, no further use for personal surety can be found.
Rates of premium on surety bonds are always moderate.
A surety company is required by law to carry reserve against its risks and is possessed of large resources.
The UNITED STATES FIDELITY AND GUARANTEE COMPANY executes bonds covering all positions and trusts.
Existence of surety companies makes it unnecessary for the employe to ask friends to become surety for his integrity.

Surety companies protect the home and family.
Unlike personal surety, the bonds issued by surety companies can always be collected.
Resolve to never have your name used as a bondsman.
Embarrassing positions may be escaped by not becoming surety on a bond nor asking others to do so.
This Company does not surround the person bonded with annoying restrictions.
You cannot afford to incur obligations by asking friends to become surety for you.

Head Office for Canada, 6 Colborne Street, Toronto.
A. E. KIRKPATRICK, Manager.

buckwheat are all nominal. Little or no business is being done, farmers being busy harvesting.

Fruits and Vegetables.—An active trade has been the rule the past week. Of course, the main feature for the moment is raspberries, which are coming forward plentifully. Strawberries are practically out of the market, though a few are still straggling in. They sell at 8 to 10c. Potatoes, cukes and tomatoes are becoming easier. Tropical fruits are becoming rarer. Prices are about as follows: Cherries, per basket, sour, $1 to $1.15; sweet, $1 to $1.35; raspberries, 8 to 10c.; Lawton berries, 15c.; gooseberries, per basket, 50c. to $1; red currants, per large basket, 50 to 65c.; black currants, $1 to $1.15; huckleberries, per basket, $1 to $1.15; oranges, California Valencias, $4 to $4.50; lemons, Messinas, $3 to $3.50; Sorrentos, $3 to $3.50; Verdillis, $3.25 to $3.75; St. Nicholas, $4; bananas, firsts, per bunch, $1.75 to $2.25; 8's, per bunch, $1.25 to $1.50; pineapples, Flor., per case, $3.50 to $4; Havanas, $3 to $3.25; watermelons, each, 30 to 35c.; cantaloupes, small, per box, $2 to $2.25; bush., hmpr., $2 to $2.25; California plums, per box, $1.50 to $1.75; do. apricots, per box, $1.25 to $1.50; do. pears, $2.50 to $3; do. peaches, 75c to $1; Elberta do., six-box case, $3; Canadian peas, per basket, 35c.; do. tomatoes, 75c. to $1; do. cucumbers, per basket, 35 to 40c.; do. potatoes, per basket, 35 to 40c.; do. beans, per basket, 25 to 30c.; green peppers, per basket. 75c.; new potatoes, per bush., 90c. to $1.10; Egyptian onions, per sack, $2.50; per basket, 40c.; egg plant, per basket, $1.15 to $1.25; Baltimore green corn, per dozen, 30c.; Southern tomatoes, per case, $1 to $1.10; New Jersey, $2.25 to $2.50; cabbage, crates, $1.25; Kalamazoo celery, per dozen, 45 to 50c.; Canadian celery, per dozen, 60 to 75c.; pink, 50 to 65c.

Groceries.—In sympathy with the very firm feeling which has existed for some time past in the New York market the prices of all grades of refined sugars have been advanced by 5c. per cwt. The advance has been followed by considerable firmness and a good movement. General trade continues good to fair, and payments are satisfactory. The strength in canned goods continues, and further advances are not unlikely.

Hides, Skins and Leather. — The receipts of hides are still small, while the demand is good. Prices continue very firm. Calf and sheepskins are steady, with no particular change. Tallow is a little less easy. For leather the demand is somewhat slack.

Provisions.—Dairy butter is coming in liberally, and stocks are accumulating somewhat. Cheese is firm in sympathy with British market, but not much business is passing. Eggs are very firm still. Smoked meats are in especially good demand, and prices are firm. In hops not much is doing, and more definite information is awaited concerning the new crop.

Wool.—Not much change has taken place in wool. The position is strong owing to good demand, small supplies and firm statistical position in other markets.

CANADIAN MANUFACTURERS' ASSOCIATION.

Just in time for this issue comes the official announcement of the date and place chosen for the annual meeting of the Canadian Manufacturers' Association. It is to be held this year in the Windsor Hotel, Montreal, on the 20th, 21st, and 22nd September, Tuesday, Wednesday, and Thursday. The Toronto branch of the Association will hold its annual meeting in the Board of Trade building, Toronto, on Thursday, August 11th next. The Toronto branch has now 394 members.

RUINOUS COMPETITION.

The Trade Bulletin, of Montreal, refers in pessimistic strain to a method of procedure among competitors in certain lines of business which consists in punishing a rival by making him lose as much money as possible, and often at the cost of a good many dollars to the one who observes and carries out this unwritten code. "As an instance we may mention the fact that a young firm which started business in this city, sometime since, took orders for the future delivery of goods which it had purchased at a pretty reasonable figure. But no sooner had an older house in the same business discovered that its young rival had taken a large quantity of orders ahead of it than it sent out circulars to those who had placed their orders offering to supply the goods at less money. The result was that a number of the customers of the younger firm cancelled their orders (which was most unfair), and accepted the much lower offers of the older concern. Consequently, the former firm had a large quantity of orders thrown on its hands, upon which it lost money, while its rival lost more; but the latter had the pleasure of knowing that, while it could afford to make a loss, the younger concern could not. * * * Our object in bringing this peculiar phase of trading before our readers is to demonstrate the reverse of an elevated condition of business which underlies the apparently fair and square surface of trade. The above remarks apply to too many instances of competitive trading, which in substance enunciates the vicious principle of expending capital in perpetrating an injury upon a business rival, even if it ruined him."

TORONTO STOCK TRANSACTIONS

The chief feature of the stock market this week was the weakness of Nova Scotia Steel and Dominion Coal. Otherwise not much of a striking character has been presented. The volume of business has been about nominal. Following is a summary of the transactions carried through in some of the more important of the industrial stocks: C.P.R. 616 at 122⅜-4½; Rich. and Ont. Nav., 540 at 61-3¾; Tor. Rail., 299 at 99¾-100¼; Twin City, 460 at 95-6; Sao Paulo, 1070 at 103-5¾; Nova Scotia Steel, 1123 at 51¼-62; Bonds, $3,000 at 107¾; Dom. Steel Bonds, 33,000 at 61½-64; Dom. Coal, 160 at 42¼.

How the
Royal Automatic
Smoke Preventer
and Fuel Saver
Reduces Cost of Power

If you have not a device on your boilers by which you can have complete combustion, would it not be worth your while to do a little investigating.

Others have done so and it **PAID.** In the Royal Automatic Smoke Preventer and Fuel Saver the following advantages have been demonstrated:—

It is not an expensive appliance.
It can be applied without shutting down.
No interfering with grate or brickwork.
Produces perfect combustion.
Increases draft in smoke stack.
Reduces the beat in smoke stack.
Saves in amount of fuel used.
Increases evaporation of water.
Simple in construction.
Does not produce clinkers.
Completely cuts away the smoke.
Leaves the boiler and tubes clean.
Easy on the boiler.
Being automatic it needs no attention.
Can be easily attached to one or more boilers.
Adds to the life of the grates.
Aids the boiler on a quick demand.

All these points have been shown in many plants. — Not one time and another, but a'l on each boiler.

No oil, no fans, no fancy stoking, no troublesome machinery.

Royal Automatic Smoke Preventer and Fuel Saver Company, **ROOM "Z,"**
Confederation Life Bldg.,
TORONTO, Ont.

A convention will be held in Sherbrooke, on August 10th, of representatives from the various municipalities in the Eastern Townships of Quebec, to discuss the good roads movement.

The Canadian Pacific Railway has leased the Lindsay, Bobcaygeon, and Pontypool Railway, and will operate it as part of its system. It is likely that the company will before long extend the line.

The Canadian Timber Company, Limited, of Ottawa, capital $250,000, has received a Dominion charter for the purpose of carrying on the business of lumberers, timber merchants, pulp manufacturers, etc.

The Mineral City Fire Clay Company, Limited, headquarters at Moosejaw, Assa., has been incorporated, with a total capital stock of $78,000. It will make and sell fire-clay, fire-brick, and similar products. Henry New, of Hamilton, is among those interested.

The Canadian Timber Company, Limited, headquarters, Ottawa, capital $250,000, is the name of a company just incorporated under Dominion laws. It will carry on a lumbering and paper manufacturing business, and will produce and distribute electricity.

In Senate Committee on Banking and Commerce, the Imperial Loan and Investment Company's bill which places the company under the general law was reported without amendment. The bill authorizing the Allied Bank to commence business, was also reported without amendment.

The Canadian Hausa Cement Company, Limited, Montreal, has been incorporated by the Dominion Government, with a share capital of $500,000. They propose to make and deal in cement, brick, building materials, etc. Messrs. H. Edmunds, a London, England Civil Engineer, and R. L. and G. A. P. Dillon, of Montreal, are among the charter members.

Ignorance of things Canadian is not yet at an end in England, the latest instance being in a well known sporting paper. The United States universities last week held their races, among the crews being Cornell, Columbia, and Pennsylvania, in spite of which our contemporary boldly heads the paragraph, "Canadian Intercollegiate Races."—Canadian Gazette, London, Eng.

The following despatch comes from Rossland, B.C.: "All was activity about the mill during the week, the delivery of stamping machinery having given the construction crew ample employment. The Blake crusher was also set up. Yesterday two cars of plant for the Elmore end of the mill was shipped from the Montreal manufactory, and prompt delivery is expected at this end of the line. Another car of machinery for the mill is also in transit. The measure of progress achieved at the mill is most satisfactory, and the indications point to the fulfillment of the prediction that the works will be running before September.

THE PLANET
CHATHAM, ONT.

are by far the BEST, CHEAPEST, and MOST COMPREHENSIVE in the market.
Full Information Freely Given.
A. C. C. DINNICK, Managing Director.

The Montreal Gazette publishes a letter from Mr. W. Street, in which it is said: "I understand there was a deficit of half a million this past year in connection with the Intercolonial Railway. I was on one of the Intercolonial Railway trains a few days ago, and the conductor expressed his opinion that it was no wonder, considering that on one of his trains going to the salt water, there were 26 free passes, some of them for five or six persons."

The fastest 30-foot launch in the world, so her builder says, has just been finished by a Detroit man, designed and built by John L. Hacker, the well-known builder of small craft out Jefferson avenue. The boat was made for Murray W. Smith, a retired broker, of Walkerville, and makes 23 miles an hour. Her name is "Au Revoir," and, says the News, she can certainly bid good-bye to any craft around here. The nearest boat of her size in regard to speed is the famous little "Japanesy," of New York, which can go 22 miles an hour.

siders, whose operations were undoubtedly influenced by good crop reports, easy money and the consequent better feeling in business circles. It is worth while, however, stopping for a moment to consider the extent of the advance. The active stocks have all risen 10 to 15 points above the low price of this year, and some have scored considerably larger advances. Not a few stocks are at the highest point of the year; and, if the comparisons be made with the low prices of 1903, the advances are

still maintains its stand at the

HEAD OF ALL ITS COMPETITORS

among Canadian Life Companies, as shown by the Government Reports.

still more striking. This brings us to the question—Has the rise yet reached the danger mark? So far as legitimate influences are concerned it seems as if the advance has been almost sufficient. Good crops and better business have been for the present fairly discounted, especially as both are still in the realm of expectation, and realization remains a matter of two or three months. It seems the part of prudence, therefore, to begin to exercise some caution in hereafter following the upward movement. What would happen in case of serious reverses to either corn or cotton? Neither is yet out of danger. August is often a month of deterioration, and after such a prolonged spell of favorable weather the probability of a setback is measurably greater. In the iron trade a great deal more has been made out of the improvement than is justified; apparently for the purpose of stimulating speculation in the steel issues. A turn for the better has really appeared in the iron trade, and buyers are rather more willing to place orders since they are convinced that the decline in iron has ceased; but prices are still very low and the volume of orders is far below the normal. When bountiful crops become a certainty general trade will assume more activity and the railroads may then see their way to larger purchases of rails and rolling stock; but that will show in the last quarter of the year, and not in the present quarter, although there has certainly been sufficient improvement in the iron industry to warrant a more hopeful feeling.

More attention has been paid to foreign complications than they deserved. Russia is altogether in too strained a condition to invite serious troubles with Great Britain, or any other great Power. She is fully occupied with Japanese attentions at present and is more in need of friends than additional enemies. The war has, moreover, ceased to be a factor in Wall Street, except in event of large additional loans, which would inevitably cause a shifting of investments and firmer money in the European markets, all of which would be indirectly felt at this centre.

We have enjoyed another week of admirable crop weather, and experts are now figuring on 2,500,000,000 bushels of corn, 11,500,000 bales of cotton and 625,000,000 bushels of wheat, these figures allowing for the fact that condition of cotton and corn may fall off somewhat during August. As producers are generally securing profitable prices—even nine cent cotton yielding more than an average profit—it follows that interior merchants should experience a reasonably satisfactory season; for in spite of industrial growth the agricultural interests are still the backbone of our national wealth.

◆

—A report to the Dry Goods Economist upon wool, states in view of the extreme activity of the previous three weeks it is natural to expect some diminution of demand. As an actual fact, however, the contraction in actual sales has been slight, and, if large transactions that are nearly consummated are included, the total will be found almost as large as last week. The fact that so much of the new clip has been moved thus early, and that the prices paid for the remainder of the clip will force dealers to hold for current or higher prices in order to net moderate profits, are factors of strength. Even more important is the fact that manufacturers are asking and obtaining advances of 2½ to 10 per cent. on staple woolens and worsteds. Active buying at such prices will do more to firmly establish current prices for wool than any other factor. The goods market thus far, however, can hardly be described as active and comparatively small orders have been placed at advanced prices. The outlook is improving, nevertheless, and with election uncertainties out of the way business should be all that can be reasonably desired.

◆

—A Boston newspaper considers it remarkable that more women do not take up the jewelry business when searching for a trade. A woman can cater to women's tastes, and with an apprenticeship under a good firm should be capable of starting for herself. An Englishwoman is cited who has taken up the work and is successful in resetting stones and also has acquired the unusual art of painting precious stones. Upon this the Brooklyn Eagle remarks that a new field for women who have artistic ability is the designing of mosaic patterns. A number of Brooklyn women have done good work in this direction. Beside marble, pieces of Tiffany glass are used.

◆

—The report of the Inter-State Commerce Commission shows that the par value of railway capital outstanding on June 30th last in the United States was $12,599,990, representing a capitalization of $63,186 per mile. The number of passengers carried was 694,891,535, an increase of 45,013,030 over the previous year. Freight carried, 1,304,394,323 tons, an increase of 104,078,536 tons. The gross earnings from the operation of a total of 205,313 miles of railway lines, which is the aggregate single-track mileage, were $1,900,846,907, an increase of $174,466,640; operating expenses, $1,257,538,852, an increase of $141,290,105; net earnings, $643,308,055, an increase of $33,176,535; income from other sources than operating, $205,687,480; net income available for dividends or surplus, $296,376,045. The total casualties were 86,393, of which 9,840 were killed and 76,553 injured. The aggregate number of locomotives in service was 43,871, an increase of 2,646 cars in service, 1,753.389, an increase of over 113,000 during the year.

MANAGER FOR CANADA:

B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

TORONTO FIRE APPLIANCES.

After reading an account of the investigation, as far as it went, begun on Wednesday and to be continued this afternoon, into the action of the Toronto Fire Brigade at the Eby, Blain Company fire of last Friday, one's feeling of uneasiness as to the condition of our fire-fighting appliances and the handling of the brigade is not lessened. The president of the Board of Trade, who wrote to the city authorities requesting an investigation, was not backed up as he should have been by those who had witnessed the fighting of the fire, and had complained of it. Only Mr. John Macdonald had the pluck to face the Fire and Light Committee of the council; and he said in plain court what other observers said among themselves, that the firemen were slow in their operations. Mr. Ellis said, truly enough, that

"There is a feeling that the fire protection is not what it ought to be. The insurance rates have gone up, and a merchant carrying $100,000 insurance is compelled to pay $1,000 more in rates. Now, these are facts that are staring us in the face. We do not want these rates to go up any more. The fire department should be well equipped. Merchants are willing to pay for the protection."

As to the controverted point of the too great lapse of time in the brigade's getting water to play on the flames, we shall not attempt to decide until the enquiry has gone further. But taken in connection with the admission of the superintendent of the fire alarm system, Mr. Craig, that "the alarm system is out of date for a large city," his testimony and that of Harry Saunders, operator at fire headquarters, as to the non-receipt of an alarm when the Eby, Blain clerk rang one, and the possibility of this alarm being cut off by the simultaneous registering of Box 3 (vide Mr. Craig's evidence) are very significant. The strength of a chain is only that of its weakest link; and if our fire alarm system is a weak one we are wasting money and effort in getting secondary appliances to combat fire. If we are not mistaken, there was a report made months ago to the council upon the unsatisfactory condition of the alarm, and the council lacked either pluck or promptness in dealing with it.

Some features in the handling of this fire by the department stand out prominently. One is that the fire was in the rear portion of the top story. This the chief could have seen, for the Eby, Blain Company's hose was playing on it five or ten minutes before the brigade got to work, and *kept it from working to the front* of the building. But the brigade kept pouring water in at the *front* windows, a hundred feet away, where there was no fire. We have, in describing the devastated state of the stock all over the warehouse by reason of volumes of water, expressed our opinion of the disgraceful waste of squirting water where it will do least good. Again, where was the sense of raising the tall ladder on the west side of Scott Street, forty feet away, whence the streams could not reach the fire, instead of on the east side next the building. Years ago, when Scott Street was re-paved—it is 75 to 80 feet wide—the electric wires were removed to the *centre* of the street, away from the warehouses on either side of it; as if in order to allow ladders to be raised against the buildings. Time was lost here, therefore, in raising the aerial ladder on the wrong side of the rows of wires.

In the opinion of spectators competent to pronounce, poor judgment was shown by the brigade in attaching too many hose to one hydrant, thereby lessening the pressure upon any one stream. It is in such matters as these that good judgment or bad judgment by officers of the brigade makes all the difference between quick fire-fighting and slow. True, the bursting of hose at a critical time does not reflect upon the efficiency of the men, but the lack of a wrench at a moment when it is needed worst to replace a length does not show the preparedness to be expected of a modern brigade.

It is timely to sound a warning to our manufacturers and merchants as to the danger of storing specially combustible materials in the midst of valuable merchandise. In the Eckardt fire a year or two ago the blaze broke out near where quantities of matches were stored. And now, in the Eby, Blain case, matches were stored on the top flat, where the fire broke out. In some wholesale warehouses packing cases are carelessly allowed to accumulate, and packages of paper or flimsy stuff are in too great quantity for reasonable safety. There is, if we mistake not, a city ordinance requiring the segregation of such materials in appropriate places, such as within lined walls. But such an ordinance is more honored in the breach than in the observance. For another thing, our firemen need to know more about the structure and interior arrangement of our prominent buildings, commercial or other. Part of the brigade might with good effect be engaged day by day in making intimate acquaintance with the interiors of buildings. And it is our opinion that some drill in the handling of imaginary fires might be of important service. Some of the men are valiant and capable fire-fighters—none more so; but it would be too much to say that they all know their business thoroughly.

WESTERN CROP REPORT.

There is reason to think that the grain crops of Manitoba and the Territories will turn out well. Not so phenomenally well, perhaps, as the sanguine people of the North-West have been predicting for many weeks, but that a good crop over increased acreage is likely. Yesterday's telegram from Winnipeg to the Monetary Times says:

"Rain has been general throughout the West during the past week. The crop is headed out, and is maturing rapidly. With continued favorable weather it is expected that the harvest will begin during the latter half of August. Crops are looking well and the prospects are good."

CANADA'S NORTHERN TERRITORY.

Canada's sovereignty over the waters of Hudson's Bay has been asserted by the Dominion Government in no uncertain language. The question came up the other day in the House in connection with an item of $200,000 for the purchase, equipment and maintenance of vessels to be employed in patrolling the waters in the northern portion of Canada; also for establishing and maintaining police and customs ports at such points on the mainland or islands as may be deemed necessary from time to time. Last year, it will be remembered, an expedition was sent out to explore and patrol these northern waters. The instructions given to Capt. A. P. Low, who was in charge of the "Neptune," the vessel chartered to undertake this work, were to explore as far as he could during the season the northern waters and establish a port somewhere on Hudson's Bay, no definite location being ordered. Then, as soon as the ice broke up in the spring, the expedition was to go north and explore Baffin Bay and Lancaster Strait, and then come back to Cape Chidley, at the entrance to Hudson's Straits. There the "Neptune" would meet another steamer with coal and provisions.

It is evident, from past experience, that no time should be lost in protecting Canadian interests in these northern waters. At the present time there are whalers and fishermen of different nations cruising in that locality, and unless we take active steps to assert that these lands belong to Canada we may, perhaps, find ourselves in the face of serious complications. This is the real reason underlying Capt. Bernier's expedition on the "Arctic," which is the vessel which has orders to relieve the "Neptune." She will patrol the Hudson's Bay waters, establish ports at suitable locations, and assert Canada's sovereignty in general.

THE DRY GOODS TRADE.

It is now not too soon to attempt some sort of a forecast as to the fall trade in general dry goods. As a fact, it is something that already engages a good deal of the attention of both wholesale and retail merchants. So far as orders at present arrived or on the way serve to show, prospects are very good; in some lines they are judged by some to be ahead in quantity and value of what was the case at this time last year. And so far as the situation has developed yet, there is no reason why this record should not continue. The chief conditions affecting the trade are good crops and the possession of plenty of spending money on the part of the masses. So far nothing has taken place to cause doubts as to these two factors, though, of course, it is full early to speak of assured excellent crops. With regard to the latter question, the consuming power of the people, its present largeness is evidenced on every hand. In no branch of trade does this influence make itself more felt, or more quickly, than in dry goods.

Referring to prices, they are steady to firm in practically all departments. The intense feeling about cotton, naturally enough, has disappeared; nevertheless, it would be a mistake to imagine that the market for that commodity, or for goods made therefrom, is an easy one. On the other hand, recent events, such as the extensive strike in the Fall River district of New England, will act in a contrary direction, and are certainly likely to counterbalance the effects of the drop in raw material, even if the latter could have the effect of causing declining values for finished goods, which, owing to the necessities of the case, explained in a recent article, could hardly be hoped for for some time to come.

When we come to the consideration of woolens, everything points in a "bull" direction. For this, not only is the short domestic clip responsible, but the great rise in values in every country in the world. Raw wool is now almost double the price it was ten years ago, and—what is of more recent happening—yarns, too, are just about double what they were held at in 1892. These figures refer to the British markets, but these fairly represent world conditions. For some years, over there, yarns were not raised in price in due proportion to the rising value of raw material; but during the last few months yarns have steadily gone up, and reached their true position so far as a parity is considered, and this is what counts in calculating the prospects for finished woolen products. Several repeat orders sent to British woolen manufacturers during the past month or so have, we hear, been executed only at a tangible advance in rates, and there are several indications that this is likely to go on indefinitely. Canadian mills seem to be buying the clip of the country fairly freely, and, the latter being, as before stated, in small compass, it means that the export across the line to Boston and other United States centres, which in most years is quite a feature, will probably be a much less important one than in most years. We hear a report that this season the somewhat unusual course has been adopted by certain parties of shipping Canadian wool to England, where it will be made into yarns and returned to this country.

BANK BRANCHES IN CANADA.

A striking feature of Canadian banking has been the extension of branches throughout the Dominion of late years. Nor was this peculiar to the newer districts of the country alone, where it was to be expected: the older Provinces of the East have shared to a large degree in the increased number of bank branches. Nova Scotia has been a marked exemplar in this respect; the Bank of Nova Scotia and the Royal Bank having been among the first to extend their business into all the Provinces of the Dominion. The Bank of British North America, too, was early in the field with branches in the far West. Indeed, it extends into every Province but one. The Canadian Bank of Commerce, by its amalgamation of the Bank of British Columbia in 1900, added materially to the list of its branches in our Pacific Province. This bank heads the list in number of branches and equals the British in their wide distribution. The Bank of Montreal, goes everywhere except to Prince Edward Island and the Yukon.

We have compiled a list of branches of Canadian banks as at 1st July, 1904, which, we believe, will be found complete. It gives the number of branches of each chartered bank in the seven Provinces, the Territories of Assiniboia, Alberta, and Saskatchewan, and in the district of the Yukon. The total number is 1,059 branches of thirty-five banks. We have included in it the Caisse d' Economie, of Quebec, and the City and District Savings Bank of Montreal, because these are to be found in the list of banks with branches which appears in the Year Book of Canada: and a comparison taken from that volume of different years may be instructive. The latest Year Book list, however, is for 1st January, 1904, and gives the total as 1,049, whereas, our figures for last month make the

	498	174	48	105	11	51	89	80	3	1059

total 1,059. Sub-branches to the number of ten are included in these figures.

The subjoining table will show the increase by Provinces at four periods within seven years. The leap between 1902 and 1904 is remarkable. There are three new banks opened in this seven years and one bank suspended.

	1st July.	1st Jan.		
	1904.	1903.	1902.	1898.
Province of Ontario	498	420	349	306
" Quebec	174	147	137	117
" New Brunswick	48	41	35	30
" Nova Scotia	105	102	89	69
" Prince Edward Island	11	11	6	6
" British Columbia	51	47	46	47
" Manitoba	89	79	52	46
North West Territories	80	54	30	18
Yukon District	3	3	3	3
Total	1,059	904	747	641

It is in the prairie country that the growth of bank branches and agencies has been relatively greatest. In Manitoba there were in 1898 only forty-six branches, where, in 1904, the number is eighty-nine. In the Territories, there were only eighteen branches in 1898, while in 1904 there are eighty. This exhibits an increase from sixty-four to one hundred and sixty-nine in the Western country, nearly trebling the number.

Taking individual banks the Canadian Bank of Commerce has the largest number of branches, one hundred and one in all; next, the Merchants Bank of Canada, ninety-one—increased from seventy in two years—then the Union Bank of Canada, with eighty-three; the Bank of Hamilton with sixty-three—increased from forty-one since 1902—the Bank of Montreal has fifty-eight, and the Bank of Nova Scotia fifty-one; followed by the Royal and Imperial. The table will repay some study.

It is noticeable that some of the banks whose quarters are in Ontario, have branches only in that province. The Standard Bank, for instance, has twenty-six branches, all in Ontario; the Traders Bank, forty-eight, all in Ontario; the Western and Metropolitan Banks, also have all their branches in that one province. The Union Bank of Halifax, the Bank of New Brunswick, the Bank of Yarmouth, the Peoples Bank of New Brunswick, and the St. Stephen's Bank have all their offices in the Maritime Provinces, but the Peoples Bank of Halifax, out of its twenty-five offices, has nine in the Province of Quebec. Of the French banks, only the Hochelaga and the Nationale have offices outside of the Province of Quebec. The Hochelaga has branches as far West as British Columbia. There is a branch of the Merchants Bank of Prince Edward Island outside of its own Province. Of the new banks, the Crown has all its agencies in Ontario, but the Sovereign has six of its forty branches in Quebec.

As to the number of banks represented in the various Provinces, it will be found that there are twenty-three banks represented in the Province of Quebec, while only twenty-two are represented in Ontario. Ten banks each have offices in Nova Scotia and New Brunswick; four in Prince Edward Island; ten in the North-West Territories; eleven in the Province of Manitoba; nine in British Columbia; two in the Yukon.

◆

THE COST OF LIVING.

A man in Brantford asks us if it is true that the expense of living has advanced in the last few years by twenty-five per cent. over and above the advance in wages or any kind of middle-class income. We reply that this is a difficult question to answer, because authorities have different opinions upon it. We have seen the increased cost of living as between 1899 and 1904 estimated as high as thirty-three per cent.; another, a newspaper statement or estimate, gives it at twenty per cent. between 1900 and 1903. More trustworthy computations, or at least computations which are probably upon a large scale, have been made by bodies in the United States. For example, the Employers' Association of Chicago has made a calculation that the cost of living increased by 16.8 per cent. between 1898 and 1903, which if accurate would show no hardship to the wage-earning class, for it corresponds very closely with the estimated general advance of wages these five or six years.

Such a subject is best investigated broadly, however, and therefore we are glad to be able to give some statistics as to the cost of living compiled by the United States Department of Labor. This department procured its figures from 2,567 families with an average income of $827.19, and an average expenditure of $768.54, and found the cost of living in 1902, when it was highest, to be 16.1 per cent. more than in 1896, when it was lowest. In the same period, average wages have increased by just that 16.1 per cent.; in some cases by more. We are glad to infer that the instances from which the average is calculated in this instance are taken from the artisan class. It is to be remembered, however, that while whether by strikes, threats of strikes, or voluntary concessions by employers, the trades-people or hand-working class have had their wages raised by over sixteen per cent. the class of clerks, book-keepers, civil service hands—the great army of salaried men and women who work in counting houses, have scarcely had their pay raised at all. Certainly, their average increase of income would be nearer five or ten per cent. than sixteen, and it has not kept pace with the rise in cost of living.

Our correspondent ventures the opinion that in Canada the mechanic class save one-eighth of their wages each year. He is of the opinion that some such percentage as 12½ is yearly put aside by the workers in such communities as Brantford and Peterboro, and invested in real estate, life assurance, or placed at interest in saving banks. Answering him on this point, we are doubtful if any such average as he mentions can be predicated of the hand-workers in Canada generally. Among Ontario towns and cities, Brantford is perhaps an exceptionally thrifty place; Galt certainly is, and Berlin. And some of the Nova Scotia towns are notably saving. But we cannot believe that in the cities of Quebec and Montreal, the average artisan saves and puts awav 12½ cents out of each dollar he earns. It is worth noting that among the 2,500 families in the United States cited above, presumably widely scattered, the average saving was about seven per cent.

THE PROBLEM OF THE FUTURE.

The sixteen-to-one silver controversy may fall out of sight by mutual consent of the two great political parties; imperialism becomes an almost undisputed factor in American politics; and presidential candidates may win and lose; but the question which is slowly but surely making itself the most important issue in the whole body politic of the Republic, is the one that affects the relation between Capital and Labor. Perhaps it would be more desirable to say "between capitalists and workmen," because political economy showed years ago that between the former in any true sense of speaking, there would be no conflict; that really, they are two parts of one individual whole. The issue then, as it has become involved, lies between the representatives of the men who have money, on the one side, and the men who have their hands and labor on the other side. This seems likely to become the greatest political problem—referring to politics in its fundamental sense, of the science of government—that the present generation may have to solve.

The whole dispute resolves itself into one of equality under the law, which democratic institutions were supposed to have settled for all time, but evidently did not do. To show the truth of these remarks, as applied to the Unites States, which its founders hoped to make the most truly democratic and "all-equal" country under the sun, we quote from the New York Journal of Commerce, by no means one of the yellow journals:

> "When combinations of capital, ... reach a stage at which they can exercise the power of monopoly within considerable limits, in any branch of industry or the trade that consists in the exchange and distribution of the products of industry, they become a menace to liberty and equality. In so far as they use their power to suppress competition, to crush out rivalry, by a manipulation of the forces of production and exchange, by raising or lowering prices or wages, they destroy the fundamental conditions of equality under the law. They take away the value of property and blight the opportunities of others by arbitrary acts of power to increase their own advantage and their own profit, drawing wealth from the many to the few, and making the many dependent upon the few. The pathway of some of the "trusts" whose names and history are familiar have been strewn with the wrecks of property and of business and watered with the blood and tears of victims, like the course of conquerors in barbaric times. . . . They have made war upon the fundamental principles of free government and have not thus far been successfully resisted."

On the other side of the picture is another monopoly—the combination of working men in such form as to prevent the freedom of the individual and to suppress competition. Trades unions in themselves, and when conducted with the object of improving the workers' conditions, to increase efficiency, and protect from grasping methods of carrying on business, are beneficial institutions, and in the past have done much for the well-being of the community as a whole. But to quote our contemporary once more:

> "So far as they are used to establish monopolies in industry and trade, to suppress competition, to exclude those who are not their members from an equal chance to work and an equal opportunity to live at peace, in so far as they use coercion, intimidation and violence to accomplish their ends, they become the allies of capital combinations in the destruction of liberty and equality of rights and the subversion of the fundamental principles of free government."

With two such enemies sucking, like vampires, at its life blood, it would be folly to deny that a very great problem is on hand for solution by the American people, one that will tax all its resources of close thinking and resolute action, and one that will not much longer bear to be shelved in favor of more showy, but less dangerous platform cries.

MICHIGAN BANKERS' ASSOCIATION.

After leaving Toronto on Friday morning last by boat for Niagara, the members of the Michigan Bankers' Association and the ladies of their party made connection for Buffalo, and there took steamer for Detroit, arriving on Saturday morning, July 30th. It is pleasing to hear that the bankers' programme for the annual convention was carried out exactly as scheduled, and that there was not a hitch in the proceedings from the time the association left Detroit until it returned.

On the way home per boat executive sessions were resumed and officers were elected as under: President, James H. Seager, president of the National Bank of Houghton; first vice-president, Dudley E. Waters, of Grand Rapids; second vice-president, Charles E. Townsend of Jackson; treasurer, H. B. Waldby, of Adrian; secretary, Fred. E. Farnsworth, of Detroit; assistant secretary, W. W. Waine, of Detroit, re-elected. The next meeting place of the association will be Houghton, on Keeweenay Bay, on the northern peninsula of Michigan, well known as a centre of the great copper-mining industry of that state. Resolutions of thanks to the retiring officers were passed, and Col. Farnsworth and Mr. Waine, secretary and assistant secretary respectively, were honored in a similar way.

Our Detroit correspondent advises us that the members of the association and their guests were remarkably pleased with the cordiality of their reception in Toronto. Not only were they outspoken in acknowledgment of the courteous treatment they received here from Mr. Walker, Mr. McGillivray, and others, but they became enamored of the city itself. Their time was very fully occupied, but pleasantly so, and arrangements were carried out "in ship shape and Bristol fashion," promptly, as bankers would expect to have it done. Nor had they anything but good words for the management of the King Edward Hotel, which hostelry they thought was fine enough for any occasion or for any body. The only criticism one might offer is that the visiting bankers did not remain long enough in Toronto to enable them to see it properly.

BORROWINGS IN BRITAIN.

The London Economist had the following in a recent issue: Government borrowing has been less in evidence during the past half-year than in any similar period since the outbreak of the war in South Africa, and though the encouragement offered by the improvement in the market for gilt-edged securities has brought out a number of municipal issues, and foreign Government borrowing has been on a fairly large scale, the amount of the total issues for the half-year is smaller than in any June half-year since 1896. The amount is £70,559,000, and compares with £77,414,000 in the first half of 1903, and £106,435,000 in the June half of 1902. The following is a statement of new capital issues, quarter by quarter, for the current and the previous four years:—

New Capital Applications.

	1904.	1903.	1902.	1900.
	£	£	£	£
First quarter ..	19,905,000	22,226,000	47,993,000	51,587,000
Second quarter.	50,654,000	55,188,000	58,397,000	31,189,000
Third quarter ..	....	15,063,000	21,276,000	49,769,000
Fourth quarter.	....	15,986,000	26,146,000	32,954,000
	70,559,000	108,463,000	153,812,000	165,499,000

Three foreign Government loans have been offered during the half-year. The first was a moiety of the Japanese War Loan of £10,000,000, the other half being offered in the United States. A high rate of interest was offered with good security and the amount was subscribed for fully twenty times over. A large Cuban loan made its appearance, and was probably taken up chiefly in the United States, and the Greek International Commission offered the balance of the Greek Railway Loan of 1902—a 4 per cent. security at 84.

◆

NOVA SCOTIA STEEL AND COAL.

Montreal, August 3rd.—There was a meeting to-day of the Nova Scotia Steel and Coal Company, the following directors being present: John F. Stairs, Hon. S. D. McGregor, J. Walter Allison, Hon. L. Melvin-Jones, Robert Jaffray, Robert Reford, Thos. Cantile, N. H. Harris, K.C., George Stairs, Harvey Graham and James C. McGregor. The general manager presented a report of the business of the company for the current year, and the progress of the new works at Port Sydney, and stated that the new blast furnace would be blown in before the end of the present month, which it was expected would materially add to the profits and efficiency of the company's business. A discussion took place regarding the finances of the company, and increase of capital required to fully complete and equip the new works. The solution met with the unanimous approval of the directors. Arrangements will be made to carry the project into effect at an early date.

The above despatch appeared in the Toronto papers of yesterday morning. On the previous day the Monetary Times received a lengthy letter, postmarked New Glasgow. containing what professed to be information of an important nature about the position of the Nova Scotia Steel & Coal Co. It was unsigned, however, and although the writer displays much acquaintance with the company's affairs and professes to be deeply interested in the welfare of the town of New Glasgow, he does not give his name. We therefore do not publish his letter. But some of his statements are of moment—if backed by a respectable man's signature they would be weighty. For example, commenting on the sharp decline of the common stock, he accounts for it thus:—

"The business of the Nova Scotia Steel & Coal Co. is thus divided: The steel plant at New Glasgow, N.S.; blast furnace at Ferrona, N.S.; coal mines at Coalburn, N.S., and Sydney Mines, C.B., and the iron mine at Wabana, Newfoundland. Of these I am in a position to say that the only one paying to-day is the coal mine at Sydney Mines. The blast furnace at Ferrona is closed down for good, representing a loss of about $1,000,000; the coal mine at Coalburn, on which over $500,000 has been spent, is now known by all insiders to be practically worthless, while the steel plant at New Glasgow is barely earning the interest on the bonds and preferred stock. The iron mine at Wabana, it has been discovered, is not nearly as good as that portion sold to the Dominion Steel Co.; so the whole load rests with the coal mine at Sydney Mines."

Now, he argues, in the face of such circumstances as these, to declare six per cent. dividend on the common stock is madness. In his opinion, the greatest asset the company had was Graham Fraser. And he adds, the real reason Graham Fraser left the company was that he would not consent to paying six per cent., holding that two per cent. was all that could honestly be paid—and indeed that was a good return, considering the small amount that had been paid for the stock. He contends warmly and at length that for the ultimate good of the company itself, and for the good of the town, whose prosperity depends largely on the welfare of this company, the common stock should be forced down out of the hands of its present holders to a point at which it can become a dividend payer in the face of all conditions, and that the policy of Graham Fraser should be carried out.

◆

UNLICENSED INSURANCE COMPANIES.

That people are entitled to get what they pay for, and that what are known as "underground" insurance companies should not be allowed to profit by the money of good law-abiding Canadian citizens, seems to be the moral of the following decision, of which we hear from Victoria, B.C. The account which follows describes a fire insurance case, the first of its kind tried in the Province. A full court has sustained the appeal of Barrett and Turner, hotel keepers, White Horse, Yukon Territory.

In 1900 the firm were hotel keepers, as stated, and Joshua Holland, of Victoria, applied for insurance on their premises. They agreed to insure $12,000 in some companies authorized to do business in Canada. They paid Holland part of the premium, and Mr. Holland sent the application to Victoria. It was attempted to effect the assurance in Victoria, but being unable to do so, they sent the application to insurance brokers in New York City.. They issued three policies in companies which were not licensed to do business in Canada under the Canada Insurance Act. The policies were sent through the bank, the plaintiffs accepted and sent the balance of the premium, amounting to $651. The insurance policies were for one year.

Subsequently Barrett and Turner ascertained that the companies were not authorized to do business in Canada. They claimed to have all money paid as premiums returned to them, notwithstanding the fact that Holland had deducted only his own commission and forwarded the remainder to New York. The case was tried before Justice Drake, who dismissed it. Barrett and Turner then appealed to the full court, who rendered judgment in their favor for the amount of the premiums paid, namely, $868, and the costs of the action and of the appeal.

◆

ABOUT THE TOBACCO TRADE.

Hon. Mr. Brodeur is preparing a measure by which he intends that Parliament shall rectify a wrong done to the tobacco trade of Canada. The claim is made that the American Tobacco Company have treated their customers high-handedly, and have injured other traders. Mr. J. M. Fortier, of Montreal, speaking for himself and some other manufacturers of tobacco, approves Mr. Brodeur's effort, and adds: "We are not looking for favors, but we do want equity, and this is exactly what Mr. Brodeur's measure seeks to give us. In other words, we demand the right to sell our goods to people who were compelled to abandon us by the arbitrary restrictions of the American Tobacco Company's contract or arrangement.,

For a number of years, Mr. Fortier contended that tobacco growing in Canada was an industry worth fostering. He and his friends in 1896 secured a duty of ten cents a pound, and the Canadian tobacco industry succeeded so well that the American Tobacco Company realized the fact that successful factories had been started at different points, and they bought out the factories at Granby, Joliette, of L. Larue, jr., and later on that of B. Houde and Company, Quebec. Since then they closed up the Joliette factory and Larue's as well. Mr. Fortier maintains that this has diminished the competition in the buying from the farmers and affecting the customers likewise. "We want," he declared, "to get back the commercial channel which has been closed against us. For instance, a man in the Baie des Chaleurs sends to us for five hundred cigarettes, and I find that by shipping them direct the freight would be seventy-five cents, and as this would be too high I want to have the right to send these cigarettes over to a wholesale grocer who also ships goods to my customer at Baie des Chaleurs. But the grocer tells me that by his contract or agreement with the American Tobacco Company, he is precluded from even handling goods manufactured by their competitors. Now, this is not British, and is against the true principles of trade. We desire to reopen this commercial channel, which is the wholesale grocer, the produce merchant and the tobacconist."

Mr. Fortier further states: "that eight years ago he had brought action against the American Tobacco Company for conspiracy, and it was decided not to be an illegal conspiracy. Still, the result of the trial was an attempt at legislation by the present Solicitor General, to meet the case in question. The bill, however, did not get beyond its first reading. Now the Minister of Inland Revenue, after studying the question in all its phases, has brought down the bill in question.

◆

THE BRITISH TARIFF SCHEME.

We have received a copy of the report of the Tariff Commission appointed to examine into the probable effect of Mr. Chamberlain's proposals on present conditions of British trade; to suggest what modifications, if any, would be desirable, and in what way conflicting interests may be harmonized; also to recommend a scale of duties. The volume now published has to do with the iron and steel trades. The purposes of the commission, it is almost needless to remark, involved an enormous amount of research and detail work, as well as the formation of a plan for obtaining expert testimony. Memoranda were therefore prepared upon the comparative statistics of the iron and steel trades of Great Britain and foreign countries, the organization and working of the German Kartells, the recent developments in the American iron and steel industry, the operation of the German iron duties, drawbacks and rebates in foreign countries, railway rates and policy, etc., etc.

A significant reply which we note, made by several firms to one of the enquiry circulars freely sent out to those interested was, "we formerly exported, but now cannot do so." The figures and data collected by the commission and presented in this report are so voluminous that we cannot attempt to reproduce them in this place, but the result of their labors, as regards pig-iron, may be summarized as follows: At the end of the seventies, the total amount of pig-iron produced in the United Kingdom was nearly 6¾ million tons, that is, as much as the total production of the five iron-producing countries next in importance, and no less than 45 per cent. of the total production of the world. At the end of the eighties, however, the total amount of pig-iron produced in all countries had increased by 59 per cent., but that of the United Kingdom by only 17 per cent. Germany and the United States, on the other hand, had increased their production by 93 and 175 per cent. respectively. Early in the nineties, the United Kingdom lost the pre-eminence it had enjoyed for more than 100 years, and the United States took the first place. Since then, the United Kingdom has been overtaken by Germany, and has now fallen to the third place, while the total production of the United States is only a little less than that of the United Kingdom and Germany taken together. In the United Kingdom, the production of pig-iron has just kept pace with the increase of population. In Germany and the United States, the increase in production has been continuous and much more rapid than the increase of population. Thus, by whatever test we apply, we find that the pig-iron industry of the United Kingdom is practically stationary.

In the case of steel, the results of the enquiry show even more strikingly the decadence of Great Britain as a manufacturing country. In the period 1876-80, the quantity of steel annually produced in the United Kingdom was one-third of the total quantity produced by all countries; it is now less than one-seventh. The United States on the other hand has increased its share of the total production of steel from about one-quarter to two-fifths; and Germany from one-sixth to more than one-fifth. If we take consumption of steel per head of the population, the increase in the case of the United Kingdom is from 64 lbs. to 253 lbs., but, in the case of the United States, the increase is from 37 lbs. to 404 lbs., and in Germany, from 25 lbs. to 282 lbs. While the steel requirements of the world are rapidly increasing, the steel industry of the United Kingdom is almost stationary, and the steel industry, both of the United States and Germany, is rapidly progressing.

The commission, after discovering the general truth of the propositions thus summarized, enquired into the alleged causes of this relative decline of the iron and steel industries in Britain, and came to the conclusion that it was not due to the inadequacy or inconvenience attached to the supplies of ore, nor even to the charges for transportation, admittedly more burdensome in the United Kingdom than in foreign countries. The preponderance of opinion in the minds of witnesses was that the danger consisted in the combination of the transport policy of foreign countries with their tariffs and export organization, and with the system of free imports of Great Britain.

The commission's finding in regard to the process now known as dumping is to the effect that not only is it of the most widespread character, but, contrary to the view held by many, it is profitable to the countries practising it; that, unless checked, it is likely to remain one of the permanent incidents of trade, that it has already caused serious loss of employment and wages, diminished profits, and brought about a feeling of insecurity in many branches of industry; and that there are no advantages to the consumers, which can, in the long run, compensate for the injury so caused.

Finally, the commission recommend, as no doubt, thinking of its origin, most people thought it would recommend, the establishment of a British tariff in such a manner as to check the practice of dumping, to maintain the export trade with foreign countries, and to develop the colonial markets. These objects, it is suggested, can be obtained by means of a tariff divided into three classes: (a) A general tariff, consisting of a low scale of duties for foreign countries which admit British wares on fair terms. (b) A preferential tariff, lower than the general tariff, for those of our colonies which give adequate preference to British manufactures, and framed with a view to securing freer trade within the British Empire. (c) A maximum tariff, consisting of comparatively higher duties, but subject to reduction by negotiation to the level of the general tariff.

◆

FOR GROCERS AND PROVISION DEALERS.

The Montreal Packing Company, Limited, of Montreal, has been incorporated under Dominion laws. It will carry on the business of packing and canning meats, fruits and vegetables, and of establishing a rendering and sausage factory.

The Toronto Retail Grocers' Association held a very successful excursion to Niagara Falls and Buffalo last week, being the eighteenth in the series.

The United Fruit Company, of Boston, which largely controls the banana trade of this continent, is said to be proposing the innovation of selling that fruit by weight instead of by the bunch. There are things to be said on both sides, but it is believed that the change would result in a better division and grading of qualities; against it may be raised the objection that increased handling would be necessitated.

The indications this season point to very heavy crops of apples in England, so the prospects for early Canadian apples in that market are not very promising when the risk of landing in unsound condition is taken into consideration. It has, however, repeatedly happened, says a market report from Liverpool, that even when English fruit is unsaleable, a ready market has been found for some of the best varieties of American, but the venture is, of course, always a speculative one. With regard to winter stock a lower range of prices, as compared with last year, must be anticipated until October, when markets should be cleared of English and ready to receive imports. Values will then be guided by the quantities received. The consumption of apples in Great Britain is a steadily increasing one, and there is no reason for supposing that it should not continue to be so. Last year, in spite of the enormous quantities of apples imported into that country, and of the variable quantity of many shipments, there was at no time any real collapse of the market, and taking prices throughout the whole season, they held up wonderfully well.

A despatch from Yokohama, Japan, says that choice high grades of good cupping quality have been in general demand. At present the demand is active for medium and low-grade leaf suitable for making pan-fried or sun-dried tea. On account of the scarcity of high grades prices remained very firm for these sorts, but gradually declined on the medium and lower grades of late arrivals. Second crop teas will be on the market in a few days; style and cup quality are reported to be good. Of medium and lower grades there was an abundant quantity. Medium to choice grades of basket-fired leaf were exceptionally scarce, style of late arrivals being below the average. Quality of higher grades slightly inferior, but lower grades show an improvement over last year's offerings at this time of the season. Style in general to date has been inferior to teas of last season. Kobe market.—The higher grades on the same basis, but lacking the fine quality and style of Yokohama leaf. The lower grades show light liquor and fair leaf; prices at present are comparatively low.

DRY GOODS ITEMS.

The fall millinery opening at Toronto will probably take place on Monday, the 29th inst., the week of the Exhibition.

As a result of the cotton mill strike at Fall River, Mass., in which eighty-one factories and twenty-six thousand operatives are involved, hundreds of French Canadians are reported to be returning to Canada, where they will remain until the mills reopen.

The report of the English Sewing Cotton Company, London, for the year ending March 31st, last, just issued, shows a very satisfactory improvement in earnings. After wiping out a debit of £64,177 from the previous year, there remains a net balance of £106,051, enabling the directors to pay arrears of preference dividend for eighteen months, and to carry forward £31,051. The net profit from the year's trading amounted to £170,829.

The Russian flax crop is described as very behindhand. In some districts sowing was not over till the middle of July, the weather having been very unfavorable. The Siberian districts are perhaps the worst and as large levies are being made among the peasants for war purposes the prospects are bad. As Ireland uses such large quantities of Russian fibre anything that affects the Russian crop influences the linen trade, even though the home flax crop should turn out to be everything that could be desired.

A New York millinery expect forecasts that this winter velvet will reign supreme, especially the plain rich lustrous pliable kinds. The new shapes in hats make it obligatory that velvet shall be the fabric most employed by the milliners. It will be the large-crowned hat with a brim of more or less curving tendency that will be prominent in this field of fashion. This will be a plain-covered hat, and require the richest of materials to perfect it. Even the smaller shapes, which will continue in vogue, will be made of velvet, but for them it will be draped in graceful folds, which results can only be obtained by the use of supple and light-weight velvets. The trimmings to be used will be the ostrich plume and tip, the coque and like feathers, and roses in rare shades and unusual size. Ornaments will come in for a fair share of attention with this certain revival of the crowned hat.

LIFE INSURANCE NOTES.

The annual colonial examinations of the Institute of Actuaries are to be held in April next. The precise date will be found in our advertising columns. The cities in which they are to be held are: Montreal, Toronto, and Ottawa, in Canada; Melbourne, Sydney, Adelaide and Brisbane in Australia; Wellington in New Zealand; and Cape Town in South Africa. Candidates are required to give notice in writing to the Honorary Secretaries in London, England, and pay a guinea fee before 31st January. The supervisor in Toronto is Mr. T. Bradshaw.

—The Toronto Star's third edition of its Summer Resort Guide is now issued, and fills an ever recurring summer want. It gives in concise form easily understandable directions as to how to reach the various pleasure resorts in Canada, after giving a few hints on the difficult matter as to which place to choose for the proposed outing, out of so many which this Canada of ours offers. It gives, too, the distances necessary to travel in each case, the cost of getting there, and the names of the various hotels, with their charges and proprietors' names. It is a veritable "silent guide" whose pages are always ready unobtrusively to offer us the information everybody feels so much need of at this time of the year.

—Northern Alberta's great summer fair, held at Edmonton on June 30th and July 1st and 2nd, was a great success, the weather being ideal and the show very fine. Entries of live stock were much more numerous than ever before, and in character this department showed, according to all reports, very great improvement. There is, without doubt, a promising future for this most important branch of farming in Alberta.

—We observe that the New Zealand Government proposes to appoint a High Commissioner, to reside in London. "King Dick," as the strenuous present Premier of that colony is nick-named, may be the lucky first occupant of the position, as his health is hardly equal to the strain of party politics. The general opinion in Britain seems to be that Mr. Seddon will make an admirable High Commissioner, who would lose no opportunity of pushing forward the interests of his country.

—Referring to the fact that this year the East goes West to see the Dominion Exhibition at Winnipeg, and that last year both East and West went to Central at Toronto on a like errand, the Maritime Merchant points out that to preserve symmetry in the arrangement of things, next year's Dominion Exhibition should be held in the Maritime Provinces. There is no good reason why the East should not have the $50,000 Dominion Government grant for a big exhibition next year, while there are many reasons in favor of its having it. Central and Western Canada do not know as much about our Atlantic Provinces as they should.

OUR AUSTRALIAN LETTER.

The following are paragraphs of our Sydney correspondent's letter of 13th June for which we had not space in our last week's issue:

The papers tell us of the great prosperity of Canada, nevertheless, as for ten years past, enquiries are made whether Australian money cannot be got to invest in pulp mills, quarries, shipping concerns, and other industries, for which there is said to be great facilities there, but not the capital. The Australian is a borrower himself, and wonders if the Canadian prosperity stories are not a bit mythical.

Rev. Dr. Egerton R. Young, of Canada, is on a lecturing tour here. In his series he has one on Canada. It was interesting, but Canadians criticised because it contains so much dog train, snow shoe and Indian in it, that it leads to misconcepion of the country. These things are all very well in missionary pictures, but not in the description of living Canada. The Australians think that when he says the lands of Canada are so fertile that wheat can be grown upon them without manure successfully for five hundred years without diminishing the fertility, it is stretching matters a bit. Similarly the statement that *fifty thousand families* went there from the United States last year is considered an exaggeration.

The Federal Government has appointed Mr. Copeland, the agent general of New South Wales, as its representative

AN ENGINE

Possessing the qualities of Economy, Simplicity, Quick and Even Regulation, being Easy to Operate, needing Few Repairs, is the kind required by steam plant operators.

These essentials are embodied in the

WHEELOCK and IDEAL STEAM ENGINES.

MADE BY

The Goldie & McCulloch Co.
LIMITED,
GALT, — Ontario, — Canada.

We Make—Wheelock Engines, Ideal High Speed Engines, Gas and Gasoline Engines, Boilers, Pumps, Water Wheels, Flour Mill Machinery, Oatmeal Mill Machinery, Wolf Gyrators, Emery Choppers Wood Working Machinery, Shingle Machinery, Heading and Stave Machinery, Wood Rim Split Pulleys, Iron Pulleys, Shafting, Hangers, Friction Clutch Couplings, Friction Clutch Pulleys, Safes, Vaults and Vault Doors. . . . . . .

There is this feature about FENSOM'S ELEVATORS which means much:—

Their entire construction is mechanically correct.

Unsafe and untried ideas are never utilized.

on the Pacific Cable Conference. As Mr. Copeland has always been a particularly good friend to the Eastern Extension Company, Canada can get an idea of what it may expect from such representation.

The papers announce further Commissions to enquire into the methods of the Independent Order of Foresters, but surely there cannot be more to come out than is known, and the thing begins to look a little like persecution. If the Canadian Head Office would put itself straight on the Dr. Montague matter, much of the sting of the charges against the Society would be taken out. A leading paper says: "It is alleged that corruption is so rife in Canada that the Doctor's act will be regarded as a trifle over there, but we won't believe it until it has been confirmed by information from Canada."

Mr. De Schryver of Auckland, in giving evidence of the need of a better route to New Zealand, is represented as saying that to get to Vancouver by the Canadian Line he had to go to Sydney, and that took thirty-two days, whereas he could have got to 'Frisco by the United States steamers in seventeen. Mr. De Schryver knows very well that one does not need to go via Sydney to Vancouver, but via Suva, and it can be done in twenty-one days. As a matter of fact that was the route Mr. De Schryver took, and he was just twenty-one days going from Auckland to Vancouver. He is the advocate of a visionary line from a United States port, and a quicker service to New Zealand is desirable, but that is no reason for slandering the route that already exists. F. W.

Sydney, New South Wales, 13th June, 1904.

ANSWERS TO ENQUIRERS.

M., Saint John.—"I should be greatly obliged if you would inform me whether you know of any book published in Canada or the States giving particulars as to how to form a limited stock company, and all particulars pertaining to such; also the names of author and publisher." [Write to the Canadian Railway News Company, Limited, 102 Union Station Building, Toronto, for a copy of J. D. Warde's "Shareholders' and Directors' Manual,' sixth edition. It will inform you how to organize and manage such companies, and also supply forms and by-laws. It has a compend of the laws governing joint stock companies, Provincial and Dominion.]

R. E., Pembroke.—The Commissioner of the North-West Mounted Police is a Justice of the Peace, and has besides all the powers of a stipendiary magistrate. The superintendents are Justices of the Peace. They can, therefore, legally do all you say.

THE HULL CEMENT WORKS.

One day last week a dozen of the Dominion senators went over from Ottawa and paid a visit to the works of the International Portland Cement Company at Hull. They were all surprised at the extent of the works and pleased with their appearance. Among those who visited the works was Senator Edwards, who was afterwards interviewed on the subject by a reporter of the Montreal Gazette. He declared himself greatly pleased with all he saw there. Said he: "I don't speak as one knowing the business, but I do think that next to those of agriculture the great products of Canada in the near future will be iron, steel, cement and pulp. And I further think that if there is any place in Canada where cement can be made profitably it is at the works in Hull, surrounded as they are by so many natural advantages. I have never seen anything more complete than the way in which the raw materials are disposed close beside each other. And as to the engineering skill displayed in the factory, I have never seen anything superior. To have so large a factory right at hand," he continued, "is bound to be of inestimable benefit to Ottawa and Eastern Canada. In the nature of things there will in the near future be an enormous quantity of cement consumed in the Ottawa Valley, and, in fact, all over Canada, in developing the water powers and other industries. Think what it means, then, to Ottawa to have a factory like this right at the doors of the consumers, where they can get cement without having to pay duty or freight rates, which, as the substance is weighty, are always large. The factory is going to enrich this part of the country."

As Mr. Edwards is the Senator for the district close by which these works are situated, his favorable opinion about them, as expressed about, must certainly be of value to the managers of the International Cement Company.

THE FIRE AT THE EBY, BLAIN COMPANY'S.

It is only a matter of seven months, or thereabout, (Monetary Times, January 2nd, 1904), since, in describing the premises of the Eby, Blain Company, wholesale grocers, of this city, we said: "the building may be termed well-equipped for fire." And we described its stand-pipe, with openings and a hose on every floor as well as on the roof; buckets of water on each floor, too; the whole place wired for a fire alarm system, and thermostats on every floor. But how inadequate all this may be to prevent enormous damage in case of fire, the destruction and injury of Friday last at this warehouse has shown. Shortly after ten on the morning of that day, an employee, having occasion to visit the top flat of the house, smelled fire and presently discovered a slight blaze. Some time elapsed before an alarm was sent in, and more time elapsed before the brigade, when it did reach the spot, had water playing on the burning roof and the smoking, smouldering interior of the top flat. The fire brigade of the firm had meanwhile got the hose from the flat below and did excellent service in confining the fire to the rear half of the sixth floor. There was much inflammable material on this floor, as well as quantities of coffee and spices.

When the city fire brigade began to throw water on the place (through the front windows, where the water tower was one hundred feet away from any fire), and through the side windows, it was not long before the top floor was swimming in from one to two feet of water. This poured down the hoist and down the stairways, till the whole place was as damp and as chill as a coal mine, and almost every thing in it ruined, or badly damaged. How many hours those firemen pumped water into that building after all danger from fire was over, we do not know, but it does occur to us that something more is needed in a brigade or the officers of a brigade, than ability to pour water by the ton upon a fire; to soak a building through and through, regardless of the value or condition of its contents. Is there no virtue in chemical engines? Has the chief of the brigade no liberty of judgement to investigate a fire, or send his men to investigate a fire, before he pumps half the contents of Toronto Bay into the building which is smoking? Is there no aptitude among fire handlers in the way of learning how to deal with fires in another way than drowning them out? Must the whole stock of a merchant be ruined or injured because a fire breaks out in his top floor? These are questions we should like answered. If any one walks through that extensive place from attic to basement, as the writer did yesterday, and sees the marks on posts indicating the depth of water on the various floors; sees the great holes cut by the axes of the firemen to let the water down—to injure some more floors below; sees the way they broke open with axes or pikes the customs and inland revenue partitions (containing tobacco and cigars) where there was no sign of fire, will be very likely to come to the conclusion that however brave and devoted to fire-fighting and water-throwing the firemen may be, they are violent and reckless in their way of doing their supposed duty.

Here are six stories, basement included, of a building fifty feet by one hundred and eighty-five, and not a square foot of any floor that has not been submerged by water from the engines. The contents, as may well be imagined where a heavy stock of mixed groceries is concerned, are very badly damaged. Teas, coffees, sugars, rice, spices, nuts, tobaccos, cheese, fruits, cornmeal, canned goods—all more or less injured, some of them destroyed. But the damage by fire, or even by fire and smoke combined,

is small compared with the loss by water And with the exception of molasses in barrels, soap in boxes, and some canned goods, we cannot think of any thing that is not injured. There is, we are told, $120,000 insurance. Adjusters went to work on Monday to ascertain what the loss is and what the salvage. It will take them probably all week to determine.

MODERN BABYLON.

There was issued last month, by the County Council of London, England, a huge book of statistics of that enormous city. It gives a fair idea of the stupendous scale on which the city is run. Some of the figures are enough to make a fellow "sit up." For example, there are, inside the boundaries of Greater London 2,017 miles of public highway, and there are 74 public and private bodies which can open them at their own sweet will. Says the London Leader: "We have 181 miles of tramway, besides about 15,000 cabs and omnibuses, and 225 miles of railway.

The population of the administrative County of London in the middle of last year was estimated at 4,613,493. Since 1876 its birth rate has been diminishing, until in 1902, it was the lowest on record (28.5 per thousand). On the other hand, the death rate in the year (17.2 per thousand) was also a record low one, with the exception of that of the year before. Fifty years ago the marriage rate was 22.3 per thousand, among Londoners living, in 1902 it had fallen to 17.8. What is the reason?

Every year we get about 30,000,000 telegrams and 750,000,000 letters, and every Londoner has the choice of fifty-three theatres, forty-hree music halls, and two hundred and forty-five other places of entertainment.

The charities of London have an income of close on £7,000,000 a year—something like thirty shillings for every man, woman, and child in the country. London's hospitals make provision for 98,959 in-patients, and 1,290,838 out-patients. After spending £638,277 every year, they find themselves left with a deficit of £147,008.

About 140,000 inhabitants have to go to the rates for help, and cost their brother and sister Londoners about three and one-half millions sterling a year. Nearly 30,000 of our population live in common lodging houses. London's main drainage system comprises about two hundred and ninety miles of sewers. There were six and one-half millions of users of the public baths and washhouses last year. London, too, sends 764,026 children to school, and provides 17,000 teachers to look after them.

The municipal libraries provide about a million books, and the total number of issues last year was nearly six million. But seventy-seven per cent. of the books were fiction and juvenile literature.

FINANCIAL ITEMS.

Having already, in the autumn of 1903, purchased the business of one Cuban bank, the Banco de Oriente, in Santiago de Cuba, the Royal Bank of Canada has just completed the purchase of another, the Banco del Comercio. The Havana Post of 10th July, states that at a final meeting of shareholders of the latter bank, the assets (with the exception of the real estate which has been disposed of at private sale), and goodwill of that institution, were sold to the Royal Bank of Canada, which will take over the business on Monday, the 11th July. "The Banco del Comercio, capital $700,000, founded in 1845, and until 1898, owned by the English Company, the United Railways of Havana, confidence of the Spanish business and Regla Warehouse, Limited, has always enjoyed to a large degree the friendship and confidence of the Spanish element of Havana, with which it has done an extensive business." It is understood, adds the Post, that the general manager and other officials of the Banco will enter the service of the Royal Bank, "and that the president and others of the late board of directors will become members of an advisory board of directors, which the Canadian institution is about to establish in this island."

At St. John, on Friday last, the treasury board opened tenders for $113,500 worth of city debentures 3½ per cent. forty years to run. Of the two tenders received, that of J. Morris Robinson, St. John, private banker, was accepted. He offered 90½ per cent. The other tender was below 90 and was from A. Jarvis & Company, Toronto.

We hear of the appointment to the management of the Crown Bank branch, at Woodstock, of Mr. S. S. Fuller, who used to be manager of the Imperial at that place.

On the first of August, three new offices were opened by the Crown Bank of Canada. They are situated at Bracebridge and Comber in Ontario, and at Aylmer East in the Province of Quebec.

A REMARKABLE DEVELOPMENT.

Perhaps the most remarkable instance in recent times of the rapid development of a purely virgin region into a rich and prosperous state is to be found in the Malay Peninsula. In a communication to The London Times, Sir Frank Swettenham, since 1874 a resident British official and now the governor of the Straits Settlements, thus summarizes the facts: "In less than thirty years four small Malay States, jungle-covered, pathless, unknown, have been turned into flourishing communities, with a revenue of two millions sterling per annum, a trade of ten millions sterling per annum, three hundred and fifty miles of excellent railway, thousands of miles of roads and telegraph, great public buildings, schools, hospitals, waterworks—in fact, all the machinery of the most modern administration—with no debt of any sort, and a balance of over one and a half millions, ready to be spent on further railway extension and other works of development." Three things have contributed to this great success—the tin mines, cheap Chinese labor, and, most important of all, able and intelligent rulers. For it can hardly be doubted that if the British Government had failed to secure men to represent it who sought to understand those whom they ruled, and who made their interests their chief aim, the country would have remained practically a pathless jungle.—New York Evening Post.

LIFE ASSURANCE ITEMS.

Business men in Chicago are unanimous in commending the decision of the leading life insurance companies to require the resignation of the employee who goes on a race track, into a pool-room, or is seen in company with betting men, and it is certain that the examples set by the companies will be followed by firms engaged in other lines of business. The question with these companies is purely a business one. The employee who has become infected with a passion for gambling is apt to be a dangerous man to the employer. That is all. The decision involves no censorship of morals. But there are other forms of gambling quite as dangerous as the placing of a small bet on the favorite in the American Derby once a year, just by way of giving the annual holiday an additional zest. Here is what the defaulting cashier of the German-American National Bank of Aurora has to say on the subject:

> "I simply did what half your successful cashiers in Chicago have done. In my case the result was disaster; in their case it is success. Everything depends on the turn of the cards. Look at the case of a very prominent banker—ten years ago he had not enough money to pay a hotel bill; to-day he is a millionaire. Do you think he saved it out of his salary !"

The vice or luxury of gambling is not confined to employees on salaries. There are gentlemen, for instance, who operate in the world of *la haute finance*, in the wheat pit and in the hog market. What a pity they can't all be made virtuous!—Investigator.

While we are not authorized to name the company which advertises to-day for a Provincial Manager for Quebec and Eastern Ontario, we know that it is a prominent and respectable life office..

That family insurance is appreciated by the industrial classes in the United States appears from the number of claims paid, growing out of the disaster on the "General Slocum," which was burned on the East River. In the case

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON, ENGLAND—The National Bank of Scotland.

of the Metropolitan Insurance Company, alone, three hundred and fifty-five policies were paid as the result of this one casualty, and more claims are expected.

FIRE INSURANCE MATTERS.

The Scandinavian fire insurance companies recently held a meeting at Christiania, Norway, at which it was decided to increase by 12 per cent. all premiums chargeable on wooden buildings. Notice has since been given to the municipal authorities that unless the fire brigade service is improved it will probably be found necessary to advance rates by a further 10 per cent. The destructive Aalesund fire is responsible for the increase.

Respecting some of the Baltimore fire insurance companies, wrecked by their heavy losses in the great fire, the United States Review ascertains as follows: The Old Town Fire of Baltimore has nearly all of its claims filed, and will soon make a report to the court. The Peabody has paid 30 per cent. on account of its losses, and hopes for a further dividend of five per cent. The receiver of the Firemen's has not yet filed his report to the court. Receiver Williams, of the Home Insurance Company, of Baltimore, will not state what he expects to pay. Receiver Pennington, of the Baltimore Fire, has made his report to the court, which is now being audited. He is in hopes of paying 65 or 70 per cent.

It is after a fire which has gutted his premises, damaged all his stock, and perhaps destroyed his books that a man says to himself: "I would have done better to consider the proposal of that man who called on me a month before the fire to ask me to take out insurance which would have compensated me, in some degree at any rate, for the loss I now sustain, and must sustain, for weeks and months, by the interruption to my business."

RAILWAY ARRANGEMENTS.

There seems a general branching out just now on the part of the railways around Toronto. Not long since we chronicled the large purchases of land by the Grand Trunk near Mimico, in the western district. Now comes the report from the east that the Canadian Pacific has taken over several tracts of land on the bay point, just east of the river Don. The property, it appears, is to be used for additional yard room, as the traffic is often badly congested in that district.

In this connection, and referring to our article of last week, we remark with satisfaction that the Railway Commission has made an order that every railway train coming from the eastward along the Esplanade shall come to a stop just east of the foot of Yonge Street, and not proceed until it is signalled to do so. This in the meantime is a wise and business-like ruling. Now, let us have the over-head bridge at Yonge Street as quickly as it can be built.

◆

—It is satisfactory to know that building operations in Toronto thus far this year exceed in value and extent those of any previous year recorded. It is true that 1891, when permits were issued for larger sums for the new civic buildings, and the land boom was on, showed a somewhat larger total. Then, too, the recent conflagration caused many fine warehouses to be built, but the building of houses also exceeds similar operations in all previous years. Up to 30th July, the value of buildings for which permits have been issued this year was $3,470,483; same period 1903 it was $2,488,330; same period 1902 it was $2,304,614, and the total for seven months of 1891 was $3,018,605.

Mercantile Summary.

A fire broke out a few days ago in the temporary stationery rooms of Warwick Bros. & Rutter, Toronto, and did some $5,000 worth of damage before it could be extinguished. The loss is covered by insurance.

The Maritime Hardware Association held its annual meeting in Yarmouth, N.S., last week and elected officers as follows: President, W. H. Sterns, Halifax; vice-president, George Weldon, St. John; Executive, E. K. Spinney, Yarmouth; G. E. Smith, Halifax; George Troop, Halifax; T. C. Lee, St. John; John McAvity, St. John; John Keele, St. John.

Canada is to be represented at the series of three exhibitions to be held at the Royal Agricultural Hall, Islington, London. Confectionery and allied trades, grocery and allied trades and dairying. They will each last eight days with an interval of a week between. The material is being gathered in Ottawa and Montreal. The exhibits are being shipped direct to London on the Livonian this week.

The opening ceremonies in connection with the beginning of work upon the T. Eaton Company's new premises in Winnipeg took place last week, the first sod being turned by Mr. J. C. Eaton, vice-president of the company. The building, which will be of brick and stone exterior, is to be six stories high, with foundations providing for two additional stories later on. Contracts for the main part of the building have already been let.

It may not be altogether because of the dearth of other attractions in St. Louis that her Fair does not draw big crowds, and that it has to reduce expenses. There is a deal of economizing going on in the States: her people are not travelling or holidaying as much as usual. It is stated by Mr. J. W. Ryder, city passenger agent of the Grand Trunk Railway, that the Canadian summer resorts are doing a great deal better than the resorts in the United States.

The beginning of direct connection between Bobcaygeon and the main line of the Canadian Pacific Railway by the official opening, on July 30th, of the Lindsay, Bobcaygeon and Pontypool Railway was made the occasion of an enthusiastic demonstration in that district. The line now runs from Burketon, a station between Toronto and Peterborough, to Lindsay, Duinsford and Bobcaygeon. The line has been projected for many years, and has been aided with subsidies by both Provincial and Federal Governments. It is understood that it will be operated by the C.P.R., and that C.P.R. capital will push it through to Pontypool.

As showing that work is likely to be started very soon at the Lake Superior Company's plants at Sault Ste. Marie, we note that 1,000 men are advertised for to go into the lumber camps. They are to be employed in the woods getting out pulpwood and wood for the charcoal ovens, the sawmill and the veneer plant, which will be operated at once. Negotiations have been going on for the purchase of pig-iron and other supplies, and the steel plant will commence operations about the 15th inst. It is declared a certainty that coke ovens will be built in the American Soo to supply coke for the blast furnaces. Heretofore this has been bought at lower lake points and shipped to the Soo, entailing some loss on account of breaking and handling. The building is being placed on the American side on account of the duty on coal. The gas by-product will be used for lighting and heating purposes.

In answer to an enquiry made by a member of the British House of Commons the other day as to what number of British troops was stationed at Esquimalt and Halifax, their cost, and what contribution was made by the Canadian Government, War Secretary Arnold-Forster replied there are 362 at Esquimalt, and the annual cost was £44,200, half of which was contributed by the Canadian Government. There were 1,785 at Halifax, the annual cost being about £20,500. In this case there was no Canadian contribution.

Mercantile Summary

Mr. Robert Reford, of Montreal, was on Monday last elected representative on the harbor board of the shipping interests.

It is stated that Mr. W. Day, of Toronto, has purchased about 120,000 acres of land in Alberta with a view to colonizing it.

An Ottawa tailor in a limited way, named J. J. Owens, is reported insolvent. His liabilities are hardly estimated to exceed $1,000.

A vote was taken on Monday last of the inhabitants of Sherbrooke, Que., on a municipal lighting scheme. The vote resulted in its defeat by nine votes.

Arrangements have been completed for an international convention of the Brotherhood of Locomotive Engineers, in Montreal, from August 9th to 12th. Delegates from points all over Canada and the United States are expected to be in attendance.

At Trenton on August 1st by-laws were passed to provide $20,000 to purchase bonds of the Ontario Electric Railway, and granting exemption from taxation for ten years to the Apple and Produce Cold Storage and Forwarding Company.

The Montreal Harbor Commissioners have taken over the new grain elevator from the contractors for testing purposes, and during the next three months they will ascertain that everything about it is in proper order before finally assuming control of the structure.

It is very significant of reduced travel and a feeling of economy in the United States that twelve hundred workmen at the Pullman Car Works, near Chicago, have been laid off since June 1st because of lack of orders. Half a dozen departments of the big plant are idle.

E. E. Bent, of Sydney, N.S., who has been engaged in the grocery trade for the brief period of eighteen months, is offering his creditors 25 cents cash on liabilities of about $3,000. He is said to show nominal assets of $4,000, but mostly made up of uncertain book debts.

The report for July of the Montreal building inspector is that seventy-nine permits to erect buildings were given in that month, value $392,800; and fifty-eight permits for alterations, to cost $87,598; total value, $480,421. This is less in value of proposed structures than the previous July, which was $553,000, but the houses were fewer in number.

Late failures in Quebec City are noted as follows: F. X. Dion, carrying on a grocery as Dion & Frere, has abandoned his estate upon the demand of his mother, who is a creditor for $2,300. In 1901 he became involved through the failure of a leading broker (this tells a story), and he then compromised at 40 cents.—Oscar Coté, a contractor, has assigned, owing about $1,500 to local parties.—Louis Paradis, for a number of years dealing in cheap furniture, stoves, picture frames, etc., besides doing note-shaving in a small way, has also assigned. He is called an illiterate man, but has been credited with a good deal of natural shrewdness, and was generally supposed to be in pretty fair financial shape. He is now reported to owe about $11,000, while apparent assets will hardly exceed that amount.—An assignment has been made on demand by L. A. Robitaille, a jobber in hardware, oils, etc., who began business in 1901 on a limited capital, and who has evidently spread out much beyond the limits his means would warrant. He is said to owe about $23,000.

Mercantile Summary.

"Trade follows the flag"
May be true, but we add,
The auctioneer's rag
Follows trade when it's bad.
—Philadelphia Press.

The A. D. Gall Petroleum and Chemical Company is the name of a new corporation which has just received a Dominion charter authorizing it to extract, buy and sell oils, minerals, lumber, wood alcohol, etc. Its capital is placed at $200,000, headquarters at Montreal.

The production of pig iron last month in the United States, according to figures compiled by the Bessemer Pig Iron Association, was about 1,000,000 tons. This is smaller than for any month since January, when it was 921,000 tons. In April the production was 1,553,000 tons. About one-third of the Bessemer furnaces in the United States are idle.

The following recent failures are noted in Montreal: L. E. Gingras was to all appearance a fairly successful grocer in St. Cunegonde suburbs, but about a year ago he engaged also in a dry goods business, which has apparently been the occasion of his downfall. He has now made a voluntary assignment.—J. Lamoureux, a manufacturer of skirts and cloaks, who was burned out several weeks ago, and subsequently tried to arrange a settlement at 50 cents on liabilities of about $20,000, has now assigned.—Consent to assign has been fyled by J. Docks, fancy goods dealer, whose liabilities are put at $5,000.—J. T. Parker, doing business as the Parker Coal, Ice and Cartage Co., has gone into insolvency. He is said to show liabilities of $45,000, his wife figuring as a creditor for about $20,000. —J. E. Allard, formerly in a small way of retail business at Chateauguay, and who recently moved to Montreal, paying 100 cents on the dollar for a grocery stock in the city, has turned his affairs over to an assignee.—A small dry goods retailer in the northern suburbs, E. Jacques by name, is reported as having assigned. He was formerly of Jacques & St. Pierre, who failed in 1897.

Hormidas Carignan, of St. Maurice, Que., aged 45, and brought up as a farmer, started storekeeping in the spring of 1903, but evidently found out his mistake after a year's experience. After being sued several times, last spring he sold out to one P. Robert. He has not, however, apparently got clear of his difficulties, for he has now assigned.—J. E. Bergeron, general dealer at Jonquieres, Que., reported as insolvent several weeks ago, is offering his creditors 50 per cent. cash.—An assignment has been made by J. A. Brunelle, who opened a boot and shoe store at Lennoxville, Que., eighteen months ago. He had previously been employed as manager of the branch store at Eustis of W. Blue & Co., of Sherbrooke.—Z. P. Cormier, a prominent dealer in hats and furs at Sherbrooke, Que., is embarrassed, and offering 40 per cent. upon liabilities said to aggregate $34,600.—The failure is noted of Mrs. O. Dubrule, engaged in a small millinery and dry goods business at Valleyfield, Que. She owes about $1,500.—A. W. Couture, of Levis, Que., who succeeded his father in the grocery business about two years ago, has made an assignment, and is said to owe $1,600. —J. H. Therien, of St. Gregoire, Que., who only began business in August, 1902, with the assistance of means furnished by his wife, is reported to have become insane, necessitating his removal to an asylum, and it is said his

INTERNATIONAL EXHIBITIONS.

More and more with each one, question is made as to the desirability of international industrial exhibitions, not merely on the ground that in these later years they have become so numerous as to become tiresome, but on the more serious count that through their means valuable information is often given to foreign competitors, which they speedily turn to the detriment of the country holding the exhibition. This certainly was the case to some extent with the great initial exhibition in London at the middle of last century, for it gave the first pointers to many a foreign industry which now acts as a rival to that of the Mother Country. Many British firms now act on the assumption that they are cutting their own throats in exhibiting at foreign shows, and either send nothing at all, or else only a poor, second-rate assortment of time-honored appliances. For the first, something can be said, but surely little for the second. If a thing is worth doing at all, etc. To send a few out-of-date samples in this desultory manner is worse than not doing the thing at all, as not only does it not advertise the British manufacturer, but if it has any effect at all, it is to give a false impression, and one likely to kill what trade he may already possess. At any rate it should be remembered that progressiveness is the surest advertisement for any goods or any firm; and, even if its to-day's method be plagiarized by a foreign rival, it has always recourse to improved methods to-morrow, which is the mark of progress the world over. Thus will it still be ahead.

A NEW FISH STORY.

A well-known lawyer experienced religion and joined the church. His friends, upon learning of his desire to ally himself with active religious work, decided that there was one point upon which he might still improve, and they talked to his pastor about it. Said they in effect: "So-and-so is a fine man in every way, but he certainly does fail to stick closely to the truth when he tells about his fish catches, and we wish you would caution him about it."

The minister did his duty, and the lawyer acknowledged his carelessness. "That is my besetting sin, parson, and hereafter I'll be careful. I shall buy a pair of scales and verify every statement I make by them."

Not long afterward he was blessed with a son. In due time there was question about the weight of the boy. The fond mother spoke up and said: "Take father's new scales and weigh baby in them."

The nurse and the whole household crowded around, unable to believe the registered figures, which told them that the new baby weighed precisely fifty-three and a half pounds.—New York Times.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

◆

—Commercial Intelligence comments upon the fact that in the North-West most necessities that one purchases cost more than similar goods in the East, but that is only to be expected owing to the larger distance they have to be transported, the high rent shopkeepers have to pay, and the more liberal scale of wages. In Winnipeg, and for that matter in any city a large distance from the coast, the excessive freights are a standard argument. As an illustration of the length to which this argument is sometimes carried, Mr. L— tells a story of a gentleman who went into a men's outfitter's and priced four ordinary collar buttons. "Those are sixty-five cents," replied the clerk. "No wonder the departmental stores of Toronto can sell goods here when you charge sixty-five cents for four collar buttons." "Oh, well," remarked the clerk, deprecatingly, "the freight rates are so high out here."

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFETIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World"s Fair, and consult Grand Trunk Agents for further particulars.

MONTREAL MARKETS.

Montreal, 3rd August, 1904.

Ashes.—The market for potash is easier, and $5.85 per cental is probably the outside limit that could be at present realized for firsts; seconds are quoted at $5.30 to $5.35. The great scarcity of pearls is still unrelieved, and for these $8 would be paid.

Cements and Firebricks.—There has been a little better demand for cements the last week or so, but the total of business doing is still quite moderate. We quote Belgian cement at $1.70 to $1.90; English ditto, $1.95 to $2.10; firebricks, $16 to $23, as to quality.

Dairy Products.—Last week's shipments of cheese from this port were 42,000 boxes short of the corresponding week in 1903, the figures being 57,824 as against 99,817, and the total shortage on the season compared with last thus far is 306,000. Butter shipments, however, are of a more satisfactory character, and an aggregate of 20,562 packages was shipped last week, the figures of a year ago being 8,124 packages. The gain on the season thus far has been just about 50,000 packages. The cheese market firmed up a shade after last writing, which is hard to account for in view of the very large visible supply, and the continued falling off in exports. Fine Westerns are quoted at 7⅞ to 8c.; fine Townships, 7⅝ to 7¾c.; fine Quebecs, 7½ to 7⅝c.; ordinary stock, 7 to 7¼c. For finest Townships creamery butter the quotation is 18¼ to 18½c.; Quebecs, 17¾ to 18c.; Western dairy, 13½ to 14c. per pound.

Dry Goods.—There has been no increase in the general movement of goods out of warehouse as yet, and the volume of orders coming to hand is still quite moderate. Collections, while fair, are not up to the returns at this date a year ago, and a certain proportion of renewing by retailers is expected on payments coming due the 4th. Apart from the general stiffening in woolens, there is nothing new in prices.

Groceries.—The sugar market conket continues an active and a strong one. Upon the strength of telegraphic advices from New York this morning advising an advance in refined sugars of 10c. in bags and 5c. in barrels, the local refiners have given notice that quotations have been put up 5c. a cental on all grades, making standard granulated now $4.55, with soft grades ranging from $3.95 to $4.35. The demand during July was an active one. Some moderate importations of foreign sugars, mainly Scotch and Russian, are reported. Advices from Patras report opening prices for fine Filiatra currants at 14 to 14s. 6d.; the first steamer is expected to leave Patras about the 1st prox. The crop of Valencia raisins is estimated at about 25,000, figures slightly below the average, but prices are hardly expected to exceed those of last year, as prices of California raisins

2

are easy. California prunes are also a little lower, but dried apricots and peaches are firmer.

Hides.—Lambskins are again advanced to 55c. each. Receipts of calfskins are about at an end for this season. Business in beef hides is quiet, but quotations are steady at 9c. per lb. for No. 1.

Leather.—Some of the large shoe factories are now turning their attention to the preparation of spring samples, and the local demand for leather is not very brisk, but manufacturers report good orders from Britain for sole, prices of which tend to stiffness, some advance being reported in American markets.

Metals and Hardware.—Business in these lines is even quieter than it has been during July, and little improvement is looked for until the end of the month. Foundrymen, etc., are not very busy, or enquiring much about iron, and the unsettled plumbers' strike affects the demand for a good many lines of metals and metal goods. The general tone of foreign advices indicates an easy tendency in values of iron manufactures, but no special changes are noted. Bar iron is steady at $1.70 to $1.75; boiler plate, $2; Canada plates, $2.25 to $2.30 in a jobbing way; tin plates, $3.65 for cokes, and $3.90 for charcoals of standard brand and weight; galvanized sheets, $4.30 for . Queen's Head and equal; Ternes, $6.25; galvanized Canadas, $3.90 to $4 for 52 sheets. Ingot tin is firm at 30 to 30½c.; copper, 13½c.; lead, firmer at $3.20 to $3.25; spelter, $5.75; antimony, 7 to 7¼c. per pound.

Oils, Paints and Glass.—Business is dull in character at the moment, but general expectations seem to be entertained of a good fall trade. In values no noteworthy changes are reported. Linseed oil continues easy at 43 to 44c. for raw, and 46 to 47c. for boiled. Turpentine is steady at 83c. per gallon for single barrels. Fish oils are dull and neglected. White leads are still being much cut, and while $4.50 is the nominal figure for chemically pure, sales are put through, it is said, at lower figures. Glass is easy at $3.10 to $3.20 for first break.

◆

TORONTO MARKETS.

Toronto, August 4th, 1904.

Chemicals, Drugs, etc.—An average trade being done is the report of the wholesale druggists. Prices keep steady. Opium is moving a little more quickly, but quinine is dull. There is little in the situation worthy of special attention. A New York market report says chemicals are active, some lines being firmly held. Peppermint oil and golden seal and seneca roots show a tendency to go upward. The recent speculative movement in opium seems to have receded. The demand for quinine shows no increase, but the undertone of the market is firm.

Dry Goods.—Considering that this is the slack season in the dry goods trade,

"WE WILL BOND YOU."

Corporate bonds are more reliable and in every way more desirable.
Only where it is indicated that men possess integrity of character can they obtain a bond in a surety company.
Regard your name as a bondsman as an encumbrance on your property.
Personal sureties are subjected to questions as to the worth of the bond filed which they would rather not have made public.
Once a corporate surety bond has been used, no further use for personal surety can be found.
Rates of premium on surety bonds are always moderate.
A surety company is required by law to carry reserve against its risks and is possessed of large resources.
The UNITED STATES FIDELITY AND GUARANTEE COMPANY executes bonds covering all positions and trusts.
Existence of surety companies makes it unnecessary for the employe to ask friends to become surety for his integrity.

Surety companies protect the home and family.
Unlike personal surety, the bonds issued by surety companies can always be collected.
Resolve to never have your name used as a bondsman.
Embarrassing positions may be escaped by not becoming surety on a bond nor asking others to do so.
This Company does not surround the person bonded with annoying restrictions.
You cannot afford to incur obligations by asking friends to become surety for you.

Head Office for Canada,
6 Colborne Street, Toronto
A. E. KIRKPATRICK,
Manager.

and that many of the travellers have been taking their vacation, general business may be described as fairly good, and payments are quite satisfactory, except to some slight extent from the North-West. Staple goods are held very firmly, especially woolens, and high prices for the latter, as well as for the raw material, are recorded in all parts of the world.

Flour and Grain.—Flour is firmer, and ninety per cent. patents have advanced to $3.80 in buyers' bags, eastern or western freights. Manitoba flour is 20c. higher. No change has taken place in oatmeal. Bran and shorts are a little higher, and held firmly. Wheat is 1 to 2c. higher, and very firm at the advance. Barley is also in better demand at an advance of from 1 to 2s.

Fruits and Vegetables.—This is the busiest period of the year for the fruit merchants, and this year is no exception to the rule. Early apples are becoming more abundant in the market, and sell at about 25 or 30c. per basket, not being, as a rule, of very fine flavor. Cucumbers and tomatoes are easier. Raspberries and other domestic fruits keep pretty steady. The following are the usual price quotations: Cherries, per basket, $1 to $1.35; raspberries, 7 to 8c.; Lawton berries, 15c.; gooseberries, per basket, 50c. to $1; red currants, large baskets, 50 to 65c.; black currants, $1 to $1.15; huckleberries, per basket, $1 to $1.15; peaches, per basket, 40 to 75c.; apples, per basket, 30 to 35c.; oranges, California Valencias, $4 to $4.50; lemons, Messinas, $3 to $3.50; Sorrentos, $3 to $3.50; Verdillis, $4; St. Nicholas, $4; bananas, bunch, $1.25 to $2.25; pineapples, Florida, per case, $3.50 to $4; Havanas, $3 to $3.25; watermelons, each, 20 to 35c.; cantaloupes, small, per box, $2 to $2.25; per bush, hamper, $2 to $2.25; California plums, per box, $1.25 to $2; pears, $1.75 to $2.25; peaches, $1.50 to $2; Elberta do., 6-box case, $2 to $3; Canadian peas, per basket, 35c.; tomatoes, 75c. to $1; cucumbers, per basket, 20 to 30c.; potatoes, per basket, 30 to 35c.; beans, per basket, 25 to 30c.; green peppers, per basket, 50 to 75c.; new potatoes, per bush., 90c. to $1.05; Egyptian onions, per sack, $1.50; per basket, 40c.; egg plant, per basket, $1.15 to $1.25; Baltimore green corn, per doz., 30c.; Southern tomatoes, per case, $1 to $1.10; do. New Jersey, $1.75 to $2; cabbage, crates, $1.25; Kalamazoo celery, per doz., 45 to 50c.; Canadian celery, per doz., 60 to 75c.; do. pink, 50 to 65c.

Hardware.—A fair volume of business is passing in seasonable lines of hardware, and prices make but little change. A good demand is to be noted for nails, screws and building utensils in general. Metals are moving slowly, but, though there is a feeling of easiness in pig iron, they keep fairly steady in price.

Groceries.—While there is no special feature to record, business conditions, generally speaking, may be described as good. The movement in sugar, which keeps firm at the recent advance, is very active. Canned fruits are very strong, especially apples, which have been advanced to $2.20. In teas a somewhat quieter feeling prevails, but no particular changes are probable.

Hides, Skins and Tallow.—The market for hides is very firm in the face of slight supplies and good demand. Sheepskins and calfskins are also in good demand and firm. Tallow keeps firm at last week's figures.

Leather. — Locally, trade is fairly good, but at outside points complaint is still heard as to slowness. Prices are unchanged, but an easier feeling is discernible.

Provisions.—Dairy butter is still coming forward in liberal quantities, but as the quality is only middling, the demand is not very vigorous. A steady market prevails for cheese. Eggs are still very firm, and can scarcely be obtained for less than 17c. or more. A fair quantity of poultry is coming forward, but the demand is good. For smoked meats the demand is very good, as is usual during the hot weather. Stocks are light, and prices should continue firm, though in some cases recently they have been cut.

Wool.—The quantity of wool coming forward now is larger, but prices asked are higher, so that not so much business is passing as might be expected. There is considerable divergence between the views of buyers and sellers. The latter point to the high values attached to wool all over the world, and appear sure they will eventually get the prices asked. For pulled wools the demand is very active, but supplies are small.

One of those women who have antipathy for tobacco entered a street car the other day and inquired of the man sitting near her, "Do you chew tobacco, sir?" "No, madam, I do not," was the reply, "but I can get you a chew if you want one."

La Compagnie d'Eclairage de Saint George, headquarters at St. George, P.Q., has been incorporated under Quebec laws. It will produce electricity, furnish light, heat and motor power.

A serious fire in the wholesale section of Montreal on Wednesday night last, did damage to the following premises: J. M. Taylor & Sons, produce merchants, loss, $15,000; insurance, $4,000; W. D. Stroud & Sons, tea merchants, $25,000, fully insured; Monette & Fortier provision merchants, $2,000, insured.

It is stated that several of the most prominent breeders of horses and cattle in Canada are visiting England, or have recently returned from the trip, undertaken for the purpose of procuring stock for show at the Canadian National Exhibition, Toronto, August 29th to September 10th. The exhibits of these gentlemen, when combined with the hundreds of other entries in all classes, are likely to complete the finest display of horses and cattle ever seen in Canada. Among those whose direct and recent importations will be shown are: Robert Beith, M.P., of Bowmanville; Thomas Graham, of Graham Bros., Claremont; J. M. Gardhouse, of the Highfield stables, and William Smith, ex-M.P., of Columbus. Among the cattle breeders, Hon. John Dryden, Minister of Agriculture, and Robert Miller, of Stouffville, will show, it is said, for the first time their recent purchases in England.

Canadian National Exhibition,

1904. TORONTO, Ont. 1904.

August 29th to September 10th.

Largest and finest exhibits of Canadian manufactures, agricultural products, live stock, etc., etc., ever shown. New buildings, improved facilities and greater variety of attractions than ever.

"BLACK WATCH BAND"

The band of the "Black Watch" (the famous 42nd Royal Highlanders) will attend the Exhibition, by permission of his Gracious Majesty the King and officers of the Regiment, and will play three concerts daily throughout its entire course.

THE RELIEF OF LUCKNOW

The grandest pyro-military display ever seen in Canada will be presented before the Grand Stand each evening, with hundreds of performers, brilliant costumes, gorgeous pyrotechnic setting, and assisted by the pipers of the "Black Watch."

SPECIAL ATTRACTIONS

"**Dare-Devil Schreyer**" in his leap from a bicycle 108 feet into a tank of water; **The Bickett Family**, world-famous aerial acrobats; **Winschermann's Wonderful Trained Bears**; **Adjie's Troupe of Lions**,—the most remarkable group of trained animals in the world, and many other acts of equal merit.

Special Railway Rates.—Ask your Station Agent for Particulars.

Remember the Dates, AUGUST 29th to SEPTEMBER 10th.

How the
Royal Automatic
Smoke Preventer
and Fuel Saver
Staff Are Rushed.

Our men are working until midnight almost continuously throughout the week, having just completed twenty-five orders in the month of July alone, and among the shrewd business firms of Toronto that are recently having their plants equipped are the Polson Iron Works, the Freyseng Cork Company and the Dominion Brewery; besides we had to increase our staff two extra travellers in answer to a number of inquiries from outside places. If you wish to have your plant equipped before October or the busy season kindly let us hear from you at once as we consider it a pleasure to give any information regarding economy in cost of power.

Royal Automatic Smoke
Preventer and Fuel Saver
Company, *ROOM "Z,"*
Confederation Life Bldg.,
TORONTO, Ont.

The Copper King group of mines at Cherry Creek, B.C., has been sold by A. N. Gray, to the owners of the Tyee Mine on Mount Sicker, who will develop the property on an extensive scale, the ore being treated at the smelter at Ladysmith.

◆

BRITISH AND FRENCH WORKMEN.

M. Jean Périer, French consul in London, makes a very interesting comparison between the English and French artizan. "The English workman," he says, "is intelligent, very anxious about his interests, but nevertheless a great lover of order. He is generally very conscientious in the execution he undertakes to do, very skilful in the management of large machines, but a little heavy in mind and body, and is becoming more and more despecialised in consequence of the use of machinery. He is very rarely an artizan workman, not very inventive, and rarely qualified for minute, artistic and finished work. On the contrary, if the French workman has not all the qualities of his English comrade, he is particularly quick in mind and body, very ingenious, and of great manual dexterity; endowed with considerable imagination and frequently with fine artistic taste. The French workman is much less despecialised than his English comrade; and in addition to this, the working classes of France have for centuries reckoned among their number a large proportion of real artizans, while France is still one of the industrial countries of the world which possesses the greatest number of little industries which produce those little goods known as 'Articles de Paris.' Thus then the British and French workmen differ much from each other, and consequently compete with each other very little as regards the products of their labor. It is quite the contrary when one compares the British workman with his American, German, and Belgian comrades, who, doing the exact kind of work, making the same kind of articles, are formidable rivals, since by their work they aid in rendering the production of their countries antagonistic to those of the United Kingdom."

THE PORK PACKERS' STRIKE.

The Chicago packers assert that their difficulties with regard to the strike are gradually being overcome. On Monday some 78,000 head of live stock were received, an increase of 59,000 compared with that day in the previous week. The big packers bought 8,000 cattle, 13,000 hogs, and 10,000 sheep during the day. Before nightfall 80 per cent. of these purchases had been slaughtered. Some 500 car loads of fresh meats were shipped one day from the stockyards, and of this number 400 cars were loaded and shipped by the firms affected by the strike. These shipments were consigned to all parts of the world, eighty car loads being billed to Boston for export. These shipments followed 280 car loads of meat sent out by the packers on Saturday, and represent, it is said, only a part of the business that is going on in spite of the strike. Many of the strikers have already returned to work, especially among those who quitted sympathetically.

Every PLANET blank book is perfectly flat opening—none others are made.

No ruling TOO intricate.
No binding TOO elaborate.

Our BUFF Linen LEDGER Papers are easier on the eye than any other shade. Send for samples and quotations.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular of July 30th say: A reactionary tone prevailed in the stock market during the greater portion of the week—the result of profit taking and selling by traders on the short side. As a consequence, the extremely optimistic views held in some quarters became somewhat modified, and market opinion was more evenly divided. There is, however, a substratum of confidence based upon the splendid crop situation that holds the market impervious to all serious attacks from speculative sources. Another week of excellent growing weather has been experienced, increasing the promise for cotton, corn, wheat, oats, hay, potatoes and other crops, and

diminishing the chances of injury. Only one more month remains in which damage can be done. Drouth is now the single serious possibility. This is the key to the situation, and as this fact becomes more evident the confidence which it begets must become more pronounced. The farmer, the merchant, the railroad manager, the manufacturer and the banker each in turn is influenced by such considerations. Their first effect is a more hopeful sentiment. This sentiment soon expresses itself in

action; then deferred enterprises are taken up, orders are placed and the whole machinery of commerce and industry is set in motion. At the same time there is absolutely nothing in the situation to warrant extravagant hopes.

The probability of gold exports has excited some concern. Sterling exchange seems to have advanced partly on account of operations connected with the Japanese and Cuban loans and partly owing to short sales. No anxiety is necessary over gold exports. As to the future of the stock market, it seems hardly likely that the bulls will readily relinquish their hold so long as crop prospects continue so brilliant. Strong leaders were at the bottom of the recent rise, and do not seem to have entirely withdrawn their support, especially as stocks are not sufficiently scattered to weaken the technical situation. All indications point, however, to a fluctuating market.

◆

—Speaking of the idiosyncrasies of the English speech, the Nashville American wants to know if there is a better example of them than the fact that when you "best" a man you "worst" him, The answer is, No, except, perhaps, that when a man is "cleaned out" he's "all in."—Pittsburg Gazette.

◆

—The Winnipeg Commercial has a list of good business openings in the West, which it is adding to all the time. In last issue the list was: Bakery at Penhold, Alta.; bank at Penhold, Alta.; blacksmith at Westwood, Man.; brickyard at Penhold, Alta.; brickyard at Maple Creek, Assa.; druggist at Darlingford, Man.; furniture store at Penhold, Alta.; harnessmaker at Renton, Man.; harnessmaker at Brookdale, Man.; harness merchant at Penhold, Alta.; jeweller at Renton, Man.; millinery shop at Penhold, Alta.; woodworking store at Penhold, Alta.

INSTITUTE OF ACTUARIES

STAPLE INN HALL, LONDON.

COLONIAL EXAMINATIONS.

NOTICE IS HEREBY GIVEN :—

1. That the Annual Examinations of the Institute of Actuaries will be held in the Colonial centres, Melbourne, Sydney, Adelaide, Brisbane, Wellington, Montreal, Toronto, Ottawa, and Cape Town, on Friday, 14th April, 1905, and on Saturday, 15th April, 1905. If necessary the Examination will be continued on Monday, the 17th, and Tuesday, the 18th April, for Part IV.
2. That the respective Local Examiners will fix the hours of the Examinations, and inform the Candidates thereof, and of the address at which they will be held.
3. That Candidates must give notice in writing to the Honorary Secretaries in London (England), and pay the prescribed fee of one guinea, not later than 31st January, 1905.
4. That Candidates must pay their current annual subscriptions prior to 31st December, 1904.

T. BRADSHAW, Supervisor in Toronto.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

THE MARKETS FOR FOODSTUFFS.

Wheat has for some time past been a very strong feature in all the markets of the world, but this week it has made what may almost be called phenomenal advances. In Toronto it went up 6 to 7 cents during the six days, and the end mav be not yet, though already the dollar mark has been reached and passed. The ways of looking at the price of wheat seem to be changing under the new conditions of things which no doubt now prevail. For many years an abundant surplus was looked upon as a kind of normal condition of the trade, any deficiency one season being sure to be made up for and more by next season's plenty. With the development of other countries, however, more especially (in this connection) with that of the United States, a vastly increased home consumption has resulted, to such an extent that even in spite of increased acreage the quantity of grain available for export has become less and less. Instead, therefore, of normal surpluses, normal deficiency seems now to have become the rule. American exports of wheat last year dropped 40 per cent., yet at the end of June last the total stocks amounted to nearly 9,000,000 bushels less than in 1903, and 21,000,000 less than in 1902 while the requirements of importing countries remained as high as ever. If this new theory, which finds good support, should prove to be true, high prices for wheat will prevail until more immense tracts of land are put into cultivation.

There is a decidedly better feeling prevailing for pork products, and advances are registered in a number of lines. Still better prices are anticipated. Some packers report stocks of some articles, especially hams, to be in small compass. Stocks of long clear are also becoming small owing to the large export shipments.

For creamery butter the improved export demand has had the effect of strengthening the market in this country. During the week prices advanced 1c. per pound. The supply, however, continues free for this season of the year. Some anxiety is expressed by a few lest the improvement in British markets may cause holders here to keep prices so stiff as to affect the demand. While so far prices have not reached an excessive point for this time of the year, yet caution is urged. Dairy has not shown much improvement, though dealers anticipate a keener demand.

The cheese market is now very firm indeed at the recent appreciable advance in values. Some anxiety is expressed at this turn in the wheel by some who believe it is the result of manipulation. They point to the large visible supply, and ask how is it possible to maintain prices in the face of this and of the apparently dull condition of trade across the ocean. Contra, it should be remembered that exceedingly dry weather for some time past is reported from Great Britain, which would affect adversely the home supplies; also, that the consumption of cheese is very large. Under these circumstances it seems not unlikely that, though the make be quite large, the consumption will equal it.

The prices for eggs remain firm. Receipts, however, are increasing, but the loss "off" in bad eggs is still heavy. Little or no export enquiry is noted, Canadian prices now having reached beyond an export basis.

THE CROPS.

Prospects for the Western crops still seem fairly favorable. Our correspondent in Winnipeg telegraphed at noon yesterday as follows:

"Weather throughout North-West generally cool, with plenty of rain. Some districts report need of rain and warmer weather to hurry ripening, but these conditions are only local in extent. The general tone of advices is favorable. Sufficient rain has fallen throughout the country to keep grain in good shape. At several points the grain is turning yellow, and harvest will commence about the 20th. Good yield generally expected."

The last bulletin issued by the Territorial Department of Agriculture states that owing to the unusual amount of moisture in the ground last spring the area of wheat was considerably lessened, but the area of the oat crop is greatly increased in the eastern portion of the Territories. Latterly the weather has been dry and hot, affecting adversely crops on light lands, stubbles and poorly-farmed sections. Indications favor the idea that while a few districts will have yields approximating those of last year, the general yield of the Territories as regards wheat and oats will be below the average. There is a marked decrease in the area devoted to flax.

JULY FIRE WASTE.

The month just past shows a record which, in face of the enormous fire waste during the first half of the year, is, so to speak, a cause for gratification. That is to say, it points to a reduction in the loss compared with the month of July last year, as the following figures compiled by the New York Journal of Commerce will serve to show:

	1902.	1903.	1904.
January	$15,032,800	$13,166,350	$21,790,200
February	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,212,150
April	13,894,600	13,549,000	23,623,000
May	14,866,000	16,366,800	15,221,400
June	10,245,350	14,684,350	10,646,700
July	10,028,000	12,838,600	11,923,200
Totals	$97,133,850	$96,593,550	$184,457,650

Nevertheless, the total loss for the year 1904 up to the end of July has been nearly double of that during a similar period of last year.

MARINE INSURANCE ON THE LAKES.

The volume of marine insurance on the Great Lakes is not so great this year as last. In part this arises, of course, from the strike of the Masters' and Pilots' Association, which kept practically the whole grain and ore fleet of the lakes out of commission for the best part of two months this spring. During that time of detention the marine underwriters received only harbor rates on vessels and steamers; but for remainder of the season, say from 15th June onward, they are getting a fair aggregate of business, hull and cargo. Rates on both steel and wood hulls, sail or steam, have not gone lower, but are practically the same.

It is to be remembered that the transportation business on the lakes in both grain and ore is less than usual, certainly less than expected this season. A good deal of grain went forward by rail during the strike, and the possible cargo business of the American boats for the rest of the navigable season is lessened by just this much. The Canadian boats were gainers by the strike, for while it lasted they were kept pretty steadily employed. But now the quantity of grain to come forward appears comparatively light. Thus far in the season but few losses have been suffered; indeed, perhaps no recent season has shown so little to complain of in this respect. Canadian hull risks go largely to the other side of the Atlantic. Indeed, lake business makes an agreeable contrast with St. Lawrence and Gulf marine business nowadays.

THE CANADIAN NATIONAL EXHIBITION.

Judging from present indications, the National Exhibition, now the chief looked-for event of the near future in Toronto, will have more attractions and be on a larger scale than ever. One part of the Fair which is to be made a special feature this year will be the Process Building, and there will be a much greater variety of goods shown than last year. It is the wish of the management to make a very thorough classification of the various sections so as to make each exhibit complete in itself. It is also worth noting that the Dog Show, the Horse Show, the Cat Show, the exhibit of poultry, and all the branches of live stock will be more fully represented than at any previous exhibition. Judges who are among the most famous in the world are coming from England and the United States for judging in this department, while every effort is being made by the leading stockmen of Ontario to produce exhibits of the highest class.

HALIFAX EXHIBITION.

Rather more than the usual interest is being taken in the Provincial Exhibition, to be held in Halifax from September 7th to 14th, inclusive. A new feature, which should be of value from an educational standpoint, will be a series of lectures on agricultural subjects which are to be delivered within the Farmers' Pavilion. Among the speakers will be Dr. James Fletcher, who will make an exhibit of grasses, and deliver addresses on the same; F. W. Hodgson, who will speak on live stock topics; A. P. Ketchen and William Smith, of Columbus, Ont. This new departure will be carried on under the joint auspices of the Nova Scotia Exhibition, the Dominion Department of Agriculture and the Maritime Stock Breeders' Association. The exhibition throughout will be strong in the usual features, although the early date on which it is held may render the agricultural and horticultural exhibits less complete than would have been the case later in the season.

The Halifax Board of Trade and the Nova Scotia branch of the Canadian Manufacturers' Association are pressing the claims of Halifax for the Dominion Exhibition for 1905. It is understood that the Boards of Trade throughout the Maritime Provinces will support Halifax in the matter, it being contended that the time has come when the Dominion grant of $50,000 for this Exhibition should come to an eastern centre. The objections to holding a Dominion Exhibition so far away from the great centres of Canadian population and industry are apparent, and no doubt the Maritime Provinces will require to put up a stiff fight in order to capture the event.

REMINDERS FOR EXPORTERS.

A recent report issued by the Trade and Commerce Department includes a series of statements from Canadian trade agents in Australia, Great Britain, the West Indies, Norway and Sweden, giving their suggestions as to how to increase and maintain Canadian export trade. The statements naturally vary with the different conditions in several points but there are a few points on which emphasis is placed in several of the reports, and to these it is worth drawing attention. For example, Canadian exporters are reminded that buyers abroad want orders acknowledged by return mail. They want goods up to sample. When a trial order is given a Canadian firm, and the latter responds by sending along a consignment of something else "just as good," it becomes very hard to secure a re-order. It is suggested that Canadian exporters should combine and send out agents to personally canvass for business in Australia and other markets we are trying to cultivate. One of the agents in Australia declares that the establishment of a Canadian bank in the Commonwealth would be a great stimulus to trade between that colony and Canada. All exchange has now to pass through London, and the result is endless bother. He says the Canadian bank in Australia would find plenty of business to pay good profits on the investment. All the agents call on Canadian firms to furnish prices free on board on orders received from abroad. The freight on shipments from interior points in this country to Australia, for example, is the largest item, and the man at the other end does not know how much to figure on for the cost of transport. If our people are thoroughly alive to their own interests they will find out the freight rates themselves, and then offer price quotations on their goods laid down in Melbourne or Sydney or Manchester or Leeds, as the case may be.

NOVA SCOTIA STEEL AND COAL CO.

The statements which appeared in last issue respecting the standing of the Nova Scotia Steel and Coal Company having been called in question, it is only fair that the company's side of the case should be presented to our readers. It is pointed out that while the sections into which the company's property is divided are correct so far as they go, the inferences drawn are unfounded. For instance, it may be true that the most profitable department of the company's business lies in Sydney Mines, owing to the extraordinary ease (compared with other great iron centres) with which the raw materials—coal, ore and limestone—can be assembled there. This circumstance, however, does not necessarily mean that other departments are unprofitable. With regard to the closing down of the furnaces at Ferrona and the coal mines in the same vicinity, it is claimed that this is but the carrying out of a policy which has been in the minds of the directors from the start. The usefulness of these old mines having been outgrown and the plant having become obsolete, it would have been mere foolishness for the company to stand in its own way by refusing to develop other and more durable opportunities simply because this would mean the abandonment of earlier propositions. As to the claim that the best portion of the iron areas in Newfoundland had been those sold to the Dominion Steel Company, friends of the Nova Scotia Company hold that, even this being so, the latter still have as much ore in sight as they supposed at the time of reorganization, and this will be sufficient for many years. With reference to the crux of the writer's contentions, namely, that the directors are absolutely unwarranted in declaring such large dividends, this may be a matter of opinion, but those who hold a contrary view justify themselves by the fact that the company, from its earnings of last year, after providing money to pay all dividends, was able to carry forward the sum of $300,000.

We have been unable to follow up the enquiry as rapidly or fully as we would have desired, but present the above—the other side of the picture—in the meanwhile.

A FEW FACTS ABOUT JAPAN.

Now that so much attention is being directed to the war between Russia and Japan, and that the lesser combatant has shown such unexpected prescience and skill in the art of war, it is natural for people to ask, in view of the size of her antagonist, can Japan keep up the pace? What resources has she? We know that but few years have elapsed since this people joined the ranks of civilized nations and entered with eagerness upon modern industry, invention, and commerce. And we also know that the area of Japan is restricted in proportion to its population, which population is quite rapidly on the increase. It numbered 33,000,000 thirty years ago, and is 46,304,000 now. There are thirteen millions additional to feed, therefore, and it is still a problem how to feed them. But something was begun in the way of an industrial revolution as far back as 1872, and to-day Japan is, in addition to her long-accustomed products, turning out manufactures which seemed very unlikely three decades ago.

The revenues of the empire have more than quadrupled in that period. In 1873 the public revenue did not much exceed 50,000,000 yen, while for the current fiscal year (1904-5) the estimated revenue is in excess of 229,000,000 yen. The expenditure for this year, naturally a heavy one by reason of the war, is estimated at 223,181,000 yen (say about $111,590,000).

Some facts illustrating the country's material growth are given in a recent issue of "Engineering." That magazine informs us that at the end of 1903 the Japanese mercantile marine consisted of 1,088 steamers, of a gross tonnage of 657,269, and of 3,514 sailing vessels, of a gross tonnage of 322,154, in addition to Japanese junks. Here is a modern tonnage of more than a million. What the junks amount to we are not told.

A fair instance from which to measure the modern development of this newest of "First Class Powers" is afforded by the statement with respect to railways within it. Not until 1872 was the first railway completed; it was eighteen miles in length. At the present time, "Engineering" says, there are 1,344 miles of State railways and 3,150 miles of private railways in operation, besides 852 miles under construction. Five thousand odd miles is a tolerably good network of railways when we consider the size and the nature of the country. But these railways are well conducted, and they pay. The larger ones yield dividends of ten and even twelve per cent.

In any attempt to measure the resources of Japan, material or moral, account cannot but be taken of the loyalty of the people. Their devotion to their country is passionate in the extreme; and this explains the spirit and tenacity with which her soldiers attempt seemingly impossible tasks or persist cheerfully in military movements in the plain face of death. Such courage as this is different from the dogged, immobile resolution of Russian infantry, which, in the Crimea, as Kinglake described it, while it held them from retreating, appeared to furnish them with no impulse to forward movement. The industry and thrift of the Japanese are another valuable asset of the nation. Informed as it is by intelligence, the outcome should, in time of peace, be material prosperity. But war is a terrific waster of resources, and if the stubborn pride of Russia will not allow her to make concessions that would result in peace, sympathizers with Japan must look to see her "bleed white" before this cruel war is over.

MR. CHAMBERLAIN'S CAMPAIGN.

Mr. Chamberlain's campaign seems to prosper. At any rate he himself has returned to the fray with all his old-time vim and perseverance. Speaking at Welbeck the other evening before what is described as an immense gathering composed largely of agriculturists, he told them that he wanted to extend to them an advantage similar to that which the Government proposed for the manufacturers. As intimated in former speeches last year, the plan he proposes is to levy a two-shilling duty on corn, one on flour sufficient to encourage its milling in Britain, and a 5 per cent. duty on meat, dairy produce, milk, poultry, eggs, etc. This plain statement of his position must be a severe blow to the absolute "free-fooders," who may have fondled themselves with the belief that, Mr. Chamberlain temporarily in the background, this, his ultimate ambition, might be shelved permanently from the definite scheme which, no doubt, will be presented to the people by the leaders of the Imperial Government at the earliest fitting opportunity.

Without a doubt Mr. Chamberlain has logical force behind his proposition. The expressed intention of his proposed fiscal reforms being to tie the Imperial bonds tighter by a union of interest and sentiment, in what better way can he carry out this purpose than by taxing imports of wheat and other foodstuffs and allowing a discount on this tax to colonial producers. In no other branch of colonial, at any rate of Canadian, trade would the advantages to ourselves be so conspicuous or so immediate.

And looking at this matter from another standpoint, why should food be allowed to enter the United Kingdom free and other products be taxed? Not surely because the British farmer is more prosperous, or has an easier path as a business man, or enjoys any special advantages compared with other classes. On the contrary, it is his path into which many of the obstacles of others have been dumped; it is his injury which often has been the convenience of those in other walks of life. Cheap food has been made a veritable idol; but while, no doubt, its importance in a country situated like the Mother Country is difficult to over-estimate, it is a question whether in obtaining it too much else has not been sacrificed. There are many anomalies perpetrated by a people constantly in search of this magnum opus of cheap food. Free Trade Britain is by no means a truly free trade country; and it is in articles used for food that its indisposition to import freely appears more prominently. Moreover, the dictum of even high protectionists on this continent that articles which cannot be produced in the country importing them should be allowed to come in free is reversed, and the opposite policy worked upon. For example, wheat and dairy products, which can be produced largely in Britain, and would be much more so under a system taxing the foreigner, are allowed to come in absolutely free. Tea, on the other hand, which cannot be grown in Britain at all, is heavily taxed, while all the time the fellow-Briton across the sea is growing it and suffering by just that amount of duty. "Their friends they smite, their foes they stroke."

And simultaneously with the ruin of British agriculturists and the triumphantly free importation of foreign foodstuffs—so that food shall be "*cheap*"—the Englishman is groaning under a weight of taxation which recent reports say since the Boer war has become simply terrible. If, then, the money has to be raised in any case, and the average man has to pay out a certain proportion of his income in taxation, the query presents itself, Why this extraordinary antipathy to paying it out on food? Especially pointed does this question become when it is realized that an appreciable part of the enhanced price—if such, indeed, were to result at all—would be paid by the foreigner. Many people in Great Britain under Chamberlain's influence are now saying, Free trade and a cheap market for what we buy are all very well, but why do absolute harm to ourselves in order to oblige disobliging foreign nations?

THE REAL VALUE OF FIRE-PROOF CONSTRUCTION.

The Chronicle, of New York, sets forth in a striking way the real value of fire-proof construction, even though it may fail to stop the ravages of a conflagration absolutely. "Many were pessimistic about fire-proof construction after the buildings of this type had failed to stop the conflagration in Baltimore; but a comparison with the big fire in Toronto affords an opportunity to measure the value of the fire-resisting qualities of these buildings. The frames of the now world-famous fire-proof buildings in Baltimore were all standing, when the editor of the Chronicle visited that city the second morning after the fire; and the opinion then expressed that all of them will stand has been fully confirmed. The loss on these buildings has been from 40 per cent. to somewhere near 80 per cent. of total. On the contrary, a recent visit by one of our staff to Toronto found the entire district over which the conflagration swept, a waste. Every wall was down or in such condition that it would necessarily be taken down; and there could be no salvage except as to second-hand materials, not utterly ruined for all purposes by the fire. Fire-proof construction should be improved; that is not open to question, and the ordeal at Baltimore points out its weaknesses and suggests their remedy. But the chief resource to prevent them from being fire-swept must be to eliminate wood and other combustible materials, so far as possible, from the floors, window-castings and frames, doors and trim such from the furnishings and other contents. Meanwhile it is well worth while to have such protection against total loss as even the Baltimore buildings gave, as contrasted with the wiping-out of values in Toronto."

Apropos this highly important subject, some valuable pointers may be found in a book recently published by the Spectator Company, of New York, entitled "Fire Prevention and Protection." Many methods are in use by which the hazard for mercantile and manufacturing establishments may be so improved as to lessen materially the liability to fire, and also, an important consideration from the point of view of the insured, to decrease the rates payable as premium. A number of these relate, of course, to the whole form of construction of the building, which is a matter for architects as well as owners, but there are also a number of fire preventive materials and devices any one of which helps to reduce the risk. It would occupy too much of our space at present writing to go into detail with regard to these appliances, but they include fire-proof roofing materials, fire-proof floors, partitions and ceilings, metal skylights, cornices and fire-proof paint, etc. Then there are fire-proof wood and fabrics, though the methods for rendering such materials really impervious to a hot fire have scarcely as yet been fully developed. It seems, however, to be a proven fact that, while they do not absolutely resist fire, yet they have considerable power in retarding it, owing to becoming immediately carbonized on contact with flame, thus contributing no further heat. Another helpful plan is to make windows of wired and prism glass, which has many incidental advantages besides that of offering considerable resistance to heat. A properly constructed fire-door or shutter will withstand intense heat.

BANK BRANCHES IN CANADA.

In our list of the branches of banks throughout Canada in last issue, we omitted to mention, through an unfortunate oversight which we regret, those of the Molsons, which number 47, distributed as follows: Ontario, 32; Quebec, 11; British Columbia, 2; Manitoba, 1; Alberta, 1. Adding these, therefore, to our former list, with three additional ones also for the Crown Bank of Canada, the total number of branches in the Dominion is 1,109. In order to prevent misapprehension, we repeat the list revised as per above:

BANK BRANCHES IN CANADA.

Bank.	Ont.	Que.	N.B.	N.S.	P.E.I.	B.C.	Man.	N.W.T.	Yuk.	Total.

HALIFAX LETTER.

Last week a number of the Halifax members of the Canadian Manufacturers' Association protested by wire to Hon. W. S. Fielding against the hasty enactment of Mr. Mulock's Alien Labor Bill, and asked that it be left over until next session for fuller consideration.

The new secretary for the Nova Scotia branch of the Manufacturers' Association has not been appointed. There are a number of applicants, among whom is the permanent secretary of the Exhibition Commission, who seems to stand a good chance of getting the position.

At the quarterly meeting of the Halifax Board of Trade, held a few days ago, the new secretary, Mr. A. T. Weldon, was formally installed. A committee was appointed to make some suitable recognition of the services of the retiring secretary, Mr. Charles M. Creed, who for the past forty years has served the business men of Halifax in this capacity. He has been granted a retiring allowance of $300 annually. The president's review of the quarter's work was ably presented, being in the main a record of the board's activities already recounted from time to time in these columns. Eighty new members were admitted at this meeting. Arrangements are being completed for the annual session of the Maritime Board of Trade about to be held at Moncton. The programme will include a drive to the Memramcook oil fields, where a new oil well is to be shot in the presence of the visitors. A sum of money has been voted in the supplementary estimates for the double-tracking of four miles of the I.C.R. between Bedford and Buckingham. When this is completed there will be a double track between Halifax and Windsor Junction, a distance of fourteen miles. The need of this has long been felt, as the traffic over this portion of the line is heavy, it being used by the Dominion Atlantic Railway and the C.P.R., as well as the Intercolonial. There is one thing that the Railway Department might do, and that is, pay more attention to the appearance of suburban stations. For ten or twelve miles out of Halifax the I.C.R. skirts the Bedford Basin, one of the finest sheets of water in the world. The shores are dotted with suburban residences of attractive character, beside which the common-place railway station seems incongruous, to say the least.

A new town is springing up at Fairview, on the outskirts of the city. This is the terminus of the new Halifax and South-Western Railway, now nearing completion, and offers exceptional facilities as a manufacturing centre. All down the western shores of Nova Scotia, between Halifax and Liverpool, there is more than the usual activity. The prospect of being brought into touch with the outside world by the opening up of railway communication seems to have imparted new life to the district.

The lobster fisheries, which bring in a lot of money, were very good this year. Not only was there an excellent catch, but the crustaceans, which, for the most part, are shipped alive to the Boston market, brought high prices. Cod-fishing has also been good. The spring catch of the Banking fleet averaged 800 quintals for the 160 odd vessels on the voyage, and the fish brought well nigh $5 per quintal. Boat fishermen have also done well, considering the high price of fish. All these things have combined to give a new life to the western shore, and business in that section is good.

I have not noticed anything in the Monetary Times regarding Nova Scotia's new loan, recently floated in London by Premier Murray. It was a 3½ per cent. loan of £650,000, and it was sold at 94, which, under the present conditions of the money market, the Government considers a remarkably good transaction. The Opposition, however, point out that it is not so favorable as the 3 per cent. loan floated five years ago. The money was required to fulfil the Government's agreement to lend $13,500 a mile at 3½ per cent. to the Halifax and South-Western Ralway on first mortgage in lieu of the usual subsidy. All former railway subsidies in the Province were paid outright, but this one is in the shape of a loan, and if the earning capacity of the road is at all favorable the Government's interest account will not be materially increased.

It is said that Mackenzie & Mann, on the completion of the above road, stand ready to build the Eastern Railway, between Halifax and Canso if arrangements can be made with the Government and with the parties now holding the charter.

Halifax is proud of her military men, and likes to be called the "Garrison City." In the British Parliament recently the Secretary of War stated that there are 1,785 troops stationed here, and the annual cost is about £20,500. This is quite a lot of money, and no doubt its distribution does the city some good, but it does not benefit the place to the extent that the same amount of money paid out annually as wages to the industrial classes would. There are people who contend that on the whole Halifax would be better off, commercially and otherwise, without the presence of "Tommy Atkins."

Tourist business has not been up to the mark this summer, due, no doubt, to the fact that the weather has been moderate in the American cities, and the St. Louis Exposition has to some extent turned the tide of travel westward.

Halifax, August 8, 1904.

ROAD IMPROVEMENT.

Mr. A. W. Campbell, Provincial Commissioner of Highways for Ontario, has issued his eighth annual report, which gives an excellent opportunity for perusing what has been done lately in regard to the important work of road-making. The wonderful amount which is eventually gained, through many small savings accumulating, by the advent of new roads, can hardly be conceived until it is actually experienced, but with the rapidly growing wealth of the country, manufacturers are gradually coming to recognize this fact, and are making more generous appropriations for improving the roads in their various districts. The report says that by the end of last year about 130 townships had abolished or commuted statute labor, and in its place (with more or less modification), had adopted systems whereby fewer and more permanently appointed road-overseers take the place of the pathmasters of the statute labor system, and by which all road work is paid for in a businesslike way. Proper road-making machinery is being employed, definite methods of doing the work have been established, and, altogether, new life has been infused into road improvement wherever the new plans have been adopted.

GRAND TRUNK PACIFIC RAILWAY.

A meeting of the officers of the Grand Trunk Railway took place in Montreal, on Wednesday, for the purpose of organizing the Grand Trunk Pacific Company. The following directorate and officers are announced: Directors, Charles M. Hays, Frank W. Morse, William Wainwright, W. H. Biggar, Montreal; Sir C. Rivers Wilson, G.C.M.G., C.B.; Rt. Hon. Lord Welby, G.C.B.; Alfred W. Smithers, John Alan Clutton-Brock, Colonel Fred. Firsbrace, London; Hon. Geo. A. Cox, E. R. Wood, Toronto; Hugh A. Allan, E. B. Greenshields, Montreal; John R. Booth, Ottawa; John Bell, Belleville.

Officers: Charles M. Hays, president; Frank W. Morse, vice-president and general manager; Wm. Wainwright, second vice-president; Henry Phillips, secretary; Frank Scott, treasurer; H. W. Walker, general auditor.

Executive Committee: Charles M. Hays, Hon. Geo. A. Cox, Frank W. Morse, Wm. Wainwright.

The law firm of Messrs. Davidson & Wainwright, Montreal, were appointed counsel to the board.

Mr. Hays, General Manager of the Grand Trunk, stated that the new company would now push ahead with surveys on the western division, and there was a chance that actual construction work would begin this year. If not, the first sod would be turned early next spring. The question of terminals was still unsettled, and would remain so until all matters bearing on the choice should be thoroughly sifted.

The facilities afforded by each of the suggested points would have to be well examined, that is, grades, waterways and other interests of a timely local nature. Representations were being continually made to the company by different municipalities, and they had to be considered. The question of branches and tapping lines was also a serious one.

◆

INSURANCE NEWS.

The bill before the Private Bills Committee of the Dominion Parliament to authorize an enlargement of the directorate of the Canada Life has been withdrawn.

Secretary Frank F. Holmes announces that the annual convention of the National Association of Local Fire Insurance Agents will be held at St. Louis, October 18th to 21st. The programme will be announced at a later date.

We learn that marine insurance losses on the lakes this season have been quite small, less than for many years, and a large proportion of those which have occurred were due to fire. The chief loss up to date affecting the companies has been the "Chilian."

Editor Hitchcock, of the Insurance Field, is receiving attention from the burglary insurance solicitors. While sitting on his porch with his family the other evening sneak thieves entered his residence through the rear and got away with $800 worth of money, jewellery and valuables.

Toronto's city engineer has more than once pointed to the lack of water in the district in the neighborhood of the Dundas Street bridges, which has in recent years become the home of several factories. We would ask, has anything been done to remedy this lack of water in the north-west district for fire protection purposes?

A sensible girl to her beau
Uttered this very timely bon meau:
  If your life you'll assure
  To make things secure,
My answer will be apropeau.
—Equitable News.

The Atlas Assurance Company has concentrated its underwriting department in the former office of the Manchester, in New York, and pursuing its policy of extending gradually in the Southern States, has entered the States of Georgia, Florida and Mississippi. The old Kings County Fire Insurance Company, which is controlled by the Atlas, has decided to cease underwriting in line with the general policy of the latter, whose business is thus concentrated in one channel.

Christie, Brown & Co., Limited, the well-known biscuit manufacturers, of Toronto, have just put in a water curtain system on the Frederick Street side of their factory, one on the south side having been put in some time ago. When in full working order, this curtain will protect the five stories of the building. This enterprising company realizes, what sooner or later will no doubt be realized by the majority of manufacturers, and others occupying large premises, that no pains is too great to take in protecting themselves against fire from the very beginning.

For a long time past those interested have felt that the Montreal fire alarm system is far from being in a satisfactory condition, and there is a growing opinion that the three departments of fire, fire alarm, and water, being more or less interdependent, should be united under one responsible head. Mr. J. Ferns, head of the alarm system, is, we understand, going into the subject very thoroughly, and trying to devise a plan complete in all details. One thing which seems to be badly needed is a separate fire-proof alarm building, as, under present arrangements, a fire in the building where they now centre would disorganize things completely, and might, in the event of a simultaneous serious fire elsewhere, lead to very disastrous consequences. Mr. Ferns strongly advocates the placing of all alarm wires in underground conduits, while a reorganization of the system of numbering the boxes is another reform urgently needed.

A special to the Toronto World gives particulars of the fifth annual convention of the Provincial Firemen's Association, which opened at Milton, Ont., on the 3rd inst. President Smith presided, and there was a good attendance of delegates from many parts of Ontario. The committee on laws reported that the association had been incorporated with headquarters at Merritton. Officers were elected and installed as follows: President, J. R. Smith, Niagara Falls; vice-president, S. Moffatt, Thorold; second vice-president, J. A. Stafford, Midland; secretary, W. J. Armstrong, Toronto; treasurer, W. Miller, Smith's Falls. Committees were elected with chairmen as follows: Executive, G. A. Thomas, J. A. Rose; printing, S. Moffatt; expenditure, W. Smith; games, A. Martin, A. Graham, A. Ridgett; laws and legislation, R. Clark. Merritton was chosen as the next place of meeting.

Embezzlements for May, as reported by "The Bulletin" of The United States Fidelity and Guaranty Company, amounted to $553,434. Classified according to professions and occupations, they were as follows:—

Banks	$118,000
Benevolent societies and institutions	23,005
Building and loan and other associations	3,060
Court trusts	132,700
Federal and state	3,500
Firms and corporations	109,036
Insurance companies	2,000
Municipal	3,237
Transportation companies	67,000
Miscellaneous	91,896
Total	$553,434

DRY GOODS NOTES.

A company has been organized with an authorized capital stock of $50,000, and headquarters in Toronto, to acquire as a going concern the wholesale millinery business now carried on by Robert Taylor in that city, and to carry on a trade as general dry goods merchants, haberdashers, tailors, dressmakers, etc.

Cornwall real estate owners voted the other day in favor of granting exemption from taxes for ten years to the Canadian Colored Cotton Mills Company on the mill property formerly known as the Cornwall Manufacturing Company's woolen mills. The company will equip this mill with new machinery and start a new cotton mill which will give employment, it is stated, to 150 to 200 hands.

In explanation of the anxiety of the Colonial Wool Merchants' Association lest the bill for the improvement of the Port of London should be dropped by the Government, Commercial Intelligence reminds its readers that Colonial wool is the largest individual import of that Port, the yearly import during 1903 bearing a value of £17,267,188 out of a total value of all imports to London of £173,132,088. Wool contributes more in dock and warehouse charges to the Port of London than any other commodity.

It is not generally known that Italy is quite an important cotton manufacturing country. From a recent consular report, however, we gather that the cotton factories there have 2,650,000 spindles, and employ 171,126 hands, while the imports of raw cotton, which amounted to 270,504,420 lbs. in 1900, had increased to 339,949,320 pounds in 1900. Of this quantity, 223,546,440 pounds came from the United States and the remainder from British India, Egypt, and elsewhere. The production of cotton goods in 1882 amounted to 119,625,784 pounds, valued at £5,800,000 as compared with 311,509,980 pounds, valued at £13,500,000 in 1903. The consumption of cotton goods in Italy in 1882 amounted to 104,718,500 pounds as compared with 264,552,000 pounds in 1903. The consumption of Italian-made goods in the country amounted to £5,200,000 in 1903.

A correspondent of the Monetary Times in the North of England says that the cotton factories are resuming full

TORONTO, AUGUST 12, 1904.

work. In the district of which Burnley is the centre no less than 76,745 looms are now clacking their hardest. Canadian purchasers of cotton cloths are less appreciable in our markets than those of woolens. Dominion orders at present are of average importance according to all reports. Domestic trade in all kinds of wool goods is at a temporary standstill. Merchants have found the home trade inferior and disappointing throughout the first half of the year. Manufacturers are faced by well-nigh irreconcilable circumstances. Wool grows dearer and ever dearer, even shoddies are at high prices, and the sums realizable for finished products do not pay a profit. Holders of all forms of wool are stubborn in their demands. Growers are hoisting English fleeces to an unprecedented level. As to the end, one cannot prophesy, but all recent history shows that in wool goods the buyers, and not the holders, of raw material are likeliest to triumph.

FOR GROCERS AND PROVISION DEALERS.

Mrs McCall—Those neighbors of yours are quite lively. I never met any people who indulged so much in repartee.

Mrs. Malaprop—You don't say! Why, I borrowed some the other day, and it tasted to me like Oolong.

The Montreal Packing Company, which has just been incorporated with a capital of $500,000, are about to build a large plant at Point St. Charles. The manager will be Mr. C. W. Bowman, of Ingersoll, and special attention will be paid to the exportation of hams and bacon.

We regret to learn of the terribly sudden death of Mr. D. A. McPherson, the well-known butter and cheese exporter of Montreal, who fell overboard from the R. & O. boat "Bohemian," on a trip from Stanley Island. The firm of which Mr. McPherson has been the head for twenty-eight years was one of the leading firms in the business. He was 53 years of age.

At the Dominion Exhibition at Winnipeg one of the features was the exhibit of British Columbia fruits. The specimens are described as being remarkably fine, and consisted both of fresh and preserved fruits. The display included, among fresh fruits, tomatoes, eight or nine different kinds of cherries, apples, raspberries and red currants. The ventilated car system, already available as far east as Calgary, would doubtless render it possible for British Columbia fruits to find ready sale in Winnipeg markets.

According to the Cincinnati Price Current there is a continuance of restrictive conditions affecting the movement of hogs, but there are also indications of modification of such influences. Total Western packing, 280,000 hogs, compared with 250,000 the preceding week, and 195,000 two weeks ago. For corresponding time last year the number was 355,000, and two years ago 265,000. From March 1st the total is 8,765,000, against 8,870,000 a year ago—a decrease of 105,000. The quality is variable, from fair to good in most instances, and to some extent on the poor order. Prices are lower, prominent markets at the close indicating a general average of about $5.25 per 100 lbs., compared with $5.40 a week ago, $5.40 two weeks ago, $5.40 a year ago, $7.45 two years ago, $5.75 three years ago.

The Canadian commercial agent at Leeds, England, reports that there will be a decided shortage of raspberries and plums in England this season, and on this account he advises shipments from Canada. The plums should be sent in boxes, carefully packed and wrapped in tissue paper. Even with this extra trouble he is sure the shipping of plums would be extremely profitable. The same remark applies to pears. Last season over six thousand tons of raw plums and pears were imported into England, of which Canada sent less than two hundred tons. Already many enquiries are coming to hand from dealers in the neighborhood of Leeds who are desirous of handling from two hundred to four hundred barrels of Canadian apples. Apple shippers are advised to place their business at once.

FINANCIAL ITEMS.

Customs returns at Winnipeg for the month of July were larger than ever before. They amounted to $288,899, against $266,657 for that month last year.

Deposits in the Post Office Savings Bank for the month of June amounted to $972,787, while interest on depositors' accounts and principal amounted at the end of that month to $1,223,448. Withdrawals amounted to $1,005,666, so that there was an excess of $1,204,696 of deposits over withdrawals. The amount at credit of depositors came to a total of $45,419,706. On the above date deposits in the Government Savings Bank amounted to $16,269,061.

While not unusually numerous, failures in Canada during July involved an exceptionally heavy amount of defaulted indebtedness, although there were but two of especial size, so that the average loss to each default was abnormal. Liabilities were greatest in manufacturing failures, while most numerous in the class embracing groceries, meats, etc. Total commercial defaults, say R. G. Dun & Co., numbered 78, with an indebtedness of $1,040,640, against 70 last year for only $389,683. Manufacturing failures were 25 in number and $647,864 in amount, compared with 21 last year involving $226,220; trading insolvencies numbered 52 with debts of $391,376, against 47 for $154,763 last year; and there was one other commercial failure for $1,400, compared with two for $8,700 in the same month last year.

◆

—The Toronto branch of the Canadian Manufacturers' Association, as we go to press, are holding their annual meeting for the election of officers, and the discussion of the chairman, Mr. J. P. Murray's report. The latter entered into an able and exhaustive review of the work of the Association, and also of the conditions now confronting Toronto as an industrial and business centre. Mr. R. A. Donald was elected chairman, and Mr. D. B. Tyndall, vice-chairman of the Toronto branch.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, August 11th, 1904, compared with those of the previous week:

	August 11th.	August 4th.
Montreal	$20,989,761	$19,394,462
Toronto	15,226,000	14,567,136
Winnipeg	5,580,607	6,013,884
Halifax	190,489	2,402,463
Hamilton	950,938	1,050,383
St. John	1,091,498	982,360
Vancouver	....	1,475,466
Victoria	569,707	697,851
Quebec	1,738,269	....
Ottawa	2,338,043	2,040,751
London	974,108	677,423

OUR NORTH OF ENGLAND LETTER.

The name of Mr. J. Carling Kelly was involved in a case the other day in which Mr. Frank O'Reilly, described as a Canadian, sought to recover £3,000 from a Liverpool stockbroker. The case arose out of dealings in the ill-fated Sapphire Corundum Company, and terms were settled out of court. Mr. Kelly calls himself a banker of Ottawa. Evidence in the case alleged him to be the keeper of a small shop in that city in which pictures of short-skirted ladies are conspicuous. Whatever the truth as to the financier's origin, it is certain that he is viewed with some suspicion just now. All who have consorted with Mr. E. T. Hooley are under a cloud, but Kelly has attracted especial notice. *The Rialto*, a breezy financial journal, invites Mr. Kelly in the best Donnybrook fashion, to institute proceedings against itself for libel; indicating contemptuously that it does not fear the result.

The inside of another financial deal is being gradually exposed to view. Woolen manufacturers in the Dominion and investors will be interested to know why the great Yorkshire Woolcombers' Association came to its untimely end. The action of certain shareholders against some directors is still proceeding. Though finality has not been reached some piquant items have been disclosed. One of these is the agreement between the directors, who were also the vendors, to play mum. No vendor was to know what any other had obtained for his business, and £1,800,000 of money was shared out under this amazing conspiracy of ignorance. Having thus resolutely declined to know what

Wood-Working Machinery.

The line of wood working Machines made by the The Goldie & McCulloch Co., Limited, Galt, is in great demand. This firm builds an extensive range suitable for almost any kind of wood-working establishments. The machines are all very heavy and made to stand hard and continuous work. Send for Catalog. Address

The Goldie & McCulloch Co. Limited,
GALT, Ont., Can. 2

We Make— Wheelock Engines, Ideal High Speed Engines, Gas and Gasoline Engines, Boilers, Pumps, Water Wheels, Flour Mill Machinery, Oatmeal Mill Machinery, Wolf Gyrators, Emery Choppers, Wood Working Machinery, Shingle Machinery, Heading and Stave Machinery, Wood Rim Split Pulleys, Iron Pulleys, Shafting, Hangers, Friction Clutch Couplings, Friction Clutch Pulleys, Safes, Vaults and Vault Doors.

The non-paying building is the big building without a modern elevator.

The dividend-paying block is the one in which has been installed elevators that do their work steadily, safely, and economically all the time. . . . . .

they were doing, one can hardly suppose them to be shocked at the consequences. It is certain that they paid £257,000 for one mill and its plant, which cost only £63,800 when new; that another business had been bought at £700 per comb, and sold five months later to the Association at £4,500 per comb; and as to a third business, even the directors, with their generous notions of the right and proper, concluded that it had cost £100,000 too much. A spell of bad trade came, and the grossly over-inflated balloon crumpled up, as anyone hearing these facts about it would expect. Trade creditors and shareholders get nothing, and if the debenture holders get more than 30 cents on the dollar they may congratulate themselves.

To avert a similar disaster the vendors to the English Sewing Cotton Company are restituting sums of money and buying back profitless undertakings. Perhaps the measure will avail. At least it will go to the credit of such firms as Arkwright, Strutt, Ermen & Roby & Dewhurst, that they did their best. The suspicion is strong that the combers vendors are on wrecking bent, and that they mean to rebuy ridiculously cheap the plants they sold so disastrously dear. No effort is required to believe that the ordinary investor in the North of England is chary in the extreme of 'combines' and that for a year or two to come he will insist upon some reasonable security before putting his deposit down for shares in companies.

For the benefit of those who may be according credit to traders in this half of the country, the comments of a prominent banker are summarized. During the year 1903-4, he said money-lending had been placed on more orthodox lines. A better condition had been reverted to. Bankers would not again incline to the recklessness of the past. More than ever, traders had been driven to use their own capital. He and his fellows were looking forward to a strong demand from many quarters for money, and they were determined to pick and choose and permit conservative principles of business to rule. That this reflects the general attitude is beyond doubt, and to its influence may be attributed the fact that despite hardships, failures have been unimportant and unfrequent. In writing down this, one is mindful to say that failures come to view, as do wrecks at sea, after the worst of the storm. When the weather is improving is the period most prolific in serious bankruptcies in England.

Mr. Chamberlain's Tariff Commission has reported in the precise terms expected upon the needs of our iron and steel trade. A tariff of five to ten per cent. with preferential loopholes is recommended. In one particular, Canadians will agree with some English critics of the Commission's findings. Says the report: "The practice of dumping could not be carried on but for the British system of free imports." Very promptly that pronouncement has been pounced on by those who disfavor new tariff proposals. Why then is Canada crying out, and framing anti-dumping regulations? ask the critics. Of course no tariff except the absolutely prohibitive can entirely prevent dumping and considerable surprise among the well-affected has been displayed at the want of prevision shown in the quoted sentence. Duties make dumping difficult, and free imports makes the practice easy, but to say so is not to endorse the positive statement made by the Commission.

NORTH COUNTRY.

Halifax, Eng., July 29th, 1904.

THE CANADIAN STORES COMPANY, LIMITED.

It is a year or more since the Monetary Times expressed an opinion upon the probable career of the Canadian Stores Company, Limited, of London, England, to the effect that the concern had been floated on too large a scale; that it was weighted with too many expenses of the nature of promoters' compensation and directors' fees; and that its provisional directors or acting manager had overestimated the digestion of the Canadian public for such projects. We have now information from London under date of 29th July which tells us of a very decided breach between the manager, Mr. Walter R. Nursey, and the Old Country directors.

It appears that, relying on the statement of Mr. Nursey that a certain number of shares had been applied for in Canada, the London board went to allotment. But it transpires that his statement was untrue; that the number of shares legally requisite had not been applied for, and that therefore the allotment was illegal, and all moneys must be returned. For these moneys the directors are personally liable. Then the expenses of floating—or rather attempting to float—this ill-advised concern had amounted in the meanwhile to something like two thousand sterling, of which £150 was to Nursey himself, and this, too, the directors will have to foot.

The result of this move to form a company for the handling of Canadian produce in Britain is unfortunate in several directions. It must tell against Canada, because the man, Nursey, who essayed its flotation paraded himself in England as a Manitoban, and he did once live in Manitoba. Again, because of his lack of business sense and good faith in this matter several important men in England have been prejudiced against taking part hereafter in similar concerns. Their chagrin at being placed in a false position must naturally be great. We cannot learn that much Canadian money was paid in on the company's stock, investors here evidently not being dazzled by such schemes.

WHAT THE STRIKERS AIM AT.

The New York Post has a suggestive article on the objects of strikers, as exemplified in the present great strike in the packing factories at Chicago. "We see at once," remarks our contemporary, "that they are imitating the most offensive methods of the Trust which they denounce. President Donnelly's haughty demand upon the allied trades this morning, 'I insist upon a general strike at once, with the negotiations to come afterwards,' could not better hit off the arrogant tone of the presiding officer at a corporation meeting, 'Vote first and discuss afterwards.' To copy the worst features of industrial or financial monopolies seems, in fact, to be the present cue of the labor unions. But their animus and secret purposes may best be gathered from their most pronounced enmities."

It is not the general public that the strikers desire to hurt. Their chief enemy, according to their way of viewing things, is the free workingman, whom they pursue with unrelenting fierceness. The intolerable thing is the existence of a body of non-union men ready and eager to work. The strikers, and unions generally, stand for monopoly, and the non-unionists are regarded as the bitterest enemies such a monopoly can have. Thus comes the desire for vengeance.

Nor is it a solution of the difficulty to suggest that all hands should join the unions. Says the Post: "The unions do not want all hands. They wish to remain a small favored class. As protectionists rage against importers, so labor unions do against free workingmen. In both cases a monopoly is furious with those who threaten it. Labor unions represent certainly less than 20 per cent. of American workingmen. Yet they assume to speak for all, and are ready to hunt to death the 80 per cent. on the outside, whenever in any way they compete with them."

After the independent workingmen, the body most hated by the strikers are the authorities who protect the former in their rights—the rights to live and work. Thus it comes about that the strike-bearer, with the police and the militia, become deadly enemies. To quote again from our contemporary: "There can be no mistaking the significance of this animosity. In it the labor union stands revealed not only as the foe of public order, but of the sovereignty of the State itself. Organized labor, when logically carried out, means State Socialism. That has long been recognized. But short of complete control, the essentially tyrannical spirit of Socialism displays itself; and we see in the raging of unionism wherever the police or the military power is invoked against its violent methods, the confession that it means eventually to usurp the functions of government. To crush out free labor; to frighten or fetter the State—those are the two objectives of labor leaders of the militant type."

VANCOUVER BOARD OF TRADE.

The report of the seventeenth annual meeting of the Vancouver Board of Trade held last March is to hand. An interesting feature of the publication is the address of the president for the past year, Mr. H. T. Lockyer, from which we take a few remarks. It is gratifying to find on such good authority that in spite of the unfortunate series of strikes which took place last year the progress made by Vancouver during that period was greater than at any time since the city was established. To such an extent has building taken place that the appearance of the city has been materially altered; vacant spaces in the business portion have been filled up and vacant residential blocks turned into densely populated sections. Many new streets and sidewalks also have been opened up, and permanent ones of cement taken the place of plank paths. Mercantile business has been generally satisfactory, though competition in many lines has been exceedingly keen, and the margin of profit in many cases more imaginary than real. Payments, however, have been as a rule well met. The mining industry, in the president's view, has now reached a stage where it can safely be said to be on a permanent and businesslike basis. The lumber trade enjoyed considerable prosperity during the year, though labor difficulties affected it adversely for a time, and shingle manufacturers and millowners were also hampered by lack of cars to carry their product to Manitoba and the North-West. Agriculturally, though the Province is making good progress, there were some unsatisfactory features during the year owing to the wet summer. The butter industry has made rapid strides Fruit culture, too, is more and more attracting the attention of an intelligent body of men. The officers of the board for the current year are as follows: President, H. McDowell; vice-president, A. B. Erskine; secretary, Wm. Skene. Council—R. H. Alexander, F. Buscombe, F. Carter-Cotton, Wm. Godfrey, C. F. Jackson, R. Kelly, W. H. Ker, H. T. Lockyer, W. H. Malkin, W. G. MacKenzie, R. P. McLennan, W. J. McMillan, W. F. Salsbury, Campbell Sweeny, C. E. Tisdall. Board of Arbitration—R. H. Alexander, F. Buscombe, F. Carter-Cotton, Wm. Godfrey, C. F. Jackson, W. H. Ker, H. T. Lockyer, W. H. Malkin, R. P. McLennan, W. F. Salsbury, C. Sweeny, C. E. Tisdall.

BUSINESS.

Communicated.

Modern economic society has imposed upon man the acquisition of business qualities and habits. If he does not possess them naturally, it is important that he should acquire them by training. For business is the great controlling factor in the economic world to-day, and pervades every vocation and occupation in human society, from the laborer, servant, and clerk to the mechanic; mechanic to the farmer; farmer to the merchant; merchant to the professional man; professional man to the poet and artist; each must possess business qualities if he wishes success.

This change of economic conditions is due to evolutionary causes, and the outcome of the natural laws that obtain in the struggle for existence. In the good old times, the lawyer and doctor sat in their offices and waited on the clients and patients who called upon them, without making any solicitation for patronage. It was then a matter of confidence, pure and simple; now, it has become a matter of competition, solicitation, and business. The lawyer and doctor were formerly more to their patrons than professional advisers, and were looked upon as trusted friends. But in the general trend of commercialism, this feature has disappeared. Now the hard, cold proposition of business meets one everywhere, and even the ministry has fallen into the spirit; for the minister who shows business aptitude in the administration of his parish, is the one most sought after, and usually also controls the best salary.

The professional man formerly regarded himself as mentally superior to the man of business, but that superiority is passing away; for the man who has built up a vast industry of intrinsic value, or has the management of a large banking institution, must be a man of large intellectual powers, or he could not reason out economic conditions, or the ever-changing affairs of trade. Economic problems rise almost daily that the man of business must be mentally equipped for and ready to solve. A difference exists between the mental ability of the professional man and the man of business. It is one of application and direction, while the functions of mind that come into play, differ materially.

Business is more a matter of conduct and tact than of character and intellectuality. Certain characteristics must be strictly adhered to, if the foundation for success is to be laid, or a competency to be attained. Unremitting application, punctuality, accuracy, order, system, despatch, and readiness, guided by good practical impromptu judgment, are essential qualities to reap business success; moreover, honesty and fair dealing, with due consideration to individual interest. The relations existing between debtor and creditor, or depositor and banker, should be one of confidence and trust. No misrepresentation of conditions should be made, and the confidant should deal fairly with the confidence entrusted to him and never betray a trust, which, alas, often happens with business men.

The struggle for existence in the commercial and business world follows closely the natural laws of the survival of the fittest, irrespective of how the success is attained. The means to the end are hardly inquired into, and the result too much the measure of success. A clever man is frequently more thought of than the honest hard-working man or the man of science, whose success is limited on account of his strict adherence to just and equitable principles. "Everything is fair in love and war" finds application in business as much as in love and war.

Although natural laws will punish moral turpitude, still the punishment is often not meted out until full benefits of success have been achieved.

In his work on the Unknown, Camille Flammarion says: "The man of science is strictly honest, for there would be no science without honesty, and it is easier to dupe such men than to deceive others. In astronomy, chemistry, physics, and geology, as well as in natural history, there are no scientific men who ever practise deception. Unhappily this confidence is not applicable to business or to politics, nor to the usual vocations of people in the world."

The question often arises, are large fortunes usually the result of extraordinary ability alone, or some other element? A group of men may start in life on equal conditions and compete in the same venture, yet the results attained vary greatly. Although the same methods were employed, and the individuals equally equipped in business qualifications, still their successes are manifestly different, barring even the factor of susceptibility to suggestion. To what factor is the variation in result due? Does it not appear as if success were due in some instances to chance?

Some years ago, I heard a young man maintain that business success was merely a matter of calculation; that all the factors arising in the course of a business could be resolved and foretold as in a mathematical problem, and that failure in business was due to miscalculation or want of calculation. An elderly gentleman nearby asked the young man whether he considered the following experience due to calculation?

"When I was a young man," said he, "I farmed in Indiana, but with the advice of some friends and neighbors, decided to sell out and go to Wisconsin to farm. They sold, and so did I. We travelled by waggon then, and when we arrived at what is now Chicago, my wife became ill For a time my friends stayed with me, but when the recovery of my wife seemed remote, they continued their journey, and I staid. In time she became better, but my treasury having become quite depleted, I finally settled on an eighty acre tract of land, and started to farm. As time wore on, the city became larger and larger. It was not long before my farm came into demand and brought me a large fortune. How do you account for that? I made no calculation; it just came that way."

(To be Continued).

MONEY.

So accustomed is mankind to the conveniences of the modern system of exchange by means of money, that its present importance and its historical significance do not often occur to us. Yet, there is scarcely a phase of life in which the development of this system, in one way or another, does not enter; scarcely a step on the part either of the individual or of society, which does not feel its influence. Money is, so to speak, an epitome of the history of civilization. There have been many attempts on the part of acute minds to enquire into the origin, development, and relationships of the present monetary system of the business world. Adam Smith, Stuart Mill, Ricardo, Professors Walker and Jevons, and many other noted economic writers have devoted great attention to this most important portion of their "dismal science." And the latest addition to the list is a book by David Kinley * of the University of Illinois, of which we are favored with a copy. This is an attempt to present the subject in the form of a systematic exposition of its theory and scientific principles. As suggested above, in the reference to the number of writers who have covered the same ground, it is difficult to find anything of a startlingly new or original nature to say at this late day; our author's object was rather to gather up the best knowledge on the subject and to present it in a clear lucid manner. This in itself is no easy task. It should not be imagined, moreover, that the author has been content merely to edit other men's views; there are plenty of signs of individual thinking out of problems which occur, and in some cases the results do not exactly coincide with the opinions held by some other economic writers. For example, in the chapters treating of the influence of credit, and of the quantity of money to its value, some new views are set forth. The book, which is one of the Macmillan "Citizens' Library" of Economics, politics, and sociology, is nicely bound and clearly printed.

* "Money, a Study of the Theory of the Medium of Exchange." David Kinley, Ph.D. Price $1.25. Published by the Macmillan Co., London and New York. Sole agents in Canada: Morang & Co., Ltd. Toronto.

◆

—Quite a revolution in trading methods has been effected in the Klondyke. The North American Transportation Commercial Company and the Northern Commercial Company, the two big corporations doing the larger part of the wholesale and retail mercantile and outfitting business there, have decided not to furnish supplies on credit hereafter. These companies have sustained seventy per cent. or more of the big operators and the laymen and other miners of the camp through the long winters, taking their pay at the clean-up time in the spring. The companies now declare they have made no money under old conditions because of losses on bad accounts and the like, and now intend to protect themselves. The new policy will force those who have been successful to keep a big share of gold dust here to buy winter stocks when they continue winter operations. This is expected to improve winter trade in the various camps very considerably. Unless the miners can obtain credit from the smaller concerns, they will have to borrow money with which to purchase their requirements, from banks or some other source.

◆

McMillan & Maguire, Limited, Toronto, capital authorized $25,000, have received authorization from the Ontario Government to purchase, sell and lend upon debentures, stocks and bonds, mortgages, etc., and to conduct a general brokerage business with incidental powers.

Mercantile Summary.

The annual summer meeting of the Canadian Freight Association was held in the Royal Muskoka Hotel, Lake Rosseau, on the 6th ult.

The Dominion Government will spend nearly $30,000 in the work of dredging a harbor at Delta Beach, near Portage la Prairie, Man.

The Ontario Government has granted a license to the International Gas Appliance Company, Limited, an organization holding a Dominion charter to do business in Ontario.

The Alberta Central Land Corporation, Limited, capital $750,000, head office Toronto, has been authorized by Dominion charter to carry on the business of a land company, under the usual provisions.

G. M. Annable, of Moose Jaw, is forming a company to carry on lumbering operations at Violin Lake near Rossland, B. C., where some 5,000 acres of timber limits have been secured. The capital is stated at $50,000.

Gerhard Heintzman, Limited, is the name of a company which has just received its charter from the Ontario Government, authorizing it to acquire the goods, goodwill, etc., of Gerhard Heintzman and Company. The share capital of the company is placed at $350,000.

The Imperial Export Company, Limited, Toronto, has been awarded a charter by the Ontario Government. Its share capital authorized is $100,000, and it will carry on business as merchants, importers, exporters, forwarders, etc., Walter H. Kimpton, Toronto, is among the provincial directors.

Halifax Board of Trade has succeeded in finding a gentleman who, it is believed, will be able to fill the important post of secretary, under a more strenuous regime. He is Mr. A. T. Weldon, who formerly occupied a position in the freight department of the Intercolonial Railway. We wish both him and the board much success.

Mr. Alexander Lumsden, the Ottawa lumberman, and one of that city's most representative citizens, died suddenly on the 5th inst., of heart failure. He was one of the pioneer operators in Temiskaming district, had a large interest in several corporations, and for some time represented Ottawa in the Ontario Legislature. He was born in 1843.

We are in receipt of copies of two new illustrated timetables issued by the Canadian Pacific Railway, entitled "The Challenge of the Mountains" and "The New Highway to the Orient across the Mountains, Prairies, and Rivers of Canada." The Canadian Rocky Mountains are attracting more fascinated attention with every year. They are so huge and endless that detailed description is well-nigh hopeless, but, these little books do what they can to give the intending traveller some idea of what he will see.

"I want to get into a school where order is kept and work is done."

That is how a letter from a young man to us put it. He spent four months in another business school in Toronto and the above states his reason for leaving it and coming to us.

And that's the reputation we have worked hard for—to be known as a

SCHOOL FOR WORKERS

and the hottest place on earth for loafers.

That's what fills our class-rooms and makes our graduates sought after by business men.

From the 9.30 bell at starting, till the 4 o'clock bell at quitting, everything moves in our school with the well ordered precision of an up-to-date business.

There is a chance for 100 cents' worth of education for every dollar of fees paid out.

We are favored with a souvenir of a visit of inspection to the new engineering works erected by Graham Morton and Company, at Hunslet, near Leeds, England. These works, which are wonderfully complete, and up-to-date in every detail, were put up, equipped, and operated, in the astonishingly short period of five and a half months, and show that not all British manufacturers need to "wake up", for from conception to completion they may confidently be said to beat the world's record. This shows the progress of building, etc., in a series of well executed illustrations, and altogether may be taken as an admirable specimen of British versus American methods.

Mercantile Summary

Several buildings in Dresden, Ont., were on the 6th inst., destroyed by fire.

The Ontario Government has granted a charter to the Canadian Cement Company, Toronto, capital stock at $150,000.

H. Sloan's saw and planing mill, at Tilbury, Ont., was on Friday last burned down, at a loss of $7,500, partially insured.

A by-law was submitted last week to the ratepayers of Finch, Ont., to raise $20,000 with which to pay off floating indebtedness, build bridges, and make other improvements, but it was defeated.

A company has been organized with a Dominion charter under the name of the Kent Oil Company, Limited, with headquarters at Harcourt, N. B., to bore for oil and gas, and to refine, manufacture and deal in the same. Capital $100,000.

The ratepayers of Cornwall, Ont., have decided to loan to John R. Atchison, whose saw-mills and sash and door factory were recently burned down, the sum of $17,500. A brick factory will be put up, equipped with proper fire protection, and insured in favor of the town.

A despatch from St. John's, Newfoundland, says that outbreaks of forest fires are causing widespread destruction throughout the colony. A number of settlements have been destroyed in different localities, and the outskirts of St. John's, itself, are now being threatened. A force of police and citizens have been employed in trying to prevent the spread of the fires. It is estimated that $20,000,000 worth of marketable timber has already been destroyed in the interior this season.

The British Columbia Government has issued a first block of licenses authorizing prospecting for coal and oil in Southeast Kootenay. About two hundred and fifty were issued in one day last week to Spokane and Grand Forks syndicates and the Flathead Coal Company. Already as the result of this policy, negotiations are in progress with a syndicate to secure a railway connection with the coal lands. The coal field is believed to be quite as rich as the Crow's Nest Coal properties, which join them on the north. Active work is expected to begin on many prospects this summer.

The Western Manitoba Retail Hardware and Stove Dealers' Association, has been inaugurated, the result of the efforts of the Winnipeg Association and their invitation during exhibition to the hardware and stove dealers of the West to meet together. Its objects are primarily to promote, foster and encourage the formation of Provincial Associations throughout the West through the medium of which local retail, hardware and stove dealers may be brought into closer touch with one another, where the annoyances or grievances peculiar to each particular locality may, by concert of action, through its Provincial Association be adjusted or eliminated, and to bring together these provincial associations into one grand body, where items of broader and wider interest may be discussed; where questions affecting not only the welfare of the retail hardware and stove dealers throughout the West, but the welfare of the great West itself, may be threshed out. Its first officers will be: President, J. A. Lindsay, Winnipeg; first vice-president, J. W. Smith, Regina; second vice-president, Robert Wyatt, Winnipeg; treasurer, C. A. Baskerville, Winnipeg; secretary, W. W. Lindsay, Winnipeg.

Mercantile Summary.

The town of Fernie, B.C., is now a city, letters patent for this purpose having been issued on the 28th ult.

The property and works of the St. John Sulphite Pulp Company, Limited, situated at Mispec, N.B., are advertised for sale. The mill property comprises three hundred acres or more, and there are besides a steamer, several scows, etc., etc.

A new town is to be located in the Flathead Valley, B.C., under the name of Farrell City. It will be situated near the large coal output at Hackett. Another new town is proposed to be located on Bull River Mining Company's placer grounds. It will be called Pritchard.

The city of Kingston, Ont., has taken over the local gas and electric light plants. It has a new problem on its hands, however, as to whether it will supply power for the running of the street cars on Sundays, which the company have been doing for the past few weeks against considerable opposition.

Insolvency proceedings have been instituted in the matter of J. A. Marchand, general dealer, Fraserville, Que. Several years ago, he is reported to have compromised at 75 cents.——Arthur Lacombe, baker, of the same place, who was reported in difficulties several weeks ago, as the result of stock speculations, has arranged a compromise at the rate of 25 per cent. on liabilities of $8,000.

The Copper Cliff Mining Company, Limited, Moncton, held its annual meeting a few days ago, the reports showing it to be in a good position. Ore now being taken from this mine is said to be high-grade copper, and also carries gold and silver values. The directors elected for the ensuing year were as follows: F. W. Givan, Geo. J. Robb, S. S. Ryan, M. P. P., Hon. F. J. Sweeney, W. J. Weldon, of Moncton; A. E. Brown, and W. H. McQuade, St. John; J. P. Sherry, Memramcook; E. A. Charters, Sussex; J. B. McDonald, P. E. Island, and Jas. Barnes, M. P. P., Buctouche.

The assignment is noted of L. E. Desilets, dry goods, etc., Shawinigan Falls, Que., with estimated liabilities of $13,000, and nominal assets of about the same figure. He was formerly in business at Ste. Clothilde, and his removal to his present location in the spring of 1903, has apparently been unfortunate for him.——Eugene L'Ecuyer, formerly a clerk in a Montreal insurance office, which position he gave up on account of ill health, started a little store business at St. Polycarpe, Quebec, a couple of years ago. He has not been able to make a success of it, and has had to assign under pressure from several creditors. His liabilities will hardly exceed $2,000.

The freight traffic through the Soo canals last month, broke all previous records. The quantity of freight passed through was 5,609,079 tons, an increase over Aug. last year, which held the previous record, of 205,271 net tons. Of this vast volume of freight 4,817,203 tons passed through the U. S. Canal, and 719,876 through the Canadian. The movement of iron ore was also heavy, 3,578,685 tons being taken down from the head of the lakes. An interesting feature of the statistical report lies in the record of passengers, since it shows how few tourists are travelling this year as in comparison with former years. The record for the last month was 9,245 passengers traveling both ways. The record for the season thus far is 16,028 behind that of last year, which would seem to indicate that the Americans are not feeling rich this summer.

the size made and used in New York and Paris and put up in 50 and 100 lb. boxes.

A demand of assignment has been made upon David Goldberg, doing a small clothing manufacturing business at Montreal, under the style of D. Goldberg & Son. He is said to have been unsuccessful in Chicago some years ago, and had been engaged in a general store trade in British Columbia, before starting in his present line four or five years ago. The liabilities are estimated at about $15,000.——The assignment of M. P. Laverty, grocer, Montreal, comes somewhat as a surprise. He had long done an established uptown trade, and though somewhat locked up in real estate, was considered to have a pretty good surplus. He is said to owe $35,000 to $40,000, considerable of it on mortgage.——J. McGarraham, a Montreal cigar dealer of recent establishment, has consented to assign, after being sued for several past due accounts.——Mrs. J. Merineau, milliner, Montreal, is reported in the hands of the assignee, and shows an indebtedness of about $1,500.

Our American cousins are not the only people who delight to break records—nor the only ones to attain remarkable speed in railways. Here is an instance from a recent Great Western run. This line has put into operation two trains to journey from Paddington to Plymouth, and vice versa, a distance of 246 miles, in 265 minutes without a stop. On the first day of service, a wonderful run was made, Paddington was left at 10.10, and London, 77¼ miles away, was reached in 74 minutes. Between that place and Bath, some of the faster running was made, several miles being covered at the rate of 88 miles per hour. Bath (107¼ miles) was reached in 100 minutes, 44 seconds, making an average speed from the start of over 64 miles an hour—a splendid performance. Notwithstanding two or three slowings down on account of checks or by reason of the train being ahead of time, Plymouth was reached at 2.33, and the train then went on to Penzance, which it reached within seven hours from London.

◆

COUNTRY VERSUS CITY MAN.

The query as to whether the country man is such a fool as his city cousin sometimes delights to think and style him, is answered in Fry's London Magazine, by W. J. Robertson Scott, in the following manner:

"I say that, man for man, as you shall pick them out from a row of desks in a London bank in the one case and from the fields of a Cumberland or a Devonshire farm in the other, the typical bank clerk at forty, in natural wit, acquired skill and knowledge that a man sets store by at sixty, in physique, and in all that matters in life, is by no means the superior, but very possibly the inferior, of the typical Hodge at forty. . . Let them even change places, Hodge coming to London and Mr. Octavius Smythe to Loamshire. Hodge will be snapped at once—a farmer who had farmed near a town once told me that as sure as he sent a man into town twice to the same place with a waggon someone offered him a job—but who wants Mr. Smythe?"

"In the town the bitterness of 'too old at forty' has entered the soul of Mr. Smythe. In the country Master Hodge is at his best."

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFETIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World's Fair, and consult Grand Trunk Agents for further particulars.

MONTREAL MARKETS.

Montreal, August 10, 1904.

Ashes.—Receipts of pots are a little freer, but pearls continue to be remarkably scarce, and the unusually high figure of $8, or even more, would be readily paid for these goods. First quality pots are a shade easier at $5.80 to $5.85; second pots, $5.35.

Dairy Products.—The cheese market shows a somewhat unaccountable advance, and quotations are about half a cent higher all around than a week ago. Export trade is still much behind last season, and the make is a large one. Shipments from this port last week were only 69,087 boxes, as against 105,737 boxes for same week of 1903. Butter shipments last week were fairly large, aggregating 22,701 packages, just about 1,000 more than for the corresponding week a year ago. Values in this line are also firmer, and the general quotations for fine Township creamery is 19 to 19¼c., though it is claimed some business has been done at a fraction higher.

Dry Goods.—Customers' paper falling due on the 4th was very fairly met on the whole, in fact rather better than was generally anticipated, and some of the larger houses report the proportion of paper met as falling not far short of 75 per cent. In the way of trade there is no material change, orders come in rather slowly, and a considerable number of travellers are on vacation. Some English manufacturers of carpets advise a slight advance.

Flour.—There has been a further general advance in flour, both the large milling concerns giving notice that prices are up 20 to 25c. a barrel, making fine spring wheat patents now $5.05 to $5.20 a barrel; straight rollers, $4.65 to $4.75.

Groceries.—The feature of prominence in this line is the remarkable strength in the sugar market, and again this week have the local refineries established an advance on all lines, standard granulated being now quoted at $4.60, with $4 to $4.40 the range for yellows and creams. The demand from jobbers continues active. In teas, importers report a dull demand. Ceylon and Indian blacks show some little tendency to easiness, and it is said the making of Ceylon greens has entirely ceased for the present, owing to the low price of Japans. Since last writing there has been nothing of special interest reported from Mediterranean fruit points. The first direct fruit steamer to this port is timed to start loading at Patras on the 28th inst., and will afterwards call at Denia to complete cargo.

Hides.—A rather better demand is reported from tanners for hides, and dealers continue buying steadily on the basis of 9c. for No. 1, charging ½c. advance to tanners. Lambskins remain at 55c. each as lately advanced.

Leather.—Sole leather tanners appear to be very firm in their views, but

Cowan's Swiss Milk Chocolate
3
Dainty and Delicious

there is no advance to report. Export trade in this line is good. Black leathers are comparatively dull, but are steady in price, as also are dongolas.

Metals and Hardware.—General slackness characterizes the demand in these lines, and a good many heads of departments and warehouse hands are away on their holidays. Quotations show very little variation. Ingot tin is a little easier at 29½ to 30½c.; lead firm at $3.25; the discount from list on lead pipe is 35 per cent. Spelter and antimony are just as quoted last week. Pig iron is easy at about $19 for No. 1 Summerlee, and $18.50 for No. 2 selected; Middlesboro, $16.50 to $16.75. Bars are unaltered at $1.70 to $1.75; iron pipe, $4.20 in an ordinary way; large specifications would be shaded. Prices of plates and sheets of all kinds remain exactly as before.

Oils, Paints and Glass.—The warehouses in these lines continue to wear a holiday aspect. Turpentine is weaker at 82c.; linseed oil easy at 43 to 44c. for raw, and the usual advance for boiled. Sales of glass in fair quantities are reported as low as $3, and of ground leads at $4.25, prices which can permit of little or any profit.

◆

TORONTO MARKETS.

Toronto, August 11th, 1904.

Chemicals, Drugs, Etc.,—Dullness still prevails in quinine, though business keeps up at least as well as a week ago. Opium is moving with some degree of freedom. Otherwise, generally speaking, trade may be described as fair to good. New York reports speak of no particular new feature. Prices for chemicals are steady.

Dry Goods.—A good trade is being done, and the prospects for fall are excellent. All staple goods continue firm, woolens particularly so, and judging from the increasingly firm attitude of the holders of the raw material, there is every probability that this will continue, and even that further advances may come. A large trade is being done in dress goods, and the domestic fabric seems to become increasingly favored. Payments are reported good, generally speaking.

Flour and Grain.—Very little flour is offered in the market, and prices are quite firm. Ninety per cent. patents have advanced to $4, or a little higher, in buyers' bags. Millfeed keeps steady. Wheat has made the remarkable advance of 6 to 7c. since last week, owing to stray cables from the United Kingdom, and to high prices across the line. Other grains continue unchanged. A despatch from New York, dated 9th inst., states that the public came into the wheat market to-day with big orders, and prices immediately soared to $1.07 for September, or 1½ cents above the previous high record, and two cents over night. The bears then made a raid, during which the upturn was lost, but on the weekly Government bulletin, which seemed to confirm private damage reports, the market turned strong again with renewed buying for outside account a feature. The afternoon market was very irregular. Efforts by some of the longs to unload sent September tumbling off to $1.04 3-16, where the bulls rallied to its support, and ran the price back to $1.05½, closing it rather firm. Fluctuations over a cent either way attracted little comment.

Fruits and Vegetables.—Tomatoes have come into the market in very large quantities during the last three days, and prices dropped heavily, though everything was cleared up. Raspberries, which are becoming somewhat scarcer, are selling at 6 to 8 cents per box. Red currants are not very abundant. The following summary shows the range of quotations: Cherries, basket, sour, $1 to $1.25; do sweet, $1 to $1.35; Raspberries, 6 to 8c.; Lawton berries, 10 to 11c.; Red currants, large basket, 75 to 80c.; Black currants, $1 to $1.15; Huckleberries, basket, $1 to $1.15; Peaches, basket, 40 to 50c.; Apples, basket, 20 to 30c.; Pears, 35 to 50c.; Plums, 50 to 60c. Foreign fruits—Oranges, Cal. Vals, $4 to $4.50; Lemons, Messinas, $3 to $3.50; do Verdillis, $4; do St. Nicholas, $4; Bananas, 1sts, bunch, $1.75 to $2.25; do 8's, bunch, $1.25 to $1.50; do red, $1.50 to $2.25; Pineapples, Florida, case, $4. to $4.50; Watermelons, each, 20 to 35c.; Cantaloupes, small box, $2 to $2.25; do basket,

"WE WILL BOND YOU."

Corporate bonds are more reliable and in every way more desirable.
Only where it is indicated that men possess integrity of character can they obtain a bond in a surety company.
Regard your name as a bondsman as an encumbrance on your property.
Personal sureties are subjected to questions as to the worth of the bond filed which they would rather not have made public.
Once a corporate surety bond has been used, no further use for personal surety can be found.
Rates of premium on surety bonds are always moderate.
A surety company is required by law to carry reserve against its risks and is possessed of large resources.
The UNITED STATES FIDELITY AND GUARANTEE COMPANY executes bonds covering all positions and trusts.
Existence of surety companies makes it unnecessary for the employe to ask friends to become surety for his integrity.

Surety companies protect the home and family.
Unlike personal surety, the bonds issued by surety companies can always be collected.
Resolve to never have your name used as a bondsman.
Embarrassing positions may be escaped by not becoming surety on a bond nor asking others to do so.
This Company does not surround the person bonded with annoying restrictions.
You cannot afford to incur obligations by asking friends to become surety for you.

Head Office for Canada, 6 Colborne Street, Toronto.
A. E. KIRKPATRICK, Manager.

Vegetables.—Tomatoes, 40 to 65c.; Cucumbers, basket, 15 to 20c.; Potatoes, basket, 25 to 30c.; Beans, basket, 25c.; Green peppers, basket, 50 to 60c.; New potatoes, bushel, 75 to 90c.; Egyptian onions, sack, $2.25; do basket, 30c.; Egg plant, basket, $1.15 to $1.25; Southern green corn, dozen, 30c.; Kalamazoo celery, dozen, 45c.; Canadian celery, dozen, 60 to 75c.; do pinks, 50 to 65.

Groceries. — On Tuesday last, prices of all grades of refined sugars were advanced 5c. per cwt. The movement is very good. The beet crop in Europe is reported to be smaller than for a number of years past. Not only is the acreage about 8 per cent. smaller than usual, but climate conditions have been bad. A fairly steady trade is being done in Japan teas, though prices are slightly easier. Ceylons seem to be improving somewhat in quality, which may mean higher prices. Currants are firm, while other dried fruits are fairly active without special features.

Hardware. — Considering this is the holiday season, a good business is going on, though the volume for the moment is naturally on the small side. Also considering the season, payments may be described as good. The high prices of wheat will no doubt exercise a good influence in the country districts, as farmers will feel disposed to do more in the way of building and making improvements, which things always are good for the hardware trade. But so far they are too busy to start work. A steady tone may be discerned in the market so far as prices are concerned. Reports from the North West are particularly gratifying. Metals show an improving tendency both here and in the United States. The demand for iron and structural materials is quite good.

Hides, Skins and Leather. — Receipts of hides are small, and prices are very firm, owing to the small stocks, and to the high prices reigning in Chicago as a consequence of the packers' strike. Calf and sheepskins are firm. In tallow, no change has occurred of any moment. For leather, the feeling seems to be a little firmer, and prospects are improving.

Wool. — The market for both fleece and pulled wool is very firm, owing to small receipts and strong reports from other places. There is a great divergence of opinion between buyers and holders however.

N. Macmillan, manager Peter Reid, engineer and three miners employed at the Shakespeare mine, near Webbwood, New Ontario, met a terrible death on Tuesday 2nd. They descended the shaft too soon after an explosion had taken place, and each one was overcome by the deadly fumes, so instantly as to be unable to call a word of warning to his companions taking the same path.

The Department of Marine and Fisheries has decided to try the efficiency of acetylene gas on reef buoys, and will test several kinds of plants of that gas.

This week takes place the international convention of the Brotherhood of Locomotive Engineers, in Montreal. Between six hundred and eight hundred delegates are present.

An important rise of water is reported from up the river near Fredericton, N. B., and it is expected that soon most of the lumber will come down satisfactorily. The logs extend some fifteen miles above Edmundston.

Surveyors are at work looking over a route for the proposed railway extension from Meaford to Owen Sound. Some believe that Owen Sound will be the eastern port for the upper lake fleet of the Grand Trunk Pacific line.

The Dominion Coal Company have prepared plans for the expenditure of a considerable amount of money in the erection of new steel coal towers and elevators, and the building of a fleet of large and powerful steel vessels.

The directors of the Canadian Pacific Railway held a meeting in Montreal, on Monday, and declared a dividend of 2 per cent. on the preference stock for the half-year ending June 30th, and a dividend of 3 per cent. on the common. The gross earnings of the company for the fiscal year were $46,469,132, compared with $43,957,373, for 1903, while the working expenses were $32,256,027 and $28,120,527 respectively. The net income from all sources was $15,904,374, for 1904, against $17,123,658, for 1903. After the payment of all dividends, the surplus for the year carried forward is $1,666,204.

BUSINESS OPPORTUNITY.

WANTED.—Party to invest from ten to twenty thousand dollars in an established manufacturing business paying large profits, and also take the business management. Address Box 1506,

Monetary Times.

It is stated in San Francisco, that owing to the war in the East, and the fear of seizure of their ships by the Russians, the Pacific Mail, Occidental and Oriental, and Portland and Asiatic Steamship Company have given notice that they will not accept any freight from the railroads designed to points in China, Japan, Manchuria, etc. This notice affects deliveries of freight from Eastern points.

The United States Government has granted patents to Canadian inventors as follows: Patents granted to Canadians: 765,699, machines for burnishing reflectors, A. Carter; 765,704, cattle guard, H. Hamel; 765,726, fire escapes, F. M. Crowe; 765,821, corn husker and shredder, T. Dornton; 765,840, waggon axle, D. Jackson; 765,863, hair curler, S. A. Spangenbery; 765,898, extracting soluble albumen from milk, M. C. Lewis; 765,930, portable wall section for house-building, E. C. Mahony; 766,011, pole tip, W. Ainley; 766,109, lamp burner and chimney therefor, W. H. Margetts; 766,140, harness hook, H. M. Eldridge et al.; 766,232, fire extinguisher, S. Erb and W. E. Morell; 766,294, draw section for caskel cabinets, W. Thompson; 766,295, shingle mill, W. Thorp; 766,345, fastening fence wire, C. H. Hanson; 766,457, sleigh, E. Michaud and C. Desjardins; 766,648, windmill, J. J. McLean; 766,779, fare box, F. H. Stewart.

Canadian National Exhibition,

1904. TORONTO, Ont. 1904.

August 29th to September 10th.

Largest and finest exhibits of Canadian manufactures, agricultural products, live stock, etc., etc., ever shown. New buildings, improved facilities and greater variety of attractions than ever.

"BLACK WATCH BAND"

The band of the "Black Watch" (the famous 42nd Royal Highlanders) will attend the Exhibition, by permission of his Gracious Majesty the King and officers of the Regiment, and will play three concerts daily throughout its entire course.

THE RELIEF OF LUCKNOW

The grandest pyro-military display ever seen in Canada will be presented before the Grand Stand each evening, with hundreds of performers, brilliant costumes, gorgeous pyrotechnic setting, and assisted by the pipers of the "Black Watch."

SPECIAL ATTRACTIONS

"Dare-Devil Schreyer" in his leap from a bicycle 108 feet into a tank of water; **The Bickett Family**, world-famous aerial acrobats; **Winschermann's Wonderful Trained Bears**; **Adjie's Troupe of Lions**,—the most remarkable group of trained animals in the world, and many other acts of equal merit.

Special Railway Rates.—Ask your Station Agent for Particulars.

Remember the Dates, AUGUST 29th to SEPTEMBER 10th.

W. K. McNAUGHT, President. J. O. ORR, Secretary and Manager.

How the
Royal Automatic
Smoke Preventer
and Fuel Saver
Staff Are Rushed.

Our men are working until midnight almost continuously throughout the week, having just completed twenty-five orders in the month of July alone, and among the shrewd business firms of Toronto that are recently having their plants equipped are the Polson Iron Works, the Freyseng Cork Company and the Dominion Brewery; besides we had to increase our staff two extra travellers in answer to a number of inquiries from outside places. If you wish to have your plant equipped before October or the busy season kindly let us hear from you at once as we consider it a pleasure to give any information regarding economy in cost of power.

Royal Automatic Smoke Preventer and Fuel Saver Company, ***ROOM "Z,"***

MOST COMPREHENSIVE in the market.
Full Information Freely Given.
A. C. C. DINNICK, Managing Director.

The city of Toronto has won in its case before the Privy Council, against the Canadian Pacific Railway, to obtain arrears of taxes amounting to about $500,000. The question was as to whether or not the C.P.R. should pay taxes on an alternative site south of the Esplanade, as well as on the site occupied by the company's tracks. The city held that the company should do so, but the latter took the other position. The city has won, the only point undecided being the question of interest on these tax arrears.

We note that the Superintendent of Buildings in New York, is formulating a plan for inspecting elevators, licensing the operators of the same. Some such thing is badly needed in Canadian cities as well, where all sorts of people, well adapted and otherwise for the position, run elevators and hold the lives of dozens of people in their hands. Some two or three years ago, we pointed out the advisability of having a system of inspection here, but though the matter was talked of, nothing definite was done.

A demand of assignment has been served upon W. T. Bailey, wholesaler of upholsterers' goods, curtain stuffs, etc. In 1896, he bought out the branch business in Montreal of Peter Schneider's Sons & Company, of New York, and started under very favorable auspices. Unfortunately he spread out in the manufacture of curtains and fittings, as well as becoming interested in some manufacturing concerns outside his own business, and in this way became involved, necessitating his asking a general extension last January. This arrangement, however, does not appear to have afforded the desired relief, and it is feared liquidation will now be necessary.

The Ontario Crown Lands Department has granted the application of the Backus Syndicate of Minneapolis for an extension of time for the completion of the power works at Fort Frances. The syndicate claimed that they were unable to get a contractor to undertake to complete the works by May 1st, 1906, as specified in the agreement, and the Government has now given them until January 1st, 1907, when the contract provides that the power of the falls right across the river, which is the international boundary, shall be developed. The syndicate are said to have practically completed arrangements for the erection on the Canadian side of the river of a three-thousand-barrel flour mill.

During the Exhibition period, a Retail Furniture Dealers' Association has been formed, covering Manitoba and the North West Territories, and under the auspices of the National Retail Furniture Dealers of Canada. The first officers of the Association are as follows: President, W. B. Sterling, secretary-treasurer, T. W. Leslie, executive, C. H. Wilson, W. B. Paine, Winnipeg; A. H. Horn, Rat Portage; A. F. Campbell, Brandon; M. B. Lloyd, Morden; John Simpson, Neepawa; R. B. Ferguson, Regina; H. Neilson, Calgary; Alex. McIntosh, Edmonton; J. M. Struthers, Guelph, national secretary. One evening during Exhibition, the Canadian Furniture Manufacturers, and others, tendered a banquet and smoker to the visiting retailers, an event which proved highly enjoyable.

The Dominion Government has granted $40,000 for the extension of the breakwater along the south shore of Centre Island, Toronto. The new breakwater will be built on a new plan. It will be eight feet wide, the piles being of sheet iron, twenty-two feet deep on the lake side, and fifteen feet on the land side. Between the piles, the space will be filled in with gravel, and small stones up to the low water line, from there to within two feet of the top with rubble concrete, while the top two feet will be of solid cement. This, it is believed, will make a perfect sea wall, and only a very small stone talus will be needed. The breakwater will be four feet above high water level. The groynes erected in 1903 have proved failures, hence the need for the new works. Some 1,500 feet altogether of breakwater are necessary, but only 800 feet are allowed for in the estimates.

UNITED STATES FINANCES.

Henry Clews & Company, in their circular under date of New York, Aug. 6th, 1904, say that the stock market exhibits a strong and cheerful undertone in spite of absenteeism, and unfavorable reports concerning the wheat crop, which induced more or less realizing in the early part of the week. The hopeful feeling now so prevalent in the "Street" is due to the changed position of leading bankers and financiers, who have abandoned the excessively conser-

The Mutual Life OF CANADA

still maintains its stand at the

HEAD OF ALL ITS COMPETITORS

among Canadian Life Companies, as shown by the Government Reports.

vative attitude which they held for the last year or two and assumed one of renewed confidence in the future. The reasons for this change of attitude are plain. They are, (1) the prospect of another profitable harvest, (2) the improvement in the iron trade, (3) the practical certainty of easy money and (4) the absence of any disturbing issue in the Presidential election. With such an array of influences on the side of improvement, and with securities concentrated in strong hands, it is not likely that the big leaders will lose such an opportunity of putting the market upon a higher level. As for the crops, cotton is easily the leading factor. The favorable character of the last Government report indicates a yield of not less than 12,000,000 bales. While cotton has shown a big decline, the price is still high enough to give the grower a good profit; and the lower cost will come in as a boon to the manufacturer, who has been greviously hampered by high cotton, high wages, competition between Northern and Southern mills, loss of export trade and legislative and union restrictions. Cheaper cotton will do much towards restoring prosperity in the cotton goods trade. Next to cotton, the corn crop is the most important element. The improvement in the iron trade is more than talk. Orders have recently been placed for over 110,000 tons of pig iron, which shows that trade leaders, who are in the best opinion to judge, believe the turn for the better has come. The iron trade is as good a barometer under the new conditions as under the old. As stated in previous advices there is no need of concern about the monetary situation. Our local banks carry a big surplus reserve of about $60,000,000, which is the largest in many years at this period. The West and South are also amply supplied with funds, and the crop and business demands are not likely to cause any embarrassment in the money markets. On August 1st the stock of money in circulation in the United States was $2,546,000,000, a net increase of $164,000,000 in the last twelve months. Such are the influences which are at present governing the stock market. The only drawbacks are the injury to the wheat crop, continued labor agitation and the possibility of injury to the crops during August and early September.

◆

GOLD MINING IN NOVA SCOTIA.

Though less gold is being produced at the present time than at previous periods in its history before, it may be said that the prospects of Nova Scotia becoming a great gold producer never looked brighter. In former years many who engaged in gold mining were prompted to do so by a spirit of speculation. They knew it was risky; they had hopes of making a "strike"; they were prepared to shrug their shoulders if the gamble failed. It is different now, observes the Maritime Mining Record. The day of the gambler in gold areas, the day of the speculative company, and the day of the small tributary is over. Gold mining is now getting down to its feet, and is being entered upon as a sound business proposition, and not as a risky speculation. After this it will scarcely be possible to say, as it has time and again been said in the past, that the cost of a dollar's worth of gold has been a dollar and a half on an average—to the getter. Gold mining is now getting into the hands of companies with sufficient capital to do the necessary development work, which individual workers were afraid to tackle. Returns of two ounces to the ton are not looked for. With big mills, big crushings, and skilful management, good returns are had from as many penny-weights as previously were obtained from ounces. During the past few years marked improvement is noticeable in gold mining methods. The very latest methods and machinery are now employed in both the mining and reduction plant at the larger mines. This year's amendment to the Mines and Minerals Act, whereby the Government will assist in the sinking of a shaft from the surface to a depth of 2,000 feet in gold mines, has brought forth several said to be bonafide applications.

◆

The Canada Foundry Company has been awarded a contract by the Canadian Northern Railway for a bridge over the North Saskatchewan, northwest of Battleford, to consist of eleven spans, and the total length of the steel superstructure to be about 1,870 feet. The total amount of steel in the structure will be about 3,500,000 pounds.

The Cornwall, (Ont.), Paper Manufacturing Company has elected the following officers and directors: President, M. P. Davis, Ottawa; vice-president and managing director, S. Greenwood; directors, Col. R. R. McLennan, R. J. Pitts, J. A. Cameron, C. P. Deroche, E. H. Brown.

On Tuesday a very destructive fire took place in Victoria, B.C. It broke out in the pattern room of the Albion Iron Works, and, fanned by the strong wind, destroyed the store room and other buildings of that establishment. It then caught the yards of the Shawinigan Lake Lumber Co., where it was fortunately soon extinguished. Sparks, however, set light to several residences, in some cases, some hundreds of yards away, and many were burning at different points at the same time. Altogether the damage done will aggregate over $100,000. Insurance on the iron works, which incurred the larger part of the loss, $75,000. Many families lost all their furniture and household goods.

Compared with last year there has been a great falling off in the receipts and shipments of grain at the port of Montreal this season. Receipts of wheat up to date this year have been 6,850,000 bushels, against 11,739,000 bushels last year; of corn, 943,000 bushels, against 4,288,000; while shipments have been, of wheat, 4,667,000, against 9,000,000 last season; and corn 803,000, against 3,665,000. Total receipts of corn and wheat were, therefore, 8,300,000 bushels behind last year, while the shipments show a proportionate decrease. The Canada Atlantic Railway has brought down 2,718,000 bushels of grain, as compared with 4,642,000 to date last year.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

A MENACE TO PUBLIC HEALTH.

Nothing can be more in the interest of manufacturers of canned goods—jams, jellies, and similar put-up goods—than that the public should be able to place implicit confidence in the purity and freedom from adulteration of the articles of this nature which they buy at the stores. Yet recent analyses show that this ideal condition is very far from being reached. A short while ago, Hon. Mr. Brodeur, of the Canadian Ministry, had inspectors visit several retail stores and obtain various samples of articles offered to ordinary purchasers in the daily course of business, such as jams, jellies, condiments, etc. Of jams and jellies the number of samples was seventy-four, and these included raspberry, strawberry, plum, peach and other fruits. Analysis showed that only fourteen samples were genuine, fifty-five being classed as adulterated and five doubtful. Not all the adulterating material could be classed as positively harmful, but it included many substitutes, as well as such stuff as glucose, coal tar dyes and salicylic acid. Investigation into the quality of ground peppers, cloves, ginger, cinnamon, allspice and other spices showed only eighty-eight pure out of one hundred and eighty-eight analyzed, the impurities being found to be chiefly stone, husks, shells, sand, charcoal, sweepings, hair, chips and dirt.

Surely this is a disgraceful state of things, and one that should be remedied without delay in the interest of the manufacturers and importers who *do* put upon the market a genuine article which really is what it purports to be. We are glad, therefore, to learn that the Government intends to act in a way which it has already the power to do, under the provisions of the Food Adulteration Act, and that those who have been responsible for putting on the market goods which were not what their labels claimed them to be, will be prosecuted with rigor.

CANADIAN FLOUR IN JAPAN.

A very interesting report comes to hand from Mr. A. MacLean, Canada's commercial agent in Yokohama, with whom the Monetary Times had an interview before he left Canada. While admitting that much remains yet to be learned concerning the commercial trade requirements of Japan, he has no doubt that ultimately a valuable trade can be worked up. There would appear, from what he says, to be a good opening for Canadian flour. In this particular, he confirms what we were long ago told by the Japanese Consul General in Canada. Some Japanese bakers claim that they are able to obtain from Canadian flour as much as 15 per cent. more bread than from the American, while others say the difference is very slight.

It is suggested by some that a warehouse should be established for the display and supply of Canadian goods generally, such as flour, butter, fruits, etc., so that the demand could be filled directly from stock. Anything of this kind that will give permanence, or at least reasonable continuity, to Canadian representation will be a good thing. In our last interview with Mr. Nosse, that gentleman urged that Canada should have a permanent resident agent in Japan, saying that to send a commissioner over for a few weeks at a time could produce only a slight effect. The quality of flour most largely used in Japan is that known to the trade as "straight," fancy brands being so far very little used. At present, the chief supplies come from the Pacific Coast States. The flour mostly favored is that containing a large percentage of starch, and it is used largely in the manufacture of macaroni, vermicelli and steamed cakes. The consumption of such food is increasing largely in the country, though the Japanese as yet are not large bread consumers. The prices fetched at present by flour from the United States range from about 86c. to about $1.35 per quarter sack of 49 pounds, but there are large stocks on hand and sales are slow. On October 1st, there will be an increase of duty of .247 sen (.124 cents) per 133 pounds. The present rate of duty is .456 sen (.228 cents) per 133 pounds, and when the new duty comes into force the duty on flour will be .703 sen (.352 cents) per 133 lbs., an increase of 54½ per cent. of duty, whereas the duty on wheat does not change.

Several dealers suggest shipping to the Yokohama market trial shipments of sacks of flour weighing about 24½ pounds each. At present there is a difference of about 50c. per barrel (or four bags), against Canadian flour, so that Japanese bakers are only able to use it for fancy baking. Mr. MacLean thinks that a business could be worked up for Manitoba No. 1 Hard, notwithstanding its high price, if the right methods be adopted. He insists most strongly that no attempt be made to palm off inferior goods of any kind.

"Flour must be packed into white cotton bags containing 49 pounds each. These closely-woven, starched bags allow practically no waste and no infiltration of dust in the course of transportation. Grain bags will not do. Some Canadian flour comes shipped in 98-pound bags—grain bags, apparently—and during shipment a great deal leaks out, and much dust works its way into the flour, and the trade is complaining on that account. Wheat is usually imported in sacks, heavy, coarse bran sacks containing 133 pounds. Bags of closely-woven material, made like burlap, tear easily, with a resulting shortage on delivery."

FACTS ABOUT RUSSIA.

Russia's apparently uninterrupted series of reverses during the present war has brought into being on this continent and elsewhere, a feeling of what may be almost called contempt for that country, and all that appertains thereto. This is a feeling, however, which may easily be carried too far; Russia is a country of magnificent resources; all that has been shown so far is that her strength is not in an immediately available position. A few facts and figures about this wonderful and probably greatly misunderstood nation, which still remains the "Colossus of the North," may prove of more than usual interest at this juncture in her history.

The Russian Empire covers an area of 8,660,395 square miles, or one-seventh of the land-surface of the whole globe. Its population is estimated at 141,000,000. To show the country's marvellous growth in numbers, which of course includes the people of newly "absorbed" territories, it may be remarked that in 1859, the population of Russia was 74,000,000, or little more than half of what it is at present, and that in 1722 it was only 14,000,000. Considering the poverty and lack of opportunity for the masses, the emigration is small, probably hardly an annual average of 400,000, though it seems to have a strong tendency to increase, and would probably do so to a considerable extent if it did not meet with Government discouragement.

The sole reliance of vast masses of the people is upon agriculture, and though implements are of the most meagre description, and the methods of cultivation employed very inferior, the enormous aggregate of land under cultivation, though yielding as a rule but poor and uncertain crops, is responsible for great additions to the world's food supplies. It should not be taken for granted, however, that this agricultural inferiority will last for ever in Russia. The Government is now taking a pronounced interest in several rural departments of industry; and already in such lines as eggs and butter the Russians are beginning to make their mark in the markets of the world. At present there are 68 or more experimental farms under governmental control. It is by no means unlikely that future development will show that one of Canada's strongest commercial rivals in the supply of agricultural produce, etc., is Siberia.

In 1902, the estimated area under crops in the Russian Empire, including Poland, Finland, and Siberia, was 214,996,000 acres of land, and the crop of wheat amounted to 820,851,000 pouds; of rye, to 1,292,690,000 pouds; of oats, to 746,077,000 pouds. A poud or pood is equal to a little over 36 English pounds. In 1899 there were under flax in European Russia about 4,004,642 acres. To show that, like another country nearer home, Russia sometimes suffers in the conceptions formed by other people of its climate, it may be remarked that in the province of Transcaucasia there were in 1899 about 250,675 acres under vines, which yielded 17,043,000 gallons of wine; and there were also about 10,265 acres in tobacco, yielding 3,392 tons. Another culture which shows a tendency to expand in the same region is tea. In the production of animals, Russia is well to the front. Of horses, the estimated number she possesses is 25,961,000; cattle, 43,589; sheep and goats, 70,647. In the year 1899, it was calculated that Russia produced 14 per cent. of the total meat production of the world.

Another natural feature in which Russia is rich is timber. She has vast forests, the principal owner being the State. Altogether, belonging to the Government there are 936,546,000 acres of forest, though much of this is in Asiatic territory where its utilization is attended with greater difficulties.

Many districts are rich in mineral ore of all kinds, the chief minerals mined being gold, platinum, silver, lead, zinc, copper, iron, coal and naphtha. In the year 1902, the consumption of all sorts of iron, raw and wrought, was 177,552,000 pouds, of which 156,497,000 pouds, or nearly 98 per cent. was made at home. The output of coal in the year last mentioned was 6,022,000, and the Russian Government is trying, through the imposition of a stiff duty and other means, to increase it.

In some branches of manufacture, the Russians have shown astonishing progress in recent years, more particularly in textiles. In 1897, the number of factories, mines, and industrial establishments of all kinds in European Russia, not including Poland, was 30,029, and these employed 2,098,242 work people, and turned out goods to the value of 2,839,144,000 roubles. A rouble is about half a dollar. The cotton industry grew from 240,400,000 roubles of an output in 1880 to 430,218,000 roubles in 1897. Last year there were in operation in the empire 274 sugar factories, the acreage of land under beets was 1,346,071 acres, and the output of refined sugar was 1,180,293 tons. In 1895 it was only 684,721 tons, which shows a satisfactory rate of progress. In 1895 there were 38,544 flour mills in Russia and Poland, with a total production of 35,100 tons per day.

Coming to the consideration of the trade done by the Russian Empire it is very large, but of course by no means so much so when the size of the country and of its population are remembered. Briefly stated, the export of foodstuffs in 1902, was valued at 526,189,000 roubles; chiefly corn, flour, buckwheat, eggs, and dairy produce, timber, flax, oil cakes, etc.; of raw and half-manufactured goods, 258,267,000 roubles; of animals, 21,558,000 roubles; and manufactured goods, 19,263,000 roubles.

The imports for 1902 may be divided roughly into food, 81,409,000 roubles; raw and half-manufactured goods, 295,483,000 roubles; animals, 1,403,000 roubles; manufactured goods, 148,800,000 roubles. Among the chief of these may be mentioned raw cotton, metal goods, coal, wool, raw and in yarns, wines and spirits, tea, fish, machinery. The countries which take the larger quantity of Russia's exports are Germany, (203,596,000 roubles in 1902); United Kingdom, 188,775,000 roubles; Netherlands, 103,013,000 roubles; France, 55,158,000 roubles. The United States only took 4,413,000 roubles' worth. It may be worth noting that the Russian tariff is very high, and generally specific in its nature.

◆

THE WATER PRESSURE IN MONTREAL.

We receive from Montreal a bitter complaint from a merchant in that city, of what he calls the despotic and disturbing action of the fire underwriters in putting up fire premiums within the congested district of Montreal, on all risks except dwellings. The congested district is bounded by the water front and Lagauchetiere streets on south and north, by Murray and St. Denis streets on west and east. The terms of the circular issued by the Canadian Fire Underwriters' Association specify that:—

> An extra of seventy-five cents (75c.) instead of twenty-five cents (25c.) as formerly must be added on and after this date to all ratings (annual and three year) in the Montreal Tariff Book (dwellings alone excepted) when risks are situated in the congested district defined on page 29a of the said Tariff.
>
> The rates on special and scheduled risks situated within the congested district, the ratings for which have been published since the 25th January, 1901, have to be increased on and after this date by adding fifty cents (50c.) thereto, and to ratings issued prior to the 25th January, 1901, seventy-five cents (75c.).

Our correspondent demands to know when the business people of Montreal, "who are the people hit by this piece of arbitrariness of the insurance lords, are going to get a rest from being salted by the fire insurance companies." As we understand it, the underwriters have raised the rates because the city authorities of Montreal, who have time and again been warned as to the defects in that city's water supply, etc., have not taken the requisite steps to have matters put right. The immediate cause of the present measure appears to be that a water famine might result any day from the defective equipment of the low level pumping station. It was stated last week, indeed, that the boilers at this station were liable to explode at any moment; but this we find from a report of Boiler Inspector Champagne, on Tuesday, is incorrect. Two batteries of the boilers, that is, six out of nine, Champagne considers "as safe as any in the city." But no steps had been taken to replace the other battery of three, condemned two years ago and never used since, and these boilers ought to be replaced at once as a reserve in case of explosion or other happening such as that of last winter when, as Superintendent Janin reminded the aldermen, "the river dropped so low that the turbine pumps could not be used very much. Then the boilers would have to be in use more." But the council has been dickering and dilly-dallying over the getting of new boilers for something like three months, and only this week, after the insurance rates had been raised, have they taken action by ordering three new Babcock and Wilcox boilers, at a cost of $15,530.

People in Montreal, and indeed everywhere else, are apt to be too dilatory in dealing with fire-fighting appliances until a great fire comes. The inaction of the Montreal aldermen in the matter under notice is only one instance among many of the sort of delay that seems to become chronic whenever the stimulus to activity of a conflagration ceases. It is of no possible use to curse the underwriters for doing what they did to protect themselves. Our correspondent should curse the city aldermen rather, for trifling with the interests of the city.

◆

THE NOVA SCOTIA STEEL AND COAL CO.

Further enquiry into the affairs of the Nova Scotia Steel and Coal Company convinces us that our informants as per our issue of 5th August were without sufficient warrant for describing its position and prospects as they did. In the one case this misinformation appears to have arisen from imperfect knowledge, but in the other case, we now conclude, from deliberate bad faith. Certain of the statements made, of which we quoted part, were untrue, some were true, and some others exaggerated. It is our duty, therefore, to say that the paragraph of fifteen lines on page 166 of our issue of August 5th, within quotation marks, ought not to have been printed. We further add an apology to the Board of Directors for having misrepresented their policy and their action.

Following up what was said in our issue of last week, we find that the amount at which the Ferrona plant originally stood on the books of the company was $326,019. This was written down at different times until the sum at which it stands on the books to-day is only $86,734. Thus the "one million loss" on this property, which our correspondent claimed, is a myth. Again, the coal mines at Coalburn, known to the company as the Marsh mine, cost originally $87,300; in 1902 there was written off it $13,000, odd; and it stands to-day on the company's books at $74,-

000, and is producing about two hundred tons of coal per day. To call such a property practically worthless was therefore absurdly wrong.

We publish elsewhere in to-day's issue the company's general statement, being up to the 31st December, 1903, embodied in its third annual report to the shareholders at their meeting of March last. It shows assets of $10,879,149, against which are $5,150,000 of stock ($1,030,000 preferred, and $4,120,000 common); $2,443,000 in bonds; sinking fund, $57,139; general reserve, $750,000; special reserve accounts and current liabilities, $1,793,365; leaving a surplus of $685,642 at the credit of profit and loss.

The profit and loss account shows earnings for the calendar year ended with December last of $859,397, which, added to a balance of $453,149 brought forward from the previous year, gives $1,312,546. Out of this sum comes $82,400 dividend on preferred stock; $246,000 dividend on common stock; $150,000 interest on bonds; sinking fund, $62,700; directors' compensation, $10,000; and reserve for depreciation $75,000; in all, $627,000. There remains, therefore, $685,642 balance at credit of profit and loss.

It is manifest from the figures we have given that this enterprise has grown to great dimensions and is one of great importance to the country. And a fuller knowledge of the plans of the directors and of the intended scale of the output of both coal and metal makes it reasonably plain that the company's activities and earnings will enable it with a continuance of active demand at good prices to earn enough to justify the dividends of $328,400, and the $150,000 interest on the bonds.

FIRE PROTECTION.

Last week we gave a brief summary taken from a book entitled, "Fire Prevention and Protection," published by the Spectator, of New York, of some of the more commonly used constructions and devices for lessening the danger from fire. We now propose to take from the same source a few hints as to the means to be taken to protect against and extinguish a fire, should it unfortunately break out. Let no one say that this is an old story or a trite story, and has lost its point. The loss by fire on this continent, ten to twenty millions of dollars a month, should arouse every man to do his best to lessen it. First and foremost among fire protective agencies is a good sprinkler system, and behind this there must necessarily be a good water supply. If it is at all possible to have more than one source of supply, it is very unwise to depend, when so much is at stake, upon a single source. Underwriters much prefer two independent supplies for sprinkler systems, one to furnish water automatically, and the other under heavy pressure. That furnished automatically should be sufficient in volume and force to give good results promptly on the opening of one or more sprinklers. Of chief importance in the subjugation of fire is the element of time. As to the supplementary supply, of primary necessity is the requirement that it should be ample in quantity, sufficient in any case to enable the pump to run at its rated capacity for at least an hour.

With reference to the manufacture of standard tar-coated cast-iron water pipe, there are many rules and requirements to be taken into consideration, and these should be very carefully noted and studied. This applies equally to the manufacture of pumps, and indeed to that of all the appliances used for fire protection purposes. Again, when installing a sprinkler or other system for extinguishing fires, it should be remembered that only such valves, gauges, tell-tales and similar mechanisms be used as have had the approval of the underwriters in the locality where the plant is to be equipped. Not only are lower insurance rates likely to be secured thus, but the owner's property is in this way better protected.

We next come to the chemical fire extinguishing systems, which may be divided into two classes, automatic and non-automatic. The automatic chemical plan of extinguishment was only devised so recently, comparatively speaking, that opportunities for practical test in real fires have scarcely been numerous enough to admit of fair comparison with the water sprinkler system. It has a great advantage, however, in the elimination of damage by water, and such advantage would be especially valuable on vessels. For many years past portable chemical fire extinguishers have been known and used with excellent results. The National Board of Fire Underwriters of the United States has several rules and regulations for the construction and installation of stationary chemical fire extinguishers, and these may be studied with profit.

The importance of a well-equipped and systematic private fire department in a mill, factory, or other large establishment cannot be over-estimated. At any time a fire may occur which, even in a building thoroughly equipped with an automatic sprinkler system, may gain sufficient headway to need the efficient aid of a fire-fighting department ready on the premises to keep it in control at least until the arrival of a public fire department.

LIVE STOCK.

Good cattle have been comparatively scarce at both the Toronto city and Toronto Junction markets during the past week or two. Receipts have been fair, but much of the stock offered has only been of second-rate quality, and buyers have shown no keen desire to transact business, even at the easier prices which prevailed. Had the average quality, however, been higher, it is likely that both butchers' and exporters' animals would have been taken up readily. At the last city market day, the trade actually transacted was confined largely to butchers and exporters' cattle, the low prices realized by sheep and lambs the previous week having brought about a slight run. Prices ranged a little higher as a consequence. Really good milch cows were rather scarce, and prices went from $30 to $50. For calves, the market was on the quiet side. Comparatively few hogs were offered, though prices were fairly good, having made a rise of ten cents a few days ago. The following summary gives the average prices this week in Toronto, very poor and extra good stock fetching a little less or more respectively:—

Export cattle, extra choice	$4 25	to	$ 5 00
do. good to medium	4 50	to	4 90
do. cows	4 00	to	4 50
Butchers' picked lots	4 50	to	4 70
Good to choice loads	4 30	to	4 50
Fair to good do	3 50	to	4 25
Mixed lots, medium	2 50	to	3 25
Good cows	3 50	to	3 75
Common to fair do	2 50	to	3 25
Butchers' bulls	3 00	to	4 00
Bulls, export, heavy	3 50	to	4 00
do. medium	3 00	to	3 40
do. light	2 75	to	3 00
Stockers, heavy	3 60	to	4 00
do. light	2 75	to	3 00
do. common	2 00	to	2 75
Light bulls	1 75	to	2 00
Feeders, short-keep	4 00	to	4 50
do. medium to good	3 50	to	4 00
do. common and rough	2 00	to	2 50
Milch cows, each	30 00	to	50 00
Export ewes, per cwt	3 65	to	3 75
Cull sheep	2 00	to	3 00
Lambs, each	2 50	to	4 00
do. per cwt.	4 25	to	4 75
Calves, per lb.	3½	to	5¼
do. each	2 00	to	10 00
do. bucks, per cwt	3 00	to	3 10
Hogs, selects, per cwt	5 75	to	0 00
do. lights	5 50	to	0 00
do. fats	5 50	to	0 00

In Montreal, according to latest advices, there continues to be a strong undertone to the market for hogs. Cattle on the other hand are rather easy. This is attributed to increasingly large supplies. The demand for sheep is pretty good, also for lambs. Ocean freight space for September is reported very firm, especially for Glasgow and Liverpool. Advanced rates are anticipated by some. The demand comes largely from the other side.

London cables report a fairly firm undertone in the cattle market, and prices show little change, Choice United States cattle sell at 13¼c.; Canadian at 12½c.; sheep are steady at 13c. In Liverpool, on the other hand, an easier tendency is visible.

THE LUMBER TRADE.

Values for pine lumber remain just about the same as last reported. The car-load trade may be described as being in just as good a position as a year ago, and a very fair volume of business is being done. Green lumber on the other hand, that which ordinarily goes by water, is very dull, indeed it may be said that it is out of the market. The reason for this is that a large proportion of such business is transacted by buyers resident in the United States, and general trade in that country is so dull just now that these people are waiting till prices go down before sending orders. Holders on this side, on the other hand, keep a firm attitude.

Farnworth & Jardine's (Liverpool), circular gives the following particulars of the state of the British wood market. We remark that the imports of wood from Canada to that port for seven months of the present year were 15,000 tons greater than for the same period of 1903, and 21,000 tons greater than for the like seven months of 1902.

The business of the past month has shown considerable depression. The arrivals have been heavy, and, although there is a fairly steady trade, orders are small, and the consumption has been disappointing; consignments have been large and pressure to sell has caused a further decline in value of some of the leading articles; stocks all round are ample, and of some of the leading woods too heavy. Referring more particularly to Canadian woods, of pine waney the arrivals have been moderate, chiefly on merchants' account; the consumption has been unsatisfactory; values are fairly steady, but stocks are ample. For square pine the demand continues quiet, and stocks are sufficient; values are unchanged. The import of red pine consists of about 4,000 feet, chiefly on contract, which mostly goes direct into consumption; the demand is limited. Oak logs have not been imported; there is no improvement in the demand to report; the deliveries have been small, and stocks are adequate; there is little change in value to record. Elm has arrived more freely, and chiefly on contract; there is fair enquiry for first-class wood, and stocks are not too large; values are firm. Ash is only in very limited request. Pine.—The arrivals of pine deals have been in excess of the corresponding month last year; the deliveries have been fair, but stocks have further increased, and are now heavy; sales are difficult. There is no improvement in the demand for red pine deals to report, and values are weak. New Brunswick and Nova Scotia Spruce and Pine Deals.—The import during the past month has been less than June, but considerably in excess of the corresponding month last year, viz.: 15,180 stds., against 13,400 stds.; with quiet demand the deliveries have been disappointing; stocks are too large, and a further decline in price has taken place. Shippers would do well to curtail consignments. Pine deals have arrived more freely, and chiefly stored on shippers' account; the demand is quiet and stocks are heavy. Of birch logs the arrivals have been chiefly from Quebec, and largely on contract; the deliveries have been fair; prices are steady, but stocks are now sufficient. Planks have been in better request, and prices have improved; stocks are light. There has been no import of British Columbian and Oregon pine; the deliveries have again been fairly satisfactory, but stocks are still heavy; values are steady.

◆

GREATER CLEANLINESS NEEDED.

It may be an exaggeration to say that the streets of Toronto are not kept in fully as clean a condition as those of New York and other American cities. It may be that, taking it on an average, and viewing all the streets throughout the whole year, they really show up fairly well in comparison with many places which could be named. This is not the main point, however. Most people will be forced to corroborate what Dr. Sheard, the Medical Health Officer, said the other day, to the effect that they are not kept nearly so clean as they should be. For one thing, Toronto is a city which naturally lends itself to beautification and easy cleansing; its topography and proximity to and a gradual slope towards a large body of water favor it in this respect. The amount annually approximated for the work of cleaning and watering the streets, etc., is in the neighborhood of $200,000, and the question often recurs, Is this money used in the most economic manner possible? If it is, then a larger amount is needed.

Probably, however, that is not the root of the evil; it is more likely that custom hath made stale, and that methods which have become antiquated are allowed to prevail in this important matter of keeping our streets clean. A long time ago Toronto gained a reputation for being the best-kept and cleanest city on the continent; and nowadays there seems to be a disposition to rest upon those laurels. In other departments of life, however, to keep still means to go backward; and this, we think, is what has happened in Toronto.

Leaving out of question all comparison with other cities, we think it may be said without much fear of genuine gainsay that Toronto is a very long way from being so clean and tidy as she should and can be. The complaints of dust hurting merchandise displayed in stores are too numerous to be pooh-poohed. There are altogether too many alleys where dirt and evil smells already go hand in hand, and where disease is always prone to make an unwelcome third. The excuse that Toronto is no worse than other cities is no excuse at all. Let us prepare for the fray and boldly assert that we mean to do much better.

BUSINESS.

Communicated.

It has been said that most of the large fortunes—such as Carnegie's and Rockefeller's—are the happy concatenation of circumstances; not that these men are not possessed of exceptional ability in their respective lines, or have not carefully laid a foundation for success, but one often notes that outside of ability is a factor that really brings the harvest of enormous fortunes to the fortunate.

It is this fortunate element that brings about the golden opportunity for prudent men to take hold of the horn of plenty presented to them in the course of their business career. Experienced business men declare that every man of business has an opportunity in his life to make a fortune, but the secret is to know when to grasp it, and this implies knowledge and ability. It is due to the lack of foresight and ability that many fail by not finding the moment.

The fact that business has pervaded every profession, trade and calling, has made investment for dependent persons difficult. The art of making investments for others is no easy task. To look, judge, and act upon one's own responsibility is easier than to do so for others, and in case of disastrous results, to have them view the outcome and the causes of the disaster according to the facts, and free from suspicion, is difficult. When one does something in investments for oneself, interest actuates one to a supervision of the deed and its results. Eternal vigilance is the mandate.

"If you leave your business to others, it will leave you," is true in the general conduct of one's business; it is also true in investments. The persons that are self-sacrificing under whatever inducements may be offered them, and that will act for others as well as for themselves in making investments and money matters, are few in number.

"Do not let others do what you can do yourself," applies in all things. The many dependent persons that inherit fortunes, small or large nowadays, and have not been trained in business, should adhere to this maxim, so that they can look most vigilantly after their own interests. This maxim presupposes, first, an acquisition of knowledge appertaining to investments, second, some business ability.

Investments are of three kinds: First, bonds, stocks, and mortgages, yielding small rates of interest, but which are safe. The secret to be successful with these securities is to purchase them right. Second, investments, yielding higher rates of interest, but attended with some risk. Third, speculative investments of greater risk. Every investment should be preceded by a thorough investigation of the business in which the investment is to be made, with an inquiry into its future, and a general knowledge of its success. In other words, a brief history of the business should be learned.

Trade conditions are forever changing. The laborer, mechanic, farmer, merchant, manufacturer, and capitalist must be on the alert every moment, for the stability of trade conditions is practically nugatory. The incessant changes in conditions are due to inventions or distance destroying factors, such as rapid-transit, and rapid-communication, which have practically brought the markets of the world to the door of every one. The spirit of invention has largely done away with the learning of trades, so that the workingman must now be ready to adapt himself to new conditions. The mechanic should be always ready and quick to learn, and the farmer, instead of keeping in the old grooves of the past, should be ready to meet the demand of the markets of the world. In order to achieve success, man *must* adjust himself to ever-changing conditions.

To attain the highest economy is the modern tendency in the commercial world. Consolidation, labor-saving machinery, and the knowledge of producing in the cheapest markets and selling in the highest, are the primary factors in the evolution of business. A continuous adjustment and readjustment of trade-relations, and continuous distribution and redistribution of commodities and means of exchange, under the inevitable law of supply and demand, are going on in the commercial, as well as in the natural world, and men should have their eyes and ears well-opened to the fact.

BANKING AND FINANCIAL.

The Standard Oil Co. has declared a dividend of $5 a share, the third dividend this year. The three dividends of this year make in the aggregate 28 per cent., compared with 32 per cent. of the firm's third dividend last year.

The British America Trust Company, of Grand Forks, B.C., has increased its capital stock to $100,000. The company was recently reorganized, with Mr. W. L. Germain as general manager. Additional branches of the company are intended.

With the exception of the small sum of $4,727, which is still unclaimed, the liquidators of the Banque Ville Marie have now paid out all the money on their hands available for depositors. Three dividends of five cents each have been paid, and, it is said, there will be no other.

The Civic Finance Committee of Ottawa recently received tenders for the purchase of $829,972 worth of debentures for local improvements. The best offer, however, being 97 for 4 per cent. short-term bonds, or 92 for those bearing 3½ per cent. interest, none was considered satisfactory and action was deferred.

The Montreal firm of Taylor, Hogle & Davis, who are the architects of the new East End branch of the Bank of Montreal, have designed the new branch of the same bank at Edmonton, on the Saskatchewan. It is a stone and brick structure, on one of the best business corners of the main street of that growing place. The roof is already on, and 1st November is mentioned as the probable date of occupancy.

A three-story building is being erected for the Calgary branch of the Merchants Bank of Canada. Calgary stone is being used, and the staff will take possession of the bank about the first week of September. The Merchants are also building fine branch buildings at Olds and Lacombe, with a third at Wetaskiwin, all of which are stone and brick.

Recent visitors to Winnipeg have been struck by the fine appearance of the structure erected for the Winnipeg branch of the Bank of British North America, located on Main Street. It is of white Ohio sandstone. The walls of the ground floor are of rusticated stone, while the upper stories are surmounted by elaborate pediments supported by four Ionic columns, the whole being finished by a stone balustrade, with vases on the top. The interior is lined in marble and decorated in keeping with the general elegance of the room. The ceiling is in old ivory and gold. The counter of Italian marble, with bronze screen. Winnipeg has many fine banking houses, and this of the British Bank need not fear comparison with any of them in appearance. In fact, the banks are the principal architectural feature of Main Street in that stirring city.

On Monday next, it is expected, the new East End branch of the Bank of Montreal in that city will be opened to the public. It stands at the corner of St. Catherine Street and Papineau Road, and is constructed of Montreal limestone, with imposing columns of Ionic design. The banking room is spacious and admirably lighted. Columns support the roof with a coppered dome in the centre. The decorations are in soft green and old ivory. The marble floor is mosaic in pattern, while the counter is made up of variegated marbles, with an ornamented bronze railing. The woodwork generally is of mahogany, and the manager's office is finished in the same material. Above the bank apartments have been fitted up for the use of the messenger and his family.

Sydney, C.B., bonds to the amount of $330,000 have been purchased by Coates & Company, London, at 84 with accrued interest.

At a special meeting of the Consumers' Gas Company in Toronto on Tuesday it was decided to take advantage of the Act passed at the last session of the Legislature and increase the company's capital by $1,500,000. The directors are now empowered, therefore, to offer a whole or part of this issue at sale by public auction. The present capital is $2,000,000. It will be remembered that in accordance with the Act passed at last session the city of Toronto is entitled to buy some of the company's stock if the ratepayers' consent can be obtained.

A newspaper article on the queer names for money used in England has the following particulars: A shilling is seldom called such in London. They call it a "bob," and a "quid," which means a piece of tobacco in America, is what they term a pound. Sixpence they call a "tanner," fourpence a "joey," and a penny more often than not is unknown to the street gamins save as a "mag." A cabman will not tell you a ride will cost five shillings, but that it will require a "bull" to pay for it, and a half crown is "half a bull." These are prevailing expressions for the pieces of money widely handled, but proper terms for higher amounts are kicked aside and colloquial terms substituted for them. At a race track if a bettor says he has ventured a "pony" on the probable outcome of a race he does not mean that as it would appear to us, but simply that he has wagered £25 on the result.

For the year ending June 30th last there was a heavy deficit in the finances of the Pacific Cable. The actual expenditure was £54,824, which was £25,000 less than the gross receipts. The board had set aside £35,500 towards a renewal fund, and also to pay an annuity to meet the interest on capital, and to replace the whole capital in fifty years, so that the actual deficit amounted to £88,000, which has to be provided in the proportion already agreed upon by the contributing Governments. A conference is to be held in London of the various Governments interested, with the object of settling certain matters at issue between them. We are of opinion that, in addition to an over-estimate having been made of the probable traffic over this cable route, the expenses of managing it are entirely too high. Then, too, the action of New South Wales in making a bargain with the Eastern Extension Company which is unfair to this one has made the difficulties of the latter still greater.

This week, we understand, the Montreal branch of the Imperial Bank of Canada is to be removed from 106 St. James Street to the premises that have been remodelled for the bank at the corner of McGill and St. James Streets in that city. The stand is an excellent one, fronting Victoria Square, as it does, and the building, always handsome, is modernized and made convenient for banking purposes. The interior walls are lined with rich Italian marble, and the floors laid in marble of different colors and patterns. The manager's room, as well as the vestibules, is finished in English oak. The effect is of great beauty. The counter, which runs the entire length of the banking room, is a striking feature. Pavenezzo and Verde antique marbles enter into the construction of the counter; the screen is of solid bronze, with fluted Corinthian columns and caps. The screen and columns produce a very striking effect. They were made by Messrs., H. R. Ives & Co., of Montreal and the architect declares them equal to any work of the kind produced in the United States. The ceiling is panelled and decorated in old ivory and gold. The vault is of very strong construction, lined with steel. The remainder of the Imperial Bank premises in Montreal is devoted to finely finished and well-lighted offices, some twelve in number.

LIFE ASSURANCE ITEMS.

The medical department of the Mutual Life Insurance Company, of New York, is issuing a unique series of booklets on health matters. We are in receipt of the summer series, containing four of these useful little tracts, entitled "Sunstroke," "Drowning," "Diarrhœa," and "Malaria." They give useful hints as to what should be done in the event of a person in danger from any of these sources.

A Vancouver telegram of the 16th instant states that the National Agency Company, Limited, of Toronto, has taken over the assets and affairs of the Century Life Assurance Company of Vancouver. The agreement was ratified at a special meeting of the shareholders of the last-named company, held on that day, with Dr. R. E. McKechnie in the chair. Mr. Harry Symons, K.C., of Toronto, represented the National Agency Company in the transaction.

At Amsterdam, Holland, on Wednesday last, there was a plenary session of the International Socialist and Allied Trades Congress. Herr Van Kohl, of Holland, was elected permanent president, and Senor Iglesias, of Spain, and M. Cirpiani, of France, vice-presidents. This congress adopted a resolution declaring that the workers of all countries demand insurance legislation, under which they will have a right to obtain the means of livelihood when incapacitated owing to sickness, accident, old age, pregnancy, maternity or the stoppage of work.

The man on the staff of the Canada Life Assurance Company who originated the idea of a "benefit" to the general manager of that company such as took shape one day last week, should get credit for originality. When we say a benefit we do not mean a subscription for his pecuniary assistance, for there is nothing wrong with Mr. E. W. Cox's health, nor with his pocket. The explanation of what was done for his gratification—as a sort of welcome home to him and as a benefit to the company—is thus described: During the recent absence of Mr. Cox on a business trip to Great Britain the various members of the Toronto staffs of the company resolved that each should obtain, before the manager's return, at least one application for assurance in the Canada Life. The result was the splendid testimonial which has been presented to him. It consisted of eighty-eight applications for assurance, obtained by forty-eight members of the various staffs, none of whom are agents, and aggregating $141,000. If this had been done by the regular agents of the company it would not have been so remarkable, for they are used to writing policies. But we venture to think that the novel move above described is even more appreciated by the general manager because of its novelty and unexpectedness.

FIRE INSURANCE NOTES.

The Toronto Fire Department is taking off the keyless doors to the fire boxes in the down-town district and replacing them with keys, enclosed in glass. The reason for this is that it has been found on many occasions that the ringing of the gong in the door to notify the policeman on the beat that the box was being opened fooled the would-be sender of an alarm into thinking that the firemen were notified. As a result a genuine alarm was delayed.

A committee of the Toronto City Council has been in Philadelphia examining into the auxiliary fire protection system of the latter city. This covers the business portion of Philadelphia, and will cost close to a million dollars. It has worked very satisfactorily, the mayor says. The city also has four or five tugs, which serve the double duty of harbor police and fire protection boats, and these are regarded as a very good investment.

Nothing that has occurred for months has given so much point to the suggestion of a fire-boat for Toronto Bay as the burning on Monday night last of the Royal Canadian Yacht Club House on Toronto Island. If, as is the case in Detroit and several of the American lake cities, a fire-boat, with steam constantly up, had been moored in Toronto harbor, this structure need not have been destroyed. True, the shipping in this port at any time is nothing like as numerous or valuable as that in such harbors as Buffalo, Cleveland, or Chicago. But there are two or three miles of Toronto's lake front which would be rendered safer from burning by the presence of a proper steamer, fitted with fire pumps, to say nothing of the growing number of island residences.

TORONTO, AUGUST 19, 1904.

MARITIME BOARD OF TRADE.

This week delegates to the Maritime Board of Trade assembled at Moncton, New Brunswick. There were nineteen boards of trade represented. Senator Wood presided, and gave an address in which he touched on many subjects. A resolution was moved by Mr. A. M. Bell, Halifax, seconded by J. E. Dewolfe, of the same city, "That the recent tariff legislation, known as the dumping clause, in its present form is detrimental to the interests of trade, and should not be put in operation till further information is secured and details for carrying it into effect perfected." After a good deal of discussion Mr. G. S. Campbell, of Halifax, moved an amendment, declaring that the dumping clause as at present administered is in some respects detrimental to the interests of trade, and asking that the Customs Department immediately make such changes in the administration of the law as will remove unnecessary restrictions of trade. This was adopted unanimously.

On motion of Mr. W. S. Fisher, of St. John, seconded by Mr. G. S. Campbell, it was resolved that the Government be asked to apply the British preference only to goods direct to Canadian ports.

DRY GOODS NOTES.

Th directors of the Montmorenci Cotton Company held a meeting in Quebec on the 16th inst., and came to the decision to erect a bleaching plant in connection with their mills at the Falls, and to manufacture white cotton for the home market. The proposed building and plant will cost fifty thousand dollars, and the work of erection is to commence immediately.

Daniel J. Sully & Company, who were responsible for the great flurry in cotton earlier this year, have informed their creditors that they will be unable to carry out the proposition made by the firm to the creditors last month to pay off 40 per cent. of the claims in cash, with 10 per cent. additional in the form of ninety-day notes. The inability to keep this agreement, it was stated, was due to the fact that certain individual creditors would not withdraw their claims. The firm, therefore, will go into liquidation.

FOR GROCERS AND PROVISION DEALERS.

A Liverpool cable reports the state of the apple market there poor. New Yorks are quoted at 8s. 6d. to 12s. for best, and 5s. less for seconds.

The Hudson's Bay Company contemplate enlarging and improving their stores at Yorkton, Assa., at an expenditure of several thousand dollars.

The next annual convention of the Dairymen's Association of Western Ontario will take place in Stratford on January 17th, 18th and 19th next, the Dairy Exhibition being held at the same time.

At the Fruit, Flower and Honey Show, to be held in Toronto, during the second week in November, about $1,500 is to be distributed in prizes. The Ontario Government has made a grant of $1,000 to aid the exhibition, and the city of Toronto one of $200.

Shipments of butter last week from Montreal were the largest so far this season, being 35,986 packages, this figure being 19,000 in excess of those for the corresponding week of last year. The total increase for the season up to date is nearly 70,000 packages. Exports of cheese were also larger than usual, being 98,255 boxes, though last year in the corresponding period they were 115,270 boxes. Altogether, this season there has been a deficiency of 360,000 boxes compared with last year.

We are told that the Anglo-Canadian Cold Storage Exchange Company are making final arrangements for establishing their business in this country. The object of the company is to amalgamate and acquire the property, etc., of certain going concerns in Ontario and Quebec, to carry on an export trade in eggs, butter, apples and poultry, and to put up modern cold storage plants at Canadian points, including Toronto, Ottawa, Montreal, St. John and Halifax. In Toronto they purpose to have 300,000 cubic feet of space in their warehouse, while they may have 500,000 cubic feet at their disposal both in St. John and in Halifax.

The peculiar cigar known as Pittsburg stogies is to be made from beet leaves, it appears. A Pennsylvania syndicate purposes going extensively into the manufacture of them from the Colorado sugar-beet leaf. The leaves are so successfully' 'processed" by manipulation and immersion in tobacco juice that the consumer of this particular brand of narcotic cannot distinguish it from either the Pittsburg or Manilla cheroot. An American paper says that the syndicate is looking for a factory location; its processes are fully patented.

A London quotation of the 15th inst. says choicest salted butter is 92 to 94s. on spot; saltless, 97 to 98s. The demand continues firm, with some improvement in prices. This has been caused by short supplies coming from the continent of Europe. Cheese is quoted at 42 to 43s. for choicest; finest, 40 to 41s. There has been a good general all-round demand, and an absolute absence of any speculative business, but this has resulted in an advance of three shillings per cwt. on spot cheese during the week, and four shillings advance on c.i.f. quotation.

—Plans are now being completed for the new power development plant which the Backus-Brooks syndicate of Minneapolis are to erect at Fort Frances on the Rainy river. The Ontario Government have, it seems, passed the order-in-council granting the water-power privilege under which the syndicate have until January 1st, 1907, to complete the power plant and erect a flour mill with a capacity of not less than 1,000 barrels a day. The company, however, intend erecting a 3,000-barrel mill, and a pulp works as well. The company have also secured the water-power privilege on the other side of the river, in Minnesota. It is agreed that at least half the total power development shall be on the Canadian side. The syndicate is to pay $5,000 for the water-power, and it agrees to let Fort Frances have all the electricity it requires for lighting and power at a cheap rate. It is estimated that between 15,000 and 25,000 horse-power can be developed at this point on the Rainy river, according to season. The result of this industrial development should be the enormous growth of the neighborhood.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, August 18th, 1904, compared with those of the previous week:

	Aug. 18th.	Aug. 11th.
Montreal	$19,877,714	$20,989,761
Toronto	15,177,116	15,226,000
Winnipeg	5,170,590	5,580,607
Halifax	1,607,122	190,489
Hamilton	1,058,646	950,938
St. John	1,056,554	1,091,498
Vancouver	1,392,769	1,360,780
Victoria	683,685	569,707
Quebec	1,549,547	1,738,269
Ottawa	....	2,338,043
London	897,747	974,108
Total	$48,471,490	$51,010,200

A TRIP TO MUSKOKA.

Reader, let us suppose you want a rest. You are in a town or city, and wish to get out of it to where you can be quiet and comfortable. Somebody has suggested Muskoka, of which you know nothing experimentally. Do as we did, a small party of us: Take the 1.45 train at Toronto, and reach Gravenhurst at 6. A 'bus meets you at the station, and carries you outside the town to Minnewaska—"rocks by the water"—where you find a roomy house and a welcome, plus clear air, good food, and a well-conducted *menage.* You can row or sail, you can fish or ride, you can bathe or walk. Indeed, you can do also nothing with great facility and in excellent company, if you choose; but a preferable plan for a specimen day is to join with a dozen others and charter the small steamer, "Charlie M." Having stocked her with food and drink and cigars, you may zig-zag back and forth a whole day among scenes of beauty and see the striking features of Lake Muskoka, Lake Rosseau and Lake Joseph, coming home tired and happy at sundown after a delightful go-as-you-please trip of eighty or ninety miles.

Should you wish to make the tour of the three lakes by the regular trips of the larger boats, "Kenosha," "Medora," "Nipissing," "Muskoka," your time-table will tell you all about the transfers and connections. If you tire of a crowd and want to get upon terra firma, there is Beaumaris, a central spot, fourteen miles up from Muskoka Wharf, with golf links, tennis, and billiards. At Milford Bay, on the east shore, is a temperance house, with cottage and steam-yacht attachments. Across the lake to the westward is Bala, well known for fishing and for scenery.

Naturally, if you are new to it, and curious, you will

Flour Mills.

We build Flour Mills, Oat Meal Mills, Corn or other Cereal Mills, from basement to attic, and can furnish the power plant as well. — Write and ask about the GYRATOR SYSTEM of Milling. Let us know your needs in the mill line and we will furnish you plans and estimates.

want to go north; so you will, perhaps, choose to continue on to Port Carling on the Indian River, which connects Lakes Muskoka and Rosseau. This well-placed and convenient point has several good hotels, where you may be indoors a flannel-shirted democrat, or where you may dress for dinner and have iced champagne. It is proper to tell you that Port Carling has a public library and reading-room, and that the telegraph office is in Mr. Hanna's store. Should you be very much tied to your business, it may comfort you to know that the telegraph wires are reachable at Maplehurst, close to Rosseau P.O., in the north, at Rossmoyne and at Port Sandfield.

On the east shore of Lake Rosseau is Windermere, where, according to current literature, all the comforts of home and all the novelties of country life are promised. Farther north is the Royal Muskoka Hotel, the attractive caravanserai for any 400 who are disposed to afford $4 a day or $20 a week. As the English farmer said of his landlord's eighteen shillings a bottle wine: "Well, Squire, I should say it was wuth it, every shillin' on it." But we cannot all be swells or American tourists. Cleveland's and the Paignton House are almost historic, and the writer remembers some delightful days he was privileged to spend as the guest of an English family at their cottage of Idylwild, near by.

They say that Lake Joseph is the prettiest of the three lakes. This is a matter of personal preference. Almost everywhere you may see white tents and painted dwellings, lofty hotels and modest boarding-houses, where $7 to $12 per week is all the drain upon your purse. You may also see cosy skiffs and canoes, saucy steam or naphtha launches, picnic parties, bathing parties in sylvan nooks, fishing groups in the shadow of rock or bluff—a constantly changing panorama. And you have the odors of pine, tamarac, and balsam in your nostrils. I forgot to say that bowling greens are to be found here and there in Muskoka, and this is not a small attraction to gray-haired boys who are used when at home to the delightful game of bowls on the green. Port Cockburn is at the head of Lake Joseph, forty-five miles from Muskoka Wharf, and it is not far from Burk's Falls, which is said to be *the* place of all places in this rock-and-lake-and-pine country to get rid of the daily curse of hay fever.

◆

OUR AUSTRALIAN LETTER.

June is the dullest month in the Australian business year, but last June exceeds in quietness any June for many years. Sales of merchandise are slow, many firms having recalled and dismissed every traveller and others doing half time. This is the record of all the Eastern States of this Federation. The banks are restricting credits, and wisely so, for extravagance is one of the banes of Australia, and conditions require that economy shall be enforced in this way. Except in breadstuffs the importations have not largely fallen off unfortunately; but then selling is slow. Collections, too, are slower.

The bright spot is ahead. Wool, though a smaller crop in Australia and New Zealand in 1903-4 than in 1902-3 by perhaps fifty thousand bales, the export being 73,780 bales less, brought a higher return in money than last year. The yield of the coming year is likely to be very considerably more in quantity and better in quality. Good rains have fallen over the whole country, indicating another year of good crops. Queensland is cutting sugar cane that promises double the average return. But there is a dark spot ahead, too, in the devotion of local Governments to State Socialism administered by pliant politicians. If the State, in order to engross more and more of the industrial work, pay a good rate of day wages and only get half a day's effective work in return, no amount of good seasons can ever bring about prosperity.

Mr. Russell, of the Canada Cycle and Motor Company, is here inspecting the branches of his company and taking observations generally. He will acquire a good deal of information which should be useful to both his own firm and Canadian export trade.

Enquiries from Canadian houses respecting a possibility of getting into this market are reported to have increased in number at the Canadian Government Offices, but unluckily the performances of those engaged in the business have not improved in proportion. Delays in corresponding, shipment, supplying prices, catalogues, etc., continue as of old. One firm here reports as an instance of unsystematic business methods that a year ago it received enquiries from a Canadian firm respecting its goods. The Sydney house went to some trouble to get the information, and sent it on with recommendations, but heard nothing further until recently, when the saame questions were sent again without the slightest reference to the former letter or the answer sent to it. The answer might have gone astray, but it does look as if the Canadian firm had laid the correspondence aside and forgotten all about it.

Another instance of the importance of looking after the details is this: A Melbourne man, who had been getting his documents regularly, found them unaccountably ceasing to reach him. After long delays and enquiries he discovered that instead of being addressed in full, the Canadian youth who addressed them in Toronto concluded he could economize his labor by marking them, "John Ferguson, Melbourne, Australia." Now, Melbourne is rather a large city, and has a good many post-office sorters; and so carriers and letters so inscribed naturally went to the general delivery, where Mr. Ferguson never thought of looking for his correspondence,

If I were asked what is most needed in order to increase Canadian trade here, I should say, more attention to details. To do a little business well is pretty sure to attract a larger trade later. Another improvement which Canadians might adopt would be a little advertising matter. In shop windows appear attractive placards of American hats, American footwear, etc., but never one such thing to indicate goods made in Canada. This is a serious piece of negligence.

Speaking at length of the steamer project which Mr. De Schryver, of New Zealand, has been trying to get an Ottawa subsidy for, our correspondent says: "It is stated that it costs $25 per ton to land average goods here, either via San Francisco or via Vancouver. I know that low-grade cargo has been refused at that rate because it was unprofitable. It can be carried from New York by steamer for $8; add $8 more for railage to New York, and what prospect has the long rail haul in the face of it. I fear Mr. De Schryver has allowed himself to be used by one or two schemers, who think the Canadian Government is as pliable as the New Zealand Government has been."

The fact is that the lack of cargo coming this way is troubling both the present Trans-Pacific lines. No foodstuffs are required here, and the freight is limited to fish and timber from the Coast and such goods as must come quickly from the East. The order for foodstuffs is rather the other way just now, though not in large quantities. Apples and grapes have reached Vancouver in good order. Some maize was sent over a month ago, but refused a landing on the ground that it contained live weevil. Another order has gone forward. The wheat was treated before leaving, and the result is looked forward to with some interest. Even some wheat was ordered for a British Columbia mill, but it has not yet gone forward.

The United Proprietary Medicine Companies, in which two Canadians are interested, have won an appeal against the Commonwealth Government prosecution for violating customs regulations. An interesting point is that two out of the three members of the High Court, which gave the judgment against the Government, were leading members of the Government which took the illegal proceedings. This may be read as evidencing the impartiality of a British Court of Justice, and it may be read as an illustration of the light-hearted methods of a British Government in dealing with the rights of the people.

The Federal Parliament contains a legislator who rejoices in the name of "King O'Malley." He is equally distinguished by his eccentric speeches and actions and by his burning desire to get his name in the newspapers. His latest feat was a petition to the Speaker to allot to him a space within the Parliament grounds on which he might pitch a tent in which to dwell during the sessions, the

reason being that his parliamentary allowance of four hundred pounds sterling is insufficient to afford him the necessities of life, single man though he be, unless he lived like a sunflower. Mr. O'Malley is a member of the Labor Party, claims he was born in Canada, but brought up in the United States. Perhaps the last may explain some things to a Canadian. F. W.

Sydney, N.S.W., 18th July, 1904.

HOLIDAY NOTES ON A FEW CAPE BRETON TOWNS.

It was not unexpected to find Sydney very much subdued in comparison to the last time I saw it, two years ago, when every member of the population appeared to have just dropped into a fortune, and to be engaged in "making it fly." At the same time, actual signs of distress were not so apparent as one might be led to believe from newspaper reports. I saw only three stores and very few houses vacant, and with the resumption of work at the Steel works (the strike was settled on the last day of my visit) Sydney has still, I should think, a good future.

On the town's action in calling out the militia as it did there seemed to be considerable divergence of opinion, but while the strikers themselves, with the Glace Bay Gazette for a mouthpiece, decried the action as wholly unnecessary, I found the general opinion of those not directly interested to be that the action had been taken just in the nick of time to avoid bloodshed. "A peculiar thing about the strikers is this, I heard several times said, "that you can hardly find one man to admit he was himself in favor of going out. Unfortunately he belonged to the union." Sydney is a pretty town, with houses of a rather superior class themselves, greatly enhanced by a fair sprinkling of trees; and it possesses at least one charming drive, around the head of the harbor.

Its sister town, North Sydney, cannot claim the same natural beauty, but has some advantages from a business standpoint. Situated farther down the harbor, it is more free from drift ice during the winter, and, whether for this or other reasons, North Sydney firms appear to control the supply business of all the small towns of northern Cape Breton. It is also the shipping point of the Nova Scotia Steel and Coal Co., an important concern.

Sydney Mines, while handicapped through lack of a harbor, shows more growth during the last two years than either of the other two Sydneys. The Nova Scotia Steel and Coal Co. operate three coal mines, all quite close to the town, which is also the site of their new steel plant, now under construction, but expected to commence operations shortly. It is a desolate, bare place, with all the appearance of being a very new town.

Another veritable hive of industry, growing rapidly into a city, is Glace Bay, the business centre of the Dominion Coal Co.'s mines. Like the American city of Pittsburg, however, there is an unpleasant side to its industry in the continual presence of a cloud of dirty, black smoke. This seemed to meet us at the station, and never left us during the day. The Marconi towers are close by Glace Bay, but so wrapt in mystery that we could learn little of what passes there beyond the bare fact that they are continually in communication with passing ships. The trans-Atlantic messages, however, and especially the despatches to the London Times which purported to have come by this route, seem, from what I can gather, to be subject to very grave doubt.

There must be a good deal of money circulating in Glace Bay; the miners make astonishingly large wages, $5 a day, I am told, being not unusual for skilled men working by the piece. Since the advent of the electric cars between the two towns, however, a good portion of the company's pay roll finds its way to stores in Sydney.

Louisburg, the oldest and, historically, the most famous of all the Cape Breton towns, has benefited comparatively little by the general improvement of the last five years. Two years ago it did experience some of the symptoms of a boom when the now defunct Dominion Securities Co expended a considerable sum of money in the purchase of land there for terminals for the Cape Breton Railway, which they proposed to have skirt the southern shore of the island and connect with the I.C.R. at Port Tupper. With the road completed only as far as St. Peter's, however, the company failed, and nothing has been done towards extending it since. Louisburg's most valuable asset, and what early attracted to it the attention of the old French colonists, is its harbor, which not only does not freeze up in winter, but is quite free from drift ice, two features which have made it the principal shipping point for the Dominion Coal Co. At present this constitutes about its sole industry.

I finished my wanderings at Baddeck, on the Little Bras d'Or Lake. Had I gone there first they should probably have ended earlier, for I have never experienced such a delightful climate or touched at a more picturesque spot. It reaches my ideal for a lazy holiday. Charles Dudley Warner, I believe, has written a little book on "Baddeck and Thereabout." I have neither the will nor the wit to follow in his steps, but can only say to those who haven't been to the locality, go and judge for yourselves. There are two hotels, both well kept, though without many frills, at $1.50 per day. The town of Baddeck has the appearance of being exceptionally prosperous for a place of its size. The American tourists must be quite a source of revenue, and back of the town, and tributary to it, is a considerable stretch of quite good farming country, as lands go in Cape Breton. S. C. N.

10th August, 1904.

—We acknowledge with thanks a copy of the annual report (the fortieth) of the Fruit Growers' Association of Nova Scotia, which was held in Bridgewater in January last. It is a very readable book to all interested in one of the most important of our Maritime Province industries, and to those specially interested in the growing of fruit should prove really valuable.

—The report of the United States Geological Survey on the production of iron ores in that country shows that last year it surpassed all others. The quantity produced was 2,234,200,000 tons, a decrease of 534,827 long tons from 1902. The quantity mined in that country in 1903 is, however, the second largest recorded, and is greater than the combined totals for the year 1902 of Germany, Luxembourg and the British Empire, which are the nearest competitors of the United States. The iron ore obtained last year came from twenty-two States and two Territories. The States of Minnesota, Michigan, Alabama and Wisconsin were the leaders in production.

—The Dominion Government has entered into a contract with the Submarine Signal Company, of Boston, to instal thirty bells along the St. Lawrence river and off the coast of the Maritime Provinces. Of these, some will be operated from lightships, but the larger number from the shore. It is to be expected that all ships plying to Canadian ports will be equipped with the telephonic apparatus necessary for picking up the sounds of these bells. Some, indeed, have already made the requisite arrangements. The United States Government has not yet adopted this system, but is expected to do so shortly. Officials of the Navy Department and of the Lighthouse Board unite in recommending the system. It has been installed experimentally at Boston lighthouse.

—Mr. Rust, the Toronto city engineer's annual report is now issued, and gives some useful data regarding the city's progress. The area of the city at the end of last year, according to this, was 17.17 square miles. The population, as estimated from the police census of 1901 and the assessors' returns, is 250,757, an increase of 13,613 during the

year. There are 265 miles of streets, of which 186 are paved. Of these, 46 miles are asphalt, 60 cedar blocks, 12 brick, and 57 macadam. The city has 115 miles of concrete sidewalks and 280 miles of wooden sidewalks. Last year 16.8 miles of pavements and 35 miles of concrete and brick sidewalks were constructed. The total expenditure of the department was $1,090,690, of which $627,164 was on the local improvement plan. The revenue in the Waterworks Department was $381,981, and the expenditure $480,976, a loss on the year's operations of $98,995. Mr. Rust makes in his report also several recommendations for the improvement of the city, such as the construction of a boulevard along the western lake front as far as the Humber, new street car lines, the placing of wires underground, etc.

◆

NOVA SCOTIA STEEL AND COAL CO., LIMITED.

The following is the third annual report to the shareholders of the Nova Scotia Steel and Coal Company, Limited, submitted to the shareholders at the third annual meeting, 30th March, 1904:

Report.

Gentlemen,—Your directors submit herewith the third annual report and general statement of assets and liabilities and abstract of profit and loss account for the year ended December 31st, 1903. The shareholders are to be congratulated on the results of the business for the year 1903.

The profits for the year were $859,397.19, and the balance brought forward from last year was $453,149.43, making a total of $1,312,546.62 at the credit of profit and loss account on the 31st of December, which has been dealt with in the manner shown by the accounts submitted herewith.

The balance carried forward at the credit of profit and loss account on the 1st of January, 1904, is $685,642.62, as compared with the sum of $453,149.43 on 1st January, 1903.

The volume of business transacted by the company during the past year shows a satisfactory increase over 1902, which was then the largest in the history of the company.

The quantity of coal mined has been largely increased, the company now being the second largest producers of coal in Nova Scotia, and it is confidently expected that the present year will show a further substantial increase.

The quantity of iron ore sold was much less than during the previous year. The quantity to be sold during 1904 will be still further reduced, in accordance with the policy determined upon by your directors some time ago to reduce the sales of ore as the company's output of coal increased.

The products of the blast furnace, open hearth plant, and rolling mills, show very considerable increases over the previous year.

The work upon the new blast furnace and steel melting plant at Sydney Mines has been prosecuted during the year. Owing to the difficulty experienced in procuring material, and the high price of labor, it has been decided to suspend the work of construction during the winter months. The work will be resumed in the early spring, and completed as rapidly as possible.

The policy adopted last year of the company doing a part of its own fire insurance, has resulted satisfactorily, and the amount to the credit of the insurance fund, as shown by the statement, is $20,662.92.

The regular dividend of 8 per cent. per annum upon the preferred shares has been paid quarterly, and a dividend of 3 per cent. upon the common shares for the first half of the year was paid on the 15th day of October, and a further dividend of 3 per cent. for the last half of 1903 upon the common shares, and the regular quarterly dividend of 2 per cent. on the preferred shares for the first quarter of 1904, have been declared payable on the 15th day of April next to the shareholders of record March 31st, 1904.

On behalf of the board,

JOHN F. STAIRS, President.

GENERAL STATEMENT, DEC. 31st, 1903.

Mercantile Summary.

A boiler at Smith's sawmill, at Langton, Ont., exploded on the 11th inst., wrecking the entire building and killing two men and injuring severely a third.

Sir Alfred Harmsworth and other London newspaper proprietors are said to have purchased 1,500 square miles of timber areas in the interior of Newfoundland, on which they propose to erect a very large pulp mill.

The Dominion Roller Screen Company, Limited, Toronto, has received an Ontario charter. Its share capital is $150,000, and among the provisional directors are F. A. Mansell and W. J. Courtis, of Toronto.

A railway is being planned to run from Garneau Junction, near Quebec, to Pugwash Harbor, N.S. It will cross the Quebec bridge and proceed through Quebec and the State of Maine into New Brunswick, down the Valley of St. John and eastward to Pugwash Harbor. A branch line is to run to St. John.

A disastrous boiler explosion took place in St. Catharines on the 12th inst., whereby a large section of the Kinleith Paper Company's mill was badly wrecked, and two men slightly injured. The liquor room, immediately above the boiler room, where were kept the bleach lime and clay, was completely destroyed, and nearly every department of the building was more or less injured. The loss is estimated at between $15,000 and $20,000.

—The shareholders of the Suburban Tramways and Power Company met in Montreal last week and organized with the following directors: Hon. L. J. Forget, president; Mr. K. W. Blackwell, vice-president; Lt.-Col. Fred. Henshaw, Sir Montagu Allan, Paul Gilbert, directors. Mr. W. G. Ross was named general manager and Mr. Patrick Dubee, secretary. The company will take over the Longue Pointe and other projected lines, and is closely connected with the present Montreal Street Railway Company.

Dame Elodie Lafrance, doing business at Three Rivers, Que., under the style of S. H. Frigon & Co., jobbers and retailers of groceries, etc., has assigned on demand. Her husband was formerly in general trade at St. Tite, but not successfully. He compromised there in 1889, and eventually assigned in 1896. Two or three years ago he removed to Three Rivers, and essayed the role of a wholesaler, apparently getting quite liberal credits in some quarters, but his settlements have not been reported generally satisfactory, and of late suits have been not infrequent.

—The Dominion Government has ordered an ice-breaker from Fleming & Ferguson, an English firm, at the cost of $272,500. Delivery on the Clyde is promised by November 20th. Its dimensions will be 200 ft. long by 18 ft. deep, and 43 ft. broad, and it will have two sets of triple-expansion machinery. This vessel, it is hoped, will demonstrate whether communication by water with the port of Montreal can be maintained throughout the winter season. If not what is the latest date in the fall and the earliest date in the spring on which ocean vessels can ply between Montreal and Quebec? Investigation will be made as to the possibility of preventing the ice bridge from forming at Cap Rouge by keeping navigation open during winter, or of obviating inundation owing to the jam of ice at that point by opening the channel earlier in spring.

IN HER PUBLIC LANDS
many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

Mercantile Summary

A company has been incorporated at Chatham, Ont., with a capital of $100,000, under the name of the Alpena Oil and Gas Co.

A man from Lansing, Michigan, visited Sarnia the other day, looking for a site and a building in which to instal a branch of a Lansing carriage works.

The largest raft ever brought into the river St. Clair, so far as local residents can remember, was towed down by the "Ottawa" on August 11th. It consisted of 7,000,000 feet of long timber, and was consigned to the Cleveland-Sarnia Sawmills Co., of Sarnia, Ont.

Respecting oil wells on the Canadian island of Pelee, Lake Erie, the first well of the Robley syndicate was finished and shot on the 20th July, and is now producing about twelve barrels a day. Later, says the Echo, the second well on the Wilson farm was shot at a depth of about 750 feet, and it is now producing about fifty barrels per day.

American silver plate manufacturers have been in the habit of sending their wares to England for the purpose of having the English "Hall mark." Importers of such goods in the United States have been enabled to get their goods back free of duty, although thus marked, because it has not been considered as an improvement in the meaning of the tariff act. An act has been passed by the British Parliament preventing the use of the English Hall mark on American or other foreign silverware in England.

Residents of Wingham are feeling "away up in G" nowadays. They have got an appropriation of $28,000 for new Government buildings, which have been begun, and are looking for the erection of new station buildings by both the Grand Trunk and the C.P.R., required by increasing business. Then we learn, from a special to a Toronto daily dated 16th August, that the substantial Holmes Block, corner Maple and Main Streets, will soon be ready for occupation. Besides which the large new upholstery factory, to which the town voted a free loan of $10,000 and exemption of taxes for ten years, is also in course of completion. It is expected to employ 100 men.

A correspondent in Montreal who had occasion to visit the leading hotels of that city last week, found them generally busy—some of them full. He says: "The St. Lawrence Hall and the Queen's reported very good business, and they looked like it. The Place Viger Hotel had a good lot of guests, so did La Corona and the Savoy. Every one of them seemed busier than the Windsor. Perhaps it was because the down-town hotels got the members of the conventions." These, we learn, were those of the Locomotive Engineers' Brotherhood and the Sons of England. Probably there were 1,000 in the two bodies and their guests or companions.

FRUIT IN ENGLAND.

Mr. J. B. Jackson, Canadian commercial agent in Leeds, reports that a decided drought has been experienced throughout the larger part of England, which almost ruined the raspberry crop. Raspberry jam is used most extensively in that country, and there is likely to be an extremely brisk demand for this product from Canada. There is an excellent market for any quantity of this product. Apparently, also, there will be only a very small crop of plums in England, and there is no reason why good Canadian plums should not be shipped there. Especially would this apply to the larger and finer varieties of Canadian plums. They should be sent in boxes and well packed. Possibly it might be necessary to pack each plum rolled in tissue paper, but even with this extra trouble the shipping of this fruit should be extremely remunerative. The above remarks will also apply to pears, which are always in great demand in the Leeds district, and bring very handsome prices. Last year there were over 60,000 tons of raw plums and pears imported into England. Of these, the larger quantities of pears were sent from France, Belgium and the United States, and of plums from France, Germany and Holland. The United States sent about 6,000 tons of plums and pears, while Canada only shipped less than 200 tons. The apple crop of England will be much lighter than expected. From all that can be learned, it will be much below an average crop, and a large proportion of English apples will be made into cider. Many enquiries from dealers are received; dealers in the interior towns desiring to handle from 200 to 400 barrels per week. If any of the apple-shippers desire to place their apples in this way, they had better correspond with the Canadian agent at once. Definite arrangements should be made during August and September at the latest. The demand for Canadian cider is increasing every day. Many enquiries have been received during the last month or six weeks for Canadian cider, and when referred to the Canadian manufacturers, the invariable answer was that they were sold out, and that no cider could be shipped until late in the autumn. This seems unfortunate, especially when one takes into account the thousands of bushels of good cider apples which were allowed to go to waste in Canada last fall."

◆

MICHIGAN'S WHEAT CROP.

A report stating that the Michigan wheat crop will only average eight bushels to the acre is not as disheartening as it at first appears. Michigan is not a banner wheat State. When States like Kansas can thresh out 97,000,000, Minnesota 88,000,000, and the two Dakotas 113,000,000 bushels between them, and showing a tolerably steady increase from year to year, Michigan seems of small account with a production of 12,000,000, which is a decline from 34,000,000 in 1898. Her planted area is relatively small and her yield per acre likewise, the average being something like fifteen bushels. When it comes to copper, iron, salt and salt products and, not long ago, lumber, most of the other States were out of the running. It is evident that the Michigan farmer is becoming convinced that he must carry a handicap when he engages in wheat growing. The profit, even in a record year, is far from princely.—Detroit Evening News.

"DOMINO"

the size made and used in New York and Paris and put up in 50 and 100 lb. boxes.

For several years past J. Goldberg & Co., of Montreal, have been engaged in the manufacture of iron beds, spring mattresses, etc., in a small way. They have turned over their estate to the assignee, owing, approximately, $5,000.

Gilmore's departmental store, Rowe's tailor shop, the Richardson Jewellery Co.'s premises, and Jones & Dundas, groceries, at Carberry, Man., were destroyed by fire on the 14th inst., with a loss of $40,000, partially covered by insurance.

The failure is noted of J. E. Langlois, for many years doing a leading general store business at The Brook, Ont. His business record has not been marked by a great measure of success, for in 1890 he was reported to have compromised at 50 cents in the dollar, and in 1902 he was burned out with insufficient insurance, and arranged to pay 25 per cent. on liabilities of $14,000.

J. L. Bertrand, doing quite a prominent retail dry goods business in Quebec, under the style of Bertrand & Gauvin, has made assignment of his estate upon the demand of Messrs. Thibaudeau Freres. His liabilities are scheduled at $46,300, with nominal assets of about $49,000.—Louis Klineberg, also in the dry goods line in the same city, is reported insolvent, with liabilities of $10,210. In 1900 he arranged a compromise at 50 cents.——Nathan Klineberg, engaged in business as a peddler, in Quebec and vicinity, is offering 40 cents on liabilities of $3,340.

Originally a peddler and for several years settled in a regular store business, at Rimouski, Que., S. Viner has assigned to a Quebec accountant. His liabilities are stated at $6,400, while he shows nominal assets of $3,400.——Jasmin & Grenier, engaged in carriage-making, at Coaticook, Que., are reported insolvent.——J. P. Desilets, a young man, apparently without much experience, who opened store at Grand Mere, Que., in the spring of 1903, has proved unsuccessful. His prices were apparently fixed without a due regard to cost and expenses, and his affairs are now in the hands of the assignee.

MONTREAL MARKETS.

Montreal, Aug. 17, 1904.

Ashes.—There is further demand from Britain for pearl ashes, which cannot be met, the high figure offering for these goods, namely, $8. being apparently no inducement for makers to produce them, and it is feared that the manufacture of pearls, which calls for a special skill, will soon become a lost art. Pots are a shade easier at $5.75 to $5.80 for firsts; seconds, about $5.30.

Cements and Firebricks.—A rather better demand is reported for cements, and, though no very large sales are reported, the aggregate of business shows some improvement. Quotations have undergone no recent revision. For the week ending to-day no supplies of cement have come to hand, and there is no plethora of stock; receipts of firebricks, 105,000.

Is It Sufficient?

Very few people realize how much life insurance is necessary to take the place of the income they are at present earning. Take a man who is earning $1,500 a year. Let us suppose that $500 goes for personal expenses and $1,000 for the keeping of his wife and family. $1,000 is the interest at 5% on $20,000. It is safe to say that no man earning $1,500 a year carries $20,000 of life insurance. Every man should, however, strive to leave his family in as good a position after his death as they are before.

last week were the largest of the season, being 35,986 packages, figures about 19,000 in excess of those for the corresponding week of 1903, while the total increase for the season to date is nearly 70,000 packages. Exports of cheese were also larger than usual, 98,255 boxes, but the figures a year ago were 115,270 boxes, and the aggregate of shipments to date is 360,000 boxes behind the returns at this date twelve months ago. The advance in cheese values noted last week has not been sustained, and present quotations for finest Ontarios range from 8½ to 8⅝c.; Townships, 8¼ to 8⅜c., and Quebecs at 8 to 8¼c., though buyers in many cases are loth to concede these figures. Butter is fairly steady at 18½ to 19¼c. for the finer grades of creamery.

Dry Goods.—There is no livening in the general wholesale movement, which, on the whole, is of a somewhat disappointing character, and city retail trade is also dull, but this is only natural at the season, and improvement is looked for in the course of the next week or so, when the return movement from seaside and country sets in. Collections are about fair, a certain proportion of renewal indulgence being called for by some customers. With regard to prices, nothing new is reported.

Flour. — The market continues to stiffen, a further advance of 10 to 15c. a barrel being established this week by the large millers, and we quote Manitoba patents $5 to $5.30; winter wheat patents, $5.15 to $5.25, in barrels, and $2.30 to $2.40 in bags.

Groceries.—The general movement continues of rather a slow character, and nothing specially new is reported with regard to values. There has been no further advance in sugars, but refiners' quotations are steadily maintained at the figures as revised last week, factory prices being $4.60 for standard granulated in barrels, soft sugars ranging from $4 to $4.40. British Columbia advices just to hand report that the run of sockeye salmon had almost ceased on the Sound, while very few salmon were reported on the Fraser river. An estimate of the pack is made at only about 270,000, as against 473,000 cases last year, and all quotations are withdrawn. Malaga advices report some rain and wind damage to the vines, and the yield of raisins is estimated hardly equal to last year, but prices are expected to be about the same. The currant market at Patras is firmer, unfavorable weather being reported in some districts. Filberts show further advance, and some authorities calculate the crop at only 25 per cent. of last year. A good crop of Valencia almonds is reported, and about an average yield of French walnuts.

Metals and Hardware.—A little better demand is reported for shelf goods, but the movement in iron and heavy metals is still of a sluggish character. Some business is reported in a fairly large way in sales of Sydney iron at $15.50, net terms, but the goods were not of regular brand, being culls and yard cleanings. For best brands of domestic iron from $10.50 to $19 is quoted, and for Summerlee about the same figures. In general quotations there is not a notable change.

Oils, Paints and Glass.—Business still rules on the quiet side. Turpentine has recovered a part of late decline, and is quoted at 82½c. Prices of linseed are easy and unsettled, raw being variously quoted at from 43 to 45c., with the [illegible] advance for boiled. Castor oil is notably firmer, with quotations ranging from 7 to 8½c., as to quality and quantity. Fish oils are in limited request. Whale oil is quoted at 45 to 50c. as to grade; steam refined seal, 60 to 65c.; cod oil, 36 to 38c. In glass there is continued general cutting in prices, dealers quoting all the way from $3 to $3.20 for first break.

Chemicals, Drugs, Etc.—As may be expected at this time of the year, when so many travellers are taking holidays,

---

THE POPULAR ROUTE TO WORLD'S FAIR.

Now that the World's Fair is in complete running order, the Grand Trunk Railway System have inaugurated a double daily through car service, Montreal to St. Louis, which gives the public an exceptional route to the Ivory City. In addition, patrons are offered stop-over at any point in Canada, Detroit, and Port Huron, or Chicago, Ill., without extra charge. Do not make a mistake, but see that your tickets read via the Grand Trunk—the great double track route to St. Louis.

DOUBLE TRACK ROUTE TO WORLD'S FAIR.

The Grand Trunk have inaugurated a double daily through car service, including sleeping cars and coaches, direct to the World's Fair City. Fast trains, most interesting route, stop-over allowed at Chicago, unexcelled road-bed—are assured patrons of this line. Ask Grand Trunk Agents for full information.

THE OPPORTUNITY OF A LIFE TIME.

No one should miss visiting the greatest World's Fair ever held, now open at St. Louis, Mo., and for solid comfort in travel the Grand Trunk route should be taken. Through sleeping cars and coaches direct to the World's Fair City via the Grand Trunk double-track route. Stop-over allowed at any point in Canada, Detroit, Port Huron and Chicago. All Grand Trunk agents will give full information.

TWICE A DAY TO ST. LOUIS.

The Grand Trunk offer a double daily through car service direct to the World's Fair City—St. Louis, Mo. Trains leave Montreal morning and evening. Send four cents in stamps to J. D. McDonald, District Passenger Agent, Toronto, for the handsomest publication yet issued on the World's Fair, and consult Grand Trunk Agents for further particulars.

trade has been a little on the dull side. Opium now shows a better tendency, though not much actual business is passing. Quinine is fairly steady, and there is a good undertone to the market. Sulphur and sulphur compounds are firm. Cascara bark has receded. In cod liver oil some improvement is visible.

Dry Goods.—Very fair orders continue to come forward, though this is naturally a time of the year when not only travellers, but many retailers, as well, are away upon their vacation. In cotton staples a waiting attitude is being adopted by buyers. Very discordant opinions exist as to the probable price which will prevail for the raw material, and many mills seem indisposed to quote prices. Some lines of woolens have been advanced in price, for example, blankets. It is altogether likely that woolens will continue in their upward movement for some time. The demand for dress goods, especially for those of domestic make, is very good.

Flour and Grain—Continued firmness is visible on the flour market and ninety per cent. patents are quoted at $4.05 in buyers' bags, east or west. Rolled oats are steady, but have made no recent change in price. Millfeed also remains about the same as before. Wheat is again 2 to 3c. higher, and strong at the advance, being scarce and wanted by millers. Barley is also up a cent or two. Other grains are unchanged.

Fruits and Vegetables.—Supplies of fruit have been plentiful this week, almost too much so in fact, as selling became slow, and prices declined. Raspberries are still coming in to some extent, but their quality is not up to standard, as a rule. Tomatoes are abundant and low-prices. Peaches, when really good, bring fair prices. We quote: Raspberries, 6 to 8c.; Lawton berries, 6 to 8c.; black currants, large basket, 75c. to $1; huckleberries, basket, 75c. to $1.25; peaches, basket, 35c. to 50c.; apples, basket, 15c. to 30c.; pears, 25c. to 40c.; plums, 20c. to 35c.; oranges, California Valencias, $4.50 to $4.60; lemons, Messinas, $3 to $3.50; lemons, Verdillis, $4; lemons, St. Nichols, $4; bananas, 1st's, bunch, $1.25 to $1.50; bananas, 8's, bunch, 75c. to $1; bananas, red, $1.50 to $2.25; pineapples, Florida, case, $4 to $4.50; watermelons, each, 20c. to 25c.; cantaloupes, basket, 50c. to 75c.; California peaches, $1 to $1.50; California plums, 75c. to $1; California pears, $1.25 to $1.75; tomatoes, 15c. to 25c.; cucumbers, basket, 10c. to 20c.; beans, basket, 20c. to 30c.; green peppers, basket, 40c.; new potatoes, bushel, 50c. to 60c.; Egyptian onions, sack, $2.25; onions, Canadian, basket, 30c.; egg plant, basket, 50 to 60c.; Canadian green corn, doz., 10c. to 11c.; Kalamazoo celery, doz., 45c.; Canadian celery, basket, 40c. to 50c.; Canadian, pink, 50c. to 65c.; vegetable marrow, doz., 40c.

Hides and Skins.—Supplies of hides are somewhat more liberal, but prices keep up well at the recent advances. Sheep, lamb and calfskins are all steady. Tallow continues as before.

Groceries. — Another advance in sugars took place last week. The movement at the advance keeps very good, and the feeling is thoroughly firm. Currants are firmer, and are generally held at a figure slightly higher than that prevailing last week. California prunes look as if they will be plentiful, and prices moderate, though they have so far not been quoted definitely. Some lines of tobacco have dropped a fraction. Teas are in moderate demand, at normal prices. Canned goods are quite firm.

Provisions.—Creamery butter is firm, and a good business is being done. Dairies, however, are on the slack side, partly owing to the plentiful offerings, but partly owing to the fact that the quality is not up to average, a consequence, perhaps, of the pastures being rather rank of growth. The cheese market is steady, and prices remain very much as before. Eggs and poultry are coming in in fair quantities, and the demand is moderately good.

Wool.—Business is on a somewhat easier basis, perhaps owing to the fact that the high prices kept foreign buyers away altogether. Pulled wools are in good demand.

"WE WILL BOND YOU."

Corporate bonds are more reliable and in every way more desirable.
Only where it is indicated that men possess integrity of character can they obtain a bond in a surety company.
Regard your name as a bondsman as an encumbrance on your property.
Personal sureties are subjected to questions as to the worth of the bond filed which they would rather not have made public.
Once a corporate surety bond has been used, no further use for personal surety can be found.
Rates of premium on surety bonds are always moderate.
A surety company is required by law to carry reserve against its risks and is possessed of large resources.
The UNITED STATES FIDELITY AND GUARANTEE COMPANY executes bonds covering all positions and trusts.
Existence of surety companies makes it unnecessary for the employe to ask friends to become surety for his integrity.

Surety companies protect the home and family.
Unlike personal surety, the bonds issued by surety companies can always be collected.
Resolve to never have your name used as a bondsman.
Embarrassing positions may be escaped by not becoming surety on a bond nor asking others to do so.
This Company does not surround the person bonded with annoying restrictions.
You cannot afford to incur obligations by asking friends to become surety for you.

ENCIRCLING THE GLOBE.

A recent report by the Director of the United States Census shows that the wire in use on public telephone lines is sufficient to encircle the globe about 1,225 times. There is a fraction more than one public telephone in use for every forty persons—man, woman and child—in the United States. During the past year, dividing the number of messages sent by the largest estimate of aggregate population, from the infant to the oldest inhabitant, each person has said "hello" and "good-bye" to some one at the other end of the wire about fourteen times. Nearly one-half a billion dollars represents in value the assets of the public telephone companies. These companies earned in 1903 a total revenue of $86,000,000; they paid $14,000,000 in dividends; employed 63,000 people, and disbursed $61,000,000 that stands charged in their expense accounts.

When it is borne in mind, says an exchange, that the report alluded to is but preliminary—acknowledged to be incomplete; that in its present scope private lines are omitted; that there are nearly 20,000 of the latter in the United States, with wire enough to construct more than four additional circumferential trunk lines around old Mother Earth, and other appurtenances to match; that twenty-eight years ago, at the Philadelphia Centennial exposition, the telephone was little more than a curious toy, we may recognize peculiar emphasis in the homely but forcible bit of vernacular: "The world do move."

A LIFE INSURANCE CONVENTION.

A noteworthy gathering was the convention at Belleville, during several days last week, of agents and delegates of the Mutual Life Assurance Company of Canada. The sessions were fruitful of agreeable acquaintance and a serviceable interchange of experience. Principles and practice were debated and expounded; difficult points were explained; helpful advice and encouragement were given—in fine many an agent was glad that he had gone. Mr. Earl, the Superintendent of Agencies, was in his element as a harmonizer and, so to speak, a stimulator. Memorable was the banquet of Friday night last at the Hotel Quinte: in arrangement, catering, and the even more delightful ceremonies that came after the repast, it was not easily to be surpassed.

Mr. Robert Melvin, of Guelph, president of the company, was in the chair, seated on his right were Mayor Chown, and Mr. Justice Britton; on his left, Mr. Justice Garrow and Mr. A. I. Bird. In addition to the different agents of the company in attendance, the members of the advisory board were present, including the two judges mentioned above, Mr. Bruce, M.P., and general manager Wegenast, of Waterloo.

The agents in attendance at the convention, who were present at the banquet were: T. R. Earl, J. G. Taylor, G. G. Mills, Philip Dykes, Toronto; C. E. German, London; C. R. Clapp, Woodstock; W. H. Hammond, E. M. P. Jones, A. E. Wert, Brantford; S. Roughton, Kingston; W. M. Stevens, Browley; J. W. Mooney, Ottawa; A. J. Chisholm, Owen Sound; S. J. Kilpatrick, Brockville; F. H. A. Watson, Woodstock; C. H. Denton, Tilsonburg; C. W. Huyck, Tweed; J. O. Arsenault, St. John's, Newfoundland; J. V. McDonald, Strathroy; C. B. Lane, Windsor; W. H. Shrapnell, Watford; G. R. Wood, Barrie; Duncan Stuart, Stratford; James McGregor, Caledonia; D. D. Aiken, Jarvis; H. W. Linton, Hamilton; A. N. Udy, Galt; C. B. Linton, Hamilton; S. Burrows, Belleville; M. Moyer, C. E. Hansel, St. Catharines; E. E. Boreham, Halifax, N.S.; M. Monaghan, Quebec, P.Q.; J. M. Muir, Waterloo; J. E. Wilcox, Peterborough; S. J. Fisher, Hastings; J. Y. Ormsby, Woodstock. It may be seen from reading this list how widely distributed, territorially, these agents were—from St. John's. Newfoundland and Halifax to Windsor and Owen Sound in Ontario.

The speakers adapted themselves very happily to their surroundings at the banquet. The toasts were only five in number, proposed by the chairman, Mr. Justice Britton, Mr. Alford and Mr. Justice Garrow. The two members for the district, Mr. W. B. Northrup, M.P., and Mr. E. Guss Porter, M.P., Col. Ponton, Mr. J. J. B. Flint, Principal Mathison and Mayor Chown replied. Col. Ponton and Mr. Porter were especially happy in their remarks, while Mr. Flint elicited great applause.

THE SENSE OF SMELL.

How much we might be benefited by a highly cultivated sense of smell one may imagine if he reads and believes the following, from the London Graphic: Some one recently remarked that we were losing the sense of smell. In the Boer war it was noticed that we had not the keen eyesight of the hunter and the savage. The primitive physical qualities must needs go with civilization, but as regards the sense of smell, smoking, no doubt, is partly answerable for this. The frequent odor of tobacco kills the other scents, and the sense of smell needs cultivation.

A keen nose is almost as great an enjoyment as a clear eye. The odor of the red rose, when inhaled from its calyx and pressed against the face, is said to be a cure for headache. Verbena

Two Interesting Incidents...

Incident No. 1.

A manufacturing firm in this city had found it necessary to instal a fan system for its boilers at considerable cost. A few weeks ago one of our machines was put in and the efficiency of the boilers was so much increased as to make the fans unnecessary and they were duly removed.

Incident No. 2.

A lady who lived in the rear of a factory, also in this city, had in her yard a barrel for rain water. For a long time it had been impossible to use the water due to the soot and cinders which came from the factory smoke stack.

Recently, however, a Royal Automatic Smoke Preventer was installed in that establishment and the soot and cinders from the smoke stack are things of the past. So much so that the water in that barrel is being used regularly.

If you are having trouble with smoke or inefficiency on the part of your boilers it will pay you to write us.

Royal Automatic Smoke Preventer and Fuel Saver Company, ***ROOM "Z,"***
Confederation Life Bldg.,
TORONTO, Ont.

is good for the nerves, the aromatic scents of the pine forests are invigorating, the smell of the damp earth after a shower is delicious, the dying strawberry leaves in the border on an autumn day have a sweetness that those who love it can never forget.

◆

THE IRON SITUATION.

A recent report from Pittsburg remarks that if the improvement in the iron market be gauged by pig-iron, and this is regretfully regarded as the surest index, because it underlies the industry and because also it is untrammeled by pools and price agreements of any sort, then certainly there is improvement. All selling houses agree that the increase of current orders averages 100 per cent. as compared with a month ago. Buying gives every evidence of being confined to needs of consumption figured on the most conservative basis. Consumers not only of pig, but of finished material, are cleaning up the last remnant of stock before taking in more. On this account the monthly stock statistics are to some extent misleading, for they take no account of diminution of stocks in the yards of four thousand foundries and mills throughout the country, and of the far greater army of consumers of finished forms in every line. It is a conservative estimate that the difference between full stocks and light stocks in consumers' hands is a million tons; some put it much higher. It is the filling of this gap when bearish gives place to bullish sentiment that accounts in part for the price fluctuations which bewilder the public. Because pig-iron orders have doubled up, some have jumped to the conclusion that a real turn in the market was at hand. There is no evidence of anything of the sort. Even the improved buying is at least one-third below the normal of the past three years. Instead of any improvement in prices it is accompanied by actual weakness, at least so far as Northern iron is concerned. There have been enough furnaces ready to turn accumulated stocks into money at a sacrifice to give prompt delivery buyers very cheap iron. This stage always accompanies the first liberal buying after long stagnation. If the demand continues and broadens the bargain lots will soon be out of the way. If it does not, buyers are likely to have their way for some time yet."

◆

According to a recent report made to the Ontario Crown Lands Department, the amount of timber cut during last winter on the lands of the three hundred settlers in the Temiskaming, was not less than $232,788.

A company is being organized, we understand, under the auspices of the Associated Charities, though quite distinct therefrom in objects, for the purpose of providing sanitary homes for working people at a reasonable rate for rent. The name proposed is the Toronto Artisans' Dwellings Company, Limited, and among the promoters are Dr. Goldwin Smith, Canon Welch, Mr. R. F. Massey, etc.

—It is understood that Hon. S. N. Parent, Premier of Quebec, has been named as Government representative on the board of directors of the Grand Trunk Pacific Railway. The honorable gentleman is to be one of the party who leave with Mr. C. M. Hays, president of the G.T.P., Senator Cox, and others, for the Pacific Coast. A resolution has been adopted by the council of the Quebec Board of Trade, asking the Government to give Quebec a representative on the Government commission which will have under its control the building of the eastern section of the G.T.P. The council also recommended that a Quebec man be appointed chief engineer.

Have you ever used our

MISS VEALS,
Lady Principal.

—The Italian novelist Salvatore Farina, recently delivered an address before the Society for Psychic Research at Milan, in which he minutely described the case of an author who six years ago completely lost his memory for language and names, while otherwise his mind was more active and wideawake than ever before. At the expiration of that period the memory returned. In concluding his lecture the speaker confessed that he was the author in question.

THE COMMERCIAL

The Weekly Financial, Commercial & General Trade Newspaper of the Great West

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED,
Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

And Still it Leads

As applied to the gain in net amount of assurance in force in Canada for the

5 Years Ending Dec. 31st, 1903.

Head Office — WATERLOO, ONT.

The Mutual Life OF CANADA

still maintains its stand at the

HEAD OF ALL ITS COMPETITORS

among Canadian Life Companies, as shown by the Government Reports.

A new Archives Building is to be erected near the Government Printing Bureau, at Ottawa. It will be of three stories and contain a space of 20,000 square feet.

—"You know, Jones, who was reputed so rich? Well, he died the other day and the only thing he left was an old Dutch clock." "Well, there's one good thing about it; it won't be much trouble to wind up his estate."—New Orleans Times-Democrat.

The Eastern Townships herds distinguished themselves at the Winnipeg Summer Fair. For example, Mr. Robert Ness did remarkably well with his herd of Ayrshires, taking nine firsts and seven second prizes, including the herd prize. Mr. Ness sold the herd for $2,000.

A special despatch from Sherbrooke to the Montreal Gazette says that the Sherbrooke Gazette has been purchased by Messrs. Wm. Farwell and C. H. Fletcher. It will be continued as a weekly paper, Mr. J. A. Powell, of Belleville, Ont., has been engaged as manager.

On the north shore of the St. Lawrence, the tobacco crop is not extremely promising this year. But better accounts of the crop come from some of the counties on the south shore. For example, in Chateauguay County, the Ormstown Bulletin says: The tobacco crop is unusually fine, and both quality and quantity are far ahead of former years, and unless it be overtaken by an early frost, the prospects were never better. Ormstown is something like forty miles from Montreal.

—The late ex-President Kruger was not an eloquent man, but he excelled at brief and pithy sayings, many of which, like the saying about waiting for the tortoise to stick out his head, have passed into the language of nations. His answer to a nephew who petitioned for a Government appointment has often been quoted: "My dear boy, I can do nothing for you. You are not clever enough for a subordinate position, and all the higher offices are filled."

The Altar Of Friendship

Do not hazard your all on the altar of friendship. Thousands of men have been ruined by going surety for friends. Better far for you to pay a strong surety company the premium on the bond. It will pay you to enquire about our policies.

EMPLOYERS' LIABILITY
ASSURANCE CORPORATION
MONTREAL — TORONTO

GRIFFIN & WOODLAND
MANAGERS. 3

A peculiar state of things prevailed last week at Brandon, Manitoba. The T. Eaton Company had gone to considerable expense in putting up an exhibition of their goods at the Fair there, but at the last moment they were forbidden to circulate advertising literature. Thereupon, they withdrew from the Fair altogether. A large class of people in the West object altogether to the departmental store methods; on the other hand, the Eaton Company claim that the reason for this is that western merchants charge an unreasonable profit on their goods.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada. $1.800 000.00.

Investigation Endorses

the statement that while 80 per cent. of men aged 45 are fairly prosperous, only 13 per cent. of those who reach 65 are self-supporting. After thinking carefully about this ask for particulars of an endowment policy in

THE WESTERN CROP PROSPECT.

Our Winnipeg crop despatch of yesterday noon says: "The weather during the past week throughout the West generally has been fine and warm, very favorable for all the crops. Cutting will be general in a few days provided we have continued fine weather. There have been so many conflicting reports of the estimated damage from rust that only threshing returns will show the true state of affairs. The most reliable sources, however, estimate rust damage at ten to twenty per cent., but this may become greater, inasmuch as rust may spread to many places where grain is late and is still unaffected." An excursion of grainmen and bankers of Winnipeg who had gone south and west to investigate the state of the Manitoba crop returned from touring the country on Wednesday evening. They estimate the wheat crop at 44,000,000 bushels, a shrinkage of 30 per cent. We learn further that the information received by the Bank of Commerce from their branches and agencies in the North-West places the average yield of wheat at eighteen bushels per acre. Even should the yield be less than this, the increased acreage and the increased price now prevailing as compared with last year means riches for the farmer.

◆

MARITIME PROVINCE TOPICS.

The annual meeting of the Maritime Board of Trade has come to be regarded as the most important meeting of representative business men at the eastern end of the Dominion. We made a brief reference to it in last week's issue, having but telegraphic despatches about a few leading resolutions. But to-day we can give a tolerable digest of the conclusions reached from our own correspondent and the daily press. The sessions at Moncton, in New Brunswick, this year were particularly interesting. There was a large representation from Halifax, including J. E. DeWolfe, Hon. W. Ross, Hon. G. J. Troop, B. F. Pearson, M.P.P., James Hall, Alex. Stephen, A. M. Bell, J. B. Foster, A. M. Payne, Edw. Stairs, W. B. Arthur, R. B. Colwell, O. E. Smith, G. S. Campbell, H. S. Colwell, F. A. Ronnan, H. R. Silver, Fred DeWolfe. And there was an attendance of delegates very generally distributed over the Maritime Provinces. The subjects discussed by these gentlemen were many and various.

It may be remembered that at the 1903 meeting of the Board, held in Charlottetown, there was a lengthy discussion of a fast Atlantic line of steamers for Canada. This year again this subject was debated, and the resolution passed upon it at Moncton, towards which many adroit whereases converge, is both strong and convincing. A matter which merited all the consideration it received was that of steel shipbuilding in our Atlantic Provinces. Again and again we have insisted in these columns upon the great importance of this. The resolution which deals with it deserves to attract wide attention because of the surpassing advantages which these Provinces possess for that industry. To the utterance of the meeting upon the dumping clause and to that desiring the British preference to apply only to goods imported through Canadian ports we referred last week. Various matters of real import to the Island of Prince Edward were discussed, and we present the resolutions carried with respect to them. The matter of winter communication with the mainland is a vital one to the Island.

◆

—The same paper which announces the production on Wednesday last of the first steel rails at the Canadian Soo brings word also of a purchase in the United States by the Canadian Pacific Railway Company of 60,000 tons of steel rails at $20 to $21 a ton, which is $7 to $8 a ton under the pool price. The rails have been sold by the United States Steel Corporation and the Pennsylvania Steel Company. Is there not a connection between the two events? The selling companies explain the incident of this sale to suit themselves, but it is evidently disturbing their market. And as to Canadian producers of steel rails, the dumping clause ought to have something to do in their protection.

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian banks for July, 1904. It is compared with the Bank Statement for the same month of the previous year instead of with the month of June this year, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES.	July 1904.	July 1903
Capital authorized	$100,546,666	$96,326,666
Capital paid up	79,267,773	77,093,666
Reserve Funds	52,318,691	48,122,212
Notes in circulation	$59,979,830	$57,563,665
Dominion and Provincial Government deposits	8,518,003	6,794,542
Public deposits on demand in Canada	118,331,939	110,542,900
Public deposits at notice	312,713,823	271,597,201

Call loans elsewhere	34,924,405	36,382,605
	$240,844,200	$232,173,826
Current Loans in Canada	414,096,802	363,586,174
Current Loans elsewhere	19,821,390	22,226,350
Loans to Dominion and Provincial Governments	2,094,659	1,286,312
Overdue debts	2,133,146	2,199,555
Real estate	758,962	835,697
Mortgages on real estate sold	748,128	724,969
Bank premises	9,783,402	8,420,051
Other assets	6,128,566	10,532,557
Total assets	$696,409,519	$641,985,699
Average amount of specie held during the month	16,671,640	14,257,291
Average Dominion notes held during the month	31,076,172	29,067,961
Greatest amount notes in circulation during month	62,160,693	60,640,008
Loans to directors or their firm	10,168,288	11,209,805

Taking the figures of a year ago instead of those of a month ago enables a comparison of the state of commercial affairs they disclose at two points. The figures of last month show quite as healthy a state of affairs as a year ago, with no set-backs but such as have arisen through stock speculation. The banks appear to have been able to take care of the regular business of the country very well. Current loans show an increase of fifty millions of dollars, which practically corresponds with the increase in deposits in the banks, which increase is surprising. Call loans are less, which is natural and by no means to be deplored, for an increase in transactions resting on production and transportation is to be preferred to a largely puffed up business in shares. Notwithstanding continued activity in business, the reserves of the banks have been well maintained, the proportion of cash assets being to-day 34½ per cent. of the total assets. The increase in circulation from $57,500,000 to $59,900,000 is another remarkable feature of the statement; for it indicates continued activity in directions where by reason of strikes and fires at home and some untoward appearances in the United States, one might reasonably have looked for a decrease.

ABSTRACT OF BANK RETURNS.

Description.	July 30th, 1904.	July 31st, 1903.	In Month 1904.

DRY GOODS PROSPECTS.

At the present time it would be rash to attempt to forecast the probabilities so far as cotton and cotton goods are concerned. On one or two days this week spot cotton at New York has made upward jumps, but the general tendency without a doubt is towards really lower prices; that is, unless something very serious should happen to the crop now growing, which, of course, during the present weeks is at a critical stage in its growth. Canadian manufacturers seem to anticipate a decline in prices, and for the present withhold quotations. At any rate it may be stated that in the event of any marked change in values the likelihood is in favor of them falling lower. Already battings have made a recession of 10 per cent., but in this particular line there had been some accumulation of stocks. In reading the above remarks it should be borne in mind that the goods which will be purchased between now and, say, the next two months will not be affected by the decline in prices.

One difficulty which is making itself felt by both wholesale and retail dealers in regard to the policy pursued by the textile mills of not delivering before December 1st on a basis of new prices, whenever they may be issued, is that the former, generally speaking, have not sufficient goods in stock to carry on the ordinary requirements of their trade until that time. The new quotations are expected this week.

In the department of woolens a very different order of things exists. The position is becoming stronger every week, principally due to the high cost of raw wool. Flannels of all sorts are scarce. Blankets are likely to be in specially great demand in the North-West and elsewhere during the next few months, and they have already advanced in price a little. But the main difficulty is not in getting them at fair prices, but in getting them at all. The trouble consists in getting promise of delivery.

As to general trade, it may be described as fully up to the average for this time of the year, in spite of the somewhat adverse influence exercised by holidays and by uncertainty regarding the harvest. A good many country retailers also have no doubt postponed sending in their orders in the expectation of themselves visiting Toronto during Exhibition fortnight. The fact that Monday next will see the fall millinery and dress goods openings gives point to this determination. In the meantime it may be said that there is good promise for a satisfactory fall trade in dry goods and millinery.

FORGERY.

While the law relative to forgery is settled in certain respects, yet the variation in facts attending certain forgeries gives rise to new combinations of principles which constantly present difficulty to the courts. A most interesting case has recently been decided by the Supreme Court of Canada, which case is unique by reason of the fact that in deciding it the learned judges had absolutely no direct precedent in either the courts of Great Britain, the United States, or Canada, and it became necessary to decide it on the general principles of common law as nearly as possible applicable. In this case of Ewing and the Dominion Bank, one Wallace was manager of a phosphate company in Toronto, and it appears that he forged the signature of Messrs. Ewing & Company, of Montreal, to a note for $2,000, which note he discounted at the Dominion Bank in Toronto on the 15th of August, 1900. Immediately thereafter the Dominion Bank, as is their custom, sent a written notice to Messrs. Ewing & Company, of Montreal, advising the firm that the said note had been discounted at the bank named, and requesting them to make provision for its payment on the 17th of December, 1900, at its maturity. Immediately on receipt of this notice on the 16th of August, Messrs. Ewing & Company, of Montreal, got into communication with the phosphate company of Toronto in order to get an explanation of this unusual proceeding, and within the course of a few days they had learned without question that their signature to the note described was a forgery. Meantime Wallace issued cheques against his deposit as above, which left a balance at the close of business on the 16th of August of $1,350, and on the 17th of $84; and, the funds having thus gone out of the bank's hands, they had no way of recouping themselves.

Messrs. Ewing & Co. did not notify the Dominion Bank that the signature above was not genuine, but continued their communication with Wallace in Toronto to endeavor to get restitution. The note finally matured, and Messrs. Ewing & Company were called on for payment. Refusing, the matter went to suit, and both at the trial and again before the Court of Appeal of Ontario they were ordered to pay to the Dominion Bank the amount of the note. These judgments have now been sustained by the Supreme Court of Canada as above.

Although it seems rather hard that Messrs. Ewing & Co. should have been compelled to pay this note under the circumstances, yet the correctness of the decision cannot well be questioned in view of the truth that it is absolutely essential to sustain a high standard of business morality, because the bulk of all legitimate business is done on a basis of confidence. The decision of the Supreme Court of Canada was based on a technical rule of law known as the doctrine of estoppel, which shortly means that if a man, by silence or acts, induces another man to believe that a given state of circumstances are so, and the other man, believing, therefore, that these facts are true, acts on them and sustains damage thereby, the former cannot thereafter deny the truth of the fictitious circumstances which he by his conduct or silence has induced the other man to accept as true.

This decision also settled that even although a man is not a customer of a bank such as a depositor, for instance, yet if he is advised by the bank that they hold his paper under discount, the signature to which he knows to be a forgery, then a duty is cast on that man to notify the bank of the forgery immediately, in order that they may save themselves by either proceeding directly against the forger or by attaching any monies in their hands, as, for instance, the proceeds of the discount.

In this case, therefore, the Supreme Court held that there was a duty incumbent upon Messrs. Ewing & Company, of Montreal, to immediately, by either telephone or telegraph, advise the Dominion Bank, immediately after receipt of their notice on August 16th, that said note was a forgery, and that Messrs. Ewing & Company having represented to the bank, by not fulfilling this duty and by keeping silent on the matter, that their note was genuine when the bank had parted with practically all the proceeds of the discount as above on August 17th. After that date Messrs. Ewing & Co. were estopped from saying that the note was not genuine, and, therefore, they were liable for the amount of the same to the bank the same as if it had been a genuine signature.

There were a number of decisions previous to this case which had settled the doctrine of estoppel in reference to forged instruments, and it had been definitely decided that where a man was a customer of a bank, as, for instance, a depositor, when such man learned that his cheques had been forged there was a duty cast on him to immediately notify the bank of the forgery as soon as he discovered it, in order that they might save themselves as much as possible. There had, however, never been a case applying this principle to the case of an outside man who was not a regular customer of the bank, and this is the fact which made the present case a difficult one to decide. But this point is settled definitely now, and on the whole it seems but reasonable that if a man discovers his name to have been forged and a bank is liable to lose money through the forgery, he is under an imperative duty, as well as being actuated by the incentive of self-interest, to notify the bank at once of the forgery in order that that institution may suffer as little loss as possible.

AN ADVANTAGE FOR CANADIAN LIFE COMPANIES.

A change has been made in the status of colonial life insurance companies in England. Hitherto, for many years, premiums paid in the United Kingdom on life insurance or on contracts for deferred annuities have been, if the companies were British ones, exempt from income tax. But since of late years colonial companies have been doing business in England, their business has suffered from the disadvantage they were placed under in this respect. The matter was laid before the High Commissioner for Canada and the Minister of Finance, and in consequence of representations made to the British Treasury on the subject the disability has been removed.

The effect of this change in the English law is illustrated thus: The English law used to provide that where a person invests one-sixth of his income in life insurance in British companies that portion of his income should be exempt from the income tax. This provision did not formerly extend to insurance in colonial companies. In the past if of an income of £1,200 say £200 was invested in life assurance in English companies, this £200 was exempt from income tax, while the same investment in a colonial company would have to pay the income tax on this sum amounting to £10. In order to compete with English companies the colonial companies have in the past been forced to pay this by deducting it from the amount of the premium collected. Now they will not only be on a par with English and Scotch companies, but, it appears, will have this as an advantage over American companies doing business in the Old Country, a very considerable preference for colonial companies.

But is this fair? ask some English journals, who bring forward the fact that there are continental and other foreign companies which do far more life business in the United Kingdom than the colonial and Indian companies put together. The Chancellor of the Exchequer, when bringing forward the measure declared "that it was not in the interests of the companies, but in the interests of the individuals that he commended the amending clause to the house." If this be the case, comments the London Economist, why is the extension of the privilege to be limited to insurers with colonial and Indian offices? "If the principle is to be applied equitably, it will have to be applied all round. Moreover, while our home life offices have hitherto enjoyed a privilege in this matter denied to their colonial or foreign competitors, they have labored under still greater disabilities. They are required to pay income-tax on the whole of their interest receipts, while the colonial and foreign offices practically escape the tax altogether, as their funds are invested abroad."

MANUFACTURERS TO FORM AN INSURANCE COMPANY.

A plan, or at least the outline of a plan, for the formation of a manufacturers' mutual fire insurance company has been arranged, to be submitted at the annual meeting of the Canadian Manufacturers' Association in Montreal in September. And we commend to the attention of the Canadian Fire Underwriters' Association the scheme as far as it has been promulgated.

> It is proposed that this mutual company, to be operated direct from the offices of the Canadian Manufacturers' Association, will for a time at least confine itself to bearing what is known as sprinkled risks among its membership. In other words, risks of the highest class with all the modern improvements of fire doors, automatic sprinklers, etc., will be carried by this company, all other risks being placed outside the board companies, making a saving, it is claimed, of twenty per cent. for the latter over present rates, while the sprinkled risks can be carried at very much less than what they now cost with the board companies. The Manufacturers' Association hope by this means to bring back into Canada a very large percentage of the sprinkled risks which are now being carried abroad particularly in the New England mutual companies, which make a specialty of this sort of insurance.

Seeing that the combined capital of the associated manufacturers of the Dominion amounts to hundreds of millions of dollars, there is a great field for the operation of such a company as that proposed. Certainly, if it shall adopt the careful plans and the exacting restrictions of the New England Mutuals, a great saving may be expected, not only in the fire waste of this description of property, but in the cost of fire insurance. For we are told that part of the plan of organization of this Manufacturers' Mutual is that no agents be employed, the offices of the Association handling the business. This is expected to make a vast difference in the expense account, a very desirable thing. Another feature is that insurance will be confined to members of the Association.

It will be found, however, that the betterments that will have to be effected in premises and plant and the appliances to be provided in order to reach the standard required by, say, the New England Mutuals will be much more exacting than the average manufacturer dreams of. It will be well if the effort outlined shall result in the formation of a strong and competent company, or group of companies, in Canada to give secure indemnity instead of depending upon United States companies which write such risks as those indicated. Nothing, however, but the highest skill, the result of long observation and experience, will suffice to yield such results as the New England Mutual are able to show. Given this skill, and the exemplification of that old-fashioned but effective trio, "care, order, and cleanliness," and effects will be shown that must lessen the fire waste and help the manufacturer to increase the balance on the right side of his ledger.

BRITISH RAILWAYS.

The reports of railways in the United Kingdom which have been published during the first week in August were looked for with general interest, inasmuch as railway earnings are a good indicator of prosperity or depression in commerce. Those which have thus far appeared do not savor of any serious lessening of activity. In a list of twenty-four companies, whose dividends and forward balances for the June half year are given in the London Economist of August 6th, there are ten whose dividend remains the same, seven who declare more dividend, and seven who declare less than in the same period of 1903. We present the figures of the principal roads:

	Half-Year Ended June 30th.			
	1904.		1903.	
	Dividend.	Balance Forward.	Dividend.	Balance Forward.
	%	£	%	£
Central London	4	48,737	4	55,832
Gt. Central (1,879 Pf.)	5	3,366	nil	12,895
Great Eastern	1¾	16,380	1¾	16,113
Great Northern	3	41,806	3	22,880
Great Western	4	25,600	3¾	24,255
Lancs. and Yorks	3	19,300	3¼	37,109
Lon. and Brighton	3½	23,339	3	18,084
Lon. and N.-Western........	5	74,000	5	80,800
Lon. and S.-Western........	4	25,977	4	25,546
Metropolitan	3	21,236	2½	26,256
Midland Deferred	2	24,707	2¼	22,256
North-Eastern	5	40,875	5	45,287
North London	6	336	6½	2,962
Rhymney	8½	3,868	7	2,359
South-Eastern	½	10,592	½	17,060
Taff Vale	4	11,545	3½	6,315

People were looking with curiosity for the report of the Lancashire & Yorkshire, which was not expected to pay so much as 3 per cent. Economy in working expenses (these were £1,571,000 for the half year compared with 1903) had much to do with it. The Great Central accounts are always looked for, too, for that road is "making progress in climbing the stairs of the successive preference issues towards a dividend on the ordinary." It pays dividend this year on the 1879 preference, but there still remain without dividend four issues of preference stock amounting to £8,210,000; "so that a long and toilsome climb must be accomplished before the goal of an ordinary dividend is attained." The half year's gross revenue was £1,732,484.

The Great Northern Company has done well, gaining £25,000 in gross receipts and writing off permanent way suspense account. The great sum of £2,470,153, equal to more than twelve millions of dollars, is shown by the London & South-Western company for the half year. It is an increase of £55,572 over 1903. The working expenses of the road are 64.4 per cent., we observe; that of the Grand Trunk of Canada is 70.16. As to the North-Eastern Company, the Economist says disappointment was felt that no better result than that for the first half of 1903 was secured. "A good deal has been made of the fact that this company had adopted American methods of statistics and working, had electrified a portion of its system, and was very up-to-date generally. The company is also credited with dealing fairly with its capital account by charging revenue with a full proportion for renewals and 'betterments.'" But the ordinary shareholders do not benefit. The market professed to be disappointed that the Great Western dividend was not made 4½ or 5 instead of 4, but it is contended that the increase to 4 from 3¾ was as much as could be expected. As the ordinary capital has been increased to the extent of £1,350,532, "it would have required £65,600 more to pay 4 than sufficed to pay 3¾ last year." The North-Western dividend at the rate of 5 per cent. must be regarded as extremely satisfactory, last year's rate having been maintained, although the estimated traffic receipts showed a falling off equal to £91,000.

◆

—An interesting and important work is that entered upon by Professor Zavitz, who is in charge of re-forestry at the Guelph Agricultural College. He was in Ottawa the other day conferring with the Minister of Agriculture about plans for the future. The professor has recently completed a tour of Ontario with the object of finding out what are the farm forestry conditions, the needs and capabilities of the different sections. He found the Lake Simcoe and Georgian Bay districts well adapted for experiments in farm forestry. It is his intention to set out at once on a seed-collecting expedition. A heavy crop of white pine seed is promised this year, and he will endeavor to obtain a large supply of it. Energetic action in such a direction as here indicated is the part of wisdom. Canada must not be behind other countries in the needful work of restoring trees that have been needlessly and wastefully cut down, to the impoverishment of the country and the injury of its cultivators.

SOME POINTS ABOUT THE WINNIPEG FAIR.

It is not sufficient to say that the Winnipeg Summer Fair of 1904 was a good Exhibition—that would be a commonplace expression. It was an extraordinary Exhibition, for the following, among other reasons. The Fair was kept open for two weeks, and it was the first time this had been done. The result justified the experiment. Again, in a new country, and with only a dozen years' growth, to have got together such an instructive array of products, natural and artificial, was a remarkable achievement. The arrangement of the handsome colonnade, a covered way from which one could walk protected into each and all of the great sheds, was a happy thought. These buildings were from 550 to 650 feet in length each, and 40 feet in width. Their disposition made it possible for a spectator to see every exhibit in all these spacious premises without going from under cover, and this is something to be appreciated in case of inclement weather. It is stated that 30,000 people could have found shelter therein in case of necessity. It should be emphasized, too, that the having a covered marquee, seated and always dry, in which judges could do their work, was found to be a great comfort.

In two particulars the 1904 Fair was especially noteworthy, the display of live stock and the exhibit of field implements. This was to be expected, for these are two of the great features of North-West farming. Of farm engines, threshers, and the other implements that a plains farmer needs, there was an astonishing display; in size and value, on the testimony of good judges, the machines shown could not be surpassed anywhere. It is satisfactory to know, too, that a Canadian concern carried off the gold medal from United States exhibitors in this class. The show of animals, as we have said, was most creditable, Ayrshire, shorthorn, and polled cattle were all present in large variety. It seems to be admitted that the shorthorn is the best breed for our North-West. An excellent showing was made of grade cattle. A very fine display of horses was made. The Clydesdales and roadsters shown were of a good kind, and there were some fine carriage horses. A deficiency of saddle horses was to be remarked, however. Sheep were only of fair quality, and the exhibit was not great, but the swine were admirable—the size of some of them enormous. Perhaps the most pleasing feature of the show, from an agricultural point of view, was the great and cordial interest displayed by the great cattle breeders of the Eastern provinces.

By means of an arrangement with Eastern manufacturers, a greater display than ever before was found possible at this Fair of Canadian products of machinery. It may, perhaps, be said that a greater variety might have been shown; but considering the distance goods had to be taken, the array deserved praise, some of the individual exhibits being large and most striking.

The attendance was very large, indeed the crowd was sometimes enormous, and one would have thought embarrassing. In fact, the doubts held by the management as to whether the second week's duration of the Fair would justify itself were all dispelled. Of course the greater scale of things, the erection of the colonnade, and the great new sheds, must have run away with a lot of money. But we are glad to be told that the financial results were so satisfactory that there is likely to be a balance on the profit side.

SAINT JOHN AND THE FIRE UNDERWRITERS.

The City of St. John is now seriously considering a large expenditure for an improved water supply. Engineer Frank A. Barbour, of the firm of Snow & Barbour, Boston, has made a report on the St. John water service. He finds that while sufficient for domestic and manufacturing uses, it is inadequate for fire protection. He recommends a connection of the existing system with Loch Lomond, a large lake eleven miles from the city. This lake can supply water sufficient for a city seven times as large as St. John, and the service will be a gravity one, the lake being about 230 feet above the level of the city. Mr. Barbour estimates the cost of the extension he recommends at about $200,000, but there is a fear in the city that if the work is undertaken, claims for very heavy damages will be presented. The Mispec river drains Loch Lomond, and at its mouth is the Mispec or St. John Sulphite Pulp Mill, owned by an English syndicate. This mill has not proved a financial success, and is advertised to be sold by order of the courts on October 1st. The company built large dams on the Mispec river and used the water in connection with the mill. If the city sought to take water from the lake the mill owners might set up a claim for big damages. This is the present fear. The fire underwriters are demanding the improvement of the water service. Recently that body added 40 cents to the insurance rate, promising to take off 15 cents when two chemical engines are added to the city's fire fighting apparatus, and the remaining 25 cents when an adequate water supply is secured. The chemical engines have been ordered, so that the 15 cents will soon come off, and the other work is sure to be done, no matter what the cost is.

Wholesale druggists from different Maritime Province points are here to-day. The object of their conference has not been learned, but it is generally believed that the meeting is part of a move now general over the Dominion to compel the retailers to buy from the wholesalers. It is understood that many jobbers have been in the habit of placing orders for proprietary medicines direct with the manufacturers. The wholesalers want to get a share of this trade, and it is understood are taking steps to secure from the manufacturers promises to sell only to the wholesale trade, and from the retailers pledges that they will buy only in the same way. Some of the manufacturers have agreed to the demand of the wholesalers, and of course the small jobbers, who are dependent on the wholesale houses for their very existence, also agree not to buy elsewhere. Some St. John dealers, who have been placing orders with manufacturers for years past, have had them turned down lately.

The company that is working the New Brunswick oil fields now has about sixty wells bored. All these are producing oil, some of them quite freely. It is intended to keep on boring until 100 producing wells have been put down, and then a small refinery will be built. Recently some of the oil was given a test in the I.C.R. shops, at Moncton, and the report on it is understood to have been most satisfactory. While the development is slow, the owners of the property express themselves thoroughly satisfied with the outlook, and appear to think the time is not far distant when New Brunswick oil will be on the market as a commercial product.

New York capitalists have deposited $10,000 with the Provincial Government as a guarantee of good faith. They have been granted permission to harness the water power at Grand Falls, next to Niagara the finest water power in Canada. The company intend going into the manufacture of manganese from bog ores, and say they will build an extensive plant at the falls. The water power is such a fine one that when once harnessed other important industries are likely to be established at Grand Falls.

Word has been received by the city authorities from the Bertram Iron Works, Toronto, that the hull of the city's new ferry boat has been completed. Thirty cars will be required to bring the steamer to St. John, where workmen of Messrs. James Fleming & Son, the local machinists who took the contract, will put it together. This firm is building the machinery.

Bakers in New Brunswick are talking in view of the advance in wheat of increasing the price of bread. Two pounds is the standard loaf in this section, and the price of it is seven cents.

St. John harbor fishermen have been unusually successful this year. The catches of salmon, shad and gaspereaux were all above the average, and prices were good. The bay fishermen, on the other hand, have had poorer luck than for fifteen or twenty years past. Catches of cod, halibut, pollock and other deep sea fish have been very small. The foggy weather and the ravages of the dog fish are the reasons assigned.

Lumbermen in the province of New Brunswick have made a demand on the local Government for a reduction in the new stumpage and mileage rates. The lumber trade is very dull and the manufacturers say the business will not stand the increases put upon it. The Government has promised consideration. The question is apt to be a troublesome one for the Government at the provincial bye-elections now pending in St. John.

A commission appointed by the Provincial Government is taking evidence over the province with regard to the necessity of a factory act. St. John, Campbellton, Chatham, and Newcastle have been visited. The Government is pledged to the St. John labor organizations to pass an act, but the evidence so far given shows there is little need for one.

St. John, N.B., 23rd August, 1904. * * *

MONTREAL REAL ESTATE.

"Real estate is legitimately in demand and there is no signs of any falling off in its earning power; on the contrary, there is little doubt but that Montreal at the present time is underbuilt, and until a good deal more housing accommodation is furnished to meet the requirements of a growing city, rents will still have a tendency to increase." Such is the statement of Simpson's Real Estate Record for August, which considers, all things being taken into account, that the real estate market in that city must be regarded as in an exceptionally safe position. Building operations are going on pretty steadily, we are told, but it will likely take another year or two to restore the equilibrium between supply and demand.

The record shows one hundred and eighty-two transfers in the seventeen wards of the city and the municipality of Westmount during July, and the aggregate of them was $729.-363. The largest figures are shown by Westmount, $105,202; St.

Lawrence Ward, $99,750; St. Louis Ward, and St. Mary's Ward, $67,000 each; St. Jean Baptiste, $57,000; St. George's, $59,000; Hochelaga, only $15,000. In the same month last year the total figures reached about the same amount. In the suburban municipalities recorded sales mounted up to $390,644, and were as follows: Maisonneuve, $185,545; Delorimier, $15,706; Mile End, $92,735; Outremont, $6,000; Cote des Neiges, $15,100; Notre Dame de Grace, $33,986; Montreal West, $400; Verdun, $526; Cote St. Paul, $21,734; St. Henri, $12,412; Ste. Cunegonde, $6,500.

Three hundred and forty building permits were issued in July, and the stated aggregate cost of the work was $480,421. Nearly half the number of permits were for new buildings, consisting of 63 houses, 108 tenements, warehouses, factories, school, etc., to the total of $392,000. The permits for alterations and repairs amounted to a value of $87,000.

Money is easily obtainable, the Record adds, at five per cent. on first-class mortgage loans on property in the city of Montreal or its immediate suburbs, but lenders are disposed to be very conservative, and it is difficult to place loans unless up to their standard of requirements. The mortgage loans tabulated were mostly at 4, 5, and 6 per cent. in the Eastern End of the city. In the west one loan of $6,400 was made at 3, but the great bulk was at 5, 5½ and 6.

LIFE ASSURANCE ITEMS.

We learn from the Insurance Record of London, England that Mr. Junkin, managing director of the Manufacturers Life Insurance Company, of Toronto, is on a visit to the Old Country, with the object, it is said, of opening an office in London, and of finding a manager to take charge.

In the language of the day, it is the "knocker" who does the "twisting," says W. S. Tupper. No man lapses one policy to replace it with another merely because he is solicited to take life insurance. It is because the soliciting agent attacks the other company and causes the policyholder to lose faith in it. Without attacking the company in some way the "twister" could not effect his purpose. Any company forbidding competitive literature in the interest of clean field methods, would certainly forbid scandalous and abusive literature; and the same principle should exclude verbal abuse.

The course in fire insurance and fire insurance engineering which the University of Michigan proposes to inaugurate next fall, would seem to have many points to commend it. The technical course in life insurance, established in this university two years ago, has passed beyond its experimental state and is now firmly established. This is the only course offered by any university or college which prepares students for actuarial work, and that it fills a demand is attested by the applications received from life insurance companies for men to fill office positions, a demand very considerably greater than the supply. The success of this course has amply demonstrated the fact that there is in this country a field for technical instruction in life insurance, and has made it a permanent feature of the curriculum. We can see no reason why a technical course in fire insurance should not meet with just as hearty a reception.—Detroit Indicator.

FIRE INSURANCE MATTERS.

Souris, Manitoba, is installing a gasoline engine valued at $3,580, a chemical engine at $750, and a hook and ladder truck at $200, also tanks which will cost $500, making a total of $5,030 for fire protection purposes. It is understood that fire insurance rates will now be reduced in the town, as a consequence.

On Tuesday last, the ratepayers of Meaford voted by a large majority in favor of extending the water mains and increasing the pumping plant of that place. They also voted $20,000 to the Meaford Wheelbarrow Co.

Several fires of suspicious origin have occurred lately in and around Dresden, Ont,. Provincial Detective Murray has been despatched to investigate the causes of them.

The corporation of London has made a demand on the C.F.U.A. for a reduction of twenty per cent. in the key rate of fire insurance in that city, which reduction, it appears, was promised not long ago. Correspondence is now going on upon the question, the underwriters having invited the London council to send delegates to confer with them in Toronto

The capital city of Michigan, Lansing, has been quite recently subjected to a rise in rates of fire insurance. Indeed the new schedule has changed almost every risk in the place the advances ranging from 10 to 30 per cent. Naturally, the citizens do not like this and have demanded to know why it was done. Mr. N. C. Lowe, of the State Inspection Bureau, was asked to report. He did so thus: "On examination of the surveys made by our inspectors, I find that in nearly every instance where an advance in rate has been been made, it is due mainly to the omnibus construction of buildings, exposures, faulty electrical equipment, or other defects which can easily be remedied if your patrons so desire. By so doing they will be entitled to a modification of the estimates." The lesson is plain enough; it is strange that so few, whether in Michigan or anywhere else, appear disposed to learn it.

ANSWERS TO ENQUIRERS.

During the absence of the Editor, a number of enquiries have accumulated. Some have been answered by letter within the week; others, unreasonably long, which we cannot undertake to answer, have been returned to the writers. To those replied to below, we pen this explanation of the delay.

F. McK., Edmonton.—We do not know of such a company in Canada as the Royal Canadian Trust Company. You must mean the Royal Trust Company, whose headquarters are in Montreal. It has a branch in Winnipeg, as the Toronto General Trusts Corporation has. The Royal is a respectable company. Its president is Lord Strathcona; its vice-president, Sir George A. Drummond; the remaining directors are: R. B. Angus, E. S. Clouston, E. B. Greenshields, C. M. Hays, C. R. Hosmer, Sir W. C. Macdonald, Hon. R. Mackay, A. Macnider, H. V. Meredith, A. T. Paterson, R. G. Reid, Jas. Ross, Sir T. G. Shaughnessy, Sir William C. Van Horne, K.C.M.G. The manager is Mr. H. Robertson. Paid capital, $500,000; reserve fund, $350,000.

Far West, Nelson.—It is very questionable if any company of the kind can afford to pay such dividends as that one promises. Better let it alone unless you have money to waste and want to gamble.

Borderer, Sault Ste. Marie.—There is no excess of modesty about your request. What you ask us to do would take a page of this journal. We have already published the figures, but as you probably do not file the Monetary Times, we shall repeat the amounts of Canada's imports from the West Indies for a series of years. This includes British Guiana, the British, Danish, Cuban and American West India Islands. Fiscal year, 1900, $1,544,600; 1901, $3,027,000; 1902, $2,260,500; 1903, $3,042,800. The exports to the same for the years given were: $536,000 in 1900; $610,000 in 1901; $564,000 in 1902, and $584,000 in 1903. Exports consisted of fish, lumber, flour, oats, peas, bran, animals, coal, hay, cotton, boots and shoes, books, drugs and chemicals, fruit, paper, butter and cheese, vegetables, meats, spirits and wines, household furniture, iron and steel goods, and a score of other articles.

R. C. D., Hull, Que.—Write to the New Brunswick Tourist Association, St. John, N.B., W. S. Fisher, president; Charles D. Shaw, secretary. They will send you an illustrated pamphlet and map. Take the Intercolonial Railway or board the steamer "Campana" at Montreal. The C.P.R. will only take you through parts of Quebec and the State of Maine.

J. H., Brantford.—Canada's exports for that year consisted of produce of the mine, $31,235,165; of the fisheries, $11,826,646; of the forest, $36,431,114; animals and their produce, $70,466,619; agricultural products, $51,572,889; manufactures, $22,880,176; miscellaneous, $817,152. Total value of exports, $225,849,724, including $619,963 of coin and bullion.

R. B., 257 Pond St., Boston.—Your letter of July arrived while the Editor was absent on his vacation. Regret having no special knowledge of the place or people, beyond a general impression that the locality is almost ideal for the purpose.

E. B. H., Griswold, St., Detroit, Mich.—Your article is not suitable and has been returned. The subject does not possess interest enough for Canadians. It is for the people of your country to bring pressure to bear upon the authorities at Washington. The residents of Boston, St. Paul and the lake cities are awake to the anomaly that exists, but the people of the South and West are either obtuse or prejudiced in the matter.

H. McL., Montreal.—Look out for the meeting of the Canadian Manufacturers' Association on 21st September, and make the proposition then. The idea is a good one.

BANKING AND FINANCIAL ITEMS.

A map of the city of Toronto has been issued, which takes in parts of High Park and Toronto Junction, on the west, and north, the Woodbine race track and beyond, on the east. It shows in red lettering the eight branches of the Canadian Bank of Commerce in the city and the Toronto Junction one, nearly five miles away. On the back of the sheet is a key which enables one to find a street quickly.

Mr. E. S. Clouston, general manager of the Bank of Montreal, has been visiting Nova Scotia in his private car "Riva." He stopped off at Amherst and inspected the site on which it is proposed to erect a handsome stone building for the branch of the bank in that town. Thence he proceeded to Cape Breton.

W. T. T., Dundas.—Yours of 12th August stating that an appeal to the files of the Monetary Times would probably confirm your assertion that Canadian Bank Discounts decreased between 1870 and 1880, is correct. We have consulted the files and give the figures for ten years. The expansion in business of all kinds in 1873 and 1874, well remembered by those living whom it affected, is clearly shown by the amounts we quote below. Between 1872 and 1874 the bank discounts rose from $101,000,000, in the year first mentioned, to $128,000,000, in 1874. So also is the subsequent decline in business and stringency in finances for half a dozen years reflected in the statistics. In 1875 the discounts had gone down to $122,000,000; in 1878 to $113,000,000; and by 1880 they had declined to $86,000,000 from which point they began to rise, reaching $100,000,000 inside two years thereafter:

		Discounts.
Year ended with June,	1871	$79,820,289
" " "	1872	101,295,542
" " "	1873	115,477,412

" " "	1880	86,705,382
" " "	1881	100,021,000

TOBACCO SELLERS AND BUYERS.

The measure which was being prepared by Hon. Mr. Brodeur to relieve the smaller tobacco manufacturers of Canada from what they regard as unfair competition, did not meet with completion during the session of Parliament which has just closed. A large deputation of wholesale and retail dealers in tobacco appeared at Ottawa at the end of July to lay their side of the question before the Government. This deputation protested against any interference with the trade contracts which the wholesale houses had made with the Empire Tobacco Company. Mr. Bristol insisted that "the arrangement as now in force as between the American Tobacco Company and the wholesale grocer, is quite satisfactory to the wholesale trade and the general trade. It did not originate from the American or Canadian Tobacco Companies, but came from the wholesale grocer trade, and I was one of the parties instrumental in introducing it. It put the selling of tobaccos on a solid basis, and it afterwards extended and worked satisfactorily to all. We claim it is not an injustice to anybody."

The answer made by the wholesale houses, who have agreed to sell the Empire Tobacco Company's product, amounts to this, that it pays them to sell these particular goods, and it does not pay them to sell other brands or kinds. When they are reproached with being monopolists who are assisting a particular maker of tobacco and cigars to cripple his competitors, their reply is: We are willing to do the same with other makers whose goods are equally in demand, and who will make arrangements to secure us the same slim but steady profit we get on his goods." If you suggest that these arrangements are perhaps not equitable, but that they handicap other makers of tobacco, they will tell you: "We have nothing to do with his arrangements, indeed, we don't know, and don't want to, how he does for other people. If he keeps faith with us that is sufficient."

It is doubtless a fine thing for the Empire Tobacco Company to have the assistance of forty-five wholesale houses in selling the company's goods through their travellers and other salesmen. And the company on its part has done much, by ingenious advertising, and above all by putting out a good quality of goods, to retain the friendship of these houses. But it is hardly to be expected that this sort of arrangement, which ties up a whole trade virtually to one man, can last forever. Monopoly, if too long permitted, is apt to become arrogant, and this is what the Premier and Hon. Mr. Fielding evidently perceive, when speaking to the deputation about undue restrictions in the business, and about taking power from Parliament to restrain. It is not certain, however, that the smaller makers, in efforts to correct an iniquity they say the Empire Tobacco Co. is guilty of, have gone the right way to work to cure their wrongs. It would be curing one injustice by creating another to take away the company's license.

—The party sent out by the Ontario Crown Lands Department to explore the Lake Abitibi region, with a view to ascertaining its mineral and agricultural resources, reports that most of the land is quite flat and covered with stratified clay. Though somewhat wet on account of the level nature of the country, the streams have banks of sufficient height in most places to drain the land, with the exception of those parts which are covered with muskeg. These last mentioned are comprised in the district covered, so far from one-tenth to one-fifth of the total area. Owing to the level nature of the country, the peat deposit on them does not extend to any great depth. On most of them a sounding of from three to six feet encountered a clay bottom, though in some the sounding went from ten to twelve feet. It is believed that with a system of draining much less extensive than that in parts of the counties of Essex, Kent and Lambton, most of these muskegs could be changed into farming lands.

—A Canadian Commercial Club has been formed in Mexico, its object being to create and improve the trade relations between that country and Canada. Most of the members who have organized the club have been long resident in the southern Republic, so that their experience should prove of especial value to exporters here who desire to enter the Mexican field.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, August 25th, 1904, compared with those of the previous week:

	Aug. 25th.	Aug. 18th.
Montreal	$18,951,923	$19,877,714
Toronto	13,711,231	15,177,116
Winnipeg	4,747,801	5,170,590
Halifax	1,627,164	1,617,022
Hamilton	1,051,573	1,058,646
St. John	938,093	1,056,554
Vancouver	1,596,509	1,225,542
Victoria	566,122	683,985
Quebec	1,437,383	1,549,547
Ottawa	2,272,981	1,944,024
London	778,007	897,747
Total	$47,688,786	$50,258,487

MARITIME BOARD OF TRADE.

At Moncton, N.B., on several days of last week was held, as we stated last issue, the annual meeting of the Maritime Board of Trade, where were present delegates from New Brunswick, Prince Edward Island, and Nova Scotia. Hon. Senator Josiah Wood, of Sackville, was in the chair. There was a great deal of spirited and sometimes even hot discussion, as may be imagined where some twenty different boards of trade were represented. But that much of the discussion was sensible and cogent appears from the conclusions reached in the nineteen resolutions carried which we print below.

On Thursday, 18th August, most of the day was spent by the delegates at St. Joseph's College and Dover, where there are oil wells. A special train took the vistors and a number of Moncton citizens to Memramcook, whence by carriages they were conveyed across country to Dover, about fourteen miles. They then went back to St. Joseph's College, where in the afternoon a well was shot for the benefit of visitors and an hour or so spent in viewing wells in the district. The oil industry of the locality offered a novel and improving sight to most of the delegates.

Among the speakers and those present at the convention were: Mr. W. Lewis, of Louisburg, C.B., who spoke on the Canadian coasting trade; Mr. W. F. Tidmarsh, of Charlottetown, and Captain Reid, of Summerside, who respectively moved and seconded a resolution on fishermen's education at fishing stations and the suppression of illegal fishing. Mr. C. Jamieson, of Digby, and Mr. W. M. Jarvis, of St. John, spoke on the dogfish pest. In addition to several speeches by Halifax representatives in advocacy of the construction of steel vessels on our eastern coasts, Mr. Rattenbury, of Prince Edward Island, and Mr. B. F. Pearson, M.P.P., spoke upon it. On the question of an open port for Sydney, Mr. Shaffner moved a resolution setting out that Sydney was the second largest shipping port in the Dominion, and asking the Dominion Government to give Syd-

STEAM ENGINES

ney a harbor ice-breaking steamer. J. G. Lefurgey, Summerside, seconded the resolution. J. H. White, St. John; W. S. Loggie, M.P., of Chatham; Capt. Anderson, Sackville; Mr. Birch, of Alberton, P.E.I., were other speakers, more particularly on the subject of short weight in canned goods, and the need of penalties to stop it.

The officers elected for the current year are:

President, E. K. Spinney, of Yarmouth.

First vice-president, Capt. Joseph Read, of Summerside, P.E.I.

Second vice-president, W. S. Fisher, of St. John.

Permanent Secretary, Chas. M. Creed, Halifax; corresponding secretary, E. H. Armstrong, of Yarmouth; auditor, M. G. De Wolfe, Kentville.

The president, Mr. Spinney, is described to us as a jovial hardware merchant, a successful man of much shrewdness, who will give the members a good time when they meet him in his home town of Yarmouth at the next annual session of the Board.

The following resolutions were carried:

The Fishery Regulations.

"Resolved, that it is desirable that the Government take active measures to enforce the regulation for the protection of the lobster fishery by instructing the officials of the Marine and Fisheries Department to suppress the illegal fishing in their respective districts;

"Further resolved, that it is desirable to establish Government fishery stations at suitable places on the Atlantic coast and the Gulf of St. Lawrence;

"Further resolved, that it is desirable the Government should consider the re-organization of the fishery service with the view of bringing it up to a higher state of efficency."

Via Canadian Ports.

"Whereas, under the present tariff a preference of 33 per cent. on British goods applies to merchandise imported via foreign ports as well as Canadian direct to the detriment of Canadian commerce routes;

"Therefore resolved, that the Government of Canada be asked to apply the rebate only to goods coming direct to Canadian ports, so that our own ports and transportation companies may be built up by business of our country."

Fast Atlantic Service.

"Whereas, the construction of a second transcontinental railway and the growing expansion of Canadian exports and imports indicate the imperative necessity of utilizing Canadian shipping ports to the fullest possible extent in order to keep pace with the constantly increasing internal development;

"And whereas, the maintenance of a separate summer and winter Atlantic mail service between Great Britain and Canada has proved inadequate to the requirements of Canadian commerce;

"And whereas, it has been admitted in the Dominion Parliament that nine-tenths of the Canadian mails to and from Great Britain are despatched and received via New York;

"And whereas, the Home Government recently granted the largest ocean mail subsidies on record to assist in the construction of the two fastest steamers in the world for service to foreign ports;

"And whereas, the establishment of a Canadian fast Atlantic service affords a material all-round decrease in mileage, and consequently more rapid conveyance for Imperial mails to and from the Orient;

"And whereas, the Atlantic ports of Canada are several hundred miles closer to the Motherland than any other ports, and are better adapted for rapid ocean mail transit on modern lines;

"Therefore resolved, that the Maritime Board of Trade strenuously protests against the present divided system of Atlantic mail transit, which at a cost of over a thousand dollars per day only provides an ocean mail service very slightly in advance in the average time of the delivery of Atlantic mails at the inception of ocean steamer navigation three-quarters of a century ago;

"And further resolved, that in view of the fact that over twenty steamers with a speed of from twenty to twenty-three knots are now plying on the North Atlantic, the time has arrived for the people of Canada with the aid of the Government to inaugurate the long-promised fast Atlantic service."

Double Tracking I. C. R.

"Whereas, it is considered advisable by this Board that the I. C. R. would be improved by double tracking where needed, and by improving the terminal facilities at Halifax, and by shortening and improving the grades where possible, so as to provide for the fast and increased traffic which will result from the establishment of a fast line of steamers from Halifax to Great Britain;

"Therefore resolved, that the Dominion Government be respectfully requested to take the matter into careful consideration and enquiry, and appoint a competent person or committee to survey and report upon possible improvements and the estimated cost of such changes and the benefits likely to accrue from such charges and the extra speed to be attained by fast trains over an improved line."

Woolens.

"Whereas, the Maritime Provinces are eminently adapted to the wool raising industry and woolen cloths at times manufactured contain inferior substances;

"Therefore resolved, that it is desirable that the Government be requested to place such restrictions on manufacturers that will compel all woolen fabrics to be plainly marked as to the proportion of pure wool or adulterations therein contained in a manner similar to the legal restrictions placed by the Government on manufactured imitations of dairy products."

Undesirable Ventures.

"Resolved, that this Board, having in mind the patriotism and sense of fair play of our Canadian newspapers as a whole, cannot but regret the occasional publication therein of prospectuses and advertisements inviting and encouraging investment in ventures, the commercial standing of which is entirely doubtful and unknown, and the object of which is to enrich promoters at the expense of the public, thereby prejudicing the flotation of legitimate enterprises calculated to aid in the development and to stimulate the production of the country. Further resolved, that this Board entertains the hope that by increased care and discretion of publishers the prospectuses of unscrupulous promoters may in future be denied space in the Canadian press."

Places of Historical Interest.

"Whereas, places of historical interest in the Maritime Provinces constitute our leading attractions in inducing tourist travel, and the circulation of considerable money, and whereas most of these places, now owned by private persons, are unsightly and unmarked by any monuments, and in consequence are disappointing to strangers visiting among us, and whereas our historical societies could probably secure the erection of suitable monuments thereon by private subscriptions, and thus foster a higher patriotism and more firmly cement the ties binding the English and French people together;

"Therefore resolved, that the Dominion and Provincial Governments be respectfully memorialized and requested to take such steps as may result in the public ownership of the more important of these places commemorative of and binding us to our past."

Bank Agency Cheques.

"Whereas the chartered banks have established agencies at different points in the Maritime Provinces, and cheques drawn on these agencies have come into general use as a circulating medium, and whereas the receiver loses the exchange, and the present charges are considered excessive;

"Resolved, that this Board confer with the Clearing House Associations at Halifax and St. John with a view to adjusting the present exchange rates on a basis at least equal to that charged by express companies for transmitting similar amounts."

P. E. I. Telegraphs.

"Resolved, that this Board puts itself on record in favor of Government ownership and operation of telegraphs as in the United Kingdom, and that pending the general acquirement of the various systems the Government be memorialized to expropriate and operate the lines and cable of the Anglo-American Telegraph Co. from Sackville to Prince Edward Island, including the land lines in the latter Province."

P. E. I. Freight Rates.

It was resolved that in the opinion of the Board the rates of freight from P.E.I.R. and I.C.R. to and from the Island should be adjusted on a basis of a continuous rail haul. It was further resolved that the same principle apply to shipments originating at Island ports and transferred to the I.C.R., and that a copy of the resolution be sent to the Minister of Railways and the Maritime representatives at Ottawa.

Communication with P. E. Island.

"Whereas, in the opinion of this Board the most feasible route for water communication between Prince Edward Island and the mainland is a point on the southern coast of said island, at or near Carleton Head, and Cape Tormentine at the extreme east of New Brunswick; and whereas, there is no wharf or pier at said Carleton Head for landing passengers, though recent surveys show such could be built at reasonable cost;

"Therefore resolved, that the Dominion Parliament be memorialized to construct safe terminal facilities at said Carleton Head, and as soon as possible have a steamer put upon the proposed Cape Tormentine and Carleton Head route for traffic immediately on the close of summer navigation;

"Further resolved, that the coming winter a steamer be put on between Summerside and Cape Tormentine, with a view to regular winter communication as long as possible."

Express Competition.

"Whereas, under the Railway Act all express companies may have the same privileges over all railways in Canada, except over the Intercolonial Railway;

"And whereas, under the contract between the Government and the Canadian Express Co., paragraph 15 stipulates that this agreement is subject to the condition that equal facilities and equal terms shall and may be granted to any or all express companies which may contract with His Majesty for the conduct of an express business over said railway, or any part thereof;

"And whereas, over the Intercolonial Railway, between Montreal and Moncton and from Truro eastward, in Cape Breton and in Prince Edward Island, there is only one express company permitted to do the business;

"And whereas, the shippers of fish and other merchandise from eastern Nova Scotia and Prince Edward Island and shippers of fruit from Western Canada to points on the I.C.R., between Montreal and Moncton and points east of Truro are handicapped by being shut out from a competitive express service and compelled to pay extra rates of carriage;

"And whereas, numerous resolutions have from time to time been addressed to the Government asking that the Dominion Express Company be granted the same privileges over the Government railways as are granted to the Canadian Express Co.;

"Therefore resolved, that this Maritime Board of Trade endorses said resolutions, and urges upon the Government the early granting of said express privileges to other companies than that one now having the monopoly of the express business.

"Further resolved, that copies of this resolution be forwarded to the Minister of Railways and Canals, Minister of Finance, and to Maritime Province members at Ottawa."

The "Dumping" Clause.

"That in the opinion of this meeting the recent tariff legislation known as the dumping clause as at present administered is, in some respects, detrimental to the interests of trade, and the Customs Department is hereby requested to immediately make such necessary changes in the administration of the law as will remove all unnecessary restriction to trade."

Immigration.

"Resolved, that in the opinion of the Board the Governments of Nova Scotia, New Brunswick and Prince Edward Island should co-operate in the publication and distribution in Great Britain and Ireland, among desirable settlers, of literature showing the advantage of these Provinces for settlement, and that a committee of three members of the Board from each Province be appointed to press the matter on the respective Governments. The committee was named as follows: New Brunswick—William Jarvis, St. John; Senator McSweeney, Moncton; D. G. Smith, Chatham. Nova Scotia—G. S. Campbell, Halifax; Dr. Moore, Kentville; C. Jameson, Digby. P. E. Island—C. Rattenbury, A. Lefurgey and Mr. Acorn."

Maritime Shipping.

"Whereas, the shipping interest of the Maritime Provinces is every year decreasing; and whereas the chief cause of such decrease is due to a treaty or treaties existing between the Imperial Government and several European Governments; resolved, that this Maritime Board of Trade respectfully ask the Canadian Government to use its influence with the Imperial Government to have such treaty or treaties, as far as concerns the Canadian coasting trade, annulled."

Steel Shipbuilding.

"That as a substitution of steel for wood construction ships reduced Canada from her position as one of the four shipbuilding nations of the world to an unimportant place, and on account of the heavy trade and natural facilities, the construction of steel vessels is prevented here, by reason of skill and capital employed in British yards, the products of which are admitted free to our coastwise and foreign trade. Resolved, that the Maritime Board of Trade hereby endorses and approves of the principle of home steel shipbuilding as offering a new and profitable field for the utilization of our steel products, the employment of skilled labor, and the creation of a new mercantile marine, formerly a great source of wealth to the country."

Short-weight Packages.

"That this Maritime Board of Trade submit to the Government the importance of providing a by-law that in case such goods, each can or package shall be marked with the net weight, the article contained therein, and suitable penalties imposed for infraction of law where it shall appear that there was short weight at the time of putting up such goods."

The Dogfish Plants.

"Whereas, the Federal Government contemplates the establishment at certain points in the Maritime Province of fish reduction plants for the extermination of dogfish, and the utilization of products of such plants for fertilizing purposes; and whereas it is feared that the proposed plants may not be of sufficient capacity or so situated as to render them capable of treating all material available; Resolved, that the Government be respectfully requested to further grant a bounty of a reasonable amount to any person or company proposing to establish similar works as a private enterprise at such places in the Maritime Provinces as may meet with the approval of the Marine Department."

Fair Play to Labor.

"Whereas, municipal corporations in the Province of New Brunswick have been applying for and obtaining au-

thority to impose a license fee upon mechanics and laborers working within and residing outside the municipalities; therefore resolved, that in the opinion of this Board such legislation is not in the best interests of the Province, and such power should not be granted municipal corporations."

OUR HALIFAX LETTER.

The president of the Nova Scotia Coal Company, Mr. Winfield, announces that a change is being made in the telephone systems in the towns of New Glasgow, Westville, Stellarton and Trenton, this having been made necessary by the installation of an electric tramway in these towns, which would render the old telephones of little use. The system now to be put in is that known as the "Central Energy," or "Relay" system, such as is now in use in Winnipeg, Toronto, and Halifax, but which has hitherto been considered too expensive for towns of less than 40,000 population. It is intended to increase the rates $5 a year, making house telephones cost $25, and business telephones $30. This increase cannot be made without the sanction of the Provincial Government.

In the death of W. D. Harrington, Collector of Customs at this port, Halifax loses one of its most esteemed citizens. In early life he was a prominent figure in commercial affairs, conducting an extensive grocery business on the corner now occupied by the down town offices of the Intercolonial Railway. Speculation is busy with the appointment of a new collector, the name of Dr. Kendall being mentioned for the position. It is only a little while ago that the doctor was said to be slated for the positon of Post-office Inspector, but his intimate friends express the opinion that should the election come this autumn, he will contest Cape Breton County in the Liberal interest, the labor situation there necessitating the putting up of the strongest available man.

The many friends of F. B. Wade are congratulating him upon his appointment to the chairmanship of the commission which is to build the new G. T. Pacific Railway between Winnipeg and Montreal. He was one of the chief promoters and constructors of the Nova Scotia Central Railway, and is believed to have good qualifications for the larger work.

The home-coming of R. L. Borden, leader of the Federal Opposition, at the close of the session, was made the occasion of a monster procession. He was given a great ovation by his supporters and friends. Halifax is proud of her distinguished sons. She has already given one Premier to Canada, and is in the line of succession for another, not to speak of Mr. Fielding, who both friend and foe admit has shown judgment and ability as Finance Minister.

The Provincial Educational Association held its annual meeting at Truro last week, extending over several days. There was a good attendance of teachers and others, and the papers read and the discussions thereon were of much interest. The Government appropriation for education in Nova Scotia is quite one-quarter of the entire revenue of the province, while the burden of assessment for school purposes in various sections is small, averaging only sixty-eight cents per head. The impression prevails that teachers are rather poorly paid, but it is evident that if any increase is to come it must be by additional taxation in the school districts rather than by additions to the Government grant.

Acadia College has adopted two new courses in addition to those now comprising its curriculum. One is a four year course leading to the degree of Bachelor of Science, the other is an abbreviated science course without degree. Both courses are affiliated with the Department of Applied Science in McGill University, and the student matriculating in either will be eligible for admission to the third year in Applied Science in McGill without further examination.

The Davison Lumber Company are preparing to build a huge steam mill, at Springfield, in Annapolis County, midway between the Bay of Fundy and the Atlantic, having a capacity of 250,000 feet a day with two shifts. A railway has been surveyed from Springfield a distance of ten miles into the heart of the forest, and construction will be commenced at once. The distance will be extended as the logging progresses, until it is expected 50 miles will be constructed. Forty large flat cars for hauling logs are being built, each with a capacity of 60 tons.

The general manager of the Bank of Montreal was visiting this province last week. He was at Amherst, and went from there, I understand, to Cape Breton, where he and his assistants made a close inspection of the properties and position of the Dominion Coal Company, but for what object has not transpired. The Bank carries a loan of $3,000,000 on these properties, and it is possible that the directors may desire to increase the amount, but of this your correspondent has no personal knowledge.

Halifax, August 22nd.

MINING IN KOOTENAY.

The Nelson Tribune of 13th August gives a list of the shipments of about fifty mines in the Kootenay country for July, showing a decrease of ore, as compared with June. The principal shippers were the St. Eugene mine, at Moyie, to Antwerp, 2,200 tons, and smaller quantities to Trail and Nelson smelters; the Centre Star, at Rossland, to Trail, 7,653 tons; the Jumbo, at Rossland, to Grand Forks, 2,393 tons; the War Eagle, at Rossland, to Trail 5,100 tons, the Granby, at Phoenix, to Grand Forks, 34,072 tons; the Mother Lode, to Greenwood, 13,410 tons; the Emma, 836 tons to Nelson, 957 tons to Greenwood, and 1,072 to Trail; the Ymir, 111 tons to Nelson smelter, and 122 to Trail; the Ottawa, at Slocan City, 228 tons to Nelson smelter; the Ivanhoe, at Sandon, 62 tons to Trail smelter and its zinc to Kansas; the Idaho, at Alamo, 180 tons to Nelson, and its zinc to Iola, Kansas; the the Oro Denoro, at Eholt, 570 tons to Grand Forks; the Hunter V, at Ymir, 814 tons to Trail; the Slocan Star, at Sandon, to Trail, 355 tons. The Tribune says: The returns of ore shipped during the month of July show a small decrease, as compared with the June shipments. In the statement below, no returns are given from mines that ship to the smelter at Northport, or from mines that mill their ore at the mines. . . During the month of July, the Canadian Smelting Works, at Trail, shipped 146 tons of copper matte to Tacoma and 455 tons of lead bullion to San Francisco. The pig lead shipments from the same works were: 118 tons to Montreal, 30 to Toronto, 15 to Lethbridge, 56 to St. Henri, 20 to Windsor, 20 to Oshawa, and 15 to Moose Jaw; a total of 274 tons. The smelters in the Boundary shipped 585 tons of blister copper to New York during July.

—The Cape Breton Electric Company is having trouble with the city council of Sydney. There is a dispute over water, which it is said the company has been using without properly accounting for. The company are asking consumers to sign a contract calling for an advanced rate of from 12 cents per kilowatt hour to 15 cents per kilowatt hour, which is met by a threat that an action will be brought against the company for non-compliance with the Government regulations regarding the inspection of meters. It is believed that the present bickerings are in part due to the action of the company in discharging some union employees at the time of the strike in the steel works, when the decreased business warranted a curtailment of the working expenses.

—Mons. Kalo Morvel, of Geneva, (Switzerland), writes asking for our good services in making known more widely a suggestion he has sent to thirty of the leading advocates of the Metric System resident in Canada, the United States, and the United Kingdom. He states it remains true that many signs indicate the universal adoption of the decimal system, but greater collective efforts are necessary, and the suggestion is "that Canadian, Usonans, and British 'metricites' should bring about the formation of a pro-metric system society in Canada." At first we were puzzled by the descriptive term "Usonans," but a foot note in Mons. Morvel's letter explains that in 1889 he invented the word "Usona" to indicate the residents of the United States of North America, as distinct from the residents of British North America.

Mercantile Summary.

James C. Curry, of Windsor, N.S., carrying on an old established planing mill business, under the style of W. Curry & Son, has assigned with a good-sized liability. He is said to owe some $40,000, apart from a mortgage indebtedness of $10,000. The failure has created surprise as well as distress in some quarters.

A. Koury, a Syrian, formerly engaged in peddling, but for several years past doing a store trade at Inverness, N.S., has assigned, and is said to owe as much as $12,000. It is feared, that in the settlement of his affairs, complication may arise with several of his relations, who have made his premises a sort of headquarters for their trading operations.

We hear of the death at Oxford, N.S., from typhoid fever, of H. G. Cameron, secretary-treasurer of the Oxford Woolen Mills. Mr. Cameron was, for a number of years, a resident of Halifax, having been employed both at Miller Bros. and at Moir, Son & Co., as bookkeeper. He had many friends in both places, to whom the news of his death while still a young man, comes as a shock.

The firm of Smith & Co., tailors, Montreal, have assigned on demand. They were once before unfortunate in 1888, when they arranged to pay 50 cents on liabilities of about $5,000.——Joseph Thibault, who began business in Montreal, in a moderate dry goods way two years ago, has assigned. He was heard of recently as seeking an extension, when he claimed a surplus of some $3,000.——L. E. Gingras, doing a suburban dry goods and grocery business in Montreal, who was lately reported insolvent, has made an offer of 20 cents, which will likely be declined.

What is to be the first cement dwelling in Saginaw, Michigan, is described by the Michigan Investor. It is that of John J. Granville, a well known contractor. Mr. Granville intends to roof the house with cement shingles. The foundation is made of cement blocks, 8 x 10 x 20 inches in size, and laid so that they make a wall 10 inches thick. These blocks are made hollow; they look like stone, and the foundation has the appearance of being constructed of stone in the usual manner. The blocks, which are to be used in the upper portion of the building, are 8 x 12 x 18 in size and make a hollow wall eight inches thick.

Closed automobiles are getting to be the vogue in Paris. The women of that city are growing tired of dusty and wet riding in the open machine and are asking for vehicles which can be covered when climatic conditions become unfavorable. The coachbuilder had to alter his pattern, and the long "chassis" now in use permits him to have entrance at the side of the auto, which makes closed coaches possible and convenient. It is said that to-day nearly all kinds of long automobiles are supplied with closed coachwork, whether for town or touring. For town, says a recent article, there can be no question that the closed vehicle, with large windows capable of being lowered, is the most sensible pattern, while for touring, in most parts of the world, its advantages are even more apparent. Speed is checked slightly, no doubt, by the additional weight, and wind pressure, but touring is a comfortable proceeding rather than a long-drawn drink of dust and flying mud. Detroit, which is the great auto-producing city of the United States, is turning out closed automobiles in different patterns.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending July 31st, 1904.

A news item from Vancouver, states that the Vancouver, Westminster and Yukon Railway line, by which the Great Northern will gain an entrance to the city, is commencing a daily service of four trains each way between Vancouver and New Westminster. The railway line across the bridge over the Fraser River at New Westminster is not completed, so passengers will have to transfer there to the Great Northern trains.

The car shops of the British Columbia Electric Railway Company in New Westminster have been destroyed by fire, together with several large cars in course of construction. The loss is estimated at over $20,000, which is said to be covered by insurance.

Mercantile Summary

The British market for Canadian pig iron may be helped by the adoption of a new style of pig iron warrant in England and Scotland. It is especially intended to facilitate business in Canadian and American pig.

A meeting of the directors of the Dominion Iron and Steel Company was held in Montreal on Thursday, last week. Reports were received from the works at Sydney, intimating that the steel rod and washing mills were in full operation.

The cruiser "Canada," which the Dominion Government is having built at Barrow-in-Furness, England, for fishery protection on the Atlantic coast, is nearly complete. She is 200 feet in length, 25 feet breadth, and 148 feet depth, with two decks.

The thorough training given by The Dominion Business College, Limited, 4 Richmond St. East, Toronto, evidently meets the requirements of the business community. This week, six young men went direct from the class room to good positions in Winnipeg, besides several others to different manufacturing and mercantile firms.

The Dominion Iron and Steel Company, have awarded the contract for the building of a complete new rail mill. The machinery is expected to be ready in about three months. The mill is designed to turn out railway rails of all sizes and descriptions, and will have, when fully completed, a capacity of 1,000 tons per day. The plant is expected to be in a position to manufacture rails by next July.

The report of the Grand Trunk Railway for the past half-year, shows gross receipts of £2,559,300. The working expenses were £1,895,600, which is equal to 70.16 per cent., and the net receipts £663,700. The net revenue charges, less credits, were £519,700, leaving a balance of £144,000. Deducting a deficiency of £19,400, this leaves a surplus of £124,600, which, added to the balance from December, makes £127,300 available for dividends.

In the face of the keenest competition from firms and companies in the U.S., an English firm has just secured an important steel contract from a Canadian company. This is an undoubted victory for the preferential tariff. Messrs. G. & W. Walker, Limited, of Donnington, Shropshire, Eng., have secured the order from the Consumers' Gas Co., of Toronto, for a steel tank, 184 feet in diameter by 33 feet deep, and a telescope gas holder, with four lifts, to be erected in the tank. The capacity of the tank will be 3,000,000 cubic feet of gas, the largest in Canada. The price is somewhere about $150,000. Great satisfaction is expressed in many quarters at the fact that what turned the scale in favor of the British firm obtaining such an important contrast, was the Canadian preferential tariff in favor of British goods.

LEATHER GOODS CO.,
LIMITED
105 King St. West., - TORONTO

Already this season, permits have been issued in Winnipeg for the construction of buildings to cost over $7,000,000. Last year the total, though then thought phenomenal, was only $5,000,000.

It is rumored in Pittsburg, that a $20,000,000 coal combine is in course of formation. The scheme is to gather in no less than twenty-eight individual mining companies. Some of these are of the utmost importance to the coal trade, with facilities for mining that have already made them powerful competitors of the Pittsburg Coal Company and the River coal interests of that company. Others are smaller, but all have modern mines, many own their own coal cars and control a good trade. The project is fostered by coal mining companies themselves. What success the scheme has met with is still purely a matter of conjecture. It is said that the present estimated annual production of the new companies amounts to 10,000,000 tons. The companies intended to be taken in are all located in what is termed the Pittsburg district, and aside from the Pittsburg Coal Co., the new concern would be the largest bituminous coal mining corporation in the country.

Mercantile Summary.

The Velvet Portland Mine, at Portland, B.C. has now started up a compressor plant.

The Western Ontario Cordage Company, Limited, of London, has been incorporated with a share capital of $300,000. Messrs. D. C. Cowan, and T. H. Purdom are among the incorporators.

The Royal Canadian Yacht Club's building in Toronto, was on Monday last destroyed by fire, which broke out during the progress of a dance. The loss is placed at $15,000

The Dominion Brass Works last week inaugurated their new factory at Port Colborne, Ontario, with a luncheon and entertainment of that town's leading citizens, after which the machinery was set in motion by the manager.

The Dominion Government has awarded the contract for the construction of a new steel tug to a Victoria, B.C., machinery concern, the price to be about $30,000. It will be 85 feet long, 17 feet beam, and 12½ feet deep in the hold. The indicated horsepower will be 280, and the speed about 11½ or 12 knots.

A man of importance in the commercial and financial affairs of St. John's, Quebec, Mr. Louis Molleur, died in that town last week. Mr. Molleur was born in L'Acadie, in 1828, and moved to St. John's, to reside there, in 1867. He was the leading spirit in the establishment of the St. John's Bank, of which he was president till last year, and he built the St. John's waterworks in 1872. He represented the County of Iberville in the Legislature of Quebec from 1867 to 1881. The deceased gentleman was a man of much energy and business capacity, and maintained his strength until late in life, for he was 76 years of age when he died.

The following is a list of patents recently secured through the agency of Messrs. Marion & Marion, patent attorneys, Montreal and Washington: 88,600, Eduard C. Carstens, Oldenburg, Germany, extension tables; 88,636, Wm. R. Bawden, Kalgoorlie, Western Australia, Clinostat, for surveying deep bore holes; 88,649, Evence Coppee, Brussels, Belgium, coke ovens; 88,657, John Glover Nicol, Worcester, Eng., gloves; 88,734, Niels G. Sorenson, Stockholm, Sweden, manufacturer of boards from round logs of wood; 88,769, Stanislas M. Barre, Winnipeg, heating and pasteurizing apparatus; 88.790,, Frederick Wm. Bursill, Marlborough, N.Z., means of securing fencing wires in standards, swingers, etc.

From Sydney, N. S., we learn of the following recent mercantile failures. James A. McLean, a grocer, writes his creditors that owing to the strike at the steel works, and prevalence of smallpox in the town, he is unable to pay in full, and proposes that his creditors shall release him on payment of 25 per cent. of their claims, amounting to about $1,500.——The assignment is reported of W. E. Barron, originally a miner, who started as a retail grocer about three years ago. A suit for some $400 instituted by a Montreal house, several weeks ago, apparently brought matters to a focus.——Max Wener, formerly a peddler in various districts of the Province of Nova Scotia, but for some little time settled in the clothing business at Sydney, is offering his creditors 30 cents on the dollar.——B. Kanter, who used to do dry goods business in the name of his wife, Sarah Kanter, but has been operating in his own name since September 1901, has had suits and judgments recorded against him of late by Montreal firms, and has now assigned.

Mercantile Summary.

The Independent Telephone Company make the offer to install a system in Brantford, Ontario. They offer to give business 'phones for $25, and residence 'phones for $15, and to give the city five free 'phones and $200 a year. The company claim to have a long-distance line from Windsor connecting all intermediate points under way.

The weekly list of business troubles among country dealers in the Province of Quebec, is as follows: H. Potvin, a farmer of St. Germain de Grantham, engaged in a grocery business about a year ago, and has already found that the way a merchant has to travel is not an easy one. He has put his affairs in the hands of an assignee, and will probably return to the plough, a poorer but wiser man.——J. A. Payette, of St. Johns, formerly a journeyman jeweller, started to keep shop on his own account two years ago on a limited capital. He is now reported insolvent.——The experience of W. C. Fyfe, of St. Faustin, in the trout-fishing and health resort district of the Laurentian Mountains, north of Montreal, has been a brief and unfortunate one. He was formerly in the real estate business in Montreal, and bought a hotel business about eighteen month ago. His premises were burned during the prevalence of the disastrous forest fires which swept that section last summer, causing him serious loss, and now he has had to assign.——H. Mercier, general dealer at Upton, is reported an absentee, and it is said his wife will make a proposition to pay them 50 cents on their claims amounting to about $4,000. Mercier began business in February, 1902, apparently with little experience, having been originally a farmer, and had resided a while in Quebec city, where he was connected with some brokerage business.——Narcisse Leclerc, long a farmer at French Village, bought a general stock house years ago, and has also been running a sort of temperance hotel, but is now reported insolvent.——L. E. Desilets, of Shawinigan Falls, recently reported failed, has made an offer of 20 cents, which has been declined, and the assets will be sold.——J. P. Desilets, of Grande Mere, another recent insolvent, offers 20 cents, which is not satisfactory to creditors, who intimate they will accept 35 cents.——J. H. Constantin, of Nominique, Ottawa County, Quebec, who was assisted by his father to buy out an established business in 1902, is reported as embarrassed. He is said to have been very careless in his payments of obligations, frequent suits having appeared against him the past few months. His liabilities are stated at $13,500.

DAILY ROMANCE.

The sweet girl pouted, as she exclaimed:

"But Horace can write the most beautiful poetry!"

Her parents patiently labored with her over the matter in point.

"Yes," they agreed, "but John can write checks."

"But Horace can draw the sweetest pen and ink sketches," she sighed.

"Yes," agreed her loving parents—"yes, but John can draw drafts."

"But Horace is such a brilliant conversationalist," she concluded despairingly.

"John's money talks," they gently replied.

Accursed age! A thrice accursed age!

The Horaces are living happy bachelors' lives and the Johns couldn't stay single if they tried. Why should Horace go thus unscathed, while John is followed by a horrible fate? Dern 'em one an' all; some men have all the luck.—New York Sun.

—That no riddle is too difficult or too absurd for the real enthusiast in such matters is proved by the following from the diary of Sir Mountstuart E. Grant Duff: "Someone told an excellent story of two men who, wishing to play a trick upon a friend famous for finding out riddles, conspired to ask him one which had, they thought, no answer. "Why is a ghost-like a muffin?" He asked for a day's time, and then gave the answer: "They are both fancy bred." And a listener mentioned the well-known riddle, "Why did Joseph's brethren put him in the pit?" with the old answer, "Because it was such a fine opening for a young man," and a better new one, "Because he had a coat of many colors, and could not be admitted into the dress circle."

◆

LITIGATION.

It is said that in no other country in the world are there so many damage suits brought as there are in the United States. Indeed, the civil suits brought in that country are declared to exceed two millions in number. This seems a great number, until we learn that it is exceeded relatively by both Italy and Germany, which are litigation countries. The New York Sun says that the number of lawsuits brought in a year in France is 800,000. In Italy it is 1,400,000, and in Germany it is 3,000,000, a very much larger number, both actually and relatively, than the number in the United States.

Civil actions of all kinds begun last year in Great Britain and Ireland numbered about 1,500,000, or one for nearly every tenth male or female adult in the United Kingdom. In 1902, there was an increase of nearly 62,000 over the previous year, and 472,041 actions were heard out of 1,410,484 that were begun. Of the number of appeal cases heard, one in every three was successful, against one in four of five years ago. The total cost of British litigation in 1903 was placed at $7,809,875.

The best measure of litigation is usually the number of laws or statutes, and not, contrary to general belief, the number of lawyers. In this country it is found generally to be the case that the largest amount of litigation does not originate among Americans, but among newcomers here, who appeal to the courts for the adjudication of matters of trifling accounts. In the United States, if the plaintiffs were different in every case, one in eight of the voting population could be said to be a litigant. As it is, the actual number of different litigants is not in excess of 800,000—400,000 plaintiffs, and 400,000 defendants—which is one per cent. of the total population of the country, which is now about 80,000,000.

ABOUT AUTOMOBILES.

It was after much deliberation and thought that I decided to invest in an automobile, relates Simon Ford, in Everybody's Magazine: The first machine I looked at was small, simple, and inexpensive. It had but one cylinder. The salesman said that was an advantage. He said a four-cylinder engine would get out of order four times as often. This machine had a handle on the side like a barrel-organ. He showed me how to make it go fast and slow, and stop and start, and all while the machine stood in the store. A child of ten years could run it, he assured me. "Now, if you want to get out of a tight place," he said, "get a sudden move on—so to speak—you just touch this lever, called the accelerator."

He touched it, and with that something went wrong, and the handle I have alluded to fled around and smote me violently in the abdomen. When I came to I told him a child of ten might run the machine, but the child would have to have a very strong stomach.

Every auto I thought of buying, all my friends assured me was no good, and in the light of subsequent exper-

School Debentures
FOR SALE.

The Town of Rainy River is offering for sale $25,000 school debentures, bearing 5 per cent. interest, repayable in thirty equal annual payments of $1,626.29 each, the first dated July 19, 1904.

The present bonded debt of the town is $1,500; the assessment for 1904 is $386.515; the population is 2,000. For any further particulars apply to

A. E. MARK, Sec.-Treas.
Rainy River, Aug. 18, 1904.

Debentures For Sale.

The undersigned is prepared to receive offers for the purchase of debentures of "The Southern Judicial District" in the Province of Manitoba to the amount of $40,000, and issued under the provisions of Chapter 55, 3-4 Edward VII., intituled "An Act to provide for the erection of Judicial Buildings for the Southern Judicial District and Equipping the same," such debentures to be in denominations of not less than $500 each, payable on the FIRST DAY OF JANUARY, A.D., 1940, and bearing interest at a rate not exceeding four per centum per annum, payable half-yearly on the FIRST DAY OF JULY AND JANUARY; said debentures both as to principal and interest to be made payable at any place in Great Britain or Canada, either in Sterling money or in the currency of the Dominion of Canada.

All offers must be addressed to the undersigned and marked "Tender for Southern Judicial District Debentures" and must reach his office NOT LATER THAN SATURDAY, THE TENTH DAY OF SEPTEMBER, A.D., 1904.

Delivery of debentures to be made in Winnipeg.

iences I guess they were right. Finally, on my own responsibility, I bought that lovely lobster-pink creation in which I may be seen most any pleasant day now, running merrily through the park or street, and, anon, sitting reposefully while my chauffeur, assisted by the populace, explores the vitals of the machine, looking for trouble. I remember when I was a boy I saw and admired at Barnum's museum a working model of an engine, all made of glass, but I never dreamed I should own one.

I am getting rather proud of my machine. I think it holds the record for having travelled fewer miles in a given time than any other yet devised. My engine will break when standing motionless on the barn-floor, simply through the power of gravitation. It is operated by a skillful mechanic, and costs me as much per month as it would to run a battleship. But it has one merit. I never wander so far from my own fireside but that I can easily walk back. I have worn out six sets of hinges in the hood, peering at the engine to see what is busted.

I used to get up and help the chauffeur to look, until one day, when we were both hidden behind the hood, a sneak carried off my fur robes. Now I just sit back and listen to the jeers of the populace, and sigh to think of the happy times gone by, when I used to travel on the street-cars and get to my destination on the same day.

◆

BUSINESS EDUCATION AWAY FROM HOME.

It may at first sight appear strange that Commercial Intelligence, whose whole object is to encourage business at home, should publish a series of articles on "How to Start Business Abroad," but a moment's reflection will show that in many cases the starting of branch businesses abroad by British firms is the very best means of increasing British trade at home. There can be no doubt that the establishment of American industries in England, has in many cases familiarized the British people with American methods in a way that could not have been done by any other means, and has led directly or indirectly to encouragement of export business for that industry in the States. Moreover, again and again, we read of British firms being compelled to establish branch businesses in countries from which their goods are shut out by high tariffs. Then, too, there are large numbers of young Englishmen who go abroad every year with a view to building up British goods abroad. Naturally enough they often make serious mistakes through assuming that foreign customs and laws are similar to those in England, and it is with a view to drawing their attention to some of the pitfalls that lie in their path, and putting them on their guard as to other difficulties that may arise, that we have invited our correspondents abroad to write us a series of short articles on "How to Start Business Abroad."—Commercial Intelligence.

THE FIRE AT BROWN BROTHERS WAREHOUSE.

There are many, all over Canada, who will sympathize with the Brown Bros. Company in the second disaster which overtook them, in having their temporary warehouse (the Queen City Curling Rink) burned on Sunday night last. They issued a circular on Tuesday to their friends, and the trade, in which, while regretting the loss of such a unique warehouse, so convenient and completely stocked with new up-to-date goods, they are "glad that our factory is still intact, which enables us to fill all orders for manufactured goods as usual. Our leather goods works are also undisturbed and in full working order." They meanwhile hope for the patience and co-operation of their friends. They had insurance as under: On stock: North British and Mercantile, $10,000; Insurance Company of North America, $5,000, and $5,000 each in the Caledonian, Norwich Union, Liverpool and London and Globe, Union Society, Northern, Commercial Union, Alliance, British America, Royal—making $60,000 in all.

The rink was insured for $8,000 in the Sun, $2,100 in the Home, of New York, $3,000 in the Phœnix of England, and $4,000 in the Commercial Union.

"WE WILL BOND YOU."

Corporate bonds are more reliable and in every way more desirable.
Only where it is indicated that men possess integrity of character can they obtain a bond in a surety company.
Regard your name as a bondsman as an encumbrance on your property.
Personal sureties are subjected to questions as to the worth of the bond filed which they would rather not have made public.
Once a corporate surety bond has been used, no further use for personal surety can be found.
Rates of premium on surety bonds are always moderate.
A surety company is required by law to carry reserve against its risks and is possessed of large resources.
The UNITED STATES FIDELITY AND GUARANTEE COMPANY executes bonds covering all positions and trusts.
Existence of surety companies makes it unnecessary for the employe to ask friends to become surety for his integrity.

Surety companies protect the home and family.
Unlike personal surety, the bonds issued by surety companies can always be collected.
Resolve to never have your name used as a bondsman.
Embarrassing positions may be escaped by not becoming surety on a bond nor asking others to do so.
This Company does not surround the person bonded with annoying restrictions.
You cannot afford to incur obligations by asking friends to become surety for you.

Head Office for Canada, 6 Colborne Street, Toronto.
A. E. KIRKPATRICK, Manager.

MONTREAL MARKETS.

August 24th, 1904.

Ashes.—The market is a quiet one, with a comparatively light demand for pots, which shade to easiness at $5.75 to $5.80 for firsts: seconds, about $5.30. Pearls are being asked for from England, where there is apparently a new use for these goods, gin distillers using them in some of their processes.

Dairy Products.—From this port there were shipped last week to Britain 84,647 boxes of cheese, some 14,000 boxes less than for the previous week, and 12,000 less than the same week of 1903. Butter shipments continue above the average, 32,398 packages having gone last week to London, Liverpool, Manchester, Bristol and Glasgow. For the corresponding week a year ago, shipments were 21.371 packages, and the gain for the season thus far is about 80,500 packages. The butter market is about on the level last noted: fancy creamery at 19 to 19¼c.; fine to finest, 18½ to 19c.; dairy makes, 14 to 14½. In cheese, buyers and sellers do not seem to harmonize in their views, and business is consequently more or less restricted. Finest Ontario makes are quoted at 8½ to 8⅝c.; Townships, 8¼ to 8⅜c.; Quebecs, 8 to 8¼c. per pound.

Dry Goods.—There is not a great deal of change to be noted in this line as yet, and business still rules on the quiet side, but travellers are getting on their routes again for the sorting trip, also carrying some spring samples, and city retail trade is showing signs of picking up, as people are beginning to get back from the country, and the children have to be got ready for school, etc. Collections may be called just about fair, and failures are a little more frequent during the past few weeks. though there is really nothing very notable in this way. The firmness in woolens is steadily held, and there have been some further advances in price of certain lines of domestic knitted goods.

Flour and Feed.—The market continues firm at late advances, though wheat is weaker. Patent flours are quoted at $5.50; strong bakers, $5.20; winter wheat patents, $5.25 to $5.35. Stocks of mill feed are light, and bran is quoted at from $16.50 to $18; shorts, $19 to $20.

Groceries.—Things are still moving rather slowly in this line, but remittances are said to be coming in fairly well from the retail trade. As regards values, nothing in the way of an important change is noted. Sugars show no inclination to weaken on late advances, and the local refiners report a fairly sustained demand from jobbers. In teas, importers say the enquiry is still light, with no stiffening tendency in the markets abroad. Of sultana raisins a short crop is expected, and high prices prevail. 24s. is quoted for bright samples. Latest cables from Patras quote fine Filiatras at 14s. 6d. to 15s. Of figs, both Smyrnas and Comadres, a good yield is reported, also of French prunes and Valencia raisins, but it is figured the supply of Malagas may be below an average.

Hides.—Tanners are reported as making fairly liberal purchases of hides, prices of which are steady, dealers buying on the basis of 9c. per pound for No. I, and asking half a cent advance. Lambskins are steady at 60c. each. Nothing doing now in calfskins.

Metals and Hardware.—There are some signs of the demand for metals picking up a little, but buyers as a rule seem disposed to place their orders conservatively, the tendency in iron values being towards easiness. Very little is being done in pig iron, and quotations for best domestic and Summerlee rule about $18.50 to $19. Bars are fairly steady at $1.70 to $1.75. Barb wire and galvanized wire are reduced 25c. a hundred, and rope is lower by half a cent a lb. In tin plates, Canada's galvanized sheets, etc., there have been no recent changes. Lead inclines to firmness at $3.25; copper, 13½c.; tin, 30 to 30½c.; spelter, $5.75 per hundred.

Oils, Paints and Glass.—Travellers are beginning to start out again, but wholesale trade is still quiet. Turpentine has advanced, and is to-day quoted at 83¼c. in single barrels. Linseed oil easy at 43 to 44c. for raw, and 46 to 47c. for boiled. Fish oils dull at prices quoted last week. Benzine and gasoline are a cent easier. White leads continue to be sold at cut rates, chemically pure at $4.25 to $4.50, and other grades at corresponding figures. Putty is easier at $1.40 in bulk; in bladders, $1.65 to $1.75. Glass easy at $3 to $3.10 for first break. Shellac, $2.70 for pure white, $2.60 for orange.

What School For Your Boy?

An experienced teacher wishes to take into his family two or three boys that need special attention; plan and supervise their studies, and give them all the private help and teaching necessary in preparing their lessons. Location—a town with first-class public and high schools, less than seventy-five miles from Toronto.

For further information, address

HIGH SCHOOL TEACHER,
Monetary Times Office, Toronto.

TORONTO MARKETS.

Toronto, Aug. 25, 1904.

Chemicals, Drugs, etc.—A fair trade is passing in opium, which keeps now seemingly at a fair figure. Quinine is now pretty firm. In general business throughout the country a nominally good movement is reported, considering that this is the holiday season. From New York is reported a steady business with no features worthy of special attention. The British export trade is described in recent advices as poor, while the home requirements for chemicals are of a hand-to-mouth order.

Dry Goods.—The strongest feature in the dry goods situation at present is wool, the cost of which raw material is rapidly working up the prices of blankets, flannels, and other woolen materials to a high pitch. Not only this, but it is very difficult in such goods to obtain satisfactory delivery. Cotton goods are easy quite markedly. Trade for the present is fair, but it is

Canadian National Exhibition,

1904. *TORONTO, Ont.* *1904.*

August 29th to September 10th.

Largest and finest exhibits of Canadian manufactures, agricultural products, live stock, etc., etc., ever shown. New buildings, improved facilities and greater variety of attractions than ever.

"BLACK WATCH BAND"

The band of the "Black Watch" (the famous 42nd Royal Highlanders) will attend the Exhibition, by permission of his Gracious Majesty the King and officers of the Regiment, and will play three concerts daily throughout its entire course.

THE RELIEF OF LUCKNOW

The grandest pyro-military display ever seen in Canada will be presented before the Grand Stand each evening, with hundreds of performers, brilliant costumes, gorgeous pyrotechnic setting, and assisted by the pipers of the "Black Watch."

SPECIAL ATTRACTIONS

"**Dare-Devil Schreyer**" in his leap from a bicycle 108 feet into a tank of water; **The Bickett Family**, world-famous aerial acrobats; **Winschermann's Wonderful Trained Bears**; **Adjie's Troupe of Lions**,—the most remarkable group of trained animals in the world, and many other acts of equal merit.

Special Railway Rates.—Ask your Station Agent for Particulars.

Remember the Dates, AUGUST 29th to SEPTEMBER 10th.

W. K. McNAUGHT, President. J. O. ORR, Secretary and Manager.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

Two Interesting Incidents...

Incident No. 1.

A manufacturing firm in this city had found it necessary to instal a fan system for its boilers at considerable cost. A few weeks ago one of our machines was put in and the efficiency of the boilers was so much increased as to make the fans unnecessary and they were duly removed.

Incident No. 2.

A lady who lived in the rear of a factory, also in this city, had in her yard a barrel for rain water. For a long time it had been impossible to use the water due to the soot and cinders which came from the factory smoke stack.

Recently, however, a Royal Automatic Smoke Preventer was installed in that establishment and the soot and cinders from the smoke stack are things of the past. So much so that the water in that barrel is being used regularly.

If you are having trouble with smoke or inefficiency on the part of your boilers it will pay you to write us.

Royal Automatic Smoke Preventer and Fuel Saver Company, ROOM "Z," Confederation Life Bldg., TORONTO, Ont.

expected to increase next week, when so many out-of-town merchants will be visiting Toronto for the fall millinery and dress goods openings, and the Exhibition.

Flour and Grain.—A very firm market exists for flour, and local buyers quote for export ninety per cent. patents at $4.25, and a little higher for special, choice grade Manitoba flour is also quite firm. Bran and shorts, too, have an upward tendency. No change has been made in oatmeal.

Fruits and Vegetables.—Liberal supplies of fruit have come forward during the past week, but prices have kept fairly good. Pears and plums have come forward in fair abundance and have sold well. California fruits have become comparatively scarce. We quote prices as follows: raspberries, 8c. to 10c.; lawton berries, 6c. to 8c.; black currants, large basket, 75c. to $1; huckleberries, basket, 75c. to $1.25; peaches, basket, 20c. to 40c.; apples, basket, 10c. to 30c.; pears, 25c. to 40c.; plums, 30c. to 60c.; Canadian cantaloupes, 12 quart basket, 30c. to 45c.; oranges, Cal., Vals., $4.50 to $4.60; lemons, Messinas, $3 to $3.50; do Verdillis, $4; do St. Nichols, $4; bananas, 1sts, bunch, $1.25; do 8's bunch 75c. to $1; do red, $1.50 to $2.25; pineapples, Florida, case, $4 to $4.30; watermelons, each, 20c. to 25c.; cantaloupes, basket, 50c. to 75c.; California peaches, $1 to $1.50; do plums, 75c. to $1; do pears, $1.25 to $1.75; tomatoes, 20c. to 30c. cucumbers, basket, 10c. to 15c.; beans; basket, 20c to 25c. green peppers, basket, 20c. to 25c.; new potatoes, bushel, 50c. to 55c.; egg plant, basket, 35c. to 50c.; Canadian green corn, dozen, 8c. to 11c.; Kalamazoo celery, dozen, 45c. Canadian celery, basket, 40c. to 50c.; do pink, 50c. to 65.; vegetable marrow, dozen, 40c.

Groceries.—No special feature presents itself for comment this week in groceries. Sugars continue firm at the recent advance. Molasses, too, are strong. Canned salmon are strong owing to reports from the Pacific coast. Dried fruits are in steady demand, but there is nothing new to report.

Hardware.—A seasonable trade is being done, though it is perhaps not quite so good as it would be were the crops already safely harvested. Trouble in the building trade as well is another thing which prevents any great augmentation of activity. The movement in metals is average, and a somewhat better feeling seems to prevail in pig iron. Scotch advices speak of a more active market with Cleveland warrants steadily advancing. Local consumers have bought more freely than for some time back.

FOR LOOSE LEAF LEDGERS AND LOOSE LEAF SHEETS for any binder—

The Planet Flat-Opening Blank Book-making House, Chatham, Ont. will furnish you with prices.

6

The best machinery obtainable has been purchased for this class of work, and estimates are promptly furnished upon application.

$4,500 Required

On Security of Manufacturing Plant, Value $15,000. Reduced $200 every three months (if necessary). Operated twenty-five years, recommended and valued by manufacturer of absolute integrity. Particulars apply R. F. SEGSWORTH, Barrister, 103 Bay St., Toronto.

DELAYS ARE DANGEROUS.

The Accident and Sickness Policies

CANADIAN CASUALTY and Boiler INSURANCE CO.

22-24 Adelaide St. East, TORONTO.

are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Full Information Freely Given.

A. G. C. DINNICK, Managing Director

Live Stock.—Considerably better tone prevailed in the cattle market this week, and everything of fairly good quality sold readily. Prices, however, remained very much as before, though for exporters they went a shade higher. The highest value attained was $5. Butchers' cattle of prime quality were in good demand. Offerings of feeders and stockers were on the small side, and prices kept steady. Lambs declined 20c. as they, as well as sheep, were in larger supply than the demand warranted. Milch cows were scarce, the prices offered varying from $25 to $50.

Provisions.—There is an improving demand for choice butter, especially for creamery. Medium and poor grades, however, are still coming in too freely. Cheese is somewhat duller. Eggs are not coming in at all plentifully, and prices are quite firm. Hops are dull, and buyers are waiting to see the result of this season's crop operations. There is a good movement in smoked meats. Long clear bacon and lard are particularly firm. Poultry remains as before, with spring chickens quoted at 16c. and fowls at 11c.

Wool.—Dullness prevails for the present in the wool market, the divergence of view between buyers and sellers being too wide to bridge yet. Offerings of fleece are small, for pulled wools there is a good demand from the domestic mills.

◆

TORONTO STOCK TRANSACTIONS.

A stray feature on the local stock exchange this week was Nova Scotia Steel and Coal, which made several points advance on reports from the coal fields.

RAILWAY ACCIDENTS.

The total number of casualties on the railroads of the United States during the year ending June 30th, 1903, was 86,393, of which 9,840 represented the number of persons killed and 76,553 the number injured. Casualties occurred among three general classes of railway employees, as follows: Trainmen, 2,070 killed and 25,676 injured; switch tenders, crossing tenders and watchmen, 283 killed, 2,352 injured; other employees, 1,253 killed, 32,453 injured. The casualties to employees coupling and uncoupling cars, were: Employees killed, 281; injured, 3,551. For the year 1902 the corresponding figures were: Killed, 167; injured, 2,864. The casualties connected with coupling and uncoupling cars are assigned as follows: Trainmen killed, 211; injured, 3,023; switch tenders, crossing tenders and watchmen killed, 57; injured, 416; other employees killed, 13; injured, 112.

The number of passengers killed in the course of the year 1903, was 355, and the number injured 8,231. In the previous year, 354 passengers were killed and 6,683 injured. There were 173 passengers killed and 4,584 injured because of collisions and derailments. The total number of persons, other than employees and passengers, killed was 5,879; injured, 7,841. These figures include the casualties to persons classed as trespassing, of whom 5,000 were killed and 5,079 were injured. The total number of casualties to persons other than employees from being struck by trains, locomotives or cars, were 4,534 killed and 4,029 injured. The casualties of this class were as follows: At highway crossings, passengers killed, 3; injured, 7; other persons killed, 895; injured, 1,474; at stations, passengers killed, 24; injured, 108; other persons killed, 390; injured, 501; at other points along the track, passengers killed, 8; injured, 14; other persons killed, 3,214; injured, 1,925. The ratios of casualties indicate that one employee in every 364 was killed, and one employee in every 22 was injured. With regard to trainmen—that is, enginemen, firemen, conductors and other trainmen—it appears that 1 trainman was killed for every 123 employed, and 1 was injured for every 10 employed.

One passenger was killed for every 1,957,441 carried, and 1 injured for every 84,424 carried. With respect to the number of miles travelled, however, the figures show that 58,917,645 passenger-miles were accomplished for each passenger killed and 2,541,096 passenger-miles for each passenger injured.

◆

THE REAL SUFFERERS FROM FIRE.

In a recent address read before the Insurance and Actuarial Society of Glasgow, Mr. D. L. Laidlaw discussed the growing fire hazard in central city districts. This is a question of the greatest importance to fire insurance offices, but—what is not sufficiently recognized by the public at large—it is eventually fully as important to the mercantile community. It is obvious that a continued growth in the losses accruing from fire must mean ultimately a corresponding increase in the premiums payable by the insuring public to cover the extra waste.

The public, as Mr. Laidlaw acutely points out, are constantly forgetting that every fire involves a permanent and absolute loss of national capital. The annual fire waste in Great Britain is upwards of £5,000,000 sterling, and the amount, particularly in city districts, appears to be steadily growing. Not only is this large sum irretrievably lost every year to the country, but owing to a corresponding impairment in the taxable value of property, the burden of taxation is thereby proportionately increased to everyone. The loss is usually so well distributed by the existing system of insurance that its incidence is not often seriously felt. There is, however, a distinct danger that the growing fire hazard in congested city districts may sooner or later involve merchants in the payment of such an increase of premium as may hamper the requirements of commerce. It would be impossible to carry on commercial undertakings on present lines without the protection of insurance, and in the event of the losses continuing to grow in magnitude, or of districts being so closely built and connected as to form one fire risk, or to be in danger of annihilation by the ravages of a single fire, it might become impossible to obtain adequate insurance in these districts even at the most tempting rates of premium.

It is, therefore, contends this writer, of vital importance to owners of property, especially in the central districts of large cities, that proper means be adopted to reduce as far as possible the risk of conflagration. To the fire offices also it is no doubt equally important, but the stronger companies—possessed of adequate reserves, and conducting their business within prudent limits—have hitherto been able, even after the most serious losses, to protect themselves by a readjustment of their premiums. Fire losses generally, are, therefore, in reality borne by the community, the insurance offices being merely the medium by which the loss is distributed.

◆

The Drummond Bleaching and Cotton Company, Montreal, capital $150,000, has been incorporated under Dominion charter. Senator Mitchell, of Drummondville, and J. W. Woods, of Ottawa, are among those mainly interested.

The Montreal Woolen Mills do not seem to have derived so much benefit from the late increase of tariff in favor of woolen goods as was anticipated by their friends. The management announce that they have closed down the plant for this week and will continue to do so every alternate week for an indefinite time. They attribute the cause to lack of orders, owing to the British preference.

Apropos of what is said in our Halifax correspondent's letter about the probable successor to Mr. Harrington as collector of customs at that city, we observe a telegram to the Toronto Globe dated 24th August, which says that Mr. Archibald S. Mitchell, of G. P. Mitchell & Sons, Halifax, one of the leading West India firms of the Maritime Provinces, will be appointed collector of customs at Halifax. Mr. Mitchell is a brother of George Mitchell, M. P. P. for Halifax, and is one of the most competent business men in the city.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

THE WESTERN CROPS.

Our Winnipeg despatch of Thursday noon indicates that opinion at that point as to the crop is not only not of an alarmist character, but is calmly confident of a good crop. Our correspondent says: "The weather has been cool throughout the West during the past week. There have been light frosts, but not enough to damage crops in the least. The presence of rust is noticeable in some localities, but damage from this cause has been very much exaggerated. The majority of points reporting its appearance estimate damage from that cause at five to ten per cent. Latest reports indicate that wheat cutting is half over, and that threshing will start in a few days."

THE TORONTO EXHIBITION.

The Toronto Industrial Fair of 1904, which is now dignified by the title of Canada's National Exhibition, is not undeserving of even this pretentious name. For it assuredly gives, in buildings and by means of arrangements whose equal was never reached in Canada before, a succinct view of most of the natural and artificial products of the country under conditions which are satisfying alike to exhibitor and spectator. In his address at the opening, His Honor the Lieutenant-Governor of Ontario very happily summarized the features of this Fair. He expressed the opinion, and there are many who agree with him, that "from the nature of the exhibits, the extent of them, the multiplicity of them, the present Exhibition will eclipse everything which has been known in this country." Its predecessors have been showing the growth of Canada year by year, and one may now say that it reflects the creditable position which the Dominion has attained in various fields of productive activity.

While the Fair must always possess in a marked degree interest for agriculturists and admirers of domestic animals, seeing that we are primarily an agricultural people, it is impossible not to recognize, and to warmly welcome, the strides that the country is making in mining and manufactures. Visits to Machinery Hall, the Manufacturers' Building, and the Process Building of to-day, to say nothing of the Dairy Auditorium, the Stove Building and that representing Transportation, compel admiration of the industrial advance shown, and inspire hope for a vastly greater future growth in varied handiwork at furnace and forge, lathe and loom. The note of progress has been caught by individual exhibitors, who signalize their cheerful accord with the march of improvement by greater efforts at worthy display of their wares in surroundings that manifest the growth of an aesthetic sense. Witness the many tasteful booths and temples that shelter the exhibits, the greater care in arrangement, the greater regard for harmony of color. Mention ought to be made of the remarkable array of musical instruments, such as pianos and organs of Canadian production. These are a revelation to the foreign visitor in their beauty and variety, while in quality and tone the instruments deserve high praise.

A merited encomium was pronounced by His Honor upon the exhibit in the Art Gallery. It is in every way satisfying, and marks in a gratifying manner the improvement in Canadian art. The crude, the tawdry, and the pretentious daubs which used to cumber the walls of the Art Room are to-day noticeably absent. A selection of paintings has been made, the work of Canadian artists, which no one need be ashamed to take visitors to see. Furthermore, the loan collection is a welcome and happy feature, the effect of which in gratifying the sense of beauty and stimulating taste is worth all the intelligent pains taken by the management to secure it

◆

ONTARIO MINERAL PRODUCTION.

The aggregate value of the mineral production of the Canadian Province of Ontario for 1903 was $12,870,593, a decrease compared with the previous year of about 4 per cent. This decrease was altogether in metals, the non-metallic minerals showing a decided gain over 1902. Iron and steel were the principal losers, largely owing to the cessation of operations at the Soo and at the Helen iron mine. There was also some diminution in the yield of precious metals. In two items, however, there is shown a considerable increase in production, namely in nickel and in copper, which, owing to the better facilities, both in regard to mining and treatment at Sudbury, established a record. Among non-metallic minerals, petroleum shows a noteworthy advance in production, though only in value, for the yield of oil was smaller. Lime, salt, stone and brick improved their comparative position both in prices and output. Portland cement is another article which made a long stride forward. Corundum and mica also made gains.

We are told in the report of the Bureau of Mines that prospecting, particularly for iron ores, was active during the exploring season of 1903. Much work of this nature was done on the various northern iron ranges. The extension of railroad facilities into the Temagami district is likely, it may be remarked, to lead to a good deal of systematic testing of some of the large outcroppings of banded ore in that region as soon as the necessary appliances can be put into operation there. The following table will give a summary of the mineral production of 1903 in comparison with the two previous years. The total of 1900 was $9,298,624, and of 1899 it was $8,416,673.

Ontario Mineral Production, 1901 to 1903.

Total production	$11,831,086	$13,391,634	$12,870,593

It will be noted that the output of gold shows a steady decrease, and the causes for this as attributed by the compiler of this report, are worth bearing in mind. As a rule, the gold-bearing ores of Ontario seem to be low-grade in character, and, to yield a profit, must be worked on a considerable scale by concerns with sufficient capital to be able to spend large sums in thorough development work. In the past, mining companies have often, in their haste to obtain large returns, spent too large a proportion of their funds in above-ground works, thus exhausting their capital before the existence of payable ore bodies has been fully proven. Hence, discouragements and a bad reputation for gold mining. Other causes contributing to failure have been want of judgment, and even in some cases want of honesty on the part of promoters and directors, as well as a lack of competent management. However, the conclusion is arrived at that the free-milling ores of Ontario will yet be worked with a profit when the operations are superintended by men of skill and good training.

◆

FALL MILLINERY OPENINGS.

There was just as large a crowd of buyers this week in Toronto as usual for the fall millinery openings, which began on Monday, and, so far as could be judged from an outside view, trade has been exceptionally heavy. In Montreal, there were a great many milliners at the openings from near-by points and the city; many dry goods buyers, too, from places more distant, and a good trade was done.

No particular form of head-gear can be picked upon as representing the style for the coming season; there are too many in evidence to warrant such a course. One model worthy of mention which may be said to represent a good type was a black picture hat of meline, with chenille facing around the upper brim, while around the under brim and outer edge was a flange of black chiffon, with black lace falling gently over the brim. On the side were foxtail feathers, and from the back drooped a long lace scarf, caught here and there with cabochons, the tout ensemble presenting a model of elegant simplicity. Another much-admired design was a toque of shirred and tucked velvet in three shades of green, trimmed with applique and bird-of-paradise osprey, with steel and gun-metal ornaments.

A prominent feature in hat garniture this season will be ribbon, taffeta, satin mousseline, ottoman and moire, the widths 40, 60 and 80 being preferred. Velvet ribbons will be much worn, the colors being black in all widths and other shades in Nos. 1 and 2. Other popular materials will be peau de soie and merveilleux silk, feather plush, pressed velvets, plain silk, and chiffon and cache velvet. Chenille is likely to be a favorite in cords, braids and bandeaux, while beads and large buttons also will be used. The range of colors looks as if it will be almost unlimited. Of the new shades, perhaps tangerine is the most striking. Cache de roche, another favorite, is a species of burnt orange, which combines very prettily with brown. Emerald, reseda, and myrtle also promise to be much used, as also fawn. All materials will be much shirred and tucked.

Birds, wings, and military pompons made of coqué feathers, breast effects, ostrich feathers, including the new foxtail variety, and birds of paradise will be considered stylish. Ornaments of all kinds will be strictly "in it." From all this it may be inferred that a tendency to dressiness, to startling abundance and variety in headgear and trimming, will be features of the autumn millinery of 1904.

HIGHER DUTY STILL THE CRY.

For some time we thought, in view of the old establishment and perfection of the competition which the Canadian woolen industry had to meet, that the tariff on several lines of woolen goods was not sufficiently high. When, therefore, Mr. Fielding in his late budget announced its revision and an increase of the duty to a minimum of thirty per cent., even under the preference, we were inclined to rejoice and to congratulate the woolen manufacturers on the finding of this easy way out of their troubles. But, alas! that way is apparently yet unfound. Still they cry for more tariff, without which, they claim, they cannot live. At least some of them do, and two have recently closed down, giving lack of sufficient protection as their reason. But there are others—and this is a point which causes the most sympathetic to have qualms of doubt as to the strict genuineness of the complaints—which seem not only to bear without flinching the terrible burden under which the industry in Canada staggers, but to prosper and to pay dividends. One prominent dry goods man in Montreal, who is also a manufacturer, has gone so far as to suggest that the trouble may be in unwise management, manifested in the production of lower grades, or in not sufficient specialization, or in out-of-date machinery.

At any rate, many people belonging to the ordinary consuming classes are murmuring words to the effect that thirty dollars on the hundred is very near the limit to the amount they should be called upon to pay for the luxury of setting a home industry upon what seems to be at the best but stumbling feet. Before consenting to a further advance in tariff duties, which, for all they know, may have to go on *ad infinitum*, they would like to see the complaining woolen manufacturers try a little of the alternative, and possibly more arduous policy. In fact, what they want is to see a little more strenuous effort to overcome obstacles and a little less dependence upon legislative favors.

SOME FIRE INSURANCE CONSIDERATIONS.

Perhaps the most prolific causes of extensive fires in this country are: First, the existence of blocks of buildings with openings from one into the other; second, the openings inside of any given building from one floor to another; and third, window openings in buildings near one another. Experience has shown that more fires spread from these three causes than from any others. It is quite reasonable, therefore, to find the fire underwriters of Canada making special efforts to lessen their losses by curing these and other defects in building. Openings for well-holes, staircases, elevators, dumb-waiters, chutes, are found in case of fire to be vents which invite and extend the spread of fire. Hence, standard construction contemplates the placing of stairways, elevators, etc., in brick, stone or steel-clad enclosures, which should be outside the main walls of a building, but may be constructed inside if the other is impossible.

What we have said leads us naturally to speak of the system of special rating of buildings which is in a short time to be applied in Canadian cities, notably Montreal and Toronto. The principle upon which this special rating is to be done is this: A standard building is supposed, three stories or forty feet high, and a basis rate is charged upon it. If the building shows defects in structure or arrangement, those defects are charged for in the premium; if the building is higher than standard the extra height is charged for; if it is in a narrow street, this is counted a defect; if electric and telephone wires encumber the street, this also is a blemish.
